

Associate Degree

Associate of Science in Accounting (ASA)

• CIP 520305 • 60 credits

Program Description

The Associate of Science in Accounting (ASA) is a 60-credit program that is designed to provide students with a foundation of academic study in business achieved within a reasonable period. Students who plan to continue their education at the bachelor level should be well-prepared, having completed standard General Education courses as well as key core 100- and 200-level accounting and business courses.

This degree employs a foundational theory and practice model, which allows students to acquire knowledge of the overarching principles of accounting while immediately applying the skills learned and demonstrating the abilities of an entry-level accountant. For those students who wish to gain a deeper knowledge of the accounting profession, the AS in Accounting also serves as an interim credential en route to the BS in Accounting degree. This program will offer a dynamic approach to understanding the depth and breadth of the first level of the accounting profession.

Program Outcomes

- Complete the accounting cycle using assumptions, constraints, and principles.
- Prepare the four essential financial statements.
- Construct financial statements and tax returns using industry software programs.
- Identify ethical issues related to accounting decisions.

Instructional Delivery

The ASA is an online program. Courses are eight weeks in length, and there are six sessions each year. The ASA is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive online learning format.

Given that CCG students are primarily working adults, the average program completion is three (3) years, four (4) months (part-time; 20 eight-week sessions), or one (1) year, four (4) months (full-time; 10 eight-week sessions).

Program chair: Matthew Fowler, M.S., Ph.D.
