

Bachelor of science

Bachelor of Science in Accounting (BSA)

• CIP 520305 • 120 credits

Program Description

The Bachelor of Science in Accounting (BSA) is a 120-credit program that is designed to provide students with a strong foundation of academic study in accounting achieved within a reasonable period of time. In addition to the skills and knowledge gained in Accounting, students will acquire a solid background across a wide range of functional business areas including finance, management, ethics, marketing, and law.

Students enrolled in the BS in Accounting will be exposed to key theoretical constructs and immersed in hands-on application of those theories in practice. In this program, a particular emphasis is placed on the acquisition of highly-targeted skills required by accounting professionals in support of career goals ranging from entering the public accounting world, to sitting for the requisite exams to earn highly regarded professional designations such as the Certified Public Accountant (CPA) or Certified Management Accountant (CMA), to focusing on financial management and the exam. The BSA offers a dynamic approach to understanding the depth and breadth of all areas of the accounting profession.

Concentrations: The degree has been designed with three 3-course concentrations aligned with the skills conducive to preparing students for the CPA and CMA exams.

- The Public Accounting Concentration offers students knowledge in Not-For-Profit, Advanced Auditing, including Internal Auditing and Governmental Auditing, and advanced topics in Management Accounting found on the CPA Exam®.
- Finance Concentration
- The Management Accounting Concentration offers students advanced knowledge in Strategic Management, Compensation and Benefits, and Advanced Cost Accounting, all of which are found on the CMA Exam®.

Each of these concentrations enables students to obtain an understanding of exam-specific content while simultaneously offering valuable knowledge which can be used regardless of the area or the industry in which the student enters.

Program Outcomes

- Apply advanced principles and rules to financial statement data to produce a complete set of company financial statements.
- Conduct a mock audit using Generally Accepted Auditing Standards (GAAS) and prepare an independent auditor's report.
- Use decision-support tools to evaluate, process, and solve organizational problems.
- Analyze global business transactions and apply appropriate accounting theory.

Instructional Delivery

The BSA is an online program. Courses are eight weeks in length, and there are six sessions per year. The BSA is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive learning format.

Given that CCG students are primarily working adults, the average program completion is five (5) years or thirty (30) eight-week sessions.

BSA General Education 42 credits

English 6
 ENG 101W English Composition I
 ENG 201W English Composition II

Critical Thinking and Literacy 6
