About This Catalog

This catalog presents current information about Cambridge College's academic programs, courses, resources, policies and procedures for the 2020-2021 academic year (September 1, 2020-August 31, 2021). This catalog has been compiled from the most accurate information available as of the date of publication.

By enrolling in the College, each student agrees to follow all College policies, practices and procedures.

The College reserves the right to change its programs, policies and practices at any time and without notice, in accordance with applicable law. The development, review and updating of College policies and procedures is an ongoing process. Official College policies may be viewed on the College's website.

This catalog does not constitute a contract, and shall not be construed as a binding agreement.

Addendum (March 2021):

The Perrone-Sizer Institute for Creative Leadership Certificate was added to this catalog for the 2020-2021 academic year (see p.159).

The Alcohol & Drug Counseling certificate was reduced from 19 credits to 18 credits (see p.73 and p.255).

Accreditation and Authorization

Regional Accreditation

Cambridge College is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.).

Accreditation of an institution of higher education by the Commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the Commission should be directed to the administrative staff of the institution. Individuals may also contact:

New England Commission of Higher Education

3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514

(781) 425-7785

E-Mail: info@neche.org

Program Accreditation

The Teacher Education Program and School Counseling Program at Cambridge College are awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

State Authorization

Massachusetts

All Cambridge College's degree programs are authorized by the Massachusetts Department of Higher Education (www.mass.edu). Cambridge College programs preparing students for educator licensure are approved by the Massachusetts Department of Elementary and Secondary Education and are subject to its regulations and standards.

In addition to the Cambridge campus, authorized instructional sites are located in Lawrence, Springfield, and collaborating hospitals.

Other State Authorization

Cambridge College is also currently authorized or licensed to operate in California and Puerto Rico.

California

Cambridge College is a private institution approved to operate by the California Bureau for Private Post-Secondary Education. Approval to operate means the college is compliant with the minimum standards contained in the California Private Postsecondary Education Act of 2009 (as amended) and Division 7.5 of Title 5 of the California Code of Regulations.

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833 • P.O. Box 980818, West Sacramento, CA 95798-0818 • www.bppe.ca.gov • 916-431-6959 • 1-888-370-7589 • fax 916-263-1897.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau's Internet web site www.bppe.ca.gov.

Puerto Rico

The Puerto Rico Board of Postsecondary Institutions (www.ce.pr.gov) has authorized Cambridge College to offer selected programs.

The President's Welcome

Deborah C. Jackson
President

Dear Student,

On behalf of the Board of Trustees and the entire College community, it is my pleasure to welcome you to Cambridge College. We look forward to working with you to help you succeed in both your academic and professional pursuits.

Since we opened our doors in 1971, we have supported the incredible potential of adult learners helping them to discover uncharted capacity, determination and resilience. With programs in five schools – School of Undergraduate Studies, School of Education, School of Management, School of Psychology and Counseling, and the recently acquired New England Institute of Business, we have the programs available that will help you to grow and develop, explore new interests and succeed in the professional career to which you aspire. Our programs are offered in a schedule designed to fit your busy life at a competitively affordable tuition.

Our top priority is your success. Our expert faculty bring a wealth of experience and knowledge into the classroom, ensuring a rich and unique learning environment. In addition to support in the classroom, faculty, staff, and student support services are available to assist you with all other aspects of college life, including financial aid, academic success coaching, and career resources, to name a few.

Thank you for choosing Cambridge College and I look forward to congratulating each and every one of you as you cross the stage at Commencement to receive your diploma—a symbol and acknowledgment of your hard work and dedication. In the meantime, may your journey at Cambridge College be a rich and rewarding one.

Sincerely,

Deborah C. Jackson
President

Cambridge College

Cambridge College was established in 1971 by a group of educators as the Institute of Open Education, an innovative graduate program offering advanced degrees to teachers and non-traditional adult learners, such as students older than the typical first-time college student, including many with previous college experience but no credential. The founding mission shaped the early institution and continues to guide the College today: *To provide academically excellent, time-efficient, and cost-effective higher education for a diverse population of working adults for whom those opportunities may have been limited or denied.* The mission reflected the essence of Cambridge College's teaching and learning model, characterized by open admission with student-centered, career-oriented academic instruction.

Today, Cambridge College remains a pioneer in higher education focused solely on adult learners. We offer undergraduate and graduate programs tailored to the needs of adult students focused on advancing their careers to meet the demands of tomorrow's workforce. As a fully accredited private non-profit institution with five schools – School of Undergraduate Studies, School of Education, School of Management, School of Psychology and Counseling, and the recently acquired New England Institute of Business, Cambridge College was created to advance the lives and careers of adult learners. Classes are offered across flexible schedules and modalities in five locations (Boston, Lawrence, Springfield, MA; Rancho Cucamonga, California; and San Juan, Puerto Rico) and 100% online through NEIB.

For close to 50 years, the College has maintained its commitment to open enrollment and continues to prioritize the needs of the diverse, working adult students it has always served, who now number over 36,000 alumni.

Mission

To provide academically excellent, time-efficient, and cost-effective higher education for a diverse population of working adults for whom those opportunities may have been limited or denied.

Values

Cambridge College is a responsive learning community, where adult learners can find ways to make the personal and professional changes they need to achieve their goals. Learning at Cambridge College takes place in an atmosphere of true diversity, where students support each other in a collaborative learning process that respects their needs and values along with their prior learning and life experiences. The College's innovative adult-centered learning model links theory and practice, helping students to acquire the academic credentials they seek, enrich their lives and careers, and become leaders in their communities.

History

In 1971, a small group of educators created an educational institution, now known as Cambridge College, whose primary mission was to provide educational opportunities and degree attainment for working adults who did not have ready access to higher education. The art and science of helping adults learn became the foundation of education philosophy at the institution. By blending theory and practice in a developmental and participatory approach, this group of educators developed "the teaching/learning model" specifically for adult learning and to benefit those who may not have had opportunities for a college education.

The College was first known as The Institute of Open Education within Newton College of the Sacred Heart, and later became part of the Antioch University Network. In 1981, it became an independent, private non-profit institution with the new name of Cambridge College. A Master of Education was the initial degree program launched at the graduate level; it successfully supplied the growing need for teachers, especially in urban settings. The mission and philosophy of the College drew the attention of students from businesses, non-profit and social service agencies, and other professions. As this learning community grew, the College expanded to offer a broad range of academic programs, including the Master of Business Administration, Bachelor of Arts, Bachelor of Science, and Certificate of Advanced Graduate Studies.

Today, Cambridge College also serves the educational needs of students outside of its main campus location in Boston, Massachusetts. The College has regional locations in Springfield and Lawrence, Massachusetts, and in California and Puerto Rico. The College aspires to be a visionary organization and learning community for its constituents. Through the dynamic learning processes that are the foundations of our educational model, and our dedication to our mission, we believe we are serving and transforming the lives of adult learners across the national landscape.

On March 13, 2020, Cambridge College acquired the assets of the New England Institute of Business following the unanimous votes of each institution's boards of trustees. This momentous decision brings together two institutions with a combined 150 years serving adult learners pursuing meaningful careers.

Distinctive Teaching/Learning Model

The College's innovative adult-centered learning model links theory and practice, helping students to acquire the academic credentials they seek, enrich their lives and careers, and become leaders in their communities. This model of adult learning has proven resilient and adaptable to new content areas and a variety of learning formats throughout Cambridge College's history. Cambridge College is a learning community in which adult learners experience educational practices that honor and empower them. The College believes that each person can learn regardless of one's age, life history, current circumstances, or past academic experience. Each student's uniqueness, capabilities and experiences are valued in the classroom communities. Our programs develop and enhance skills, competencies, attitudes, values and habits of mind, all enabling our students to competently meet personal needs and professional challenges.

Our coursework is designed to promote collaborative learning, support the use of technology, and to increase content expertise. The real-world diversity of our classrooms provides rich opportunities for examining socially constructed learning in individual research projects and team-based assignments. The majority of our faculty are experienced professionals who bring both academic and professional perspectives to the classroom, thus allowing our students to study current trends in the field. Faculty members and program chairs work with students to build the competencies needed for academic and career success.

High Quality and Engaging Student-Faculty Relationship

According to the Council for Adult and Experiential Learning, reducing barriers for adult students means recreating the roles of faculty to be more facilitators of student learning and less lecturers, and to instill in them the freedom to learn from students without professional embarrassment. By recognizing adult learners as potential co-creators of knowledge and connecting their real life experience to academic theory, students will be able to continually enrich and contribute to their learning process and feel motivated to persist in their educational pursuits.

At Cambridge College, many of our students report that the dynamic learning process has transformed their professional and personal lives. The distinctiveness and efficiency of this model has been long substantiated by our student population; our students regularly praise the quality of the relationships they enjoy with the faculty and highlight it as one of the defining and unique characteristics of a Cambridge College education. Our alumni re-engage with Cambridge College because they see the College not only as an inspiring institution where they acquired their priceless education but also as a community of genuinely caring individuals who continue to believe in, nurture, and admire their resiliency, abilities, and well-deserved accomplishments.

College Profile

Our Students

Adults — Cambridge College draws a highly diverse population of adults who are serious about learning and earning the degree credentials they need to advance their careers and change their lives. Cambridge College attracts adults based on our goal-directed programming, our experienced faculty, and flexible scheduling.

Diverse — Our students are quite diverse in terms of their age, educational background, professional attainment, race, ethnicity, and language, and bring to class a wealth of personal experiences.

Committed — Our adult students have made a commitment to their education while working, parenting, and participating as members of their community.

Student Diversity

Cambridge College was once again named one of the top 100 colleges and universities in the United States that conferred the most degrees to minority students.

Master's Degrees

	to African Americans	to Hispanics	to Asian Americans	to Minority Students
Education	86th	36th	n/a	56th
Mental and Social Health Services & Allied Professions	7th	15th	22nd	10th
Psychology	80th	n/a	n/a	n/a
Health Professions & Related Programs	73rd	n/a	n/a	n/a

Source: *Diverse Issues in Higher Education* magazine (<http://diverseeducation.com/top100>).

Faculty Profile

More than 400 active full- and part-time professors (Academic Year 2017-2018); many are active professionals working in their field.

Full-time faculty

- 17 full-time faculty members college-wide
- 82% with a doctorate or other terminal degree
- 53% female, 47% male
- 31% minority
- average tenure 24 years

Part-time faculty

- more than 380 active part-time faculty college-wide
- 55% with a doctorate or other terminal degree
- 99% with at least a master's degree
- 56% female, 44% male
- 33% minority
- average tenure 7 years

Campus Life

Cambridge College locations are in urban settings. Our beautiful new Hood Park central campus in Boston offers a host of amenities, including bright and comfortable gathering areas, large flexible classrooms, state of the art technology, the CC Bistro where fresh food can be grabbed on the run or enjoyed in nearby eating spaces, a CC shop, where college accessories and apparel can be purchased, ample free parking and so much more. Each regional center has a student lounge and vending machines, and public eateries are nearby.

Housing — Cambridge College does not require or provide dormitories and/or student housing, nor does it have responsibility to find or assist enrolled students in finding housing.

Boston, MA Location

Cambridge College's four schools are located in the new central campus located in the heart of Boston's historic Charlestown, MA. Our Hood Park campus is easily accessible to communities throughout Greater Boston and the surrounding areas and is easily accessible from various points in and around Greater Boston. The campus is in close proximity to Assembly Row, which features a broad range of retailers, entertainment options, and restaurants.

Regional Locations

Our students and alumni have urged Cambridge College to bring its academic programs and culture of adult learning to the people of their own cities and states. Each Cambridge College location offers academic programs established at the main campus, selected to serve local needs, and authorized by state education authorities.

Academic Schedule

Convenient evening, weekend, and online classes accommodate students' work schedules.

Three terms/year — Fall and spring terms are 15 weeks for undergraduate programs, and 14 weeks for graduate programs. The summer term is nine weeks for undergraduate programs and seven weeks for most graduate programs.

CC Online class sessions are eight weeks long and are offered five times per year: twice in the spring, twice in the fall, and once in the summer (see *Academic Calendar*).

NEIB class sessions vary depending on academic level. Undergraduate courses are eight-weeks long and are offered six times per year (twice per term). NEIB graduate courses are five-weeks long and are offered eight times per year. Doctoral courses are ten-weeks long and are offered four times per year.

Admission

Welcome to Cambridge College

For over 45 years Cambridge College has been a pioneer in adult learning. With a main campus in Boston, Massachusetts and four regional locations nationwide, we provide academically excellent, time-efficient, and affordable higher education to a diverse population of adult-minded learners. The Cambridge College community is comprised of people who understand the complexities of a busy life, from the faculty and deans, to the staff and administrators. We offer students an educational environment and programs that are designed to fit into their busy lives. We welcome you to a vibrant community of dedicated students who come from different backgrounds, and arrive with a common desire to learn and share knowledge with others, and challenge themselves to grow into the leaders they have always envisioned themselves to be.

Admission

Equal Opportunity

We welcome a diverse student body and academic community regardless of race, color, religion, sex, sexual orientation, gender identity, age, disability, marital status, citizenship, national origin, genetics, or any other characteristic protected by law. All candidate decisions related to admissions, retention, and graduation are made without unlawful discrimination.

See *Non-Discrimination and Harassment* on page 53 and view the policy at

www.cambridgecollege.edu/non-discrimination-and-harassment.

Application for Admission

Apply online at www.cambridgecollege.edu/applynow or request a printed booklet from your admissions counselor. Please mail all admissions materials to your admissions counselor at the Cambridge College location that you plan to attend. See the *Directory* on page 361 at the end of this catalog for addresses.

Your admission file must be COMPLETE and you must be ACCEPTED before:

- Financial aid may be awarded.
- Transfer credit may be evaluated.
- You may register for courses.

Rolling Admissions

Cambridge College practices a rolling admissions policy. Applicant materials are processed and reviewed as they are received. Students are then notified of their admission on a continual basis, as their file becomes complete and reviewed. Please allow 1-2 weeks for processing.

Please note:

Cambridge College reserves the right to deny a student admission. Submission of all required materials does not guarantee admission.

Students may only be actively enrolled in one degree or certificate at a time, though some exceptions may apply.

Admission Materials

Cambridge College requires all admission materials to be submitted and reviewed in order for a student to be accepted and register.

Admission documents must be submitted in English. However, applicants to the Puerto Rico Regional Center may submit the current résumé, personal statement and professional references in Spanish.

All materials become the property of Cambridge College and cannot be returned to the student. Access to these materials is limited under the Family Educational Rights and Privacy Act of 1974 (FERPA). Submitted reference letters that have been designated confidential will not be available to the student.

Keep copies of your completed application and other items you submit. Application materials may not be returned, duplicated for personal use, or forwarded.

All completed application materials are kept on file for one year after submission and can be reactivated during this period if a student chose not to enroll at the time of submission. The application process must be completed in order to be reviewed for acceptance. Applicants can choose to defer their application file for up to three terms (no longer than one year). After one year, documents are purged. Interested applicants will need to reapply.

Students accepted into a degree or certificate program will find academic advising resources listed on their academic record that they can access through the *MyCC web portal*.

Assistance With Admissions Process and Beyond

Student navigators assist all students with admissions and enrollment policies and procedures, and lead the College's Reconnect retention initiative. The navigators serve a vital role in working with admissions, enrollment, financial aid and students' accounts. The navigators also collaborate with other offices such as Student Affairs, Student Success, Alumni Affairs and Strategic Partnerships to engage students and put them into the best position to succeed at Cambridge College.

English Language Proficiency

The student must have the ability to read and write in English at the level of a graduate of an American high school as demonstrated by the possession of a high school diploma, GED or passage of the California high school proficiency exam (as applicable for California students) or a higher education degree.

Make an Informed Decision

Applicants are responsible for reading the Cambridge College catalog to get the information needed to make an informed program choice. Please visit www.cambridgecollege.edu/academic-catalog for information, including program requirements, tuition, fees and refund policies. Applicants should contact the program chair with academic questions regarding their specific program of interest.

Transfer Credit Request

- **Undergraduate applicants:** All official college transcripts are evaluated for transfer credit.
- **Graduate applicants:** Go to www.cambridgecollege.edu/admissions/transferring-credits; download and complete the **Transfer Credit Request form**, and submit it with your application if you wish to have prior course work evaluated for transfer credit. Attach course descriptions and/or syllabi of required courses, especially for licensure programs.

See *Transfer of Credit* on page 48.

International Transcripts

If your transcript comes from a **school outside the U.S.**, you must submit an **original or certified copy** of your transcript, **and** an **official transcript evaluation**, completed by an approved evaluation service listed on www.mass.gov/edu/government/departments-and-boards/ese/programs/educator-effectiveness/licensure/academic-prek-12/teacher/foreign-degree-and-credit-equivalency.html

International Students may be admitted only at

Massachusetts locations. The California and Puerto Rico locations are not authorized to admit international students. In addition to all standard admission requirements, see *International Students* on page 58 for additional requirements and information, and go to www.cambridgecollege.edu/prospective-international-students for the following:

- The International Students Application Supplement must be completed and accompanied by all supporting documents listed.
- Official demonstration of English language proficiency.

State Health Requirements — Massachusetts locations only

- **Immunizations** — Required before you may start classes. Get required form at www.cambridgecollege.edu/resources/student-forms.
- **Health Insurance** — Go to https://mycc.cambridgecollege.edu/ICS/Welcome.jnz?portlet=Office_of_the_Bursar and follow instructions under "Student Health Insurance." Students who have health insurance need to waive out. **If you do not waive out, you will be automatically enrolled and billed.**

Students Returning After Five Years

Students who withdraw any time after their initial registration and wish to return after more than five years need to reapply to a program that is currently offered, submitting all materials to the Admissions Office. Program requirements current at the time of their return must be met.

Please be aware that some programs may no longer be available. Your academic advisor or the dean can assist you to find a program that may accept much of your earlier course work, and help you map out your remaining course work.

See policy at www.cambridgecollege.edu/returning-student-policy

School of Undergraduate Studies

www.cambridgecollege.edu/admissions-requirements/school-undergraduate-studies-admissions-requirements

Bachelor's Degrees and Certificates

Application completed and signed.

\$50 Application Fee nonrefundable (\$100 for international students).

Official Transcripts/Basis of Admission

Request official transcripts to be sent directly to Cambridge College in a sealed, unopened envelope. Follow instructions at www.cambridgecollege.edu/requesting-official-transcripts.

Cambridge College requires at least one of the following:

- High school transcript (original) showing graduation or a recognized equivalent such as a General Educational Development (GED)/HiSET certificate.
- **or** Affidavit attesting to the completion of a high school program in a homeschool setting approved under state law, or—if state law does not require a homeschooled student to obtain a completion credential, completion of a high school education in a homeschool setting that qualifies as an exemption from compulsory attendance requirements under state law).
- **or** Enrollment in an “eligible career pathway program”. (See <https://ifap.ed.gov/dpccletters/GEN1609.html>)
- **or** Passing scores on an approved ability-to-benefit test (such as the Accuplacer Test administered by Cambridge College) in a single test administration: Reading Comprehension 55, Sentence Skills 60, Arithmetic 34.
- **or** Nine credit hours of Cambridge College course work, applicable toward an undergraduate degree or certificate, completed with grades of B or better. (Non-matriculated students may not receive aid while earning credits.)
- **or** 24 or more credits earned from a regionally or nationally accredited college or university. All official college transcripts are evaluated for transfer credit. **Note:** courses not included in an earned associate's degree must be earned at a grade of C or better to be eligible for transfer.

Please request transcripts from all colleges you have attended if you would like them to be evaluated for transfer credit.

Program-Specific Requirements

Alcohol & Drug Counseling Certificate

This certificate is offered by the School of Psychology & Counseling (SOPC) for both graduate and undergraduate students. Applicants must therefore meet the admissions requirements of both schools. In addition to the regular undergraduate requirements (see at left), the following are required:

- Interview with and approval of the SOPC Admissions Committee and acceptance by the dean.
- Interview with program chair.
- Current résumé.
- Two professional recommendations.

International Students - See *International Students* on page 58 and follow instructions at www.cambridgecollege.edu/prospective-international-students to meet additional requirements, including official demonstration of English language proficiency.

Required only at Massachusetts locations:

- **Immunizations**— cambridgecollege.edu/resources/student-forms.
- **Student health insurance**— https://mycc.cambridgecollege.edu/ICS/Welcome.jnz?portlet=Office_of_the_Bursar

Non-Licensure Programs

Master of Education (M.Ed.)

ADMISSION REQUIREMENTS FOR ALL LOCATIONS

- Application Form** Completed and signed.
- \$50 Application Fee** nonrefundable (\$100 for international students).
- Official Transcripts** of required degree conferred by a regionally or nationally accredited institution of higher education. Request official transcripts to be sent directly to Cambridge College in a sealed, unopened envelope. Follow instructions at www.cambridgecollege.edu/requesting-official-transcripts.
 - **Earned bachelor's degree.**
 - **International transcripts** must be translated and evaluated by an approved agency.
 - **Transfer credit request** — Follow instructions at www.cambridgecollege.edu/admissions/transferring-credits. See *Transfer of Credit* on page 48.
- Current Résumé**
- Personal Statement** Write a typed, double-spaced essay (500 words) describing your professional experience, your goals and objectives for graduate study. How do you expect your graduate studies to enhance your future career? Keep a copy for your electronic portfolio of learning.
- Two Professional Recommendations** addressing professional character and ability to perform graduate work.
- Program-Specific Requirements** See below.

For Education Leadership non-licensure (M.Ed. and CAGS), please see Education Leadership admission requirements below.

An interview may be required at the discretion of the admissions counselor or the program chair (licensure and non-licensure).

International Students - See *International Students* on page 58 and follow instructions at www.cambridgecollege.edu/prospective-international-students to meet additional requirements, including official demonstration of English language proficiency.

Required only at Massachusetts locations:

- **Immunizations**— cambridgecollege.edu/resources/student-forms.
- **Student health insurance**— https://mycc.cambridgecollege.edu/ICS/Welcome.jnz?portlet=Office_of_the_Bursar

Teacher Licensure Programs

Master of Education (M.Ed.)

ADMISSION REQUIREMENTS FOR MASSACHUSETTS LOCATIONS

- Application Form** Completed and signed.
 - \$50 Application Fee** nonrefundable (\$100 for international students).
 - Official Transcripts** of required degree conferred by a regionally or nationally accredited institution of higher education. Request official transcripts to be sent directly to Cambridge College in a sealed, unopened envelope. Follow instructions at www.cambridgecollege.edu/requesting-official-transcripts.
 - **Earned bachelor's degree with 3.0 GPA.**
 - **International transcripts** must be translated and evaluated by an approved agency.
 - **Transfer credit request** — Follow instructions at www.cambridgecollege.edu/admissions/transferring-credits. See *Transfer of Credit* on page 48.
 - Current Résumé**
 - Personal Statement** Write a typed, double-spaced essay (500 words) describing your professional experience, your goals and objectives for graduate study. How do you expect your graduate studies to enhance your future career? Keep a copy for your electronic portfolio of learning.
 - Two Professional Recommendations** addressing professional character and ability to perform graduate work.
 - MA Educator Documentation** from the Massachusetts Dept. of Elementary and Secondary Education (DESE) website. Keep copies of all documents submitted and, upon admission, post in your electronic portfolio (TaskStream):
 - Required for entry:**
 - Massachusetts Educator Personnel ID (MEPID number).
 - MTEL Communication & Literacy Test, successfully completed.
 - Required if completed** (see *SOE Academic Programs and Policies*):
 - Massachusetts preliminary license, if held.
 - Sheltered English Instruction requirement.
 - Fingerprinting and Criminal Offender Record Information.
- Applicants who do not initially meet all requirements (e.g. GPA of 3.0 or MTEL) for admission into their chosen licensure program must enroll in the corresponding non-licensure degree option. Students who achieve a 3.0 GPA upon completion of the first three SOE courses, pass the MTEs, and now meet all requirements, may request a change of program.
- Program-Specific Requirements** See next page.

Continued 

Program-Specific Requirements for Non-Licensure and Teacher Licensure M.Ed. Programs

Autism/Applied Behavior Analysis M.Ed.

Applicants to the M.Ed. programs that include the ABA course sequence must meet the requirements below **before they may begin the ABA coursework.**

- Active employment in a relevant, related field with at least one year of experience in a ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Applicants must be prepared to pursue timely completion of the ABA course sequence, given that the sequence aligns with a particular edition of the exam approved by the national Behavior Analyst Certifying Board.

Math (5-8, 8-12)

A math placement test is required, and is administered during the interview to assess applicant readiness to enter the math program selected and, upon acceptance, for program advising.

School Nurse Education

Registered Nursing License (RN) required. Complete and submit a Registered Nurse License Requirement Form and be prepared to show your RN license to the program advisor when class begins.

Skills-Based Health/Social Emotional Learning

Licensure and non-licensure candidates must document the successful completion of a course in anatomy and physiology. The program chair will provide a list of courses, locations, and course delivery systems upon request.

Disclosures: Licensure Programs

- Licensure requirements are subject to change per Massachusetts regulations.
- All candidates admitted for licensure programs must successfully complete the program in its entirety.
- All requirements at the time of program completion must be finalized prior to seeking Massachusetts endorsement for licensure purposes..

SOE Certificates

ADMISSION REQUIREMENTS

Application Form Complete carefully and sign.

\$50 Application Fee nonrefundable

Official Transcripts

Transcripts must evidence a bachelor's degree or higher from a regionally accredited college or university.

If applying for:

- **Certificates identified as graduate level:** a bachelor's degree or higher is required.
- **Certificates identified as post-graduate or post-master's:** a master's degree or higher is required.

You must request official transcripts to be sent directly to Cambridge College; we must receive them sealed and unopened. Please follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

Program-Specific Requirements See below:

Program-Specific Requirements for SOE Certificates

Autism/Applied Behavior Analysis

- Master's degree or higher in education, special education, or psychology in an area that meets the current BACB™ standards at time of enrollment. Please consult the BCBA program chair prior to enrollment.
- Active employment in a relevant, related field with at least one year of experience in a ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Applicants must be prepared to pursue timely completion of the ABA course sequence, given that the sequence aligns with a particular edition of the exam approved by the national Behavior Analyst Certifying Board.

Elementary Science Specialist (1-6) Certificate

- Valid Massachusetts elementary PK-2 or 1-6 initial license.

General Science (5-8) Initial Licensure Teaching Certificate

- Bachelor's or master's degree in a STEM field.
- MTEL Communication & Literacy Test, successfully completed.
- Transcript analysis.

School Counseling and School Adjustment DESE Licensure Programs

Applicants to degrees and certificates preparing students for licensure in School Counseling or School Adjustment must also meet the admission requirements below.

MTEL Communication & Literacy Test

Candidates for licensure are required to pass the **Massachusetts Communication & Literacy Test (MTEL) prior to admission into licensure programs**. Submit a copy of the official document noting your "pass score" or verification page from the Educator Licensing and Recruitment (ELAR) system maintained by the Massachusetts Department of Elementary and Secondary Education (DESE).

GPA of 3.0

The official transcript of your prior bachelor's or graduate degree is required to show a GPA of 3.0 or better. Applicants who do not initially meet all requirements (e.g. GPA of 3.0 and/or MTEL) for admission into their chosen licensure program must enroll in our non-licensure degree options (see below).

Students entering the College without having met the MTEL requirements are:

- Required to begin as follows:
 - ◆ If applying for *School Counseling (48 credits)*:
GPA <3.0, Register for School Counseling, Non-Licensure
 - ◆ If applying for *Mental Health & School Counseling (66 credits)* or *School Adjustment/Mental Health Counseling (60 credits)*:
GPA ≥3.0: Register for Mental Health Counseling.
GPA <3.0: Register for Psychological Studies.
- Advised to take the Communication & Literacy MTEL within their first term at the College.

Once the MTEL test is passed and a GPA of 3.0 earned in at least three SOPC courses, students may seek approval to become licensure candidates in School Adjustment or School Counseling.

Massachusetts Educator Personnel ID (MEPID number)

If you do not have a MEPID number, please submit an application to receive one with the Massachusetts Department of Elementary and Secondary Education (ME-DESE) and submit a copy of the official notification of the number along with the MTEL results for admission into the licensure program selected.

Program Chair Consultation and Approval

Students should consult with the program chair regarding licensure requirements and seek approval to enter a DESE licensure program.

Continued 

Program-Specific Requirements

Alcohol & Drug Counseling Certificate

- High school diploma/GED, bachelor's or higher degree required.
- Interview with program chair required.

Rehabilitation Counseling Certificate

- 60-credit master's or higher degree in mental health counseling, marriage & family therapy, social work, or psychology.

School Adjustment Counseling Certificate for Mental Health Counselors

- Completion of current Cambridge College 60-credit M.Ed. in mental health counseling or equivalent program. (Bachelor's degree also required.)
- Pass Massachusetts Communication & Literacy Test (MTEL) and all other DESE licensure requirements for School Adjustment Counseling. See above.

New England Institute of Business

at Cambridge College

General Requirements - Computer and Internet Access

To participate in an online course, students must have access to a fully-functional laptop or desktop computer that can play audio and video. While students may be able to use a portable device (cell phones, tablets or “books”) to complete some of their coursework, other courses will require the use of downloaded software or web-based tools that are not compatible with portable devices. Access to Microsoft Office (Word, PowerPoint) and a broadband Internet connection is required to participate in discussions, assignments, access readings, transfer course work, and receive feedback from faculty.

Undergraduate Programs

Application completed and signed.

\$50 Application Fee nonrefundable

Official Transcript(s)

High school transcript (original) showing graduation or a recognized equivalent such as a General Educational Development (GED)/ HiSET certificate. Follow instructions at www.cambridgecollege.edu/requesting-official-transcripts

High school seniors may apply for admission but acceptance before high school graduation is contingent upon the receipt of notification of satisfactory completion of high school requirements or GED..

Pass the required English and Mathematics

Placement Assessments by achieving a score of 75% or better on both assessments. Students who score under 55% on either of the placement assessments will not be admitted to the College. Students who score between 55% and 74% on either of these assessments will be provisionally accepted and invited to take one or more fundamentals courses, which must be completed with a grade of “C” or better in order to matriculate into an undergraduate program.

Students who successfully transfer in a college level Math and English courses or their equivalents from an institution pursuant to its Transfer of Credit policy to NEIB may be exempt from taking Placement Assessments.

Prior Attendance at an Undergraduate Institution

All undergraduate applicants who have attended an undergraduate institution, prior to applying for admission to NEIB, must disclose such attendance, whether or not requesting to transfer credit from such institution(s). NEIB reserves the right to request and examine transcripts from previously attended undergraduate institutions. The extent of academic progress made by an applicant at their previous institution(s) may be taken into consideration in the admissions decision.

The College reserves the right, in the interest of student welfare, upon approval of the Program Chair, to waive certain admissions requirements in situations where a student is seeking enrollment to the College pursuant to an articulation agreement, teach-out agreement or credit transfer agreement between the College and another educational institution that the student is currently attending or has attended.

Graduate Programs

Application completed and signed.

\$75 Application Fee nonrefundable

Official Transcript(s)

Bachelor’s degree with a 3.0 GPA or higher or foreign credential equivalent established by a third party evaluation agency, or a master’s degree from an institution accredited by an agency recognized by the U.S. Department of Education. Students with a 2.0 GPA or above will be accepted on a provisional basis and fully accepted upon achieving a CGPA of 3.0 in the first two classes.

Personal Statement (approximately one to two pages) describing how the Program will assist the applicant to achieve personal and/or professional goals.

Current Résumé (Reflecting 4 years of work experience)

Personal Interview generally conducted via telephone.

The Program Chair for the specific graduate program or other qualified College administrator will evaluate and approve applications to ensure that admissions requirements have been satisfied.

For good cause shown, at the discretion of the Program Chair, institutional admissions requirements may be waived or altered upon written approval by the Program Chair.

For more information, please see *New England Institute of Business* on page 282

International Students - See *International Students* on page 58 and follow instructions at www.cambridgecollege.edu/prospective-international-students to meet additional requirements, including official demonstration of English language proficiency.

Non-Matriculated Students

Taking Individual Courses

Students not matriculated into a degree or certificate program at Cambridge College are allowed to take up to nine credits for credit without applying for and enrolling in a degree or certificate program. Students should seek advisement from the academic dean of the school in which they are taking courses. Certain exceptions based on program, alumni status or location may apply.

The non-matriculated students registration form is available at the registrar's office, at regional centers, and on the Cambridge College website on the Student Forms web page: <https://www.cambridgecollege.edu/student-forms>

Acceptance of credits into a degree or certificate — Courses completed at Cambridge College by students not enrolled in an academic program may be evaluated for acceptance into Cambridge College programs by the dean or program chair of the receiving program. There is no guarantee that courses taken as a non-matriculated student will be accepted into an academic program at Cambridge College.

See policy at www.cambridgecollege.edu/college-policies.

The College reserves the right to restrict access by non-matriculated students to particular courses.

To get the full benefit of the course work, any course prerequisites must be met. The prior education and experience required for the corresponding degree are recommended.

Financial Aid

To be eligible for financial aid, enrollment in a degree program or eligible certificate is required. Please contact the Financial Aid Office for more information.

Student Financial Services

Payment and Refunds, Tuition Rates and Fees, Financial Aid

Payment and Refunds

Student Financial Services • 617.873.0403 • sfs@cambridgecollege.edu • www.cambridgecollege.edu/offices/bursar

The following is an overview of information you need to be aware of as you begin your time at Cambridge College. The following items are subject to change at any time. Please refer to www.cambridgecollege.edu/offices/bursar for the most up to date information.

Course registration is contingent upon the payment of all amounts due to the College. Students owing a balance of more than \$50 cannot register for courses. Once registered for a term, payment or acceptable arrangements must be made prior to the start of the term. If a student registers after the term starts, or after add/drop ends, or after the established payment due date is past, payment is due one week after the registration.

Communicating With You

The Bursar's Office will often communicate with you by email to your Cambridge College email account. You are responsible for checking your email on a regular basis so you don't miss important information.

Billing of Tuition

Tuition bills are emailed at least 30 days prior to the start of the term. Payments are to be remitted on or before the due date indicated on the statement. This date is typically at the start of the term.

It is easy to calculate your tuition bill each term. On our website, go to your Cambridge College location, click on your academic program, and see current tuition rates posted on the Tuition tab. Multiply the number of credits you are taking by the per-term rate. (In some cases there may be other expenses in addition to course tuition.)

Always refer to your account online for the most up-to-date balance information.

Late Payment Fee

Students will be assessed a late payment fee if acceptable payment arrangements are not made by the due date indicated on the statement. Acceptable payment arrangements include payment in full, pending financial aid, approved third-party billing and an active and current payment plan with the Bursar's Office.

Paying for Your Education

There are several ways to pay for your college education:

- Financial aid (federal student loans, scholarships, etc.) — to apply for aid, go to www.cambridgecollege.edu/financial-aid.
- Employer tuition assistance programs or third party sponsor — acceptable if payment is made directly to Cambridge College and is not contingent upon grades. Please contact the Bursar's Office prior to the beginning of the term so that an invoice can be generated.
- Veteran's Benefits — if you are eligible for veteran's educational benefits, please contact the Bursar's Office to discuss your own particular situation (see *Military Students-Veterans and Active Duty* on page 56).
- Using your own funds — see "*How to Pay Your Bill*" below.

How to Pay Your Bill

Online — Cambridge College has partnered with TMS/Nelnet for easy online payment transactions. Students now have the option to either pay via E-Check, Credit or Debit card options. This is available 24 hours per day and can be done in a few easy steps:

1. Log into <https://cambridgecollege.afford.com/>
2. Click “Make a Payment”
3. Enter Student Information
4. Enter Payment Amount
5. Click “Add Payment”
6. Click “Continue”
7. Select Payment Type
8. Process Payment Transactions.

Mail — Checks or certified funds must be made payable to Cambridge College and include your college ID number. Mail payment to Cambridge College, ATTN: Student Financial Services, 500 Rutherford Avenue, Boston, MA 02129.

In Person — During business hours you can make a payment in person at our main campus, 500 Rutherford Avenue, Boston, MA. Payments are not accepted at any other College location. During periods of remote learning, the Office of Student Financial Services will be open from 9 AM to 5 PM, Monday through Friday. In addition, please be aware, staff are working remotely with limited access to the campus. Please call ahead and make an appointment to ensure a staff member will be on site to assist you. We will make every effort to accommodate you during these periods.

Wire Transfer — Please contact the Student Financial Services Office if you are interested in making a payment via wire transfer.

Payment Plan — Payment plans can be established with Tuition Management Systems. The payment plan allows you to pay your tuition and fees in four payments in the fall (July through October) and spring (November through April) terms, and two payments in the summer term (June and July). Please visit <https://cambridgecollege.afford.com> to create your account and set up your payment plan. We highly recommend that this is done immediately after registering for your courses.

Non-Payment

You will not be able to register until you have paid your bill. Once acceptable payment arrangements have been made, we can clear your account to register. Students with a balance will have a Bursar restriction (“Hold”) placed on their account. This restriction prevents access to grades, official transcripts; diplomas, and certificates. Students are notified of impending restriction via email to their Cambridge College email address. **Non-payment may result in being dropped from your courses.** Please do not hesitate to reach out to us to discuss your billing statement—we are here to assist you with your financial needs.

The College will make every effort to work out repayment plans. In the event a balance remains outstanding, student debts will be submitted to a collection agency if payment is not received. In such cases, the student is liable for any court costs and collection agency fees. **Collection agency fees may total up to 40% of the outstanding bill, as allowed by Massachusetts law. Cambridge College reserves the right to report account information to a credit bureau.**

Leave of Absence or Withdrawal

Students considering leave of absence or withdrawal are urged to see the Student Financial Services Office before leaving the College in order to arrange payment of any outstanding balance. Students who have received financial aid must contact the Financial Aid Office.

Cambridge College policy and procedures regarding withdrawal or leave of absence can be found at <https://www.cambridgecollege.edu/academic-policies-procedures/leave-absence-or-withdrawal>. Students must consult applicable policy and procedures in case of any questions regarding this withdrawal or leave of absence. Students can always contact the Dean of Student Affairs for further questions.

Refunds and Repayment

Tuition may be refunded. No other charges are refundable. Refunds of non-Federal/State funds are processed at the end of the academic year.

Financial aid repayment/return — Title IV financial aid or state scholarship monies are subject to federal regulations. See Repayment of Federal Funds or Repayment of Massachusetts Funds, under *Financial Aid*, below.

Refunds — Students who paid current tuition charges themselves (not from federal or state aid) are eligible for a refund of current term charges paid as follows:

Date of Withdrawal from 14-16-week courses	Refund
<i>(Fall and Spring traditional courses: week of instruction is 7 days)</i>	
Before add/drop deadline (within first two weeks of term)	100%
During weeks 3-4	75%
During weeks 5-6	50%
During weeks 7-8	25%
During weeks 9-16	0%

Date of Withdrawal from 8-10 week Courses	Refund
<i>(Online and Summer courses: week of instruction is 7 days)</i>	
Before or during week 1	100% return
During week 2	50% return
During weeks 3 – 4	25% return
During weeks 5-8	0% return

Date of Withdrawal from 5-week Courses	Refund
<i>(NEIB graduate courses: week of instruction is 7 days)</i>	
Before or during week 1	100%
During week 2	75%
During week 3	25%
During weeks 4-5	0%

Date of Withdrawal from Weekend Intensive Courses	Refund
<i>(Two-weekend schedule: 4 classroom days)</i>	
Before Weekend 1	100%
During Weekend 1	50%
During Weekend 2	0%

Excess Funds — Title IV

In accordance with federal regulations, excess funds from federal financial aid, over and above current charges, cannot be held without written authorization from the student.

Veteran's Addendum

The refund of the unused portion of tuition, fees, and other charges for veterans or eligible persons who fail to enter a course, withdraw or discontinue prior to completion, will be made for all amounts paid which exceed the approximate pro rata portion of the total charges that the length of the completed portion bears to the total length of the course. The proration will be determined on the ratio of days or hours of instruction completed to the total number of instruction all days or hours in the course.

Military Tuition Assistance (TA) Refund Policy

Military Tuition Assistance is a benefit paid to the school for eligible military student recipients who are active members of the Army, Navy, Marines, Air Force, and Coast Guard. The student is awarded the TA benefit with the understanding that the student will attend the entire term. Cambridge College is required to calculate Military Tuition Assistance (TA) earned when a military student using TA withdraws.

As participants in the Department of Defense (DoD) Voluntary Education Partnership Memorandum of Understanding (MOU), students who officially or unofficially withdraw from a course before completing 61 percent of the term have not earned 100% of the amount of their voucher for the withdrawn course. Cambridge College is required to return the unearned portion of the TA funds to the military service that provided the TA funding. Unearned TA funds that are returned to the appropriate military branch of service will become a debt to the student.

Cambridge College will calculate the amount of unearned Tuition Assistance funds using the official last date of attendance, as determined by the institution's attendance records. The last date of attendance is used to determine the number of days completed.

To remain in compliance with the Department of Defense's policy, Cambridge College will return any unearned TA funds through at least 60% of the term on a prorated basis. The amount of unearned TA that is returned is based on the date of withdrawal from the course.

After 60% of the term has passed, TA will not be evaluated for a return to the DOD.

As an institution, the DOD will be billed after 60% of the term has passed to reduce the amount of incorrect TA funds being disbursed by the DOD to Cambridge College. We will only bill for the amount the student earned given their enrollment.

Schedule for returning unearned TA:

Date of Withdrawal from 14-16 week Courses	Refund
---	---------------

<i>(Fall and Spring traditional courses: week of instruction is 7 days)</i>	
Before or during weeks 1 – 2	100% return
During weeks 3 – 4	75% return
During weeks 9 – 10	40% return (60% of course is completed)
During weeks 11 – 16	0% return

Date of Withdrawal from 8-9 week Courses	Refund
---	---------------

<i>(Online and Summer courses: week of instruction is 7 days)</i>	
Before or during week 1	100% return
During week 2	75% return
During weeks 3 – 4	50% return
During week 5	40% return (60% of course is completed)
During weeks 6 – 8	0% return

Date of Withdrawal from Intensive Courses	Refund
--	---------------

<i>(Intensive courses meet for 9.375 hours)</i>	
Prior to Day 1	100% return
Prior to Day 2	60% return
Prior to Day 3	40% return (60% of course is completed)
After Day 3	0% return

For courses that have durations differing from those listed above:

Unearned TA funds will be returned on a prorated basis, depending on the length of the course. To determine the amount of TA that needs to be returned, the institution will determine the date the withdrawal was submitted, and then divide that by the number of days in the term to determine the percentage of TA that was earned by the student.

Example: The student enrolled in a course that's duration is 30 days. The withdrawal was submitted on the 14th day. The institution would perform the calculation to determine how much TA was earned by the student's attendance: (14 divided by 30 equals 46.6%. 47% of the TA authorized was earned by the student, which means 53% of what was authorized will be returned to the DOD).

Overpayment — Non-Federal Funds

Payments received on a student account, exceeding the account balance or anticipated charges, will remain on the account and be applied toward future term charges within the academic year. Remaining overpayments are refunded at the end of the academic year. No refunds will be issued at any other time unless the student is withdrawing or has completed their degree.

Graduation Clearance

All tuition and other charges must be paid in full by the published graduation clearance deadline in order to receive graduation clearance from the Bursar's Office.

California: Student's Right to Cancel

You have the right to cancel or withdraw and receive a refund of 100% of the amount paid for institutional charges, less the STRF of \$0.00, and a reasonable deposit or application fee not to exceed \$250, through attendance at the first class session, or the seventh day after enrollment, whichever is later, if notice of cancellation is received on or before the *right to cancel date*. See table below.

First Term of Enrollment, 2020-2021 Academic Year	Application Deadline	Classes Begin	Right to Cancel Date
Fall Term 2020	Sept 1, 2020	Sept 8, 2020	Sept 15, 2020
Spring Term 2021	Jan 14, 2021	Jan 19, 2021	Jan 26, 2021
Summer Term 2021	June 7, 2021	June 21, 2021	June 28, 2021

To cancel, download the Withdrawal form from www.cambridgecollege.edu/resources/student-forms, and submit the completed Withdrawal form to the Registrar's Office by the *right to cancel date* (Add/Drop Deadline).

Students are not required to purchase books, supplies or equipment through Cambridge College, and the College does not offer student housing or transportation. Therefore these expenses cannot be refunded by the College.

Student Health Insurance

Massachusetts law states that students who meet *all* the following criteria are required to be enrolled in the College's student health insurance plan or participate in a plan with comparable coverage.

- Attend classes within Massachusetts.
- Are enrolled in a certificate or degree program.
- Are enrolled full-time or three-quarter time (undergraduate: 9 credits or more; graduate: 6 credits or more).

A student's status as full or three-quarter time is determined as of the last date of the add/drop period.

International students (active for SEVIS) are assessed for health insurance regardless of credit load.

Annual Insurance waiver — Students who have insurance with coverage comparable to Massachusetts state criteria may waive out of the College's student health insurance plan by submitting an annual waiver request by the term deadline. It is the student's responsibility to determine and certify that their insurance is comparable. To submit the annual waiver request, go to https://mycc.cambridgecollege.edu/ICS/Welcome.jnz?portlet=Office_of_the_Bursar, and follow the instructions under Student Health Insurance; click on the external link provided, and follow the online instructions. In so doing they grant permission for the insurance provider to audit their insurance information, and if it is found to be falsified, inactive, or non-comparable to Massachusetts criteria, they will be enrolled in the insurance plan and will be charged the full insurance premium.

Students who do not submit an annual waiver request by the deadline are automatically enrolled in and billed for the College's student health insurance plan. The deadline for the current term is posted on the *MyCC web portal* homepage.

Students are required to submit an annual waiver request in the first term they are enrolled and every fall term thereafter. Students returning after a leave of absence must submit the waiver request in the term when they return.

CC locations in other states — Students at Cambridge College locations outside Massachusetts are not required to purchase student health insurance.

CC Online — Fully online degree students do not require the College's health insurance plan and are not required to submit a waiver. If at any point in your program you register for an in-seat or hybrid course, you will be required to either enroll in the College's health insurance plan or submit a waiver.

CC Summer Institutes — Summer Institute students enrolled in more than three weeks of classes will need to show proof of health insurance. Massachusetts law does not require students enrolled in short-term courses (defined as no more than 15 days of classes for each term and 30 days total for the entire school year) to purchase student health insurance.

Adding Courses

Students who add courses after the term has begun are responsible for payment immediately. Students must check their account online for changes to their balances as a result of adding courses.

Dropping Courses

Tuition Charged

You must pay the full tuition for all courses for which you have registered, by the payment due date.

- However, if you correctly drop the course, you may get tuition credit as outlined below under *Tuition Credit*.
- If you do not attend class and do not correctly drop the course, you remain responsible for the full tuition.
- If you begin attending class and later cease attending classes without formally withdrawing, you remain responsible for the full tuition.

Tuition Credit

Date Add/Drop Request is Received _____ **Tuition Credit**

Courses that meet every week and start in the first week:

Before the add/drop deadline 100%
 Before third class or when no more than six hours of class time have elapsed, whichever comes first. 75%
 After third class. 0%

All other courses:

Before the first class 100%
 Before second class or when no more than six hours of class time have elapsed, whichever comes first. 75%
 After the second class. 0%

Online courses have the same tuition credit policy as standard seated courses.

Tuition and Fees Rates

Student Financial Services • 617.873.0403 • sfs@cambridgecollege.edu • Rates as of June 2020, subject to change without notice.

Admissions

Application fee (non-refundable) \$50
 Application fee - international applicants (non-refundable) \$100

Course Tuition Rates are set by the Board of Trustees and are subject to change. Current rates apply to all students. See policy at www.cambridgecollege.edu/tuition-rates-and-fees

Rates effective Fall 2020 — All rates are per credit hour.
 Tuition for each course is the same for students enrolled in a degree or certificate, or as a non-matriculated student taking single courses.

Please Note

- MBA program credits:** minimum 36 credits; up to 48 credits if foundation courses are needed (see program charts).
- Program Length**—three terms/year.
- Application Fee**—non-refundable.
- Tuition Rate**, per credit, 2020-2021 California rates (see preceding page)—All rates are subject to change and all students pay current rates. Therefore tuition rate may change over the period of an academic program. Tuition may be refunded (see Refunds and Repayment).
- LRN175 Course Materials Fee** (non-refundable): This introductory course is typically taken in the first term, so the fee is included in the enrollment/first term calculation.
- Enrollment/First Term** charges include application fee (non-refundable) and tuition (refundable) for one term of typical full-time study, 12 credits. Any first-term fees are also included: LRN175 course materials fee.

7. Graduation Fee.

- Field Experience Fee:** one-time fee for administering the clinical field experience required for counseling programs.
- Entire Program** total includes institutional charges only: application fee, tuition, school-based fees (columns 7-10; see preceding page), and graduation fee.
- 10. Personal Expenses, estimated**, per term: Cambridge College does not offer or charge students for textbooks, supplies and equipment, room and board, or transportation or the optional (external) tuition payment plan servicing fee. The figure provided is for students to estimate their personal expenses on a term-by-term basis. This is not figured into the Enrollment/First Term or Entire Program cost estimates.
TaskStream online portfolio licensing fee is \$50 at time of publication (subject to change), non-refundable, paid to external entity) required for: Autism Specialist, Interdisciplinary Studies, Teaching Skills & Methodologies.

The Student Tuition Recovery Fund (STRF), at time of publication, is \$0 (subject to change) per \$1000 of institutional charges, so is not included in calculations above. It is non-refundable. See the following.

Student Tuition Recovery Fund

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) **if all** of the following applies to you:

1. You are a student in an educational program, who is a California resident or are enrolled in a residency program, and prepay all or part of your tuition either by cash guaranteed student loans, or personal loans, and
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment **if either** of the following applies:

1. You are not a California resident, or are not enrolled in a residency program, or
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

The State of California created the Student Tuition Recovery Fund (STRF) to receive or mitigate economic losses suffered by students in educational programs who are California residents or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, attending prepaid tuition, paid STRF assessment, and suffered an economic loss as a result of one of the following:

1. The school closed before the course of instruction was completed.
2. The school's failure to pay refund or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or the Division within 30 days before the school closed or if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

New England Institute of Business at Cambridge College: Tuition and Fees

Tuition and Fees 2020-2021

NEIB is committed to ensuring that everyone has access to higher education. NEIB provides its students with a high quality, industry-specific education at reasonable tuition rates and with no hidden fees.

Tuition for programs in teach-out status will continue to follow the last NECB catalog dated January 2020 and can be found on the former NECB website, www.necb.edu.

Financial Aid

Financial Aid Office (Student Financial Services) • 617.873.0403 • sfs@cambridgecollege.edu
• www.cambridgecollege.edu/offices/financial-aid

Financial aid is available for our students who qualify, to assist in financing educational expenses at Cambridge College. Visit www.cambridgecollege.edu/offices/financial-aid/ to begin the financial aid process. The financial aid staff is available to assist students by phone, by appointment and by email.

Eligibility for Financial Aid

It is essential that students comply with requirements in order to receive financial aid.

Eligibility Requirements

Eligibility for federal financial aid is determined by the following criteria:

- Students must be enrolled in a Title IV approved program leading to a degree or certificate and the student may only receive federal financial aid for classes that are required for degree completion. Classes outside of a student's approved program cannot be used in cost of attendance calculations and determination of half time enrollment. Students enrolled in non-degree programs or certificate programs not Title IV approved are not eligible for federal financial aid.
- Students may not receive federal financial aid from two schools at the same time. Students can only receive federal aid from the school from which they are matriculated.
- The maximum time frame allowable to complete a program will be no more than 150% of the published full-time length of the program (measured in total credits attempted, including transfer credits) for undergraduate students and no more than 200% of the published length for graduate students. If a student does not complete a program in less than 150% of the published length of the program they will no longer be eligible for federal aid. (See policy on *Satisfactory Academic Progress* on page 34.)
- Students must be enrolled at least half time to receive a federal direct loan. (undergraduate: at least 6 credits; graduate: at least 4 credits).
- Students must be enrolled full time to receive the maximum Pell Grant. If a student is enrolled less than full time the Pell grant will be prorated based on enrollment status.
- Federal financial aid will be adjusted if a student withdraws from all classes before 60% of the term is completed. Students may have a balance owed to the College after these adjustments to financial aid are posted to the student's account. (See policy on *Leave of Absence or Withdrawal* on page 37.)
- Students must have financial need except for the unsubsidized loan program and some merit based aid or private grant aid. Need is defined as the cost of attendance minus the expected family contribution derived from filing the Free Application for Federal Student Aid (FAFSA).

- Students must have a high school diploma or equivalent (General Education Diploma (GED) certificate, a certificate from a state-authorized examination that the state recognizes as the equivalent of a high school diploma, a two year degree acceptable for full credit towards a bachelor degree), or have completed a high school education in a home setting that is treated as a home school or private school under applicable state law.
- Students must be a U.S. Citizen or eligible non-citizen.
- Students must have a valid Social Security Number.
- Students cannot be in default or owe money on a federal student loan.
- Male students ages 18-25 must register with the Selective Service.

Applying for Financial Aid

www.cambridgecollege.edu/applying-financial-aid

Academic Award Year

For awarding purposes the Fall term is considered to be the beginning (header) of the academic award year for Cambridge College. The Summer term will be considered the end (trailer) for the academic award year. For determining eligibility and disbursing funds the Free Application for Federal Student Aid (FAFSA) year must match the academic award year.

Example: Student applies to start in the Summer 2020 term, the last term of the academic award year 2019-2020. Student must file the 2019-2020 FAFSA and will be awarded for the Summer 2020 term only. For the next academic award year of 2020-2021, the student must file the 2020-2021 FAFSA, and will be awarded starting with the Fall 2020 term and ending with the Summer 2021 term.

Students may submit an appeal to the director of financial aid if they wish to be awarded on a different schedule due to extenuating circumstances. All appeals must be in writing and contain appropriate supporting documentation. Each appeal will be reviewed on a case by case basis by the director of financial aid.

Verification

Students sometimes make errors on their financial aid application. The Federal Department of Education requires that 30% of Free Application for Student (FAFSA) filers be verified, as selected by the Department of Education central processing system (CPS). However Cambridge College also has the authority, and may be required, to verify additional students. This policy applies to all Cambridge College students and their parents (only dependent students).

Selecting students — Cambridge College will request verification information from all students who are selected by the central processing system (CPS). Required verification items are: Household size as defined by the federal Department of Education; number in college; adjusted gross income as supplied by the IRS; U.S. taxes paid; certain types of untaxed income and benefits such as child care, IRA/Keogh deductions, interest on tax-free bonds (examples not all inclusive); All other untaxed income included on the U.S. income tax return (excluding schedules).

Cambridge College is also required to verify any application information that appears to be incorrect or contains discrepancies. Students with these applications are considered to be selected for verification by the College even though the data being verified may not be same as the required items for CPS selected students.

Notifications — Students who are selected for verification will be notified in writing in a letter which lists all documents that have been requested. This information is also posted on the student's Cambridge College MyCC account. Students whose award has changed due to verification will be notified through an updated award letter indicating the changes to each and any award.

Deadlines — Students are responsible for submitting all required verification items by the established deadline included in the letter sent to the student. Failure to submit required documents by the deadline may forfeit Federal Financial Aid eligibility. Deadlines are established each academic year and are located on the Cambridge College Financial Aid Application and on the Cambridge College web site.

Ongoing Eligibility

- Students must re-apply every year at www.cambridgecollege.edu/applying-financial-aid
- Students must work consistently towards completing their degree in a timely manner, while making **satisfactory academic progress**.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) is a measure of progress toward the completion of a student's course of study according to Cambridge College standards and required by federal regulations. Students must meet these standards to maintain eligibility for federal financial aid. These standards apply to all federal financial assistance programs and to all students: full-time and part-time, undergraduate, and graduate, degree and certificate candidates. The Financial Aid Office measures student academic progress by calculating completed credits as a percentage of attempted credits after each term.

For Financial aid satisfactory academic progress policy, see www.cambridgecollege.edu/federal-financial-aid-student-satisfactory-academic-progress-sap. If you have any questions or concerns feel free to contact the director of financial aid.

Grants for Undergraduate Students

Pell Grant

Federal Pell Grants may be awarded to undergraduate students based on criteria established by the U.S. Department of Education. Students may receive Pell Grants up to 600% of Life Time Eligibility (LEU). This is calculated by the Department of Education. No repayment required.

SEOG

Supplemental Educational Opportunity Grants (SEOG) for undergraduate students range from \$200 to \$2,000. Preference is given to Pell Grant recipients with high financial need. No repayment required.

Loans for All Students

Federal Direct Loans

William D. Ford Federal Direct Loans are available to students who are enrolled at least half time. Federally subsidized loans, available to undergraduate students only, are based on financial need. Unsubsidized loans are available to all graduate students and to undergraduate students who do not qualify for subsidized loans.

First time borrowers on or after July 2013 cannot receive Subsidized Loans for more than 150% of the published length of the borrower's educational program.

The interest on subsidized Federal Direct Loans is paid by the federal government while students are enrolled. Students may pay the interest on Federal Unsubsidized Direct Loans while enrolled or allow the interest to accrue. Accrued interest will increase the principal amount of the loan and result in higher monthly payments. Repayment begins six months after a student is no longer enrolled at least half time.

Grad Plus

Grad Plus Loans, with a fixed rate of 7.08%, are available to credit-worthy students. If a student is denied on the basis of an adverse credit history, the student may obtain a credit-worthy endorser who will be responsible for the loan. The Grad Plus is available to students only after they have borrowed the maximum on the unsubsidized Direct loan.

Parent Plus

Parent PLUS loans, with a fixed interest rate of 7.08%, are available to credit-worthy parents of DEPENDENT students. If a parent is denied on the basis of an adverse credit history, the parent may obtain a credit-worthy endorser who will be responsible for the loan. If a parent is denied and cannot obtain an endorser, the student is eligible for additional Direct Unsubsidized funds. The Parent PLUS loan is available to students/parents only after they have borrowed the maximum on the Direct loans for dependent students.

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any funds refunded to the loan provider, and that, if the student has received federal student financial aid funds, the student is entitled to a refund of the moneys not paid from federal student financial aid program funds

How Loans are Calculated

Students may receive federal financial aid for direct costs of a degree or eligible certificate, including **tuition and fees**. **Courses outside of the degree requirements are not eligible for financial aid.**

Credits/Term

Federal financial aid awards are based in part on enrollment status: the number of credits taken each term. Federal guidelines are as follows:

Enrollment Status	Credits each term	
	Undergraduate	Graduate
Full time	12 or more	8 or more
At least half time	6 or more	4 or more

Credits earned through portfolios and exams are not counted toward the minimum number of credits/term.

Student Enrollment Data

The number of credits registered for, enrollment status, leave of absence, withdrawal, etc. is electronically downloaded to the National Student Loan Clearinghouse each term by the Registrar's Office. Student loan vendors receive this information directly to verify in-school status.

Other Educational Expenses Eligible for Financial Aid

Computer for new and continuing students — The cost of one computer for your academic program may be included in your first-year federal student loan. (See requirements under *Computer Use and Policies*.) **Wait until you receive your award notice to be sure you are eligible, before you buy your computer.** Or you can wait until you receive your financial aid refund check, which will include the loan amount for your computer.

If you buy a computer too soon, and find that you are not eligible for it, Cambridge College will not be able to assist you with funding.

If **continuing students** do not yet have a computer that meets the requirements and now you need one, please contact the Financial Aid Office to discuss your needs.

Standardized tests — Undergraduate students may take CLEP or other standardized exams for credit, or earn credits by portfolios.

Books and supplies — **These are a personal expense** until first-term charges have been paid and a credit balance appears on your account.

Room and board (Summer Institutes only)— Students may receive federal financial aid for room and board if residency is **required** to attend their academic program.

- Arranged by Cambridge College — If Cambridge College has contracted with a hotel, conference center or college to provide rooms for students, the reasonable cost of basic accommodations may be included.
- Arranged by students — If students elect to stay elsewhere, or if the College has not arranged for accommodations, students must pay all their expenses up front. They may submit receipts to be considered for reimbursement.

A printed receipt or lease agreement is required from the hotel or other rental agency, showing the amount paid, date, and student's name, before additional funding can be offered.

Transfer Credits

Prior transfer credits accepted are included in the credits earned in your first academic year. The number of terms allowed to complete your program is correspondingly reduced.

Grade Level

In accordance with federal guidelines for determining awards, undergraduate students are classified by grade level. For example, students are classified as first year until they have completed 30 or more credit hours.

Prior Student Loans

Students enrolling in eligible degree programs may be eligible for in-school deferment of prior student loans. Please contact the *Registrar's Office* if you have questions.

Scholarships

Cambridge College Scholarships

Cambridge College scholarship funds, provided by donors and College general funds, are awarded only through the Office of Financial Aid. The College reviews all undergraduate and graduate students enrolled in degree and certificate programs for scholarship eligibility, based on the following criteria:

- Completion of the annual Free Application for Federal Student Aid (FAFSA) for all need based scholarships. (see www.cambridgecollege.edu/financial-aid/applying-financial-aid).
- Continuing students must meet "Satisfactory Academic Progress" requirements.
- Students must be in compliance with the College's Code of Student Conduct.
- Students must demonstrate financial need where necessary — based upon the Expected Family Contribution on the FAFSA.
- Students must meet any other requirements as set forth by the donor.

Scholarship information is available at:

- www.cambridgecollege.edu/financial-aid-resources/scholarships
- Financial Aid tab on the MyCC web portal which is accessible to students once they have been accepted, have their student ID number, and set up their personal account.

Students who withdraw, cancel, become inactive, enroll less than full-time (when full-time enrollment is required for scholarship retention), or are suspended or dismissed from the College will lose their scholarship eligibility. Students who are classified under one of the above categories due to medical reason may appeal in writing to the Committee to have their scholarship reinstated. The appeal must be submitted in writing with supporting documentation.

For full policy, see www.cambridgecollege.edu/scholarship-awarding-and-administration-policy

Finding Outside Scholarships

A trip to your local library and to the Internet requires some work on your part (applications, essays, etc.), but a few hours of your time could yield valuable information and lead to additional funding for your education. Learn more and get started at www.cambridgecollege.edu/financial-aid-resources/scholarships

Other Financial Aid Resources

Alternative Loans

For more information and to apply for alternative loans please go to www.elmselect.com

Military Personnel

Veterans may be eligible for G.I. Bill® assistance. Information is available from the Cambridge College Student Affairs Office or from your regional Veteran's Administration Office. Go to www.cambridgecollege.edu/resources/veterans-benefits

Federal College Work Study

These funds provide part time employment to students to help meet educational expenses; eligibility is based on financial need. Internship sites may be considered for off-campus work study opportunities. For more information and current opportunities, go to www.cambridgecollege.edu/financial-aid/work-study

State Aid

Cambridge College students are encouraged to research financial aid opportunities in their own states.

Massachusetts State Scholarships

Massachusetts residents pursuing undergraduate degrees may be eligible for the Mass State Grant or other state funding. The maximum award amount varies, depending on state funding. The application (FAFSA) must be filed before May 1 for consideration for the following academic year. Students must be full-time to receive state grants. Go to www.cambridgecollege.edu/grants.

Tax Benefits

Various tax benefits are intended to help students and their parents, as well as all working Americans, to fulfill a variety of educational objectives. For information, go to www.cambridgecollege.edu/financial-aid-resources/other-financial-aid-resources

How Funds are Disbursed

Financial Aid Award Letter

Your award letter will be mailed to your home address, and you can view your award information on the *MyCC portal*.

Awards and Disbursement

Loans are prioritized and disbursed according to the number of terms enrolled. In accord with federal policy, financial aid awards are posted to students' accounts at Cambridge College, not directly to students themselves. Once the College receives the loan disbursement from the government, the College credits the student's account. Any federal funds in excess of current charges may be refunded to the student after term charges have been paid, pending any change of enrollment status.

Schedule of Disbursement

The initial posting of financial aid begins one week after the add/drop deadline each term, and weekly thereafter.

Refunds and Excess Funds — Title IV

Students must wait for awards to be credited to their student accounts. Any federal funds in excess of current charges may be refunded to students after term charges have been paid, pending any change of enrollment. Any excess funds are refunded within 14 business days after the disbursement is credited to a student's account (14 days after the add/drop deadline, if credited earlier). Students will receive email notification of their eligibility and will need to choose how to receive the funds. Students must create an account with Tuition Management Services on cambridgecollegechoice.edu and then select refund method: direct deposit or Cambridge College Discover prepaid card. Before calling the Financial Aid or Bursar's Offices, students may access their accounts on the website by logging on to the MyCC portal. Student ID and PIN will be needed.

According to federal tax laws, these refunds are regarded as taxable income. Careful records should be kept and all the income must be reported on your income tax return.

Repayment Process and Loan Rehabilitation

Exit Counseling

All borrowers of federal student loans must complete federally mandated exit counseling when graduating or dropping to less than half-time enrollment status. Exit counseling prepares students for re-payment. Students must do the exit counseling in its entirety, with complete and correct information; otherwise the degree, diploma, and official transcripts will be withheld.

To complete the exit interview online, go to www.studentloans.gov, and click on Exit Counseling.

Loan payments may be necessary long after graduation. Federal authorities pay careful attention to student loans; defaulting on federally subsidized loans is a serious offense. With careful planning, students should be able to enjoy the rewards of their study at Cambridge College without being overburdened by payments.

Loan Default and Rehabilitation

Current and former students with an outstanding balance on a defaulted loan, who have not made satisfactory arrangements for payment, will not receive official or unofficial transcripts.

Defaulted Direct and Perkins (and Stafford) loan borrowers are eligible for rehabilitation and restoration of Title IV eligibility. Borrowers may regain eligibility after six on-time consecutive monthly payments; however, the loan is still in default. Once twelve such payments have been made, a federal loan is removed from default, or “rehabilitated”. Defaulted borrowers must request rehabilitation. In the case of borrowers who have a judgement rendered on their loan, borrower payments must be “voluntary” — equal to the amount required under the judgement.

Federal Financial Aid Withdrawal

Leave of Absence or Withdrawal

Students who need to withdraw or take a leave of absence from Cambridge College may do so for academic, disciplinary, personal, or medical reasons. If the student is receiving federal financial aid and withdraws from the College, Life Time Eligibility (LEU) they may be subject to federal financial aid return policies. **Students must notify the Financial Aid Office about any change** in planned period of enrollment, whether due to drop/withdrawal from a class, leave of absence, a change in academic division, or withdrawal from the College.

Non-Attendance (No-Show)

Non-attendance does not constitute official withdrawal. If a student who began attendance and did not officially withdraw fails to earn a passing grade in at least one course over an entire term, the College must assume that the student has unofficially withdrawn. For this purpose, non-passing grades are defined as No Credit/Incomplete (NCI), No Credit (NC), Withdrawal (WD), Administrative Withdrawal (AW), No Show (NS). Unofficial withdrawals will be determined within 90 days of the end of the term. Federal financial aid recipients will have their awards reviewed and recalculated, resulting in a reduction in federal financial aid awarded.

Return of Title IV Aid

The Financial Aid Office, is required by federal statute to recalculate Title IV financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a term.

- **Recalculation** is based on the percentage of earned aid using the following Federal Return of Title IV funds formula: $\text{Percentage of earned aid} = \frac{\text{number of days of the term completed up to the withdrawal date}}{\text{total days in the term}}$. For unofficial withdrawals, the withdrawal date used for aid recalculation is the midpoint of the term. Any break of five days or more is not counted as part of the days in the term.
- **Funds are returned to the appropriate federal program** based on the percentage of unearned aid using the following formula: $\text{Aid to be returned} = (100\% \text{ of the aid that could be disbursed} - \text{percentage of earned aid}) \times \text{total amount of aid that could have been disbursed during the term}$.

- If a student earned less aid than was disbursed, the College is required to return a portion of the funds that have been received by the student. Keep in mind that when federal Title IV funds are returned, **the student may owe a balance to the College**. If a student earned more aid than was disbursed, the College would owe the student a post-withdrawal disbursement which must be paid within 120 days of the student’s withdrawal.

Repayment

Repayment of Federal Funds

Students receiving federal financial aid who withdraw from the College or stop attending all classes during a term before more than 60% of the term has elapsed, are subject to specific federal regulations.

The amount of Title IV aid that you must repay is determined by the federal formula for return of Title IV funds as specified in Section 484B of the Higher Education Act.

The amount of Title IV aid that you earned during the term before you withdrew is calculated by multiplying the total aid for which you qualified by the percentage of time in the term that you were enrolled (college work-study not included).

Your disbursement or repayment owed:

- If less aid was disbursed to you than you earned, you may receive a late disbursement for the difference.
- If more aid was disbursed to you than you earned, you will be billed for the amount you owe to the Title IV programs and any amount due to the College resulting from the return of Title IV funds used to cover College charges.

Cambridge College will return the unearned aid to the Title IV programs as specified by law:

1. Unsubsidized federal loans
2. Subsidized federal loans
3. Federal Perkins loans
4. Federal PLUS loans
5. Federal Pell Grant
6. Federal Supplemental Educational Opportunity Grants (SEOG)

Repayment of Massachusetts Funds

Students who have received financial aid from the Commonwealth of Massachusetts are subject to the following repayment/refund policy.

The amount of aid you earned during the term before you withdrew is calculated by applying the federal formula for return of Title IV funds:

- If you also received federal Title IV aid this term, then the percentage of Massachusetts aid earned is the same as the percentage of Title IV aid earned.
- If you did not receive Title IV funds, the College shall use the federal formula for return of Title IV funds to determine the percentage of Massachusetts aid earned.

The following are then applied to your tuition fees:

- The amount of state and federal aid earned (see above).
- All other sources of financial aid.
- All scheduled cash payments.
- The unearned portion of state financial aid.

The result is your remaining unpaid balance of tuition charges and mandatory fees.

Note: the College cannot make any unauthorized post-withdrawal award and/or disbursement of state financial aid to cover this balance.

Your disbursement or repayment owed:

- If the remaining balance is greater than or equal to the unearned state aid, then additional state aid can be “earned” by a student that equals 100% of unearned state aid.
- If unearned state aid is greater than the unpaid balance, then additional earned state aid has to be equal to the value of the remaining balance.

You will be billed for any amount you owe to Massachusetts financial aid programs and any amount due to the College resulting from the return of Massachusetts funds used to cover College charges.

Cambridge College will distribute the remainder of unearned state aid back to Massachusetts financial aid programs as specified by law.

1. Tuition waiver (need based and categorical)
2. Massachusetts No Interest Loan
3. Tomorrow’s Teachers Scholarship
4. Commonwealth Futures Grant
5. General Scholarship (Mass Grant)
6. Performance Bonus
7. Christian Herter Memorial Scholarship
8. Gilbert Grant
9. Public Service Scholarship
10. Cash Grant (Access Grant Scholarship)
11. Part Time Grant

Excess Funds

In accordance with federal regulations, excess funds from federal financial aid, over and above current charges, cannot be held without written authorization from the student.

Academic Advising, Policies, and Procedures

Academic Standards and Expectations

Academic Affairs prides itself in providing students with excellent instruction and outstanding opportunities for career development and enhancement. We are committed to maintaining an environment that is supportive of your academic needs, and conducive to your creative development as a student.

The provost and the Office of Academic Affairs maintain academic standards and policies that promote the achievement of professional goals. Working through four distinct schools that comprise the essence of Cambridge College, we endeavor to meet your academic needs through a variety of academic programs and services. Our doors of opportunity are open and waiting for you to join us on a horizon-broadening adventure.

Cambridge College reserves the right to change academic policies including course structure, availability, content, or requirements solely at its own discretion as it deems necessary and appropriate.

Academic Advising

Students arrive at Cambridge College with an idea of what they want to accomplish. Some will know how to assimilate into the college experience without much need for help. Others will need to consult, ask questions, make sure they are on the right path, and learn to read the signs of success. No matter which type of student you are, we think that when students discuss plans and get advising along the way, there is a greater likelihood for success.

Cambridge College builds an academic advisor into each of its schools and programs:

- In the School of Undergraduate Studies, the Undergraduate Academic Advising Office provides academic advisors and an academic success program for students.
- The School of Education provides academic advisors for its graduate students. Program chairs serve as the primary advisor and site coordinators provide additional support.
- The School of Psychology and Counseling has an academic advisor for all graduate students. Program Chairs are available for further academic advising support.
- The School of Management provides an academic advisor for its graduate students.
- In the New England Institute of Business, under the Dean of Academic and Student Affairs, Academic Advising is done by the Program Chairs for each program while the Student Advising team offers individual support for student scheduling.

These skillful advisors can provide information, help arrange appropriate course schedules and build professional networks. There are systems to get used to, course loads to manage, forms to know about and deadlines to keep. Advisors can help, but so can program chairs, academic deans and office administrators - the College supports students with the right people providing useful questions and answers.

Course Registration

Registrar's Office • 617.873.0101 • registrar@cambridgecollege.edu •
www.cambridgecollege.edu/academic-policies-procedures/course-registration

Students Seeking Degree/Certificate

(Matriculated)

NEW Students

- 1 Complete your admissions file and be accepted.
- 2 Get academic advising to be sure to register for the right courses.
- 3 **Register online** — On the MyCC web portal homepage, log in with your user name (student ID) and password, and follow online instructions to register.

If you forget your password, go to the MyCC homepage and click on "I forgot my password" and follow instructions online.

For assistance with registering, please call the Registrar's Office.

CONTINUING Students

- 1 Contact your academic advisor to plan next term's courses.
- 2 Register online when web registration opens. (Clear any holds on your account).

IMPORTANT NOTES

Registration is first-come, first-served. There is no waitlisting. Courses or sections may be canceled due to underenrollment or closed because of class size limits. Students who find an anticipated course is closed or cancelled should contact the Financial Aid Office immediately to find out whether their eligibility for financial aid is affected.

Students are responsible for following their academic program.

Students must not register for courses outside their academic program, as financial aid eligibility may be lost and graduation jeopardized. Courses taken outside a student's program of study are the personal financial responsibility of the student.

Holds and Registration — A restriction, or "hold", may be placed on a student's record for admissions, academics, graduation, business, financial-aid, disciplinary or immunization reasons. A hold may prevent a student from registering for courses. If a hold is placed on a student record, then when the student enters their user ID and password into MyCC, the student will see a description of the hold and contact information, so that the student can remedy the situation. Registration will not be possible until all holds are reconciled and removed. See full policy at www.cambridgecollege.edu/student-holds-policies-and-procedures.

How Many Credits to Register for:

	Minimum eligible for financial aid	Maximum registration limit*
Undergraduate	6 credits/term	15 credits/term (12 credits in summer)
Graduate	4 credits/term	12 credits/term

* The online registration system limits course registration to the maximum shown above. Exceptions require prior written approval from an academic advisor and academic dean, and are rare.

Online and Hybrid Courses — Online courses are offered each term. Students may select online and/or hybrid courses to complete their degree requirements in most programs. International students are restricted to registering for just one online course each term.

Hybrid courses combine online and in-seat residency in a single course, and are therefore considered in-seat and not online.

Repeat Courses — Students may repeat a course twice. See policy at www.cambridgecollege.edu/repeat-courses.

Students Returning After Absence — Before registering:

Students enrolled in a degree or certificate but not registered and taking courses are considered "**absent**" that term or year.

Students absent fewer than five years must visit the Registrar's Office to complete a Reinstatement form.

Students absent for five years or more need to re-apply to a program that is currently offered, submitting all materials to the Admissions Office. They must meet all current admission and academic program requirements.

Please be aware that some programs may no longer be available. Your academic advisor or the dean can assist you to find a program that may accept much of your earlier course work, and help you map out your remaining course work.

See policy at www.cambridgecollege.edu/returning-student-policy

Auditing Courses — Courses which are audited do not count towards degree requirements and cannot be converted to credit at a later date.

Individuals wishing to audit a course must contact the Registrar's Office to verify that the course is available for auditing. Practicum and internship courses may not be audited. Once registered, the individual should consult with the course instructor at the first class to discuss expectations for class participation.

No financial aid is available for auditing courses. Please note that financial obligations will be incurred for an audited course unless the course is dropped before the add/drop deadline.

“Holds” That Hinder Students From Registering

Financial Holds

FA Financial Aid Hold: Student Financial Services

Phone: 617-873-0403
Fax: 617-873-0270
SFS@cambridgecollege.edu

Reasons for hold: There are missing documents from your financial aid file and/or your financial aid is still in process. Please check your account online to see what is needed to finalize your financial aid award.

BO, BR Business Office Hold or Business Registration Hold: Student Financial Services

Phone: 617- 873-0403
Fax: 617-873-0270
SFS@cambridgecollege.edu

Reasons for hold:

- You have a balance with the College which must be paid.
- You have a payment plan; the balance must be paid before the hold will be removed.
- You have third party billing in effect and payment may be due.

Students receiving Veterans Affairs assistance will not be subject to financial or business holds due to the delayed disbursement of VA funding. For the full policy, see *Military Students-Veterans and Active Duty* on page 56 or visit <https://www.cambridgecollege.edu/resources/veterans-benefits>.

Academic Holds

Students should speak with their academic advisor or regional site director to discuss and resolve an academic hold.

AB Academic Hold - Bachelors

School of Undergraduate Studies617-873-0547

AE Academic Hold - Education (Graduate)

School of Education617-873-0130

AP Academic Hold - Counseling Psychology (Graduate)

School of Psychology and Counseling.617-873-0248

AM Academic Hold - Management (Graduate)

School of Management617-873-0424

Academic Hold - CAGS - School of Education or School of Psychology and Counseling (see numbers above)

Other Holds

GP Graduation Clearance Pending Hold: Registrar’s Office

Phone: 617-873-0101
Fax: 617-242-0026
registrar@cambridgecollege.edu

Reasons for hold: The Registrar places a GP hold on your record when you submit an Intent to Graduate form for the upcoming graduation, and it ensures that you will be among the students audited for graduation. This hold will be removed at the close of the Registrar’s graduation clearance for the current term. Hold is applied shortly before online registration for the following term opens, and it will prevent you from registering. If you do not intend to complete your degree program requirements this term, please update your anticipated graduation date with the Registrar’s Office, which can remove the hold so that you may register for the upcoming term.

IN International Hold—I-20 Form: International Student Office

Phone: 617-873-0142

Reasons for hold: This hold will be removed and the student will be allowed to register for courses once the DSO has met face to face with the international student and has given the student the I-20 form.

If you attend a Regional Center outside Boston, Massachusetts, and need additional information, please contact the site director for assistance.

Non-Matriculated Students

See policy at www.cambridgecollege.edu/college-policies.

A non-matriculated student is a student who is not enrolled in a degree or certificate program.

Non-matriculated students may register for most in-seat, hybrid and online courses; they may audit courses as well. However, the College reserves the right to restrict access by non-matriculated students to particular courses.

To get the full benefit of the course work, any course prerequisites must be met. The prior education and experience required for the corresponding degree are recommended.

Please fill out a paper Non-Matriculated Students Registration form

which is available at the Registrar’s Office or www.cambridgecollege.edu/academic-policies-procedures/course-registration.

Students not matriculated into a degree or certificate program at Cambridge College are allowed to take **up to nine credits** for credit without applying for and enrolling in a degree or certificate program. Students should seek advisement from the academic dean of the school in which they are taking courses. Certain exceptions based on program, alumni status or location may apply.

Acceptance of credits into a degree or certificate — Courses completed at Cambridge College by students not enrolled in an academic program may be evaluated for acceptance into Cambridge College programs by the dean or program chair of the receiving program. There is no guarantee that courses taken as a non-matriculated student will be accepted into an academic program at Cambridge College.

Adding and Dropping Courses

See policy at www.cambridgecollege.edu/add-drop-policy

ONLINE Process BEFORE Add/Drop Deadline

Students may **ADD or DROP a class by the add/drop deadline** listed in the Academic Calendar for the term. Log in to the MyCC web portal and click on the Student Registration tab; click on add/drop courses.

Repeat classes and project completion classes (e.g. Independent Learning Project Graduate Management Capstone) require *paper* Add/Drop forms.

PAPER Process AFTER Add/Drop Deadline

Submit a **paper form** to the registrar, with all required signatures.

Get forms at the Registrar's Office, your local Cambridge College office, or at https://www.cambridgecollege.edu/sites/default/files/file_uploads/reg-adddrop.pdf.

You may register for additional courses before the first class if space is available and school policies are satisfied. Faculty signature is also required to add a course if the course is full.

However, courses added after the add/drop deadline may be subject to a late registration fee.

Dropped courses will appear on your student record as follows:

- Courses correctly dropped before add/drop deadline or before course starts will not appear on your record.
- Grade of Withdrawn (WD) — Completed form received **after course started**, after the add/drop deadline.
- Grade of No Show (NS) — Marked as never attended by the instructor, and Registrar's Office has not received form.

Important: With grades of Withdrawn and No Show you remain responsible for tuition.

Dropping a class from the New England Institute of Business —

If you decide to drop a course, it is your responsibility to notify the NEIB Registrar in writing.

You may contact the NEIB Registrar's Office by:

- E-mail: robert.wagstaff@cambridgecollege.edu
- Fax at 508-905-5506, Attention: Associate Registrar
- Regular Mail:
New England Institute of Business,
111 Devonshire Street, Suite 200
Boston, MA 02109, Attention: Associate Registrar.

Please Note

- Adding or dropping courses may impact your financial aid.
- Students dropping courses after the add/drop period may be held financially responsible for the course tuition.. (See *Payment and Refunds* on page 13).
- **No verbal or telephone "drops" or "adds" permitted.**
- Students must register for a class or add it as described above. Student names hand-written in to a class roster are **not** thereby registered. Unregistered students cannot attend class or receive academic credit without the written permission of the Dean. See *Class Rosters* policy at www.cambridgecollege.edu/class-rosters.

Academic Policies and Procedures

Registrar's Office • 617.873.0101 • registrar@cambridgecollege.edu •
<https://www.cambridgecollege.edu/resources/academic-policies-procedures>

Academic Integrity, and Classroom and Field Experience Conduct

Cambridge College students are expected to meet high academic and ethical standards as they engage in experiences of genuine learning. By enrolling in the College, each student agrees to follow all College policies including the academic integrity policy and the Student Code of Conduct. The Student Code of Conduct describes expectations for all students as well as disciplinary procedures and appeals process. See <https://www.cambridgecollege.edu/student-rights-complaints-grievances/student-code-conduct>.

Federal Credit-Hour Definition

Federal regulation defines a credit hour as an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutional established equivalence that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one term or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Student Class Attendance

Cambridge College expects students to attend all regularly scheduled class meetings. Students are responsible for adhering to course attendance/participation as outlined in the course syllabi. Attendance and active participation in class (including active participation in group projects and online courses) are essential components of the learning process, and are important factors in student success.

Instructors may adjust course grades due to unexcused absences or failure to participate, provided this is clearly stated in the course syllabus.

In all cases, including courses taught online, course requirements (exams, presentations, group projects, labs, reports, participation in discussion, and all other types of coursework assigned) are not waived due to class absence. Alternate or additional work may be assigned at the instructor's discretion. See <https://www.cambridgecollege.edu/academic-policies-procedures/attendance>.

Academic Progress and Probation

Satisfactory Academic Progress

The Financial Aid Office measures student academic progress by calculating completed credits as a percentage of attempted credits after each term.

Cambridge College undergraduate students must maintain a cumulative grade point average of 2.0 to be considered as making satisfactory academic progress.

Cambridge College graduate students must maintain a cumulative grade point average of 3.0 to be considered as making satisfactory academic progress.

Academic Probation

Academic probation is an official warning issued by the Dean's office when a student falls below satisfactory academic progress (2.0 GPA at the undergraduate level; 3.0 at the graduate level). A student who has been placed on academic probation will be closely monitored over subsequent terms of enrollment. A student's continued lack of satisfactory academic progress may result in suspension or dismissal from their academic program.

Procedures: (specific procedures may be subject to periodic change)

If the Dean of the relevant school determines that a student will be placed on academic probation, a Notice of Academic Probation will be issued by the Dean's office. The student must adhere to the following protocol upon notification:

- The student must meet their academic advisor within two weeks of receiving the notice of academic probation to discuss the notice of academic probation and its implications, and to develop a plan for academic success.
- **International students** must also meet with the Office of International Student Services or designee immediately upon receiving the notification of academic probation to discuss potential visa ramifications.

A copy of the notification of academic probation is given to the Registrar's office for inclusion in the student's file. A student placed on probation for lack of satisfactory academic progress will remain on probation until their GPA reaches 2.0 (undergraduate) or 3.0 (graduate).

A student may appeal the probation or suspension decision, in writing, to the Provost or designee. The appeal should be made within five business days after receiving the probation/suspension notice and should include a clear explanation and documentation to support the appeal. The Provost or designee will make a decision within five business days of the receipt of the appeal. The decision by the Provost or designee is final.

Change of Academic Program/Major, or School

When thinking about changing your program, your course load, or enrollment status, **seek advising**. We recommend students check with their academic advisor or seminar leader, the Financial Aid Office and Registrar's Office to learn about the academic and administrative procedures needed.

Within One School (for example, changing from one School of Education master's program to another) — Students must complete the Change of Academic Program form in consultation with the program chair, and obtain all required signatures.

To a Different School (for example, from the School of Education to the School of Management) — Students must re-apply to the school offering the program to which they desire to change. They must submit a new application and all materials to the Admissions Office, meet all current admission requirements, and be approved for admission.

Students must consider carefully and explore the financial and academic implications:

- Meet with your current academic advisor, the chair of your new program, and the academic dean to discuss the change and get approval.
- A different program may have additional program-specific admission requirements, and may require additional courses, time, effort, and expense.
- You will be required to meet the requirements of your new program that are current at the time of your program change.
- Courses you have already completed may not be accepted into a different program.
- Transfer credits accepted may differ.
- Financial aid rules and awards may differ.

Note: all students receiving financial aid must see a financial aid officer before making any program change, or any changes in the total number of credits taken in a term.

Students who do not receive financial aid are encouraged to meet with the bursar to address financial implications of their change.

Internal Course Substitutions (All Schools and Programs)

The institution reserves the right to substitute one course for another in any degree program. Internal substitutions are only authorized by the academic dean or the provost.

Course Waivers

Additional courses must be taken to make up the credits for courses accepted for waiver. See your academic advisor.

School of Undergraduate Studies — Some required courses may be waived if mastery of the learning outcomes is demonstrated by the successful completion of comparable coursework from a previous, regionally accredited college or university. Eligibility for waiving a required course or courses will be determined by the student's advisor in conjunction with the academic program chair and/or academic dean. Essential skills courses in writing and mathematics may only be waived if a student has successfully completed previous college-level work in those areas, and a standardized assessment, administered by the College, indicates appropriate competencies.

School of Education — Required licensure courses may be waived if mastery of the learning outcomes is demonstrated by successful completion of comparable coursework from a previous, regionally accredited college or university. Other required courses may be waived if students demonstrate comparable graduate learning. Eligibility for waiving a required course will be determined by the program chair with subsequent approval by the dean.

School of Psychology and Counseling — Course waivers are typically requested along with evaluation of transfer credit. (See *Transfer of Credit* on page 48.) Other courses must be taken in place of any credits waived.

School of Management — Required courses may be waived if students demonstrate comparable graduate learning. Some essential skills courses may be waived if mastery of the learning outcomes is demonstrated through assessments administered by the College. Additional management courses must be taken in place of any credits waived. Contact the dean of the School of Management.

New England Institute of Business at Cambridge College — Under certain circumstances, students' needs and program requirements differ. In such cases, a student may apply for a course waiver to take an elective in place of the requirement. This is accomplished by contacting the Registrar's Office. The request is followed up in writing to the Dean of Academic Affairs for approval. Once approved, the document becomes a permanent part of the student's record. (Up to 12 credits may be waived.)

Courses Taken at Other Institutions After Matriculation

Undergraduate — Only the following may be accepted into the School of Undergraduate Studies while a student is enrolled in the program.

- Courses needed for graduation that are not offered within two terms of the anticipated graduation date.
- Electives not available at Cambridge College that are pre-approved by the undergraduate dean or program chair.

Written approval from the academic advisor and undergraduate dean is required.

Graduate — Courses taken at other institutions while a student is enrolled in a Cambridge College master's degree program may not be transferred towards that degree. Special exceptions may be considered with the academic dean's approval.

Leave of Absence or Withdrawal

Students considering leave of absence or withdrawal are urged to see the Student Financial Services Office before leaving the College in order to arrange payment of any outstanding balance. Students who have received financial aid must contact the Financial Aid Office.

Cambridge College policy and procedures regarding withdrawal or leave of absence can be found at <https://www.cambridgecollege.edu/academic-policies-procedures/leave-absence-or-withdrawal>. Students must consult applicable policy and procedures in case of any questions regarding this withdrawal or leave of absence. Students can always contact the dean of students with further questions.

Grades and Grading

See policy at www.cambridgecollege.edu/academic-policies-procedures/grades-and-grading-policy

Faculty have discretion over grades. Grades are based on performance in relation to learning outcomes listed on each course syllabus.

Grade Entry—No one other than instructors may enter final grades using the MyCC web portal. If instructors are unable to enter grades through the portal, they are to forward a grade list to the Registrar's Office for entry. In the event that an instructor fails to submit grades to the College, the provost may assign the dean of the school in which the instructor teaches to issue (or change) the missing grades.

General Definitions and Policies

Grade Point Value

Grade			Grade		
Letter Grade	Point Value	Numerical Range	Letter Grade	Point Value	Numerical Range
A	4.0	93-100	C+	2.3	77-79
A-	3.7	90-92	C	2.0	73-76
B+	3.3	87-89	C-	1.7	70-72
B	3.0	83-86	D+	1.3	67-69
B-	2.7	80-82	D	1.0	60-66
			F	0.0	0-59

Credit (CR) is a grade denoting content competence.

- Undergraduate programs — equivalent to D or better.
- Graduate and post-graduate programs — equivalent to B or better.

No Credit (NC) means that the student has not met expectations and that the academic work will not be counted toward degree requirements. Students who receive a grade of "No Credit" in a required course or seminar are required to repeat the course or seminar. In general, reasons for a grade of "No Credit" include:

- Lack of class attendance — absent for more than four hours of class time.
- Required work not completed to the instructor's standards.
- Failing grades on required work.

Students incur financial liability for courses attempted whether or not credit is awarded.

No Show (NS) indicates that a student did not attend a class and/or did not formally withdraw from the course. The student remains financially liable for the tuition.

Changes in Grade — Grades (including CR) are considered to be final unless a clerical or procedural error has been made. If there are discrepancies, please contact the instructor and/or the Registrar's Office.

Undergraduate Grades

Grades of "Credit" or "No Credit" are awarded only for portfolios, challenge exams, standardized exams, seminars, and skill development courses.

Graduate and Post-Graduate Grades

Graduate and post-graduate programs award passing grades of B or better. Coursework below B receives a grade of "No Credit". Grades of "Credit" or "No Credit" may be an option for students in specific courses.

Incompletes (INC)

An incomplete grade (INC) may be granted by an instructor if the student has satisfactorily completed $\geq 67\%$ of the required work for the course, and the instructor has agreed to consider pending work for submission before the end of the following term. Students have **one term** after receiving an INC to submit outstanding work. INC's that are not converted to a grade after one term will be converted to a grade of NCI (No Credit Incomplete) or a letter grade, assigned by the instructor, consistent with the work previously submitted for the course. NCI grades are factored into a student's GPA as 0.0.

Note: Granting an incomplete is a privilege afforded to the student, not a right. If an instructor agrees to grant an incomplete, an "Incomplete Course Work Agreement" form, which clearly states the work needed and the timeframe in which it must be delivered, must be signed by both the student and the instructor.

Academic Support for Students With Incomplete Grades

At the end of each term, students who have two or more Incomplete grades on their grade report will receive an "academic hold" on their account. Before they can register for the next term, these students must:

- Meet with their faculty advisor. International students must also meet with the international student advisor.
- Meet with course instructors, complete their coursework satisfactorily, and clear the Incomplete grades.

Incomplete Final Project

Graduate (Independent Learning Project/Independent Research Project/Advanced Research Project, Graduate Management Capstone): If students do not complete the final project by the deadline within the term in which they registered for it, a grade of **Permanent Incomplete (PIN)** is assigned and cannot be changed to a grade thereafter. Students must register for the project completion course for their program (e.g. 801 for ILP/IRP, and 699 for Graduate Management Capstone) in order to complete their project and degree.

Students have up to three years from the expected graduation date (based on entry date and length of program) to complete and have the final project (ILP/IRP/ARP/Graduate Management Capstone) approved. An extension may be granted by the student's academic dean. If the original faculty advisor is not available, the academic dean will assign another faculty member to supervise the completion of the project.

Undergraduate: If the Capstone is incomplete, students have one term to finish the work and have the Incomplete grade changed to a letter grade. If the Capstone is still incomplete, the student must register in the next term for the Capstone completion course in order to receive a grade. For example, students who get an Incomplete grade in BHS490 and do not finish it in the following term must register for BHS491 in the next term. An Incomplete for a Capstone course will be changed to a Permanent Incomplete (PIN) if it is not changed to a passing grade within the following term.

Students should be aware that there are fees associated with incomplete final projects. See *Tuition and Fees Rates* on page 17.

Satisfactory Academic Progress

Students must make satisfactory academic progress to continue at Cambridge College as well as receive financial aid. Student records are reviewed at the end of each term. (See policy at www.cambridgecollege.edu/federal-financial-aid-student-satisfactory-academic-progress-sap.)

Student Records

FERPA — Student Records Access and Confidentiality

In compliance with the Family Educational Rights and Privacy Act (FERPA), the complete Cambridge College student records access and confidentiality policy can be found at <https://www.cambridgecollege.edu/academic-policies-procedures/student-records>

Change of Name, Address and Contact Information

When registering online each term, students are asked to confirm or update some personal information including their mailing address and contact information.

Students receiving federal financial aid are legally required to give their name as registered with Social Security.

Students wishing to change their names must provide legal documentation showing the reason for the change, as well as a written version of the new name. Acceptable documents include marriage certificates, divorce papers, passports, social security cards, and other court-issued documents. Students should send the request in writing and include their student ID number and/or social security number if ID number is not known. Once a student graduates the record is closed; name changes are not possible unless the student is reapplying for a new degree.

Transcripts

Students may request their official or unofficial transcripts from the Registrar's Office at any time. If students are receiving financial aid, official transcripts are held until all funds have been received.

Official transcripts for graduating students are not released until after the degree conferral date, when their academic record has been cleared for graduation and their accounts are paid in full and cleared by the Bursar's Office. Student transcripts are kept permanently.

Go to www.cambridgecollege.edu/offices/registrar to get the Transcript Request form. The completed form must be accompanied by full payment (see *Tuition and Fees Rates* on page 17 for cost).

Verification of Degree or Enrollment

Cambridge College has authorized the National Student Clearinghouse to provide verifications. The Registrar's Office does not provide verifications over the phone. If you are an employer or background screener, you may contact the National Student Clearinghouse's DegreeVerify service by web or by mail.

Web: www.degreeverify.org

Mail: National Student Clearinghouse
2300 Dulles Station Boulevard, Suite 300
Herndon, VA 20171

Educator Licensure/Certification Verification

State program verification forms are processed by the Office of the Dean of the School of Education. Forms cannot be completed until the graduating student's conferral date.

Graduation

Preparing to Graduate

• Grades Required

Undergraduate students must successfully complete all components of their academic program with grades of D or better, or Credit. A cumulative grade point average of 2.0 (letter grade of C) is required for all undergraduate courses completed at Cambridge College.

Graduate students must earn grades of B or better for successful completion of all graduate courses counted towards degree completion, with a cumulative grade point average of 3.0.

- **Intent to Graduate form** — Students planning to graduate must complete and submit to the Registrar's Office an Intent to Graduate form. It must be submitted during the term the student intends to graduate, by the deadline published in the academic calendar, in order for the student's academic record to be reviewed for graduation clearance. Students must meet with their academic advisor and review their academic plan to ensure that all program requirements will be completed by the end of the term. The Intent to Graduate form can be found on the *Student Forms* webpage.

Registrar Clearance for Graduation

The registrar will review records of students who have submitted the Intent to Graduate form by the deadline.

Candidates who have completed all academic requirements are notified by the Registrar's Office via Cambridge College email. Their academic records are closed and the degree conferral date is placed on their final transcripts. Candidates who have not satisfied the academic requirements are informed via Cambridge College email of their status and next steps.

Degree Conferral

The College has three conferral dates for graduation, in January, June, and August. A student who completes all academic program requirements and successfully completes the graduation clearance process may request an official transcript from the Registrar's Office at any time after the degree conferral date (see *Transcripts*.)

Diplomas

Diplomas are mailed to all students who have been financially and academically cleared within three months of the degree conferral date. Diplomas are mailed via U.S. mail to the address that is in the student database as of the commencement date. Diplomas that require tracking may be mailed by UPS by special arrangement, at the expense of the student.

If a hold is removed from the student's record after the original diploma mailing, the student must contact the Registrar's Office to arrange shipment of the diploma.

Student's Official Name — All name changes must be received, verified and processed by the Registrar's Office prior to the degree conferral date.

Replacement Diplomas — Students who need a replacement diploma must request it in writing, including their name, signature, student ID number, telephone number, and an up-to-date address. Replacement diplomas cost \$27. Students may include credit card information, or a check or money order made out to Cambridge College. The replacement diploma will be mailed via U.S. mail. Please note: all diplomas must show the student's name as of the degree conferral date.

Commencement Ceremony

One Commencement Ceremony is held each year in Boston, in June. Graduates who earned a degree from all Cambridge College locations are invited to participate. Students who confer in August or January are invited to the Commencement Ceremony the following June. (Certificate students do not participate in Commencement.)

Diplomas are not presented at the Commencement Ceremony, but are **mailed**.

"March Only" Conditions

Students may be allowed to "march only" in the Commencement Ceremony with the status of "participants" only, under the following conditions:

- All core requirements, including the final project (e.g. Capstone, Independent Learning/Research Project, Action Research Project) and required practicum and/or internship, must be completed and a passing grade documented in the student's academic record by the grade posting deadline.
- Six or fewer credits remain to complete the course of study; the credits are offered and completion is anticipated in the summer term.
- The student has registered for the summer term, for all remaining credits, and the registration has been processed.
- Exception by Provost, authorizing a student to march.
- A student must submit a Petition to March Only to the Registrar after registering and no later than April 11. The form is available at www.cambridgecollege.edu/registrar. Be sure to complete the second page (August Intent-to-Graduate form).
- No College written materials shall refer to the student as a Cambridge College graduate or otherwise imply that the student has satisfied Cambridge College graduation requirements.
- Students who have not completed graduation requirements cannot obtain a diploma and will not be given any written documentation that implies that they have graduated.

Transfer of Credit

Transfer Credit Office 617.873.0143 • transfercredit@cambridgecollege.edu •
www.cambridgecollege.edu/admissions/transferring-credits

Transfer credit requests, initiated by the student, are evaluated only on the basis of **official transcripts**. Students must submit a completed admissions application packet, including official transcripts and course descriptions/syllabi, if applicable.

How to Initiate Your Transfer Credit Request

- Please request official transcripts from previously attended institutions as soon as possible.
- If you have any grades not on the ABC scale, ask the course instructor to clearly state the letter grade equivalent in a letter on official college letterhead, addressed directly to the Cambridge College Transfer Credit Office.
- If requesting transfer of required courses into an M.Ed. or CAGS, fill out transfer request form (available at www.cambridgecollege.edu/admissions/transferring-credits) and attach course descriptions or syllabi. Photocopies of course descriptions or syllabi must clearly show the course number, title and description; name of the college, your name and date of birth.
- Have international transcripts translated and evaluated by an evaluation service listed on www.mass.gov/edu/government/departments-and-boards/ese/programs/educator-effectiveness/licensure/academic-prek-12/teacher/foreign-degree-and-credit-equivalency.html

Priority Dates

We must receive all documents for transfer credit evaluation (outlined above) by the following priority dates, in order to evaluate your transfer credit by the beginning of the term. Later submission will result in delayed transfer credit awards.

- By April 1 for Summer term.
- By July 15 for Fall term.
- By December 1 for Spring term.

Veterans and Military Students — The Transfer Credit Office adheres to the regulations and requirements outlined in the DoD Military Tuition Assistance Program. It recognizes, accepts and awards credit where appropriate; specifically credits earned through standardized examinations and from American Council on Education evaluated transcripts.

Evaluation Process

- The Transfer Credit Office reviews official transcripts and identifies all courses that meet the general criteria and may be eligible for transfer.
- Undergraduate academic advisors will create an academic plan which includes all eligible transfer credits that meet Cambridge College undergraduate degree/program distribution requirements. Based on the policy below, credits constituting an earned associate's degree will be accepted in total up to 69 credits. Credits outside of, or above and beyond an earned associate's degree, will be evaluated for transferability by the academic advisor.
- For licensure programs, specialized concentrations, CAGS and doctoral programs, the program chair reviews the content and approves courses that meet program-specific criteria.
- Final determination of the transferability and programmatic distribution of credit lies with the academic dean of the appropriate school.

In Your First Term

Graduate students — Do not take any course that you hope will be covered by a corresponding course that you have submitted for assessment. Wait until your transfer credit evaluation is completed.

Re-Evaluation of Transfer Credit

If you change concentration or program, you must request a new transfer credit evaluation.

When you return after an absence of one term or more, prior transfer credits are revised according to policies in effect at the time of your return.

Notice Concerning Transferability of Credits and Credentials Earned at Our Institution

The transferability of credits you earn at Cambridge College is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma, or certificate you earn in Cambridge College's educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree, diploma, or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Cambridge College to determine if your credits or degree, diploma, or certificate will transfer.

Undergraduate Transfer Credit

www.cambridgecollege.edu/transferring-credits/transferring-credits-undergraduate-programs

Student must be accepted into a specific degree and concentration for transfer credit to be evaluated. The following general criteria will guide the evaluation process.

Courses: General Criteria

- Course credits must be earned at a regionally or nationally accredited degree granting institution of higher learning.
- For courses not included as part of an earned associate's degree, only grades of C (2.0) or better are considered, and such courses must meet program distribution requirements;
- Professional development courses (PD) and continuing education units (CEU) are not eligible for transfer;
- Associate's degrees from regionally or nationally accredited institutions are accepted in their entirety at 60-69 term hours, including only the courses actually required for the degree.
- A maximum of 90 term hours from a regionally or nationally accredited degree granting institution of higher learning may be accepted, provided the coursework meets Cambridge College degree/program distribution requirements.
- Students must complete at least one-fourth of their undergraduate credits (30 term hours), including substantial advanced work in the major or concentration, at Cambridge College.

Standardized Examinations

- Credits earned through standardized examinations (DANTES, DSST, CLEP, FLATS and AP) may be accepted and will be recorded as transfer credits.
- Credits earned through school-specific testing are *not* eligible for transfer.
- Credits earned through standardized exams may replace major requirements only at the discretion of the program chair or academic dean.
- Students already matriculated into a Cambridge College program are advised to consult their academic advisor for written approval *prior* to taking any standardized exams. *Without prior approval, acceptance of credits is not guaranteed.*

ACE Evaluated Transcripts

Credits recognized through the American Council on Education (ACE) evaluated transcripts will be accepted at their full credit value as follows.

- Up to 60 lower level credits may be accepted, provided the coursework meets Cambridge College general education or elective distribution requirements.
- An additional 30 upper level credits may be accepted provided the coursework meets Cambridge College degree/program distribution requirements.
- No "V" or vocational credits will be accepted for college transfer credits.

Please Note

- Prior written approval by the undergraduate academic dean is required before taking courses at other institutions.
- As many as 18 transfer credits may be awarded for FLATS or other language equivalency exams.
- ACE evaluated and standardized exam credits may not duplicate a course taken at Cambridge College or at another institution.
- Electronic transcripts will be accepted from military branches that only provide electronic transcripts; i.e. Army (AARTS) transcripts which will transition to Joint Services Transcripts on January 1, 2013.

Articulation Agreements

Articulation agreements are partnerships between educational institutions which formalize their relationship to each other, and allow for the direct transfer of academic credit. Cambridge College has developed articulation agreements with community colleges and other associate's degree-granting institutions in order to expand the higher education opportunities for their graduates. These articulations are designed to maximize the students' educational experience by providing guaranteed admission into Cambridge College bachelor's degree programs, and accepting all credits constituting the associate's degree of an articulating partner.

Any additional credits earned above and beyond the associate's degree are subject to program distribution requirements (see above).

Cambridge College currently has articulation agreements with the following colleges:

Connecticut

- Asnuntuck Community College
- Capital Community College

Massachusetts

- Bunker Hill Community College
- Greenfield Community College
- Holyoke Community College
- Jewish Vocational School
- Mount Wachusett Community College
- Northern Essex Community College
- Quincy College
- Roxbury Community College
- Springfield Technical Community College
- Urban College of Boston

California

- Riverside Community College
- Chaffey College
- San Bernardino Valley College
- San Joaquin Valley College (SJVC)
- UCR Extension

People's Republic of China

- University of Jinan (students may be accepted at the Boston main campus only)

Master's and CAGS Transfer Credit

www.cambridgecollege.edu/transferring-credits/transferring-credits-graduate-programs

The student must be accepted into a specific degree and concentration for transfer credit to be accepted.

All Courses must meet the following criteria.

- Only graduate courses designed for graduate degree credit may be accepted.
- Courses completed at regionally accredited institutions authorized to grant graduate/post-graduate degrees may be accepted.
- Only grades of B (3.0) or better are considered.
- Other grades must be confirmed as equivalent to B or better.
- Courses must be degree credit-bearing graduate courses that are *not* professional development or continuing education unit courses.
- Courses must meet current program requirements.

School of Education: CAGS

CAGS transfer courses must be advanced graduate level; courses open to undergraduate students are not accepted.

Courses NOT Acceptable for master's or CAGS transfer credit:

- Course work taken at other institutions after enrollment in a Cambridge College graduate degree program or during an absence from that program.
- Field experiences, practica and internships.
- Independent learning, research and applied action projects (final projects cannot be replaced by transfer credit).
- Professional development courses, including school collaborative courses and other courses taken for continuing education units.
- Courses/credits included in another degree (anticipated or completed).

Licensure Course Transfer

To safeguard your licensure application, a course is accepted for transfer into a licensure program only if:

- The content matches a corresponding Cambridge College required course, meeting the high standards of our programs, and
- It is judged to match the requirements and expectations of the licensing authorities.

Counseling Licensure Courses — Final approval of other institutions' course work for your licensure application is solely within the discretion of the licensing authorities; please seek their advice.

Educator Licensure Programs — All transfer of credit into educator licensure programs is defined by the Mass. Department of Elementary and Secondary Education (DESE) as a "waiver." Records of all waivers are kept in student files, and are subject to audit at any time by DESE. These records will be required when you apply for licensure.

Transfer Credit Limits

SCHOOL/DEGREE PROGRAM	Credit Limit	Time Limit
School of Psychology & Counseling programs	9	5 years
School of Education programs (M.Ed., CAGS)		
M.Ed. licensure programs, CAGS (except as listed below)	12	5-7 years*
Instructional technology, law, and finance courses for licensure		3 years
*Time limit varies with subject and licensure area, as determined by program chair		
M.Ed. programs without licensure (except as noted on program charts)	12	no limit
School of Management programs	9	7 years
Any one specific Cambridge College management certificate	12-16	5 years

Please Note

Quarter-hours are converted into term hours at a 3/4 ratio and rounded to the nearest whole number.

Student Affairs

The Office of Student Affairs (OSA) serves as a vital resource for all Cambridge College students. With a focus on enhancing their quality of life, the OSA supports the many facets of a student's life through **FOUR PILLARS of STUDENT CARE:**

Student COMMUNICATION — Orientation and training events provide students with the necessary information and resources as they progress at the College.

Student CONDUCT — The Code of Conduct establishes standards of personal conduct for each student with the goal of sensitive and responsible behavior towards one another.

Student CARE — Care for students is provided through disability and career advising, and community resources. The OSA also makes available mediation for personal concerns and unresolved issues.

Student COMMUNITY — Opportunities for personal and academic growth are accessible through the co-curricular life where students are encouraged to participate in skill building workshops, networking events, and College student engagement events.

For policies about starting and operating student organizations, see policy at www.cambridgecollege.edu/office-student-affairs-osa-policies-student-community. If you have any questions or concerns feel free to contact the dean of student affairs.

Whether you are new to college or returning after years away from school, the student affairs and student support staff understand that the transition can feel a little overwhelming at times. They are ready to offer you guidance and assistance from orientation through graduation and are committed to providing you with the resources, support, assistance and advice that will help you be successful. We are committed to helping you become involved with the Cambridge College community both inside and outside of the classroom and allowing to achieve your potential. We hope to see you in our offices often throughout your Cambridge College career and are here to assist you in any way that you need us.

Disability Support

Cambridge College is committed to providing equal access to all educational opportunities to students with physical, psychological, or learning disabilities.

It is important to provide documentation of your disability as soon as possible as many of the services provided are outside of the College and must be arranged far in advance. Please contact the Office of Disability Support Services to arrange for an intake meeting and to discuss your needs. The Office can be contacted at disabilitysupport@cambridgecollege.edu or by phone at 617-873-0614.

Disability Declaration and Documentation — Students with disabilities at Cambridge College are encouraged to contact the Office of Disability Support (ODS) to request appropriate services but are not required to disclose any disability. All students seeking accommodations under the Americans with Disabilities Act must self-identify with ODS and provide appropriate information. Students must disclose disability directly to ODS in order to receive status as a student with a disability. Disclosure to faculty, admissions counselors, or other staff members is not considered official disclosure.

Initial self-disclosure may be initiated through phone, email, or in-person, but receipt of accommodations will require an in-person meeting unless the student takes classes at one of the College's regional locations or unless an in-person meeting is impossible for another legitimate reason. In cases where an in-person meeting is not possible, only phone or video-call conversations will be acceptable. During the COVID-19 pandemic, Zoom conferences will replace any in-person meetings.

Appropriate documentation — ODS asks students who request disability accommodations to describe their disability, their past use of accommodations, and the disability's likely impact on their educational experiences. Documentation provides a valuable tool for helping Cambridge College understand how courses, systems, and facilities may present barriers, and for planning strategies, including reasonable accommodations, that provide access. ODS uses external documentation to augment conversations with students and to support requests for accommodations.

Types of documentation supportive of requests include medical records, psycho-educational testing, school records, and letters or affidavits from mental health professionals. If students do not have copies of this type of information, they are welcome to meet with ODS to discuss other ways to demonstrate a connection between the condition and academic barriers anticipated or currently being faced.

See *Disability Declaration and Documentation Policy* at <https://www.cambridgecollege.edu/disability-declaration-and-documentation-policy-students>.

Confidentiality — The Office of Disability Support Services (ODS) is committed to ensuring that all information and communication pertaining to a student's disability is maintained as confidential as required or permitted by law. See *Policy on Confidentiality of Disability Documentation* at www.cambridgecollege.edu/college-policies.

Accommodations — Students with appropriately documented disabilities may be eligible for accommodations in accordance with the Americans with Disabilities Act. Under this law, students are eligible for accommodations which are deemed reasonable by the College.

At the initial intake meeting, appropriate accommodations will be discussed. Students must meet with or contact the coordinator of disability support services every term to set up letters sent to faculty. Accommodations do not automatically transfer from term to term and may be course specific. It is the responsibility of the student to initiate the accommodation process from term to term.

All students are expected to fulfill essential course requirements in order to receive a passing grade, with or without reasonable accommodations. Accommodations can not be granted retroactively. For more information, please visit www.cambridgecollege.edu/student-affairs/office-disability-support.

Disability grievances — See policy and procedure at www.cambridgecollege.edu/college-policies.

Emergency Phone Calls for Students

If a caller asks that a student be located because of an emergency, College staff take the caller's name and phone number, make their best effort to find the student, and give this information to the student if located. To protect student privacy, the College does not inform the caller whether the student is on the premises nor whether the call is returned. The College does not convey non-emergency messages.

Health and Medical Care

In the event of a medical emergency, security staff will call an ambulance. Students are responsible for their personal health and medical care. The College does not provide medical services.

Health Insurance

In compliance with state public health departments, Cambridge College requires its students to comply with state laws regarding health insurance for college students. See *Student Health Insurance* on page 16.

Immunizations

Cambridge College requires all students enrolling in a degree or certificate program (full-time or part-time) to comply with the immunization requirements for full-time college students of the state where their Cambridge College classes are located. This is because our students often alternate between full-time and part-time study from term to term.

MASSACHUSETTS: immunizations required (subject to change by MA):

- **Tdap: 1 dose;** and history of a DPaP primary series or age appropriate catch-up vaccination. Tdap given at ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since Tdap.
- **Hepatitis B: 3 doses;** laboratory evidence of immunity acceptable.
- **MMR: 2 doses;** first dose must be given on or after the first birthday and second dose must be given ≥ 28 days after dose 1; laboratory evidence of immunity acceptable. Birth in the U.S. before 1957 is acceptable only for non-health science students.
- **Varicella: 2 doses;** first dose must be given on or after the first birthday and second dose must be given ≥ 28 days after dose 1; a reliable history of chickenpox* or laboratory evidence of immunity acceptable. Birth in the U.S. before 1980 is acceptable only for non-health science students.
- **Meningococcal: 1 dose;** 1 dose MenACWY (formerly MCV4) required for all students 21 years of age or younger. The dose of MenACY vaccine must have been received on or after the student's 16th birthday. Doses received at younger ages do not count towards this requirement. Students may decline MenjACWY vaccine after they have read and signed the MDPH Meningococcal Information and Waiver Form provided by their institution. Meningococcal B vaccine is not required and does not meet this requirement.

*A reliable history of chickenpox includes a diagnosis of chickenpox, or interpretation of parent/guardian description of chickenpox, by a physician, nurse practitioner, physician assistant or designee.

Exemptions: Medical exemptions (dated statement signed by a physician stating that a vaccine(s) are medically contraindicated for a student), and religious exemptions (dated statement signed by a student or parent/guardian if the student is <18 years of age, stating that a vaccine(s) are against sincerely held religious beliefs) must be renewed annually, at the start of the school year.

See Massachusetts immunization guidelines at: https://www.cambridgecollege.edu/sites/default/files/file_uploads/admis-immunizform.pdf

International students — Any student obtaining, maintaining, or regaining F1 nonimmigrant student status through matriculation in a Cambridge College degree or certificate program must abide by all policies and rules set forth for full-time students, as full-time enrollment is, generally, a requirement for maintaining F1 status. These policies and rules are not nullified by an approved reduction of course load."

Orientation

Orientation introduces new students to the Cambridge College community, helping them to make a smooth academic and personal transition into the College. Informative publications are distributed. Academic and program chairs meet new students and provide course advising and explain program paths. They also deliver information on degree completion, licensure/certification requirements, and course registration. Students also meet their new classmates.

Orientation is required for all new students.

The dean of student affairs and directors collaborate to provide students at regional Cambridge College locations with information and resources to help them get started at the College.

Student Government

Opportunities for student governance and leadership vary from school to school. Student are invited to contact their academic dean or regional site director with creative suggestions for student participation efforts.

Supportive Resources

At the main campus, a list of local external resources is available from the Office of Student Affairs. At regional Cambridge College locations, similar information is available from the center director.

- Drug and alcohol rehabilitation programs.
- Local agencies and/or private practitioners who provide assistance with alcohol and substance abuse.

Student Rights, Complaints and Grievances

regina.robinson@cambridgecollege.edu • studentaffairs@cambridgecollege.edu

All Cambridge College students are responsible to become familiar with the Student Code of Conduct and other College policies, and to abide by them.

Student Code of Conduct

The complete Student Code of Conduct is available at <https://www.cambridgecollege.edu/resources/student-rights-complaints-grievances>

Student Concerns and Complaints

Grades Related

The Cambridge College policy and procedures regarding student grade grievances can be found at www.cambridgecollege.edu/grade-grievance-procedure. Students must consult applicable policy and procedures in case of any academic concerns, complaints or questions. Students can always contact the dean of students with further questions.

Faculty Related

The Cambridge College policy and procedures regarding student complaints against faculty can be found at www.cambridgecollege.edu/complaints-against-faculty. Students must consult applicable policy and procedures in case of any concerns, complaints or questions regarding faculty. Students can always contact the dean of students with further questions.

Non-Academic and Service Offices Related

The Cambridge College policy and procedures regarding non-academic student complaints can be found at www.cambridgecollege.edu/non-academic-and-service-offices-concerns-and-complaints. Students must consult applicable policy and procedures in case of any non-academic concerns, complaints or questions. Students can always contact the dean of students with further questions.

Disabilities Related

The Cambridge College policy and procedures regarding disability grievances can be found at www.cambridgecollege.edu/disability-support-services/disability-support-services-regulatory-information. Students must consult applicable policy and procedures in case of any concerns, complaints or questions regarding disabilities. Students can always contact the dean of students with further questions.

Non-Discrimination and Harassment

Cambridge College is committed to an educational and work environment in which all individuals are treated with respect and dignity. Each individual has the right to study and work in a professional atmosphere that promotes equal opportunities and prohibits unlawful discriminatory practices, including harassment. Therefore, the College expects that all relationships among persons in the educational setting and the workplace will be business-like and free of bias, prejudice and harassment.

Equal opportunity — It is the policy of Cambridge College to ensure equal opportunity without discrimination or harassment on the basis of race, color, religion, sex, sexual orientation, gender identity, age, disability, marital status, citizenship, national origin, genetics, or any other characteristic protected by law. All candidate decisions related to admissions, retention, and graduation are made without unlawful discrimination. The College prohibits any such discrimination or harassment.

Retaliation is also prohibited — Cambridge College encourages reporting of all perceived incidents of discrimination or harassment. It is the policy of the College to promptly and thoroughly investigate such reports. The College prohibits retaliation against any individual who reports discrimination or harassment or participates in an investigation of such reports.

For more complete information, see <https://www.cambridgecollege.edu/non-discrimination-and-harassment>

Title IX — Sexual Misconduct Policy

Cambridge College is committed to establishing and maintaining an educational and employment environment that is free from sexual misconduct. Sexual misconduct is a violation of a person's rights, dignity, and integrity, and is contrary to the mission and values of the College. Acts of sexual misconduct are strictly prohibited and will not be tolerated.

The Cambridge College policy and procedures regarding Title IX, Sexual Misconduct can be found at <https://www.cambridgecollege.edu/title-ixsexual-misconduct-and-sexual-harassment-policy>. Students must consult applicable policy and procedures in case of any questions regarding this topic. Students can always contact the dean of students with further questions.

External Resources

State Education Commissions

Grievances may be taken to the appropriate state education commission. Please note that state authorities typically expect a student to make every attempt to resolve a problem within their college first. Each state has its own procedure for handling complaints, often including a student complaint form and other documentation. They typically do not accept anonymous complaints.

Complaints are handled by the state education commissions listed below for the main campus and regional locations. Students who reside in other states see also Complaint Process for All States, below.

California — A student or any member of the public may file a complaint/grievance with the Bureau for Private Postsecondary Education at any time by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau's Internet web site, <http://www.bppe.ca.gov/enforcement/complaint.shtml>

Massachusetts — Massachusetts Board of Higher Education, One Ashburton Place, Room 1401, Boston, MA 02108 • 617-994-6950 • <https://www.mass.edu/forstufam/complaints/complaints.asp>

Puerto Rico — Puerto Rico Board of Postsecondary Institutions, PO Box 19900, San Juan, Puerto Rico 00910-1900 • 787-641-7100 • Fax: 787-641-2573 • www.ce.pr.gov

Online Students Outside of Massachusetts

Cambridge College is a SARA member. SARA is an acronym for the State Authorization Reciprocity Agreement, which is an interstate agreement that allows colleges and universities located in a SARA member state to offer online classes in other SARA member states without needing to obtain authorization to do so from each state individually. SARA consists of a national network of member states, districts, and territories that agree to comply with the rules, policies, and procedures set forth by the National Council for State Authorization Reciprocity Agreements (NC-SARA). All states and territories in the United States are SARA members except for California, the Northern Mariana Islands, and Guam.

Students residing outside of Massachusetts in another SARA member state may submit a complaint regarding Cambridge College's distance learning programs to the Massachusetts Department of Higher Education (DHE) only upon exhausting Cambridge College's complaint process outlined above. The SARA complaint form may be accessed at <https://www.mass.edu/foradmin/sara/complaints.asp>

The DHE serves as the Massachusetts state portal entity for SARA. As the SARA portal for the Commonwealth, the DHE receives and evaluates institutional SARA applications, administers the student complaint process for students of SARA institutions operating in Massachusetts, and provides support to SARA institutions in Massachusetts.

Other External Resources

Standards for Accreditation — The NECHE (formerly known as NEASC) complaint procedures are solely for the purpose of addressing significant non-compliance with the Standards for Accreditation, not for individual dispute resolution.

Violence Against Women Act

Violence Against Women

domestic violence • dating violence • sexual assault • stalking

In accord with the Violence Against Women Reauthorization Act of 2013 (VAWA), Cambridge College will respond to reported incidents of violence against women in the Cambridge College community with support for victims and fair, impartial disciplinary procedures.

Prompt Crime Reporting

Campus policy encourages every member of the campus community to report a crime promptly to the local police and to submit reported crime incidents to campus security personnel, the regional center director, the director of business operations or the dean of students.

Institutional Response to Reports of VAWA Crimes

The institution has programs to prevent domestic violence, dating violence, sexual assault, and stalking. When an incident of domestic violence, dating violence, sexual assault, or stalking is reported, the College will provide victims with written notice of available options, remedies, and services. If the accused individual is a student, the standard of evidence used in an institutional disciplinary hearing will be preponderance of the evidence.

Education Programs About VAWA Crimes

The College has education programs to promote the awareness of rape, acquaintance rape, dating violence, domestic violence, sexual assault, and stalking. These education programs include primary prevention and awareness programs for all incoming students and new employees. These education programs will include: a statement that these crimes are prohibited at the College; definitions of consent, domestic violence, dating violence, sexual assault, and stalking in the College's jurisdiction; safe and positive bystander intervention when there's a risk of one of those incidents; information on risk reduction to recognize warning signs of abusive behavior and avoiding potential attacks; and information about the institutional disciplinary procedures.

Sanctions for VAWA Crimes

Following a final determination of an institutional disciplinary procedure for cases of rape, acquaintance rape, dating violence, domestic violence, sexual assault, or stalking, the following sanctions or protective measures may be imposed: suspension, expulsion, education programs, community service, probation, no-contact order, disciplinary contract agreements, class changes, or other appropriate relief measures.

Procedures for Survivors of Domestic Violence, Dating Violence, Sexual Assault, or Stalking

Survivors/victims of these crimes will be provided written information about evidence preservation, how and to whom to report these crimes, options about involvement of law enforcement and campus authorities, and assistance in notifying law enforcement if the victim chooses, as well as the option to decline to notify authorities. Victims will also be provided information about rights and institutional responsibilities regarding no contact orders, orders of protection, trespass notices or other available applicable options.

Evidence preservation: In order to best preserve evidence, victims should avoid showering, washing, changing clothes, combing hair, drinking, eating, or doing anything to alter physical appearance until after a physical exam has been completed.

Reporting: Victims should report to the dean of students, (room 1281 at 500 Rutherford Ave. in Boston, MA, 617.873.0470) or the local regional center director.

Notifying Law Enforcement: Victims have the right to notify law enforcement, and the campus can assist in notifying law enforcement if victims choose. Victims may also choose to decline to notify authorities.

Procedures for Institutional Disciplinary Procedures in Cases of Domestic Violence, Dating Violence, Sexual Assault, or Stalking

The institutional disciplinary procedures will provide a fair, prompt, and impartial process from investigation to final result. The investigation and any hearing will be conducted by those who receive annual training on issues related to VAWA crimes, how to conduct an investigation, and a hearing process that protects victim safety and promotes accountability.

Parties are entitled to the same opportunities to have an advisor of their choice present at any hearing and related meetings. There is no limit to the choice of an advisor; however, the parties are responsible for presenting evidence on their own behalf. Advisors may speak privately to their advisee during the proceeding, and cannot present evidence or cross-question witnesses. Parties will be informed simultaneously in writing of the outcome of the process, the availability of any appeal procedures, and when the results become final after any appeals.

The disciplinary processes available for victims of domestic violence, dating violence, sexual assault, and stalking are the appropriate campus student conduct disciplinary procedures or employee conduct disciplinary procedures as applicable. These processes include a report being taken, timely investigation, charges issued, initial meeting, hearing and appeal as applicable. Investigations will generally be conducted within 60 days of the report being taken, unless extenuating circumstances described to the victim occur. Hearing appeals must be filed within 10 days of the hearing determination. The standard of evidence in these cases is preponderance of the evidence. Following an allegation or report of one of these crimes, the institution may offer available protective measures such as a no-contact order; alteration of residence assignments, academic, and work situations.

Confidentiality

The institution will maintain as confidential any accommodations or protective measures provided to the victims so long as it does not impair the ability to provide such measures.

Personally identifiable information about victims will not be included in any publicly available record-keeping, including the reporting and disclosure of crime statistics.

Written Notifications to Students, Employees, and Victims of VAWA Crimes

For Students and Employees:

The College will provide written notification to students and employees about existing and available counseling, health, mental health, victim advocacy, legal assistance, visa and immigration assistance, and other services available in community and on campus to victims of dating violence, domestic violence, sexual assault, and stalking. The College will also provide information about these services in writing to victims of domestic violence, dating violence, domestic violence.

For Survivors/Victims:

The College will provide written notification to victims regarding rights and options, including: available and existing on- and off-campus services such as victim advocacy, counseling, health, mental health, legal assistance, visa and immigration assistance; available and applicable institutional disciplinary procedures, and an explanation of those procedures; confidentiality in protective measures and Clery reporting and disclosure; and reasonable and available options and assistance with changing academic, living, transportation, and working situations, regardless of whether the victim chooses to report the crime to law enforcement.

In accord with the Violence Against Women Reauthorization Act of 2013 (VAWA), Cambridge College will include in its annual crime statistics all reported incidents of VAWA crimes.

Military Students—Veterans and Active Duty

veterans.support@cambridgecollege.edu • www.cambridgecollege.edu/resources/veterans-benefits

Cambridge College is recognized as a military friendly institution offering a variety of degree and certificate programs which serve the academic and career development needs of many military members and their families. At Cambridge College our focus is on adult students, their experiences and their needs. Our admissions staff and administration are trained to work with military students and help them get the best from all the benefits for which they qualify. At Cambridge College, we offer a personalized approach to assist our military students. Many of our faculty and staff have served in the armed forces and understand the challenges our military members and their families face each day. Our staff are here to help veterans through the admissions, registration and eligibility processes.

- The Veteran's Administration has approved Cambridge College programs for VA benefit coverage.
- Cambridge College is a Servicemember's Opportunity College (SOC) providing veteran support.

Veterans Certifying and SOC Representatives

Please visit www.cambridgecollege.edu/resources/veterans-benefits for current contacts at Cambridge College. Students taking courses at the Boston, MA campus should see the Bursar's Office for enrollment certification information after they have applied for benefits through the VA Office; students at regional Cambridge College locations should see their VA certifying official.

Transfer Credit Evaluation

Transfer credit—All students receiving veterans benefits will have all prior education and training evaluated upon enrollment. Credit will be awarded where applicable with the program being shortened accordingly. The student and the Department of Veteran Affairs will be notified. For transfer credit information please contact your veterans certifying representative.

Prior learning assessment can earn college credit and shorten your program—Veterans enrolled in undergraduate programs are especially encouraged to consider documenting their learning derived from experience in the form of standardized college-level exams and portfolios that demonstrate learning equivalent to specific college courses. For more information, ask to speak with your faculty advisor or Cambridge College regional center director, or visit www.cambridgecollege.edu/admissions/prior-learning-work-experience-credits.

Active Duty Tuition Discount

Tuition discount for active duty military personnel —

Undergraduate tuition is reduced to the amount covered by the federal Tuition Assistance Program; the rate is subject to change accordingly. We do not charge out-of-state tuition to our military members.

Military Tuition Assistance Refund Policy

Military students awarded Tuition Assistance (TA) are subject to the Military TA Refund Policy in the event of withdrawal. For the full policy, see *Military Tuition Assistance (TA) Refund Policy* on page 15 or visit https://www.cambridgecollege.edu/sites/default/files/file_uploads/cc-tuitionassistance-refundpolicy-7018019.pdf.

Delayed Disbursement of VA Funding

Covered individuals are students entitled to educational assistance under Chapter 30 Montgomery GI Bill®, chapter 31, Vocational Rehabilitation and Employment, or chapter 33, Post-9/11 GI Bill® benefits with 100% coverage by the VA. These students will not have financial aid or business Registration holds placed upon their accounts if they are unable to meet their financial obligations to the College due to the delayed disbursement funding from VA under chapter 30, 31 or 33. No late fees, denial of access to classes or

College facilities, requirement to borrow funds, or other penalties will be imposed upon students for whom the VA is delayed in disbursing educational assistance. These students will be permitted to attend or participate in a course of education during the period beginning on the date on which the student provides to the College a certificate of eligibility for entitlement to educational assistance under chapter 30, 31 or 33, and ending on the earlier of the following dates:

- The date on which payment from VA is made to the institution.
- 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

(A “certificate of eligibility” can also include a “Statement of Benefits” obtained from the Department of Veterans Affairs’ (VA) website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes.)

Academic Progress

Progress will be monitored each term for all students receiving veterans benefits. If an undergraduate student’s cumulative GPA falls below 2.0 (graduate programs 3.0), or completion rate falls below 67% (graduate programs 50%) in all courses attempted at Cambridge College, in any term, the student will be placed on academic probation for a maximum of two additional terms. If the student’s GPA or completion rate is not raised to meet graduation standards by the end of the second term of probation, the Veterans Administration will be notified and benefits will be interrupted.

Conditions for Reentrance: If the dean or regional site director determines that the conditions which caused the interruption have been rectified, the student will be eligible to receive benefits.

A wide range of educational benefits are available to veterans, their dependents and family members through the United States Department of Veterans Affairs. Students must apply directly to the US Department of Veterans Affairs. Below are several links that will get you started and will provide you with the information you need to take advantage of your benefits.

International Students

International Student Office • 617.873.0142 • www.cambridgecollege.edu/offices/international-students

Cambridge College accepts international students only at its campus locations in Massachusetts, where all course instruction is in English. For the English language proficiency required, see below.

For assistance with the application process, please speak with your admissions counselor.

For assistance with immigration-related questions, please speak with the International Student Office.

See also international student policies:

- www.cambridgecollege.edu/international-student-policies-f1-non-immigrant-student-status
- www.cambridgecollege.edu/international-students-and-immunizations-policy---registrars-office

Checklist of Documents Required for Admission/Issuance of I-20

International students seeking to receive an I-20 to obtain or maintain F1 non-immigrant student status through Cambridge College must be fully admitted into a full-time degree program at Cambridge College. Documents required for admission to Cambridge College include, but are not limited to:

All International Students

Completed, signed Application, with all required documents (see application booklet).

Application fee (see application booklet).

Completed, signed International Student Application Supplement.

Official demonstration of English Language Proficiency, documented in one of the following ways:

1. Official demonstration of English language proficiency. Cambridge College will accept the following scores equal to or greater than the following:
 - Duolingo English Language Test (DET): 47
 - Paper-based TOEFL (PBT): 550
 - Computer-based TOEFL (CBT): 213
 - Internet-based TOEFL (IBT): 79-80
 - IELTS: 6.0
 - Michigan Test of English Language Proficiency (in-house):
Level 2, 68 (undergraduate candidates)
Level 3, 84 (graduate candidates)
2. A diploma from a U.S.-based college, university, or high school.
3. A Certificate of completion from a Cambridge College partner English language school. For a list of participating schools, please contact Admissions, or visit our website at www.cambridgecollege.edu/international-students/approved-english-language-schools
4. A reference letter from an employer documenting employment in the U.S. for at least three years in a professional or managerial capacity, attesting to the professional or managerial responsibilities.

Not required of students whose first language is English.

Copy of your passport or other government-issued document, showing:

- Your name
- Date of birth
- Country of birth
- Country of citizenship (if different from country of birth)

Demonstration of adequate ability to fund your studies for at least the first year of study. Documents must be:

1. In English, or accompanied by a notarized translation into English.
2. Equal to or greater than \$29,000 for bachelor's and master's students.
3. No older than four months from the date of acceptance; no older than one month is preferred.
4. Accompanied by a completed Declaration of Funds, signed by the student or sponsor and signed by the bank from which funds are demonstrated.

Additional Documents

Additional documents required for students already in the U.S. include:

- I-94, Arrival/Departure record, which you can access online at <https://i94.cbp.dhs.gov/i94/>
- Copy of your most recent visa.

Students currently in the U.S. in F1 status must also provide:

- Copy of current I-20, pages 1 and 2.
- Completed Transfer-In Request form.

Students with dependents in F2 status or wishing to obtain F2 status must also provide:

- Copy of each dependent's passport.
- Copy of each dependent's F2 I-20 (if applicable).
- Demonstration of financial capability for supporting the dependent while in the U.S.:
 - For a spouse, demonstrate an additional \$8,000 in financial capability.
 - For each child, demonstrate an additional \$6,000 in financial capability.

Conditional Acceptance

Conditional acceptance is offered to students who have met all admissions requirements except demonstration of the minimum level of English language proficiency. For more information, please contact your admissions counselor or the International Student Office. See conditional acceptance policy at www.cambridgecollege.edu/college-policies.

Changing to or Regaining F1 Status

Students who wish to obtain or regain F1 non-immigrant student status through Reinstatement or Change of Status must be fully accepted to a Cambridge College academic program before receiving a Change of Status requested or Reinstatement requested I-20. Cambridge College will assist with issuance of the I-20 and any photocopying services students need for the filing of the i539 for Change of Status or Reinstatement, but does not offer any legal advising to students for these processes.

Getting Started

Transfer Credit

Please consult an admissions counselor, the Transfer Credit Office or your academic advisor regarding transferring credits to or from Cambridge College.

State Health Requirements for College Students

Students are required to comply with state laws regarding health insurance and immunizations for college students.

CAMBRIDGE • LAWRENCE • SPRINGFIELD

Immunizations — Paper form required before students can register for first term of full-time study.

Get form at www.cambridgecollege.edu/resources/student-forms

Health Insurance — Required early in first term and yearly: Go to the MyCC web portal homepage and follow instructions under "Student Health Insurance." Students who have health insurance need to waive out. *If you do not waive out, you will be automatically enrolled and billed.*

Financial Planning

Tuition and Fees — See *Tuition and Fees Rates* on page 17.

Payment and Refunds — See *Payment and Refunds* on page 13.

Scholarships are not currently available to international students.

Room, Board and Personal Expenses — All Cambridge College students are responsible for their own housing, transportation, and any personal expenses. The College does not provide dormitories, except for the Summer Institutes.

Maintaining F1 Status

Orientation

All F1 non-immigrant students are required to complete the online New International Student Orientation during their first term of study. Students who fail to complete this online session will not be able to register for the following term.

Full Time Registration Requirement

In order to maintain F1 status at Cambridge College, F1 international students must:

1. Register for a full-time course of study in the first term and all subsequent terms except in the final term. "Full-time" is defined as:
 - 12 semester credits for bachelor's (undergraduate) students.
 - 8 semester credits for master's (graduate) students.
 - CAGS and doctoral (post-graduate) students: Course load per term is defined by the program. Please see the International Student Office for full-time registration requirements.
2. Attend all courses which contribute to full-time registration. Failing a class for truancy or absence is considered an unauthorized drop below full course of study and will result in loss of F1 status.
3. Register for no more than three credits of online course work in a required term, except where the online course registration exceeds the required minimum full-time registration.
4. Register for and attend courses only taught at the Cambridge College campus where the student has been authorized to attend. For a list of Cambridge College locations approved by the SEVP to host F1 students, please contact the International Student Office or visit www.cambridgecollege.edu/international-student.

Students are not required by federal regulations to register for Summer term except when Summer term is also the initial term of study; however, some academic programs may require Summer registration. Students must ask their academic advisor and/or academic dean if they are required to register for the Summer term.

Dropping Below Full Time Registration

In order to drop below full-time registration during a required term, students must first contact the International Student Office. No special permission from the International Student Office is required for Summer registration.

Students in their **final term of study** may register for fewer than the required number of credits, but are advised to contact the International Student Office to advise the P/DSO of their intent to graduate that term.

Students who wish to drop below full-time registration for **academic reasons** may do so only in the **first term of study**. They must contact the International Student Office no later than the fourth week of the term to request the reduction in course load. A student's course load may be reduced to no fewer than **six credits** when the reduction is academic in nature. Reducing the course load to fewer than six credits during Spring or Fall terms is considered a violation of F1 status.

Students who wish to drop below full-time registration for **medical reasons** may do so at any time during the term, but must provide documentation from a licensed medical provider in the U.S. demonstrating the need for the Reduced Course Load due to a medical condition. Students must notify the International Student Office in writing (email or letter) of the intent to drop below full-time registration **prior to dropping/withdrawing from courses**. Students must provide a completed Medical Reduced Course Load form to the International Student Office no later than 10 days after visiting the medical professional who certifies the need for a reduction in course load. Failure to do so is considered a violation of F1 status.

NOTE: Receiving authorization for a Reduced Course Load allows students to maintain F1 status while taking fewer than the minimum required credits during a required term. **Students who reduce their**

course load after the add/drop period are still responsible for any late fees or charges applied to their accounts, as per the policies of the Bursar's Office. Applying for a Reduced Course Load is not a withdrawal/drop from a class. Students must also visit the Registrar's Office and Bursar when withdrawing from or dropping a class.

Updated Records

Students maintaining F1 status through enrollment at Cambridge College must keep all information updated with the International Student Office at all times. Students may email all information to the International Student Office and must do so within 10 days of the change in information. The information includes:

1. Current major field of study (if changed during studies).
2. Current residential address in the U.S.
3. Current legal name (if different from name provided when applying).
4. Current sources of funding (if different from funding demonstrated when applying).
5. Updated passport (may be scanned and emailed).
6. Updated visa (may be scanned and emailed).
7. Updated i94, Arrival/Departure record, which you can access online at [www.dhs.gov/i-94](#)

International students must separately inform the Registrar's Office and International Student Office of any changes to their residential address in the U.S. Failure to report to either office within 10 days of moving may result in complications with communication from the College and the federal government.

Program Dates

Student program dates are listed on page 1 of the Form I-20. Students are expected to monitor their own program dates and notify the International Student Office if an extension is needed, if they will complete the program before the listed end-date, or if they will depart the U.S. prior to completion of the program without intention to return within 5 months.

Degree/Enrollment Verifications

Students requesting enrollment verification must contact the International Student Office, providing their name and student ID number. The letter will confirm that the student is enrolled at Cambridge College, specify the student's standing (active, applying for reinstatement, applying for change of status, etc.), and note the student's SEVIS ID number and program dates as they appear in SEVIS.

Students requesting transcripts must submit a Transcript Request to the Registrar's Office. No transcript, official or unofficial, can be provided by the International Student Office.

Work Eligibility

Students in F1 non-immigrant status are permitted to engage in work only if they first receive authorization from the federal government through the International Student Office. There are three kinds of work in which international students may engage:

On-Campus Employment — International students may engage in part-time (no more than 20 hours per week) on-campus employment during required terms (Spring and Fall) and full-time (no limit on hours) during breaks and vacation (Summer). On-campus employment is not guaranteed to any student, nor is its availability guaranteed.

Curricular Practical Training (CPT) — International students may have the option to engage in Curricular Practical Training as part of their academic program. This is permitted only at the discretion of an academic instructor. Students interested in pursuing CPT should contact the International Student Office at least one academic term before the term in which they plan to engage in CPT.

Optional Practical Training (OPT) — International students completing a degree with Cambridge College may be eligible for the 12-month full-time Optional Practical Training benefit. Students should contact the International Student Office no later than the beginning of their final term of study for information on OPT and the OPT application process. Students may apply for OPT up to 90 days prior to the final date of classes listed for their level of study in the Academic Calendar, through 60 days following the same date. Students who have not been enrolled for two consecutive terms, including their final term of study, prior to completing their degree may not be eligible for the OPT benefit. As each student's situation is unique, one-on-one advising on OPT is strongly recommended.

Additional Information

For detailed information or questions regarding federal regulations governing F1 student status, please contact the International Student Office.

Certification of Credentials Earned

Some international graduates report that upon returning to their home countries, they are asked to provide documentation from Cambridge College to certify the credentials they earned in the United States. Students who require the College to prepare documents beyond information readily available in the Academic Catalog or on the Cambridge College website will be assessed a fee (see *Tuition and Fees Rates* on page 17). Examples include but are not limited to:

- Report or letter summarizing specific course evaluation procedures, projects, and guidelines.
- Additional evaluation(s) created and conducted solely in conformity with the home country's protocol (e.g.: blind evaluation).
- Separate correspondence (beyond official transcript) verifying course descriptions/credits/hours for each course completed.
- Separate correspondence certifying class attendance policies. (Cambridge College cannot provide daily class attendance records for individual students.)
- Separate correspondence attesting to credentials of Cambridge College personnel such as blind evaluator and/or program chair, etc.
- Separate presentation certificate certifying Independent Learning Project presentation.
- Separate correspondence regarding Cambridge College online repository of published ILPs.
- Other documents that duplicate information readily available via the Cambridge College website or the Academic Catalog.

Students who plan to return to their home country following study at Cambridge College are advised to communicate with their National Department of Education (or other appropriate sources) prior to traveling to the United States, or upon their return, to obtain guidelines that itemize the documentation that will be required to validate credentials that were earned in the United States.

Career Resources

Center for Career and Professional Development

The Center for Career & Professional Development (CCPD) is Cambridge College's career resource hub for students, alumni and employers. CCPD will prepare students and alumni to understand and promote their diverse backgrounds and experiences as strengths in today's job market, to effectively utilize career information and advice to identify employment opportunities, to successfully launch new careers and finally, to pursue meaningful professional development.

The Center will:

- Deliver services and resources that support current students and alumni in their pursuit of employment pre- and post-graduation;
- Ensure access to information, knowledge and competencies that enhance individual career development, academic success and employability;
- Promote career opportunities that reflect sustainable jobs of the future; and
- Establish relationships with employers for the purpose of meaningful exposure and transition to professional employment opportunities.

International Students are encouraged to explore career building and experiential learning opportunities supported by CCPD, but must act in accordance with the rules and regulations set forth by the US Department of Homeland Security regarding number of hours, authorization to work, and tax filing. International students are encouraged to contact the International Student Services team, below.

- Maxime Mad-Toingue, International Student Advisor, Maxime.Mad-Toingue@cambridgecollege.edu
- Vera Dimoplou, Assistant Dean of Student Affairs, vera.dimoplou@cambridgecollege.edu

Please see *International Students* on page 58 or visit <https://www.cambridgecollege.edu/offices/international-students> to review work authorization and visa requirements.

Online Tools via College Central Network

CCPD has teamed with College Central Network - CCN - to connect students, alumni and employers to a virtual range of career building services, events, job opportunities and field-based learning/internship experiences. Once students and alumni register, they can:

- View career building sites for data on jobs, salaries and employment statistics;
- Keep track of relevant CCPD and School events and activities;
- Search job opportunities and field-based learning/internship experiences; and
- Post resumes for employer review.

Career Planning and Development

Students can support their career growth strategies through one-on-one sessions on one or more of the following:

- Perfecting resumes and cover letters
- Managing personal brands and social media identity
- Mastering networking principles
- Optimizing mentor relationships
- Navigating diversity and inclusion in the workplace
- Accessing professional development training and advanced-graduate degree options

Academic Support

Center for Excellence in Learning and Teaching

The Center for Excellence in Learning and Teaching (CELT) is the heart of academic and faculty support at Cambridge College. The Center operates three offices in the College designed to foster student academic success through improved student learning and faculty teaching. The Office of Assessment conducts student assessments in many areas to help gauge student levels. The Academic Success Center provides student academic support through professional and peer tutoring as well as workshops and other events. The Institute for Faculty Excellence offers faculty workshops and professional development opportunities for continuous learning and to improve student learning outcomes. The CELT operates broadly across all of the Cambridge College regional locations, but some support varies slightly by location.

Academic Success Center

Professional/Peer Tutors — Cambridge College's academic support is housed in the Academic Success Center. This is where students can connect with professional and peer tutors. Tutoring services vary slightly by campuses, but students can expect professional writing tutors at the Boston, Lawrence, and Springfield campuses. Puerto Rico also offers peer writing tutors. In addition, students may find peer tutors for math, computers, or student mentoring at various campuses. All of the scheduling of in-house tutoring and academic support can be accessed via our online scheduling system:

To schedule an appointment with a tutor:

1. Log in to *MyCC*
2. Click the *Starfish* button
3. Click the "Academic Success Center" service
4. Select a tutor you want to work with and click "Schedule an appointment"
5. Follow the directions to book with a tutor. If choosing a ZOOM appointment, the Link will be emailed in the confirmation.

Or call (617)-873-0499 or email CELT@cambridgecollege.edu

Workshops — The Academic Success Center hosts many student workshops. These also vary by campus, but some of the workshops may be available to all students remotely via ZOOM. In Boston, workshop topics include: study skills, time management, note-taking, and computer applications among other subjects. Look for email and posted announcements about upcoming workshops.

TutorMe (24/7 online tutoring) — All Cambridge College students have access to our CC TutorMe platform through the *MyCC web portal*. This platform will allow Cambridge College students to access a live tutor via the Internet 24/7 in most subject areas. Students can get help with writing, ESL, math, accounting, statistics, computers, college skills, or content areas like business, psychology, or education. To access TutorMe, log onto MyCC and visit the CELT page.

Office of Assessment

New Student Testing — Cambridge College's Office of Assessment runs all of the new student assessments. All new students are required to take writing assessments upon acceptance. In addition, during their first semester, new undergraduate students take the College Student Inventory as part of their LRN 175 Principles and Processes of Adult Learning class. All of these assessments are given by our Learning Assessment Coordinator who can be reached at CELT@cambridgecollege.edu

Language Testing for Credit — In addition to new student assessment, our Office of Assessment operates language testing for credit for undergraduate students. Students may elect to pay a fee to take an assessment for prior knowledge in any foreign language. If they pass this assessment, they can earn up to 12 credits for a nominal fee. These credits can be included in their academic plans and count toward a degree. To find out if you are eligible to take these exams, contact undergraduate advising at AcademicAdvisingUG@cambridgecollege.edu

Foreign Language Testing for Proficiency — The Office of Assessment also conducts language testing for college entry for international students. We operate the Duolingo DET test which is fully online. Information about this test can be found on the Cambridge College website at <https://www.cambridgecollege.edu/international-students/duolingo-english-test-det>.

See *Tuition and Fees Rates* on page 17 for the language testing fees.

Faculty Support and Professional Development

The Center for Excellence in Learning and Teaching offers faculty professional development and support for both new and continuing, full and part-time faculty. The CELT offers many professional development opportunities each semester. Below are some of the supports available.

New Faculty Orientations (NFO) — the CELT runs the NFO for new faculty introducing them to the logistics of working at Cambridge College as well as the expectations for required activities and resources available to support them in their teaching at Cambridge College. The NFO is a physical orientation as well as an online self-guided platform and resource for new faculty.

In-house workshops and activities: each term, the CELT publishes a list of faculty activities such as workshops on technical and pedagogical subjects, pilot groups, and other faculty events. The publications of these events can be found on the MyCC CELT page, and physically at all campuses. All faculty are encouraged to participate and may be eligible to earn points toward a stipend.

Resources for Faculty — the CELT offers many resources for faculty to help them improve their teaching and student learning. Many documents, articles, books, and other resources to support best teaching practices can be found on the MyCC CELT page. In addition, Cambridge College subscribes to Academic Impressions, which is a webinar resource that anyone with a @cambridgecollege.edu or @go.cambridgecollege.edu email can access. Find out more about Academic Impressions on the MyCC CELT page.

Title III Strengthening Institutions Grant

617-873-0150 • www.cambridgecollege.edu/academic-programs/title-iii-strengthening-institutions-grant

In October 2018, Cambridge College was awarded a \$2.25M Title III Strengthening Institutions Grant aimed at increasing success for students through a comprehensive framework of focused support beginning at enrollment and continuing through graduation. Delivered over a five-year period, these funds will provide Cambridge College with the financial backing to ensure that students not only persist to degree completion, but finish their programs of study in a timely manner.

Supported by this grant, the **Pathways to Persistence and Success (P2PS)** project will foster a culture of continuous improvement through the transformation of the student experience and through the reformation of curriculum and instruction.

Early College Program

CELT • (617)-873-0499 • CELT@cambridgecollege.edu

The Somerville H.S. - Cambridge College Early College Program

is part of Somerville High School Beyond the Classroom Learning initiative. It is a free program offered to Somerville high school students who are more likely to be underrepresented in higher education, especially English Learners, Students with Disabilities, Low-income students, and students who are from racial/ethnic groups traditionally underrepresented in higher education.

The Early College Program recruits students during the fall of 10th grade with student and classroom outreach efforts from both Somerville H.S. teachers and staff and Cambridge College staff and faculty. Students who are interested apply and are interviewed and accepted during the late fall. All students who meet the entrance eligibility are entered into a lottery and selected for participation in the program at random with priority given to English Learners and Students with Disabilities. Students are selected for additional space that becomes available by lottery as well.

Students selected for the program commit to participating for the second half of 10th grade as well as in 11th and 12th grades. During each year, they participate in increasingly more college coursework on campus at Cambridge College during the school day in the Program's Liberal Arts Pathway. In total, they can earn up to 19, highly-transferrable college credits for free. In addition to taking college coursework, students practice college readiness skills leading up to their college coursework, and they are supported throughout their college experience. They also participate in a career-readiness curriculum that informs them of pathways in the Liberal Arts as well as career-readiness and employability skills, and they are supported with college searches, visits, and applications.

Students selected during the fall of 10th grade, begin the program in the spring of 10th grade. They take a College and Career Readiness Seminar at Somerville H.S. taught by a Somerville H.S. teacher. The seminar facilitates career workshops and searches, but it also provides direct instruction and hands-on practice in many key college readiness areas such as note-taking and time management.

In 11th grade, students take two college classes, two days per week at Cambridge College, WRT 101 College Writing 1 and MAT 101 College Math 1. They also attend an Academic Support Class three days per week at Somerville H.S. for one or two blocks per day. They receive study time, direct support, and push-in career and college skills supports.

In 12th grade, students come to Cambridge College five days per week. They take four college-level classes four days per week, PSY 120 Formative Ideas in Psychology, JUS 225 Introduction to Social Justice, SCI 203 General Biology & Lab, and LIT 210 Topics in Literature with professors who are trained for working with students who are likely to be underrepresented in higher education. They attend an Academic Support Class at Cambridge College one day per week. The 12th grade Academic Support Class follows the same curriculum and design as the Somerville H.S. Academic Support class but with more emphasis on independent study time and college search support.

Library Services

www.cambridgecollege.edu/resources/library-services

Cambridge College Online Library (CCOL)

The CCOL offers more than 15,000 full-text scholarly journals and periodicals and 185,000+ full-text books appropriate for academic research in the fields of education, counseling, psychology, management, health, and all other academic areas.

The Library is accessed by logging into the MyCC portal. Once the student has entered their MyCC logon credentials they may open the link on the Library tab labeled Cambridge College Online Library and the CCOL site will launch.

Our collections are fully indexed and searchable through our Ebsco Discovery Service (EDS), and include: Academic eBook Collection, Academic Search Complete, Academic Video Online, American Doctoral Dissertations, BioMed Central, The Boston Globe, Ebsco's Business eBook Collection, Business Source Complete, CINAHL, Ebsco's Education eBook Collection, Education Source, ERIC, Fuente Académica, Gale Books & Authors, Gale General Reference Center Gold, Gale Nursing Allied Health, Gale Nursing Resource Center, Opposing Viewpoints In Context, Gale Psychology collection, GreenFILE, Health Source: Nursing/Academic Edition, Humanities International Complete, Kanopy Video Collection, Library, Information Science & Technology Abstracts, MEDLINE, Medscape, Mental Measurements Yearbook, National Criminal Justice Reference Service Abstracts, Newspaper Source, Ebsco's Nursing eBook Collection, OmniFile Full Text Select, PsycARTICLES, PsycBOOKS, PsycEXTRA, PsycINFO, PubMed, Regional Business News, SAGE Open Source, Science.gov and SocIndex.

Within our EDS search engine, citation-only results link conveniently to the WorldCat database for location of local libraries which hold print versions. Cambridge College is not responsible for the content of these sites or of any sites to which they may link. Ebsco Discovery Service offers the options to create a personal folder within the program to save materials as well as print, email cite and share all research.

Chat with a Live Librarian provides 24/7/365 live reference librarian service for individual research assistance using online chat.

Other Libraries

Cambridge College regional locations and international —

For recommended academic and other research libraries open for public use, click the "Traditional Libraries" tab on the Cambridge College Online Library home page and select the link from the drop down menu for the campus of your choice. Links to nearby libraries, directions and how to access them online or visit in person are provided.

New England Institute of Business —

NEIB offers a fully online e-Library which can be accessed at <https://libguides.necb.edu/elibrary>

Computer Use and Policies

IT Support Center • 617.873.0159 • www.cambridgecollege.edu/information-technology/available-it-resources

Information Technology Resources, Services, & Policy Highlights

— Computer and network technology is a critical component in education, in the workplace and in everyday life. Technology in these areas contributes significantly to the success of our students, our faculty and our staff. The College depends on our technical resources to provide a rich environment to those individuals who learn, teach and work at the College. Technology can also enable dynamic conversations and personal interactions in our adult classroom experience.

The Information Technology department strives to make its resources as reliable and as robust as possible. We ask that you recognize and respect that these resources are limited. Please treat them in a way that will guarantee that others can share in their use. The following few pages describe various procedures that are in place to make technology enabled education possible. We ask that you read through the material and, by all means, ask questions of our staff if you need further information.

Computer Requirements

As a student at Cambridge College you will use a computer to access the College's web portal (MyCC), the online library, email and other software applications related to the classroom experience.

All students are required to be able to access and use a computer while a student at the College. Computers should meet the following minimum requirements:

- Recommended hardware:
 - 4GB RAM or higher (8GB RAM is preferable).
 - Intel or AMD processor: dual-core or better.
- Recommended Operating System:
 - Windows users: Windows 8 or higher
 - Apple users: Mac OS 10.8 or higher.
- Recommended Software:
 - Latest version of Firefox or Chrome browsers.
 - Microsoft Office 2010 and up.
 - DSL, broadband cable-modem or other high speed internet access.
 - Windows users: up-to-date anti-virus software protection.
- Connection Requirements:
 - Wireless capability for use while in class or at breaks.

Access to a Computer

If you don't have access to a personal computer or don't have a high-speed Internet connection you can use the computer lab at your Cambridge College location. Other computer resources may include your local public library and public Internet hot spots.

Purchasing Technology

We recommend that students wait until they receive their financial aid award notice before purchasing a computer.

Once enrolled, students are encouraged to visit the password protected "At Home or Student Use" discount software site linked at www.cambridgecollege.edu/available-it-resources/it-services to see if any of the offerings available can aid and assist them in their classwork.

IT Support

Cambridge College provides telephone support to assist you with minor IT problems such as:

- MyCC, the Cambridge College web portal.
- Cambridge College email (CC-Gmail).
- Cambridge College website.
- Connection to the Cambridge College network.
- Other College web-enabled programs.
- Password reset portal.

Please note: The College cannot assist students with questions regarding personal hardware and software issues. Please contact the manufacturer for questions regarding the use and maintenance of your computer or software.

COVID-19 Update: Please note that during the duration of COVID-19 precautions we are not physically staffing our computer labs. We do have a virtual assistant on hand in Boston to assist students with any on the spot questions. Lab hours have also been adjusted and are Monday through Sunday 8:00 am to 6:00 pm.

Helpdesk Hours: Monday-Thursday 9:00 am-10:00 pm,
Friday 9:00 am-9:00 pm, Saturday 9:00 am-5:00 pm,
Sunday 9:00 pm-5:00 pm EST.

To contact the IT Support Center Helpdesk

- Email helpdesk@cambridgecollege.edu to create a support ticket.
- Call during Helpdesk hours **617.873.0159**.
- Drop-in locations (see your site information for details).

IT Technicians

Almost every Cambridge College location has local IT technicians to assist you and to help maintain equipment, classrooms, and drop-in computer centers.

Self Help

A number of self help topics are available on the IT Support website at www.cambridgecollege.edu/it-support as well as in the IT eHelpdesk portal under Solutions.

MyCC Student Portal

Students' personal accounts are created upon self-enrollment through the admissions process. The login will be your Cambridge College network credentials. These are provided during the admissions process. Instructions about logging in for the first time are located at www.cambridgecollege.edu/it-support, then scroll down on the left to "MyCC New User Access" and follow the instructions. Users may log in to MyCC from the top right of the main Cambridge College website or <https://mycc.cambridgecollege.edu/ics>

The MyCC portal is a focal point for students and faculty. MyCC is the gateway to online course registration, online course work, the learning management system, and the online library. Students access their personal accounts and grades through the MyCC portal.

See also *Web Portal Accounts Policies and Procedures* at www.cambridgecollege.edu/information-technology/it-security-and-policies

Electronic Communication

Cambridge College provides access to email for all students. Email is an official method of communication at Cambridge College. Students are held strictly responsible for the consequences of not reading and responding to emails sent by the College to their College-provided email account.

Email Address — New students and returning students are provided a College-branded Gmail account upon registration, referred to as GO Email or CC Gmail.

- Student email addresses appear as:
firstname.lastname00@go.cambridgecollege.edu
- Senior and adjunct faculty email addresses appear as:
firstname.lastname@go.cambridgecollege.edu.
- Core faculty and staff email addresses appear as: firstname.lastname@cambridgecollege.edu.

All staff use Microsoft Office 365 email in their conversations with students.

Use and Responsibility — Faculty will require students to access MyCC and read notices sent to their official Cambridge College email address. Please read the Electronic Communication (email) Policy at www.cambridgecollege.edu/information-technology/it-security-and-policies. Please read the policy to better understand the responsible use of email and the types of email and behaviors that are prohibited.

Network Credentials

Your network credentials are used to log in to our wireless network, lab computers, eHelpdesk, and to print or copy.

Username: firstname.lastname (only the first 20 digits)
First-time login Password: 00+ID number (ex: 00123456)
Add as many zeros to make a minimum of 8 characters

Please note for your security, students and adjunct faculty may change their network password in two ways:

1. While logged on any computer on our campus, press Ctrl+Alt+Delete. A window will appear where you may select "Change Password".
2. By using our Password Reset Portal at <https://pwd.cambridgecollege.edu>

Password Reset Portal

This service allows users to reset their network password at any time from anywhere that they have web access. This service will allow users who have forgotten their passwords to conveniently reset it without having to contact an IT technician. Password reset kiosks are also available at selected locations around the College. Please contact a helpdesk technician for more information or access the portal at <https://pwd.cambridgecollege.edu>.

Information Technology Responsible Use Policy

Cambridge College provides access to information technology resources to students, faculty and staff to support the College's mission and to conduct the business of the College. Every authorized user of information technology resources at Cambridge College is responsible for utilizing these resources in an efficient, ethical and legal manner and in ways consistent with the overall College policy. Please see the *Responsible Use Policy* at www.cambridgecollege.edu/information-technology/it-security-and-policies. This policy also covers the following points:

- Privacy.
- Passwords and user IDs.
- Personal use.
- Security.
- Copyright, trademark and domain names.
- Compliance and enforcement.
- Violations and disciplinary actions.

Computer Labs

Computer labs are available at the Boston main campus and at our regional locations. Students may use these resources to conduct research and complete assignments and projects. Users can access the Internet, online classes, conduct word processing, create spreadsheets, and design presentations, as well as use course specific software that may be available through our labs. Some of our labs have trained staff on duty to assist in the use of our hardware. Limited software assistance can be provided. Lab users must comply with all information technology requirements and policy.

Computer Lab Guidelines

- Lab computers and printers are for registered Cambridge College students only.
- Do not share your Cambridge College Network username and password with anyone. You will be held accountable if you share your personal information and someone else uses your account.
- When finished using the computer please completely log-off.
- Downloading, installing and running software is strictly prohibited on any lab computer.
- Illegally downloading music, videos or any other copyrighted content is a crime and may result in disciplinary action.
- Computer labs are not to be used for recreational purposes.
- Food and beverages, with the exception of covered water bottles, are not allowed in any computer lab.
- Cell phone conversations are not permitted in the lab.
- The College is not responsible for valuables left unattended.
- Navigating to offensive, harassing or sexually explicit sites is not permitted and may result in disciplinary action.

- No chat or other form of instant messaging is permitted other than through the facilities provided by the College's MyCC portal.
- Lab assistants can only provide technical support for Cambridge College software applications.
- Cambridge College technicians are not responsible for tutoring.
- Children are not allowed in the labs.

Printing and Copying

Cambridge College believes in a green and sustainable environment. Towards that effort we have implemented a student printing and copying solution where the first 200 pages are free per semester. Your free-pages balance will not rollover to the next semester. All billing will be self-service, based on the student's personalized web account. All charges related to printing are non-refundable. See *Tuition and Fees Rates* on page 17.

For more information on our IT policies, please see www.cambridgecollege.edu/information-technology/it-security-and-policies.

Digital Millennium Copyright Act Policy

Cambridge College does not allow Peer-to-Peer (P2P) software usage on its wired or wireless network. Anyone using P2P applications on the Cambridge College network will be blocked from the network without prior notification. Please review Cambridge College's Digital Millennium Copyright Act Policy at www.cambridgecollege.edu/information-technology/it-security-and-policies. When attached to the Cambridge College network, downloading or distribution of whole copies of copyrighted material for personal use or entertainment without explicit permission from the copyright owner is against the law, and therefore against College policy. Violators may be subject to criminal or civil prosecution.

Classroom Technology Services

Classroom technology services typically include wireless labs and audiovisual equipment. Requests for these services can only be made by Cambridge College faculty and staff through the AV Request Site at <https://av.cambridgecollege.edu>

For assistance with classroom equipment, contact the IT Support Center at <https://helpdesk.cambridgecollege.edu> or 617.873.0159.

New England Institute of Business

The rigorous technological aspects of the NEIB fully online course structure requires that students have access to various technology and software. Please see *New England Institute of Business* on page 282 for more information regarding these technological requirements.

Cambridge College Online

The mission of CC Online is to provide online educational opportunities of the highest quality in support of the Cambridge College mission and vision. Cambridge College began offering online courses in 2000. Since the first courses launched, over 24,000 students have participated in at least one online course. The College offers many fully online courses each term as well as five fully online degree programs.

Online and Hybrid Courses

Each school includes online and hybrid courses as part of its course offerings each term. Online courses are those courses that are offered exclusively online; there are no requirements to attend any sessions on any campus. Hybrid courses include on campus meetings as well as online components. Online and hybrid courses are typically the same length as the term in which they are offered (Fall/Spring, 14-15 weeks; Summer 8-9 weeks); however, some may be offered in a shorter time span. Students may select online and/or hybrid courses to complete their degree requirements in all programs. International students are restricted to registering for just one online course each term.

Fully Online Degree Programs

Admission

Students may apply at any time for admission into an online degree program. Course starts occur five times during the calendar year. Admission requirements are the same for each level of education. See the *Cambridge College Admission Requirements School of Undergraduate Studies* on page 15 and *Cambridge College Admission Requirements School of Management* on page 19 for the MBA programs.

Academic Advising

Academic advising for fully online degree seeking students is available through the Advising Office – Online Program Advisor. This office may be reached at 1-877-434-4997. Office hours are typically Monday through Friday, 10 AM to 6 PM.

Faculty/Program Advisor

Students will be assigned an advisor through the program in which they are enrolled. These individuals are available to assist with academic planning and career development.

Degree Programs

The following Cambridge College programs are available 100% online:

Undergraduate Degree Programs

- *Bachelor of Science Management Studies* on page 82
- *Bachelor of Science Health Care Management* on page 81
- *Bachelor of Science Managerial Accounting* on page 83

Graduate Degree Programs

- *Master of Business Administration* on page 234
- *Master of Business Administration/Health Care* on page 236

Courses for fully online degree programs are 8-weeks in length, with two sessions scheduled in the Fall term, two sessions in the Spring term, and one session in the Summer term.

(Please see *New England Institute of Business* on page 282 for more online programs available at Cambridge College.)

Student Support

Small online classes offer personalized attention for each student, allowing students to communicate with faculty via phone, Zoom, or email as needed. Students taking online courses or enrolled in a fully online degree program have access to a support network that includes the following:

TutorMe

Fully online tutoring is available through TutorMe, a free service that is available 24/7. Academic help can be obtained in over 300 subjects on-demand. The TutorMe link can be found in the sidebar of MyCC at <https://mycc.cambridgecollege.edu/>.

Tech Support

Tech support is available 24/7 at 1-877-434-4997. Technicians can provide help with online access issues, passwords, log-in help, and other technology related issues.

Email: cconline@cambridgecollege.edu

Dean of Online Programming: Dr. Michael E. Marrapodi

Associate Dean: Dr. Daniel Ibarrondo

Administrative Assistant: Leili Ansari

School of Undergraduate Studies

Cambridge College undergraduate students learn to communicate effectively; exercise analytical and problem-solving abilities; refine and focus their values to facilitate decision-making; recognize, respect, and appreciate diversity; function effectively in a variety of organizations; and understand local and global issues in the contemporary world.

General Education Learning Outcomes

The general education component of the bachelor's degrees at Cambridge College is designed to develop and foster specific skills and attitudes which form the intellectual framework of a well-rounded scholar. The coursework is intentionally distributed across seven topical pillars in order to promote a diversity of perspectives within the student. Specific skills and competencies within the general education portion of the bachelor's degree include:

- Critical thinking, logic and analysis.
- Mathematics and quantitative reasoning.
- Written and oral communication.
- Information literacy and computer applications.
- Understanding of the scope and relevance of the arts and humanities throughout history, and within contemporary society.
- Integration of scientific thought and analysis.
- Understanding of intercultural and intracultural concepts within the social sciences.

Program Components

General education — Cambridge College students gain academic skills in college-level writing, critical thinking, quantitative thinking, computer applications, research, and presentations. They gain knowledge within the natural, physical, and social sciences, arts and humanities, begin to use their knowledge, and learn to think systemically across disciplines.

Open electives — Each student selects unrestricted electives from the full spectrum of the College's course offerings. Electives may be an eclectic mixture that reflects the student's unique interests and goals, or may be focused in a particular **concentration** or area of study. See program charts.

Major — An in-depth understanding of a field of study, including major themes and issues, historical development, major figures and ideas; analysis, synthesis, and evaluation of ideas across disciplines, from multiple perspectives, and over time.

Final project — Near the end of their program, degree candidates complete a Capstone project. Students apply the fruits of their academic experience to a culminating learning project that interests and challenges them, on a topic related to their major and their professional goals. They do original research and develop it into an extended essay demonstrating mastery of key concepts, methods, and terminology in the field.

Academic Advising

Academic success coaches/advisors are assigned to each student and serve as an ongoing resource from acceptance to graduation, working with students to stay on track and fulfill their academic and career goals.

Academic success coaches/advisors in the Undergraduate Advising Office:

- Update students' academic plans.
- Guide students in selecting appropriate courses for completing their degree in a timely manner.
- Monitor students' academic progress.
- Recommend academic support (tutors) as needed.
- Serve as a resource for creating portfolios and taking standardized tests (ACCUPLACER and CLEP).
- Provide current and accurate information regarding administrative, policy and curriculum changes.
- Provide career counseling services to students.

Orientation occurs before the start of the semester and is mandatory for new students. At Orientation students meet with the dean, faculty and fellow new students to learn about expectations for the academic journey that they will be embarking; establish important connection with faculty and students; and familiarize themselves with the resources and supports that will be available to them.

Writing Assessment, Courses and Tutoring

All new students take a standardized writing assessment prior to registration. Need-specific tutoring is provided by the College. WRT101-102 may be waived if students have taken equivalent courses **and** assessment indicates proficiency.

Taking Graduate Courses

In consultation with your advisor, and with written permission from the course instructor, undergraduate students who have completed at least 90 credits at an overall GPA of 3.0 or better may take graduate courses at Cambridge College. These graduate courses may be applied towards a bachelor's degree if they meet current program requirements; they may not be used towards a graduate degree unless specifically identified within an advanced standing program. Licensure courses may not be taken by undergraduate students.

Focused Study

Approval — Some undergraduate courses may be completed in a focused study format if the course has not been offered for several terms and you need the course to graduate on time. A completed application for focused study must be approved by the undergraduate dean.

Cost — The standard undergraduate tuition per credit is charged.

Learning Format — Focused studies meet a minimum of four times. You and your instructor arrange meeting times; you are expected to work independently. A three-credit focused study will require about 90 hours of documented learning activities, meetings, and individual work.

Independent Study

Self-motivated students may earn undergraduate credit through individually designed courses, which may be appropriate in the following situations:

- The field or topic is not offered by Cambridge College.
- A unique learning environment provides opportunity for college-level learning (for example, international travel, participation in a cultural exchange program, involvement in a social or political action project).
- Level of student's prior knowledge in subject area is sufficient preparation for advanced study.

After identifying a Cambridge College faculty sponsor, the student and sponsor jointly complete an independent study registration form, specifying the department, course title, number of credits, course objectives, planned activities and method of evaluation.

No more than 30 credits of a student's 120-credit degree program may be earned by way of independent study. Independent studies are placed within the academic plan as free electives, unless explicitly

identified as waiving an existing program requirement by the program chair and/or dean.

Cost — The standard undergraduate tuition per credit is charged (see *Tuition and Fees Rates* on page 17).

Prior Learning Assessment/Portfolios for Credit

Undergraduate students may earn academic credit for prior learning outside the classroom (not simply for prior experience). They may attempt to demonstrate the learning equivalent to college courses that meet their program requirements. Content must not duplicate courses already taken or accepted in transfer. By submitting portfolios, students can save both time and tuition costs.

Portfolio Process

1. Students meet with their academic advisor to verify that credit for this proposed portfolio would fit into their academic program, and to confirm their eligibility to petition for prior learning assessment (PLA)/portfolio credits.
2. Students may be directed by their advisor to contact the coordinator of undergraduate prior learning at 617.868.0141 or jeff.hogan@cambridgecollege.edu to obtain preliminary approval of the PLA proposal and guidance.
3. Students construct their portfolio(s). Portfolios will consist of a professional resume; a body of pertinent documentation; a written learning narrative which details and demonstrates a student's mastery of the learning outcomes of the course or knowledge area for which they are building the portfolio.
4. Once a portfolio is submitted, Cambridge College will identify a qualified subject matter expert who will review the portfolio and deliver an assessment of student mastery of the learning outcomes. Portfolios may be recommended for credit, returned for additional work, or declined for no credit.

Portfolios that are denied credit may be appealed in writing to the Dean of the School of Undergraduate Studies.

Cost — Three credit portfolios are charged at the rate of \$390 (\$130/credit). Block portfolios (5 or more credits) are charged at the flat rate of \$650.

Please check with your advisor to ensure that portfolios submitted, if awarded credit, will be accepted as part of your degree plan.

Portfolio submission and review processes are subject to change based on student and institutional demand.

Standardized Examinations for Credit

Undergraduate credit may be awarded to Cambridge College students for CLEP, FLATS foreign language exams, and DANTES DSST exams completed with scores at or above the minimum recommended by the American Council on Education (equivalent to a grade of C). The credits earned are counted as transfer credits.

Undergraduate Certificates

Certificates taken for degree credit may be applied to a Cambridge College bachelor's degree as program requirements allow (see degree program charts). Certificates with academic content and career development goals appropriate to a particular major may count as major electives (see program charts). Certificate credits may also count as open electives.

Certificates can be designed with partnering businesses, organizations, schools, and other institutions of higher education.

Undergraduate Policies and Procedures

Detailed policies and procedures for the School of Undergraduate Studies are posted on the *MyCC web portal*. Students and faculty may log in to MyCC and click on the Academic Resources tab.

Graduate Post-Baccalaureate Certificate or Undergraduate Pre-Baccalaureate Certificate

Alcohol & Drug Counseling

• CIP code 511501 • 18 credits • Certified Alcohol & Drug Abuse Counselor (CADAC) • Licensed Alcohol & Drug Counselor (LADC)

Program Description — Alcohol & Drug Counseling is for students seeking professional training in substance abuse/addictions treatment, education and prevention, leading to certification or licensure.

Learning Outcomes — Students become familiar with addictions counseling, its professional ethics, and its role in society. They learn the 12 core functions of an addictions counselor: screening, intake orientation, assessment, treatment planning, referrals, reports and record keeping, and consultation with other professionals. They know and apply current theory and research in their field, and gain sufficient knowledge for competent interdisciplinary counseling practice. They exhibit socially-conscious behaviors, critical thinking, and effective communication skills in their work with individuals, caregivers, families, staff, and other professionals.

Careers — Addictions counseling professionals help people through public health agencies, youth services, residential treatment programs, hospitals, outpatient substance abuse programs, and homeless shelters.

Courses

ADC 505	Alcohol & Drugs in Society	3
ADC 611	Family Treatment of Substance Abuse.	3
ADC 601	Role of the Professional in Alcohol & Drug Treatment. . .	3
ADC 625	Psychopharmacology in Addictions Treatment	3
ADC 642	Addiction Counseling	3

Practicum

Includes 300 hours of supervised practical experience in an approved substance abuse treatment program with appropriate supervision in the 12 core functions. The experience and supervisor qualifications must meet 262 CMR criteria to be accepted into an M.Ed.

ADC 521	Practicum Seminar in Alcohol & Drug Counseling	3
---------	--	---

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 18 credits.

Admission requirements: High school diploma/GED, bachelor's, or higher degree and other School of Psychology & Counseling requirements.(see Admissions) Including:

- Interview with and approval of the SOPC Admissions Committee.
- Interview with program chair.
- Current résumé.
- Two professional recommendations.

These courses may be accepted into a Cambridge College bachelor's or master's degree. Courses must meet current program requirements at time of matriculation.

Program chair: Paul White, M.Ed., LMHC

- Paul.White@cambridgecollege.edu

(All courses @ 3 credits.)

Bachelor of Science

Criminal Justice

• CIP code 430104 • 120 credits

Program Description

The Bachelor of Science in Criminal Justice provides a comprehensive exploration of criminal behavior and the responses of law enforcement, the court system and corrections. Students will study law enforcement, the court system, and corrections in light of the principles of public safety, current social justice issues, and the constitutional rights of individuals. Students will explore the impact of crime on victims, offenders, and the general public.

The program draws upon the experience of professional practitioners through in-class and in-field education placements; using their classroom knowledge and developing practical skills in community settings.

Program Outcomes

Students will be able to:

- Understand the underlying causes of crime and criminal behavior, and distinctions between various forms of law violations.
- Demonstrate, defend and critique the structure of the criminal justice system and discuss legal and ethical responsibilities and practices.
- Evaluate, defend and critique differing views of national, state and local laws, policies and enforcement practices.
- Know the role of law enforcement in society, the structure and training of its officers and specializations such as community policing, state police, environmental police, federal law enforcement.
- Know the history, structure and role of federal and local courts; designated courts such as drug courts, juvenile courts, mental health courts and the judicial process; the roles of defense, prosecution and judicial professionals.
- Evaluate, defend and critique the role of corrections, correctional facilities and sentenced populations, correctional policies, staffing and roles.
- Research and respond to controversial issues related to law enforcement, sentencing and correctional practices and defend differing views in a scholarly manner.
- Participate thoughtfully in debates on society's responses to crime: treatment vs. punishment, need for law and respect for human rights, the impact of crime and imprisonment, alternative sentencing and the principles of restorative justice.

Careers and Further Study

Graduates will be well prepared for positions in court probation, case management in juvenile and adult judicial processes, community-based alternative sentencing programs, youth diversion programs, pre-release and community reintegration services, drug treatment, victim advocacy, domestic violence services, and corrections on county and state levels. Graduates will be well prepared for study at the Police Academy and for graduate study in criminology, criminal justice, forensics, public administration, law enforcement, legal studies, human and social sciences, and law.

General Education 42 credits

LRN 175	Principles & Processes of Adult Learning	3

Capstone

JUS 490	Criminal Justice Capstone	3
---------	---------------------------	---

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Cybersecurity

• CIP code 430116 • 120 credits

Program Description

The Bachelor of Science in Cybersecurity equips students with the practical and conceptual means to understand and navigate today's vast digital security landscape. This expansive program focuses on the National Initiative for Cybersecurity Education (NICE) identified skill sets for the Cybersecurity workforce. The curriculum aligns a wide variety of courses with the technical, legal, social, and investigatory aspects of digital security. Students will emerge with the competencies necessary to compete in a growing global market that demands highly skilled Cybersecurity professionals. Two distinct concentrations enables students to select a range of career paths that fits their interests and goals.

Program Outcomes:

Graduates of the Cybersecurity program will have demonstrated proficiency in the following areas:

- Techniques used to protect the integrity of an organization's security architecture and safeguard its data against attack, damage or unauthorized access
- Design and develop IT risk and cyber security programs using industry frameworks and methodologies
- Knowledge of cybersecurity regulatory environment and ethics
- Monitor and assess cloud assets and resources for misconfigurations and non-standard deployments
- Meeting the challenges of evolving cyber network threats

The Cambridge College Cybersecurity program is designed to provide the requisite skills and knowledge-base for successful graduates to sit for the following certifications: CompTIA (Cybersecurity Analyst) CSA, CompTIA (Information Security Specialist) Security+.

Careers and Further Study

A Bachelor's Degree in Cybersecurity from Cambridge College qualifies you for in-demand positions such as:

- Information Security Manager
- Cybersecurity Analyst
- Cybersecurity Consultant
- Network Administrator
- Security and Risk Compliance Analyst
- IT Auditor
- Penetration and Vulnerability Tester

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Core courses 27 credits

CMP 250	Fundamentals of Cybersecurity
CMP 255	Information Security Foundations
CMP 260	EndPoint & Infrastructure Security
CMP 270	Operating Systems, Applications & Services
CMP 280	Introduction to Computer & Network Security Essentials
CMP 300	Digital Forensics
CMP 341	Incident Response
CMP 350	Cybersecurity Communications
CMP 390	Emerging Technologies

Concentrations 15 credits

Choose one concentration:

Network Security

CMP 400	Cloud Networking Security
CMP 401	Wireless Technology & Security
CMP 415	Network & Digital Forensics Investigation
CMP 435	Network Protection & Threat Monitoring
CMP 450	Machine Learning for Network Intrusion Detection

Information Security & Risk Management

CMP 302	Cybersecurity Governance Frameworks
CMP 323	Digital Law – Policies, Regulations, Ethics
CMP 331	Cybersecurity Audit & Risk Management
CMP 455	Protecting and Handling Data
CMP 460	Risk Response & Monitoring

Pre-Baccalaureate Certificate

Information Security & Risk Management Certificate

• CIP code 111003 • 27 credits, 3 terms

Program Description — The Information Security & Risk Management Certificate consists of 9 online or on-site courses focused on providing every student with a solid foundational knowledge of how to identify, quantify, respond and maintain IT risk, business continuity, regulatory and compliance protocols for an organization..

Learning Outcomes — Upon completion of the Information Security & Risk Management certificate, students will be able to:

- Identify and evaluate cyber security risks and threats
- Discern the risk appetite of an organization or business
- Design and develop IT risk and cyber security programs using industry frameworks and methodologies
- Understand the legal, policy and regulatory implications for cybersecurity
- Formulate an effective communication strategy by acquiring, evaluating, organizing, managing, and interpreting information

Careers — Graduates of the Information Security & Risk Management Certificate program will be prepared for employment in a variety of industries including Healthcare, Manufacturing, Financial Services, Government Agencies, Education, and Retail. An Information Security and Risk Management Certificate from Cambridge College qualifies you for in-demand positions, such as:

- Cybersecurity Analyst
- IT Audit and Risk Manager
- Security Consultant
- Security Operations Center (SOC) Analyst
- Security & Risk Compliance Analyst
- Cybersecurity Specialist

Courses can be taken online or on-site.

Courses 27 credits

Term 1 Spring

Introduction to Cybersecurity

- CMP 250 Fundamentals of Cybersecurity
- CMP 255 Information Security Foundations
- CMP 280 Introduction to Computer and Network Security Essentials

Term 2 Fall

Governance, Risk & Compliance

- CMP 302 Cybersecurity Governance Frameworks
- CMP 323 Digital Law - Privacy Policies, Regulations, Ethics
- CMP 331 Cybersecurity Audit & Risk Management

Term 3 Spring

Communications & Data Handling

- CMP 350 Cybersecurity Communications
- CMP 455 Protecting and Handling Data
- CMP 460 Risk Response & Monitoring

Pre-Baccalaureate Certificate

Network Security Certificate

• CIP code 111003 • 27 credits, 3 terms

Program Description — The Network Security Certificate provides students with a solid foundational knowledge of network operating systems, network security, digital forensics, and incident response methods.

Learning Outcomes — Upon completion of the Network Security certificate, students will be able to:

- Analyze network and data traffic
- Build simple Local Area Networks (LAN)
- Establish disaster recovery strategies
- Implement and troubleshoot Access control list for Pv4 and IPv6 networks
- Explore network security tools
- Monitor networks for security breaches
- Install, configure and test security hardware and software tools with supporting documentation such as port scanners

Careers — Graduates of the Network Security Certificate program will be prepared for employment in a variety of industries including business, education, healthcare, government, insurance, manufacturing, and retail. Employment opportunities include but are not limited to Computer Network Defense Analyst, Computer Network Defense Infrastructure Support, Computer Network Support Specialist, Network Administrator, Penetration Tester, Red Team Technician, and Systems Administrator.

Courses can be taken online or on-site.

Courses 27 credits

Term 1 Spring

Introduction to Networking Basics

- CMP 250 Fundamentals of Cybersecurity
- CMP 280 Introduction to Computer and Network Security Essentials
- CMP 205 Basic Network Troubleshooting

Term 2 Fall

Network Management

- CMP 260 EndPoint & Infrastructure Security
- CMP 400 Cloud Network Security
- CMP 401 Wireless Technology & Security

Term 3 Spring

Protecting & Network Monitoring

- CMP 415 Network & Digital Forensics Investigation
- CMP 435 Network Protection & Threat Monitoring
- CMP 450 Machine Learning for Network Intrusion Detection

All courses 3 credits except as noted.

Bachelor of Arts

Early Childhood Education & Care

• CIP code 131210 • 120 credits

Program Description

The Bachelor of Arts in Early Childhood Education and Care prepares students to teach within and manage early education and care organizations. This comprehensive curriculum develops the competencies defined by the Massachusetts Department of Early Education and Care as essential for leaders in this growing field. The dynamic course work addresses issues of social justice and inclusion of all children, focusing on special needs, diversity, program planning and leadership within child care settings. Electives enable students to tailor their studies to their particular career goals within the field.

Program Outcomes

Successful graduates will have a demonstrated understanding of the following competencies supporting young children (birth to 8):

- Growth and core development of children.
- Guiding and interacting with children.
- Partnering with families and communities.
- Health, safety and nutrition for young children.
- Learning environments and implementing curriculum.
- Observation, assessment and documentation.
- Program planning, development and implementation.
- Professionalism and leadership.

Careers and Further Study

Our graduates typically progress from entry level to upper level careers in state and private day care centers and pre-schools, Headstart and other agencies focused on underserved populations, and home care. Graduates are also well prepared for graduate study in fields related to young children.

Students enrolling in early childhood education and care will also have an option to be part of an accelerated masters degree leading to early education teacher licensure. The Early Childhood Education & Care program allows students in good academic standing to take courses during their undergraduate program in the graduate program that prepares students for teacher licensure.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Human Services

• CIP code 440000 • 120 credits

Program Description

The Bachelor of Science in Human Services is guided by systemic and holistic thinking, along with an appreciation of research and how it informs practice. A collaborative model of teaching and helping creates an environment where all students are encouraged to reach their potential. We do this by providing opportunities for our students to increase their knowledge and practical skills while recognizing the valuable contributions they are making in their workplaces and in their communities. Our goal is to be an integral part of the change that needs to happen to create a more just and equitable society.

Required courses provide broad-based knowledge of individuals, families and communities, with historical and multicultural perspectives. They present a unique strengths-based, systemic and culturally relevant approach to working with people effectively across many varied settings.

Field Education — Students will apply their knowledge in a variety of community-based settings.

Final Project — Students will complete a Capstone project focusing on an topic related to human services. The project consists of research and written work applying their academic experience to a learning project that interests and challenges them.

Program Outcomes

- Students gain the skills needed to work with people in a way that preserves their dignity and builds on their strengths, empowering them to address their concerns, leading to better outcomes.
- Students learn to identify and work with the strengths inherent in individuals, families and communities.
- Students gain practical skills for assisting people in making positive changes that will improve the quality of their lives.
- Students are prepared for personal and professional growth.
- Students have built a solid base for graduate studies in a wide variety of professional and academic fields.
- Students become effective agents of positive change

Careers and Further Study

The health and human service industry has been identified by the Bureau of Labor Statistics as an area of increasing growth in the 21st century. Students majoring in human services may find themselves working and leading in a variety of settings — with adolescents in residential programs or with the elderly in nursing homes; in the community or in health centers; as program directors; as case managers or outreach workers. They work in prevention or in treatment, in after-school programs or criminal justice programs.

Our graduates are well positioned to enter graduate studies in human services, psychology, counseling, social work and related fields.

Human Services Management

• CIP code 440000 • 120 credits

Program Description

The Bachelor of Science in Human Services Management provides students with a comprehensive understanding of human services and the management skills needed to provide oversight and direct the activities of human services-related organizations. Students integrate the knowledge from these two disciplines, to understand the mission and scope of service delivery within multiple program models as well as the management skills necessary for the procurement of contracts and the delivery of services for community-based and residential programs. Current ethical and legal issues will be examined.

Cambridge College integrates classroom learning with applied skills through a field education placement in a community human service agency or program. Students will be introduced to management theory and effective techniques through research, theory and practice.

Program Outcomes

Students will:

- Gain the skills needed to work with people in a way that preserves their dignity and builds on their strengths, empowering them to address their concerns, leading to better outcomes.
- Learn to identify the needs and strengths inherent in individuals, families and communities and work to develop program services that address client needs.
- Gain essential management skills, including effective professional communication, human relations, teamwork, and negotiation while creating work environments that foster corporate social responsibility, sustainability, and long-term growth.
- Gain a theoretical and practical understanding of service delivery, often to very vulnerable persons, and the professional demands of creating and maintaining effective business processes and organizational systems.
- Understand the importance of valuing and respecting diversity, as one manages within the human service agency environment.
- Gain skill in the analysis of complex managerial and organizational situations, taking into account the larger context, strategy, policy, ethics and justice.

Careers and Further Study

Graduates will be prepared for supervisory and mid-level management positions in the rapidly growing human services profession. Graduates will be ready for graduate study in management, human services, and social sciences.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Finance

• CIP code 520801 • 120 credits

Program Description

The Bachelor of Science in Finance presents a comprehensive financial management curriculum that equips students with the skills necessary to work in the areas of corporate finance, investments, economics, financial management, financial services and financial planning. Our students learn directly from practicing professionals, many of whom are distinguished leaders in their field. The Cambridge College teaching model gives students the opportunity to learn financial management theory in addition to effective, practical financial management techniques. By combining research, theory and practice, graduates will be prepared with the skills that will enable them to manage both people and complex financial projects and operations.

Required courses provide a dynamic academic framework which spans disciplines including corporate finance and investment, general management, strategic data analysis, purchase and sales of assets, dynamics of market forces, and institutional financial functions in different kinds of organizations. Additionally students will develop the analytical skills to understand key principles relating to the investment process within domestic and international markets

Final Project — Students complete a culminating research project in management related to their own personal and professional interests. Students demonstrate their mastery of financial management content and methodology, and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes

Successful graduates will have a demonstrated understanding of:

- Essential strategic financial planning, effective professional communication, human relations, teamwork, and negotiation.
- Theoretical and practical understanding of business processes and organizational systems.
- Practical business skills in accounting, economics and finance.
- Creating work environments that foster corporate social responsibility, sustainability, and long-term growth.
- The importance of diversity in today's global business environment, and develop skills to manage diverse organizations.
- The analysis of complex managerial and organizational situations, taking into account the larger context, strategy, policy, and ethics with specific applications in the financial arenas.
- Information systems, databases and Internet technology as finance management tools.

Careers and Further Study

Graduates of the finance degree program will be prepared for employment in a variety of finance-related capacities in corporate, for-profit, and non-profit organizations. Employment opportunities include but are not limited to financial analysis, investments, financial forecasting, and financial data analytics. Graduates will additionally possess a strong academic background to support graduate studies in business, finance, and management.

Bachelor of Science

Health Care Management

• CIP code 510701 • 120 credits

Program Description

The Bachelor of Science in Health Care Management presents a comprehensive management curriculum that equips students with the skills necessary to work as managers in health care institutions. This curriculum is aligned with the practical and operational needs of today's health care institutions. Cambridge College students learn directly from practicing scholar-professionals, many of whom are distinguished health care business leaders. Faculty give students the best opportunity to learn management theory and effective, practical management operations, financial theory, tools and techniques, enabling decision making based on sound financial and managerial principles. By combining research, theory and practice, graduates will be prepared with the skills that will enable them to manage people and complex issues in the health care field.

Program Outcomes

- Critical thinking skills and problem-solving to benefit patients and health care organizations.
- Effective written and oral communication with medical personnel, policy makers, and other colleagues in the health care environment, and the public.
- Leadership and management skills required to lead effectively in 21st century health care settings.
- Informed planning and decision making.
- Ethical, legal, social, political and economic forces affecting the health care industry.
- Health-related issues, disease and public health.
- Health care policies and economics and systems in the U.S. and elsewhere.
- Computer and technology applications to improve efficiency and quality of care.
- Financial operations such as medical insurance, coding, billing, and accounting systems.
- Human resource management needs specific to health care.
- Statistical analysis.

Careers and Further Study

Graduates will be prepared for supervisory positions in health care organizations as team members, managers and administrators. The program also prepares students for graduate study in health care management.

Online courses: 50% or more of this program may be taken as fully-online course work. International students may take only one fully-online course in any term.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Management Studies

• CIP code 520201 • 120 credits

Program Description

The Bachelor of Science in Management presents a comprehensive management curriculum that equips students with the skills necessary to work in for-profit and not-for-profit organizations. Our students learn directly from practicing scholar-professionals, many of whom are distinguished area business leaders. The Cambridge College *practicing professional* teaching model gives students the opportunity to learn both management theory and effective, practical management techniques. By combining research, theory and practice, graduates will be prepared with the skills that will enable them to manage both people and complex issues.

Required courses provide a practical framework to the management curriculum, including the history of management theory, structures of for-profit and not-for-profit organizations, and theories of leadership. Students will gain knowledge of strategic planning, diversity issues in the workplace, financial requirements, human resource planning, and ethics. Along with these skills graduates will be prepared with an understanding of marketing and sales skills, and technological advances in the corporate and not-for-profit environments.

Final Project — Students complete a culminating research project in management related to their own personal and professional interests. Students demonstrate their mastery of management content and methodology, and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes

- Essential management skills, including effective professional communication, human relations, teamwork, and negotiation.
- Theoretical and practical understanding of business processes and organizational systems.
- Practical business skills in accounting, economics and finance.
- Creating work environments that foster corporate social responsibility, sustainability, and long-term growth.
- The importance of diversity in today's global business environment, and develop skills to manage diverse organizations.
- The analysis of complex managerial and organizational situations, taking into account the larger context, strategy, policy, and ethics.
- Information systems, databases and Internet technology as management tools.

Careers and Further Study

Graduates will be prepared for employment as team members and managers within corporate and non-profit organizations. Areas of employment may include sales, marketing, finance, information technology, e-business, general management, human resources and hospitality.

The undergraduate management program additionally prepares students for graduate study in management, economics, finance, human resources, sales and marketing.

Bachelor of Science

Managerial Accounting

• CIP code 520201 • 120 credits

Program Description

The Bachelor of Science in Managerial Accounting gives students the skills and academic background to work in managerial accounting, and to sit for the Institute of Managerial Accountants' (IMA) Certified Managerial Accountant (CMA) examination*. The curriculum focuses on the practical skills and knowledge-base which the IMA has identified as essential to the field, and these learning outcomes and coursework are directly aligned with the practical experience and academic requirements of the CMA certification examination. Graduates will be well prepared to work in this exciting and growing field, with both the knowledge and application-based training to make important institutional decisions based on sound financial principles.

*Full IMA certification requires an earned bachelor's degree in finance, accounting or economics, successful passing of the CMA exam, and two years of documented work experience in preparation of financial statements, financial planning and analysis, auditing (external or internal), budget preparation and reporting, corporate investment decision making, or costing analysis (this experience requirement can be earned prior to, or within 7 years of passing the CMA examination).

Program Outcomes

- Planning, budgeting and forecasting
- Performance management
- Cost management
- Internal controls
- Professional ethics for management accounting professionals.
- Financial statement analysis
- Corporate finance
- Decision analysis and risk management
- Investment decision

Careers and Further Study

Graduates of the Managerial Accounting degree are well equipped to work in finance, book-keeping and accounting positions within private, public, profit and non-profit organizations. Additionally, students are prepared for graduate studies in accounting, finance and economics.

Online courses: 50% or more of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Bachelor of Science

Marketing & Sales

• CIP code 521401 • 120 credits

Program Description

The Bachelor of Science in Marketing and Sales provides students with focused, relevant training in corporate sales, sales management, marketing, product placement, and branding. Our students learn both theory and dynamic applications directly from practicing professionals, many of whom are distinguished leaders in their field.

Eight required courses form the core of the sales and marketing curriculum, and include topics ranging from marketing and sales strategies, marketing communication practices, processing and evaluation of strategic data, customer relationship management, and effective product placement. In addition, students select 15 credits (5 courses) from the suite of management offerings, including; the history of management; theories of leadership; general economic theory; diversity issues in the workplace; oral presentation skills; accounting and financial management; human resource planning, and ethics.

Final Project — Students complete a culminating research project in sales and marketing related to their own personal and professional interests. Students demonstrate their mastery of marketing and sales content and methodology, and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes

Successful graduates will:

- Demonstrate essential skills in strategic marketing, sales planning, advertising, and public relations management.
- Create and apply effective professional communications.
- Recognize and assess effective human relations, teamwork, and negotiation strategies.
- Develop and employ practical digital media applications.
- Obtain a theoretical and practical understanding of business processes and organizational systems.
- Understand how to create work environments that foster diversity, corporate social responsibility, ethics, sustainability, and long-term growth.
- Assess and employ information systems, databases and Internet technology as marketing management tools.

Careers and Further Study

Graduates of the sales and marketing degree program will be prepared for employment in a variety of sales/marketing-related capacities in corporate, for-profit, and non-profit organizations. Employment opportunities include but are not limited to corporate sales, general marketing, advertising, branding, digital media, and business communications. Graduates will possess a strong academic background to support graduate studies in sales, marketing, business, and management.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Capstone

BSM 414	Strategic Management	3
---------	----------------------	---

Bachelor of Arts

Multidisciplinary Studies

• CIP code 300000 • 120 credits

Program Description

The baccalaureate program in multidisciplinary studies at Cambridge College is a flexible option for students who are interested in studying across multiple disciplines. The program develops academic and workplace skills for success, and knowledge across a variety of academic fields. It is ideal for students who have broad academic interests and a desire to continue enhancing their knowledge throughout their lives. The program is very flexible, supporting each student's interests with a wide selection of liberal arts courses to choose from.

Required courses provide a practical focus to the curriculum, with courses that build academic skills and broad-based knowledge across the sciences, humanities and general studies.

Final Project — Students will complete a Capstone project focusing on an topic of personal and professional interest. The project consists of research and written work demonstrating their critical thinking and academic knowledge.

Program Outcomes

- Critical thinking, logic and analysis.
- Mathematics and quantitative reasoning.
- Written and oral communication.
- Information literacy and computer sciences.
- Understanding of the scope and relevance of the arts and humanities throughout history, and within contemporary society.
- Integration of scientific thought and analysis.
- Understanding of intercultural and intra-cultural concepts within the social sciences.

Careers and Further Study

Students will acquire a vocabulary in concepts and methods of critical thinking, and will gain the skills necessary to navigate and manage complex systems, obtain fulfilling employment, and compete in the working world. Students will develop persuasive oral communication and writing skills, and be prepared to utilize them in their employment and graduate study. With these transferrable skills and broad-based knowledge, our graduates will be equipped to take on new and unforeseen challenges in this fast-paced and quickly changing world.

Our graduates go on to a wide variety of careers, often working in schools, community organizations and services, government agencies, and businesses. Many continue on to graduate study in fields ranging from education to law to business management.

General Education 42 credits

LRN 175	Principles & Processes of Adult Learning	3
WRT 101	College Writing I	3
CTH 225	Foundations of Critical Thinking	3
MAT 101	College Math I	3
CMP 130	Introduction to Computer Applications	3
CMP 230	Information Literacy	3
WRT 102	College Writing II	3
MAT 102	College Math II	3

WRT 101-102 and MAT 101-102 may be waived if equivalent courses have been accepted in transfer. Credits will be replaced with open electives. WRT 201 required if both WRT 101-102 are waived; not required for students completing WRT 101-102 at Cambridge. WRT 090 and MAT 100 required if assessment indicates need.

Arts & Humanities	6
Natural & Physical Sciences	6
Social Sciences	6

Open Electives 36 credits

Choose electives and/or concentrations to support your academic interests and professional goals.

Liberal Arts Major 42 credits

Upper level courses (300 level and above) distributed by area:

Arts & Humanities	at least 9
Natural & Physical Sciences	at least 9
Social Sciences	at least 9

Capstone

BAM 490	Multidisciplinary Capstone	3
---------	----------------------------	---

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Natural & Applied Sciences

• CIP code 300101 • 120 credits

Program Description

The Natural and Applied Sciences program provides students with applicable training across scientific disciplines, enabling them to integrate scientific thought and analysis throughout their course of study. The degree is composed of courses and laboratories in four major scientific disciplines: life sciences, mathematics, physical sciences, and engineering and technology. The integration of these classical areas of science encourages students to broaden their approach to analysis and scholarship, and to develop a creative perspective in the pursuit of scientific learning and practice.

Program Outcomes

- General education in the life sciences, chemistry, physics, mathematics, and applied sciences.
- Demonstrated understanding of fundamental concepts of scientific thought, data-based reasoning, statistical inference, scientific method, logic, and critical thinking.
- Analysis and application of knowledge of biological systems, life sciences concepts and laboratory procedures, human anatomy and physiology.
- Understanding and creative approaches to the application of mathematical concepts including statistics, statistical inference, probability, and data-based reasoning.
- Understanding and evaluation of the general concepts and procedures within the physical sciences, including: fundamentals of geology and geologic systems, general astronomy, college-level chemistry and physics.
- Analysis and creative approaches to general engineering, technology trends, and the application of scientific principles to research and product development.

Careers and Further Study

Competencies across scientific disciplines provide graduates with the fundamental academic training and analytical skills to work in a variety of science-related fields such as biotechnology, biological research, information technology, health science, and environmental science. Graduates will have a strong foundation to support graduate studies within the life sciences and other scientific fields.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

General Education 42 credits

Bachelor of Arts

Psychology

• CIP code 420101 • 120 credits

Program Description

The Bachelor of Arts in Psychology is set within a broad-based liberal arts framework that has a strong interdisciplinary and humanistic foundation. The curriculum is a solid preparation for professional application in clinical, educational and human services, while also serving as a strong foundation for more specialized application and focus at the graduate level.

The psychology major prepares students for life-long learning, critical thinking and effective action in the field, and helps them develop a wide range of career options and skills that emerge from a broad and comprehensive grounding in psychology as the science of human behavior. An important feature of the program is personal reflection and application of new psychological knowledge and insights to new contexts. Given the scope, intensity and rapidity of social, cultural and technological changes in our world, the need to increase our understanding of the widest possible range of human experience and behavior has never been greater or more critical.

Required courses look at the history and methodology of psychology and introduce students to broader issues related to human growth and development, learning theory, personality, motivational and group theories, and a variety of approaches to psychopathology and psychotherapy. A special emphasis of the program is critical examination of the important roles of culture, history and belief in shaping differing approaches to the study of human behavior.

Final Project — Students complete a Capstone project which is a culminating piece of research in psychology related to their own personal and professional interests. Students demonstrate their mastery of psychology content and methodology and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes

- Fundamental understanding of the historical development and methodologies of modern psychology.
- Understanding and basic knowledge of major psychological theories, concepts and processes.
- Understanding of learning theory and cognition, personality, motivation and group theories.
- Understanding of a variety of perspectives regarding mental health, psychopathology, maladaptive behaviors and psychotherapy.
- Understanding of the roles of cultural, social and historical forces in shaping behavior.

Careers and Further Study

Cambridge College Psychology graduates are well prepared to enter a variety of career pathways working with people. These include clinical, educational, human service and management settings, and research. Graduates work in a wide variety of institutional and private programs and agencies.

Our graduates are additionally well positioned to enter graduate studies in psychology, counseling, social work and related fields.

Bachelor of Science

Wellness & Health Promotion

• CIP code 510001 • 120 credits

Program Description

The Bachelor of Science in Wellness & Health Promotion prepares students with the knowledge and skills necessary to educate, coach and support individuals, institutions and communities in promoting and maintaining healthy lifestyles. Through an investigation into human health and the history, philosophical, and theoretical foundations of wellness and health promotion initiatives, students gain a practical understanding of issues affecting individual, community and population health. Coursework emphasizes a lifestyle approach to promoting health and includes elements such as nutrition, physical activity, stress reduction, and other influences on health and wellbeing such as substance use, socio-economic and environmental factors.

Program Outcomes

Upon successful completion, students will be able to work effectively with individuals, organizations, corporations and communities in efforts to enhance lifestyle to impact health, prevent disease and increase quality of life. Students will:

- Gain content knowledge in the science, history and theoretical foundations of wellness and health promotion.
- Assess health and wellness needs; plan, implement, direct and evaluate health promotion and wellness programs.
- Gain communication and marketing skills to effectively assess, organize, and implement wellness and promotion programs and efforts.
- Understand theories and strategies that facilitate positive lifestyle change.
- Utilize evidence-based strategies to improve health and well-being.
- Maximize the well-being of specific target populations by collaborative planning and implementation of wellness programs.
- Apply their learning through direct field experience.
- Effectively advocate for policies and practices that empower individuals and communities to sustain and reinforce health promotion efforts.

Careers and Further Study

Successful graduates will be well positioned to work as health/wellness coaches and educators in community health initiatives, corporate wellness programs, public and private educational settings, and in fitness and wellness facilities. Graduates are further prepared for advanced studies in a wide range of health related fields such as community and public health, nursing, health education, health care management and administration, addiction studies, psychology, and human services.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Elective Concentrations

Undergraduate Concentration

Accounting 18 credits

The **Accounting** Concentration helps students gain an understanding of financial theory, tools and techniques so that institutional decision making can be based on sound financial principles. This concentration gives students the fundamental skills and academic background to apply contemporary accounting principles to their workplace.

BSM 200	Introduction to Business (<i>required first course</i>)	3
BSM 204	Financial Accounting	3
BSM 409	Budget Preparation & Reporting	3
BSM 442	Financial Management	3
BSM 481	Cost Management & Internal Controls	3
BSM 494	Financial Statement Analysis	3

Undergraduate Concentration

Addiction Studies 18 credits

Addiction Studies is for counselors, case managers, residence managers, and advocates. This concentration considers the impact of substance abuse on individuals, families and communities. It explores theories regarding addiction, various treatment approaches, and the societal consequences.

BHS 401	Introduction to Addictions	3
BHS 411	Family Systems and Addictions	3
BHS 421	Mental Health and Substance Abuse	3
BHS 360	Ethical Issues in Substance Abuse	3
BHS 302	Women and Addictions	3
BHS 361	Adolescent Drug Prevention	3

Undergraduate Concentration

Community Building 18 credits

Community Building is for students planning careers in community work: building and organizing, developing programs and re-creating communities. The courses present an empowering approach to working with communities to improve conditions, expand opportunities and sustain positive change, by fostering relationships and social networks.

BHS 322	Dynamics of Power in Communities	3
BHS 325	Community Planning & Development	3
BHS 340	Youth Development & Community Practice	3
BHS 445	Leadership for Community Builders	3
BHS 310	The Art of Advocacy, Skills for Policy & Service Delivery	1
BHS electives	5

Undergraduate Concentration

Education 18 credits (does not satisfy licensure requirements)

EMC 300	Classroom Management & Discipline	3
EMC 301	Integrated Language Arts & Reading	3
EMC 318	Successful Inclusion in the Classroom	3
EMC 319	Social Foundations of Education	3
EMC 420	Strategies for Teaching	3
PSY 310	Psychology of Learning	3

Elective Concentrations

Undergraduate Concentration

Expressive Therapies 18 credits

Expressive Therapies provides an interdisciplinary approach to psychology, human growth and the therapeutic encounter with an emphasis on the creative process as an important component of clinical insight and psychological healing. Having developed out of the specialized fields of art therapy, music therapy, dance therapy and psychodrama, the expressive therapies incorporates different expressive art modalities into a holistic, action-based approach to working with people with a broad spectrum of psychological and medical issues. Practitioners work with individuals, families and communities in a wide range of treatment settings including hospitals, clinics, community health centers, prisons, youth and geriatric institutions, as well as in private practice, often as part of treatment teams.

PSY 120	Formative Ideas in Psychology	3
PSY 325	Theories of Personality	3
PSY 376	Psychological & Therapeutic Dimensions of the Arts	3
PSY 403	Psychodrama & Drama Therapy	3
PSY 407	Principles & Practices of Art Therapy	3
PSY 408	Movement & Healing	3

Undergraduate Concentration

Family Studies 18 credits

Family Studies provides the knowledge and skills needed by practitioners to work effectively with the many demands families today are facing. Our emphasis on building on strengths, respecting and valuing what is important to families while providing care in a culturally humble way, serves to empower families as students learn how to assist them in the changes they are seeking. Students who focus in this area often go on to further studies in human growth and development, human services, social work, marriage and family therapy, and family policy. Students may focus on working with families or family members, on family development, advocacy, case management, or policy.

BHS 315	Understanding Family & Community Systems	3
BHS 366	Family Interventions	3
BHS 400	Family Life Cycle	3
BHS 430	Families with Special Needs	3
BHS 365	Ethical Issues in Working with Families	3
PSY 409	Family Mediation Techniques	1
BHS 300	Domestic Violence: Risks, Trends	1
BHS Elective		1

Undergraduate Concentration

General Management 18 credits

The **General Management** Concentration provides a practical framework for understanding contemporary management theory and practice.

BSM 200	Introduction to Business	3
BSM 204	Financial Accounting	3
BSM 205	Marketing	3
BSM 300	Economics for Managers	3
BSM 320	Operations Management	3
BSM 335	Human Resource Management	3
BSM 445	Organizational Theory & Behavior	3

Undergraduate Concentration

Health Care Management 18 credits

Health Care Management provides students with a theoretical and practical understanding of health care administration. Students gain knowledge of economic, financial, historical, legal and scientific concepts within health care systems. The concentration covers the regulatory requirements, management of personnel and fiscal practices that insure proper management within the health care industry.

Prerequisite course: BSM 200 Introduction to Business 3

Concentration courses:

BSM 300	Economics for Managers	3
BSM 350	Comparative Health Care Systems	3
BSM 351	Human Resource Management in Health Care	3
BSM 354	Legal Aspects of Health Care	3
SCI 339	Epidemiology & Public Health	3
HCM 301	Health Care Policy & Reform	3

Elective Concentrations

Undergraduate Concentration

Holistic Studies 18 credits

Holistic Studies is an integrated approach to psychology that addresses the relationship between mind, body and spirit. It draws from multidisciplinary, theoretical and cross-cultural sources including contemporary mind-body approaches to healing. Holistic studies includes expressive art therapies and views the transformative nature of the arts as an important aspect of holistic psychology. Holistic perspectives are applied to human growth and development, psychological disorders and clinical practice, wellness, and the nature of human potential.

- PSY 120 Formative Ideas in Psychology3
- PSY 325 Theories of Personality3
- PSY 316 Cross-Cultural Perspectives in Psychology3
- PSY 345 The Spiritual Dimension: Psychological & Educational Themes3
- PSY 376 Psychological & Therapeutic Dimensions of the Arts ...3
- PSY 428 Holistic Psychology: An Integrated Approach3

Undergraduate Concentration

Hospitality Management 18 credits

Hospitality Management equips students to manage staff and systems in the hospitality industry. The primary focus is on restaurant front of the house and back of the house management, and on hotel management. Students can become more valuable individual contributors, outstanding team members, and managers of organizations within the hospitality industry.

Prerequisite courses:

- BSM 200 Introduction to Business3
- BSM 204 Financial Accounting.3
- BSM 205 Marketing.3

Concentration courses:

- BSM 431 Introduction to Hotel & Restaurant Operations (required first course; may be waived with permission). .3
- BSM 433 Hospitality Marketing, Sales & Food Promotion3
- BSM 434 Advanced Hospitality Operations3
- BSM 435 Food & Beverage Cost Control3
- BSM 436 Legal Issues in the Hospitality Industry3
- BSM 437 Current Issues and Trends in the Hospitality Industry
- or** BSM 438 Hospitality Internship.3

Undergraduate Concentration

Information Technology & Ebusiness 18 credits

Information Technology & E-Business prepares students to develop strategies for managing infrastructure design, server management, security, e-business strategy and marketing. Graduates gain an overview of the technologies for electronic commerce on the Internet and current trends with respect to the technology of the World Wide Web, and explore various e-business models.

Prerequisite course: BSM200 Introduction to Business3

- BSM 413 Strategic Business Planning3
- BSM 406 Introduction to E-Business3
- BSM 420 Internet Marketing.3
- BSM 460 Database Management.3
- BSM 470 Project Management.3
- BSM 475 Information Technology.3

Undergraduate Concentration

Juvenile Justice Studies 18 credits

Juvenile Justice Studies provide students interested in working with adolescents and the juvenile justice system with a solid introduction into the history of youth services, current theories of adolescent development, and the impact of community disadvantage, child abuse and neglect on behavior.

- JUS 350 Introduction to Juvenile Justice3
- PSY 359 Understanding Child Abuse and Neglect3
- JUS 377 Legal Process for Reporting Suspected Child Abuse ... 1 (PSY359 required concurrently)
- PSY 330 Adolescents in Search of Belonging3
- JUS 225 Introduction to Social Justice3
- JUS 342 Girls and Delinquency3
- Two 1-credit JUS electives2

Elective Concentrations

Undergraduate Concentration

Legal Studies 18 credits

Legal Studies introduces students to the history and function of the American legal system and provides students interested in pursuing a law career with a basic understanding and knowledge of various aspects of law school and the legal profession. Cambridge College students are introduced to diverse topics and learning that incorporate principles of social justice, civil liberties and service to the community. It is in this context that students learn about and discuss executive, legislative and judicial law and their power to both shape and reflect our understanding of our changing society, world and communities.

- JUS 205 Introduction to Legal Studies3
- SOC 212 Introduction to the American Legal System3
- JUS 200 Crime and Criminal Justice3
- PSY 328 Forensic Psychology.3
- JUS 435 Restorative Justice and Alternative Sentencing3
- BHS 310 Art of Advocacy: Skills for Policy & Service Delivery1
- Two JUS electives2

Undergraduate Concentration

Organizational Psychology 18 credits

Organizational Psychology combines psychology and management. It focuses on organizational and institutional behavior; the psychology of work and working systems, leadership and management styles; and the shifting relationships between individuals and groups. Topics include communication styles and skills, enhancing work environments, mediation and conflict resolution, and valuing human diversity in the workplace.

Prerequisite/concurrent courses:

- PSY 120 Formative Ideas in Psychology3

Concentration courses:

- PSY 110 Systems Thinking in Psychology3
- PSY 325 Theories of Personality3
- PSY 421 Psychology & Work Today.3
- BSM 315 Diversity in the Workplace.3
- BSM 445 Organizational Theory & Behavior3
- BSM 465 Negotiation & Conflict Management3

Undergraduate Concentration

Peace & Justice Studies 18 credits

Justice Studies is concerned with treating justice issues as a general class of social and political problems to be understood. It is through understanding of the issues that underlie injustice that society is able to create social change. It is the mission of the Justice Studies program to recognize that the fair and equitable provision of justice is the only path to a more just and humane world.

- JUS 225 Introduction to Social Justice3
- JUS 345 War, Peace and Non-Violence.3
- JUS 435 Restorative Justice and Alternative Sentencing3
- JUS 315 Wealth, Poverty and Inequality3
- JUS 415 Violence in American Society3
- BHS 402 Special Topics in Justice Issues3

Accelerated Bachelor's to Master's Degree Programs

Cambridge College bachelor's programs are designed to align closely with our master's degree programs. Accelerated programming allows high-achieving undergraduates to enroll in specific graduate-level courses that will count toward both their bachelor's and their master's degrees, saving the student both time and money; advancing them at an accelerated pace toward greater employment opportunities.

Cambridge College undergraduate students with a history of strong academic achievement are eligible to apply.

1. Students who may wish to apply must indicate their interest to their advisor or program chair early in their program, and plan accordingly to complete all accelerated program prerequisites below before they have completed 90 credits.

- **General education prerequisites:**

- WRT 101-102 College Writing II
- MAT 101-102 College Math I-II
- CMP 130 Computer Applications
- LRN 175 Principles & Processes of Adult Learning
- CTH 225 Critical Thinking

- **Specified undergraduate courses** identified by the relevant graduate program as accelerated program prerequisites.

2. Apply for accelerated master's program: Requirements

- Maintenance of an undergraduate GPA of 3.5+ based on a full record transcript, including courses transferred in.
- 90 or more credits successfully completed, that meet requirements towards a Cambridge College bachelor's degree, including general education prerequisites listed above and any additional undergraduate prerequisites of the accelerated program:
- Students will need to obtain a written recommendation from their academic advisor or undergraduate program chair. These recommendations will be provided to the respective graduate school along with the student's academic record.
- The graduate school will then schedule an interview with the applicant. If approved by the receiving graduate school, the student will be allowed to enroll in specified courses within the respective master's programs.

3. Accepted students take specified **graduate courses** while still completing their bachelor's degree.

This graduate course work, if completed at a grade of B or better, will be applicable toward both the bachelor's degree requirements and the master's degree. The courses are billed at the undergraduate tuition rate. (The credits will appear on the graduate transcript as graduate-level transfer credits.)

- School of Management: up to 12 credits (four courses).
- School of Education: up to 12 credits (four courses).
- School of Psychology & Counseling: up to 9 credits (three courses).

4. Transition to master's program

- Students will be granted their bachelor's degree when they complete all the undergraduate requirements; they are undergraduate students until that point.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All admission requirements of the receiving graduate school and the degree/concentration must also be met before matriculation. (see *Admission* on page 13). Note that licensure programs have more specific requirements.

Upon matriculating into the master's program, students will be assigned a graduate advisor who will monitor their progress and work with them to complete the master's program (see master's program chart).

Students will be expected to maintain their strong academic record as they progress through the graduate program.

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: Interdisciplinary Studies

Both degrees: 120+32 credits • 5 years full-time

The Accelerated B.S. to M.Ed. program allows qualified Cambridge College students to earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

WRT 101-102 College Writing I-II

MAT 101-102 College Math I-II

CMP 130 Computer Applications

LRN 175 Principles & Processes of Adult Learning

CTH 225 Foundations of Critical Thinking

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate courses** below within their bachelor's degree program.

EED 636 Rereading Global Oppression

EED 705 Multicultural Diversity Issues in Workplace & Classroom

EED 647 Human Brain, Human Learning

EED 681 Visualizing Social Justice

or EED 544 Teacher As Artist

4. Transition to Master's Program

Required to Apply

- 90 or more credits successfully completed in a Cambridge College bachelor's degree in any field, including all accelerated program prerequisites, with a GPA of 3.5+ based on a full record transcript including courses transferred in.
- Written approval of the student's undergraduate program chair and regional center director (if applicable), and School of Education dean.

Transition to Master's Program

- All undergraduate graduation requirements must be satisfied.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All admission requirements of the graduate School of Education and the degree/concentration must also be met before matriculation.

Upon matriculating into the master's program, students will be assigned a graduate advisor who will monitor their progress and work with them to complete the master's program (see *Interdisciplinary Studies* on page 156). Students will be expected to maintain their strong academic record as they progress through the graduate program.

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: Early Childhood Teacher

Both degrees: 120+31-34 credits • 5 years full-time

The Accelerated B.S. to M.Ed. program allows qualified Cambridge College students to earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

- WRT 101-102 College Writing I-II
- MAT 101-102 College Math I-II
- CMP 130 Computer Applications
- LRN 175 Principles & Processes of Adult Learning
- CTH 225 Foundations of Critical Thinking

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate courses** below within their bachelor's degree program.

- ESP 592 Adapting Materials for Students w/Disabilities in Gen Ed Classrooms (1 credit)
- ESP 594 Collab & Consultation Techniques (2 credits)
- ECE 612 Developmental Reading for Early Childhood Birth to Eight
- ESP 512 Inclusion & Behavior Management
- ECE 600 Development of Young Children *OR*
ELE 620 Integration of Children's Literature in Early Childhood & Elementary Curriculum

4. Transition to Master's Program

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: Mathematics (5-8)

Both degrees: 120+35-38 credits • 5 years full-time

The Accelerated B.S. to M.Ed. program allows qualified Cambridge College students to earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

- WRT 101-102 College Writing I-II
- MAT 101-102 College Math I-II
- CMP 130 Computer Applications
- LRN 175 Principles & Processes of Adult Learning
- CTH 225 Foundations of Critical Thinking

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate courses** below within their bachelor's degree program.

- MAT 603 Arithmetic to Algebra: Developing Math Patterns & Ideas
- MAT 605 Technology in Math Learning & Teaching
- MAT 607 College Algebra
- MAT 609 Euclidean Geometry

Transition to Master's Program

Required to Apply

- 90 or more credits successfully completed in a Cambridge College bachelor's degree in any field, including all accelerated program prerequisites, with a GPA of 3.5+ based on a full record transcript including courses transferred in.
- Written approval of the student's undergraduate program chair and regional center director (if applicable), and School of Education dean.

Transition to Master's Program

- All undergraduate graduation requirements must be satisfied.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All admission requirements of the graduate School of Education and the degree/concentration must also be met before matriculation.

Upon matriculating into the master's program, students will be assigned a graduate advisor who will monitor their progress and work with them to complete the master's program.

Students will be expected to maintain their strong academic record as they progress through the graduate program.

Accelerated Programs: School of Education

Bachelor's Degree and Master of Education

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: English as a Second Language

Both degrees: 120+33 credits • 5 years full-time

Accelerated Bachelor's to M.Ed.: Skills-Based Health/Social & Emotional Learning

Both degrees: 120+36 credits • 5 years full-time

The Accelerated B.S. to M.Ed. program allows qualified Cambridge College students to earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

- WRT 101-102 College Writing I-II
- MAT 101-102 College Math I-II
- CMP 130 Computer Applications
- LRN 175 Principles & Processes of Adult Learning
- CTH 225 Foundations of Critical Thinking

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate courses** below within their bachelor's degree program.

- ESL 630 Equitable Assessment of ESL Learners
- ESL 631 Second-Language Acquisition & Culture
- ESL 610 Linguistics & Language Variations
- ESL 620 Teaching Reading & Writing to ESL Students

Transition to Master's Program

The Accelerated B.S. to M.Ed. program allows qualified Cambridge College students to earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

- WRT 101-102 College Writing I-II
- MAT 101-102 College Math I-II
- CMP 130 Computer Applications
- LRN 175 Principles & Processes of Adult Learning
- CTH 225 Foundations of Critical Thinking
- SCI 205 Anatomy & Physiology I

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate courses** below within their bachelor's degree program.

- EHE 613 Principles of Health/Social Emotional Promotion & Public Health Issues Fall
- EHE 622 Implementing Curriculum in the Health/SEL Classroom Fall
- EHE 632 Teaching About Human Sexuality Fall
- EHE 682 Health-SEL Skills for Risk Reduction & Positive Behavior Change Spring

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: General Science 1-6 or 5-8

• CIP code 131316 • Both programs: 120 + 32-35 credits • 5 years full-time

The Accelerated B.S. to General Science program provides a career pathway for qualified Cambridge College students, leading to initial licensure in General Science, Grades 1-6 or 5-8. Students earn both a bachelor's degree and an M.Ed. within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

WRT 101-102 College Writing I-II

MAT 101-102 College Math I-II

CMP 130 Computer Applications

CTH 225 Foundations of Critical Thinking

SCI 203 General Biology I

SCI 204 General Biology II

SCI 223 Physics I

SCI 201 General Chemistry I

SCI 138 Physical Geology

SCI 224 Fundamentals of Astronomy

2. Apply for Accelerated M.Ed.

3. Accepted students may take the **graduate science methods courses** below within their bachelor's degree program.

Methods & Materials for Teaching:

SCI 686 Physical Science Fall

SCI 682 Life Science Spring

SCI 684 Earth Science Spring

SCI 688 Middle School Chemistry Summer

4. Transition to M.Ed. in General Science (1-6 or 5-8)

Required to Apply

- 90 or more credits successfully completed in a Cambridge College bachelor's degree in any field, including all accelerated program prerequisites, with a GPA of 3.5+ based on a full record transcript including courses transferred in.
- Grade of B or better in all science content courses that document subject matter competency.
- Submit official transcript to science program chair for transcript review to ensure compliance with subject matter knowledge competencies for teaching science grades 1-6 or 5-8.
- Meet with the deans of the Undergraduate School and Graduate School of Education.
- Written approval of the student's undergraduate program chair and regional center director (if applicable), and SOUG dean.

Transition to Master's Program

- All undergraduate graduation requirements must be satisfied.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All School of Education admission requirements for teacher licensure programs must also be met before matriculation (see *Admissions*).
- Subject matter competency for General Science 1-6 or 5-8 will be evaluated through transcript analysis by the program chair, following the Massachusetts standards for the license (see www.doe.mass.edu). Only coursework completed within the last seven years with grades of B or better will be considered.

Upon matriculating into the master's program, students work with the General Science program chair, who monitors their progress and works with them to complete the M.Ed. in General Science (5-8) initial licensure program (see *General Science (1-6 or 5-8)* on page 152.

Students are expected to maintain their strong academic record as they progress through the graduate program.

Accelerated Programs: School of Management

*The Accelerated BS to MBA and BS to MM programs are currently under review.
Qualified candidates must contact the School of Management for an updated degree plan.*

Bachelor's Degree and Master of Business Administration

Accelerated Bachelor's to MBA

Both degrees: 120 + 45 credits • 5 years full-time

The Accelerated B.S. to MBA program allows qualified Cambridge College students to earn both a bachelor's degree and an MBA within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

WRT 101-102 College Writing I-II
MAT 101-102 College Math I-II
CMP 130 Computer Applications
CTH 225 Foundations of Critical Thinking

BSM 200 Introduction to Business
BSM 300 Economics for Managers
BSM 203 Organizational Communication
BSM 204 Financial Accounting
MAT 201 Introduction to Statistics

2. Apply to Accelerated MBA

3. Accepted students may take the **MBA core courses** below within their bachelor's degree program.

MMG 512 Organizational Environment
MMG 522 Information Systems in the Organization
MMG 520 Financial Accounting
MMG 740 Human Resources Management (MBA)
or MHC 720 U.S. Health Care System (MBA/Health Care)

4. Transition to Master's Program

Required to Apply

- 90 or more credits successfully completed in a Cambridge College bachelor's degree in any field, including all accelerated program prerequisites, with a GPA of 3.5+ based on a full record transcript including courses transferred in.
- Written approval of the student's undergraduate program chair and regional center director (if applicable), and SOM dean.

Bachelor's Degree and Master of Management

Accelerated Bachelor's to MM

Both degrees: 120 + 37 credits • 5 years full-time

The Accelerated B.S. to MM program allows qualified Cambridge College students to earn both a bachelor's degree and an MM within a reduced time frame and at a reduced cost.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

WRT 101-102 College Writing I-II
MAT 101-102 College Math I-II
CMP 130 Computer Applications
CTH 225 Foundations of Critical Thinking

BSM 200 Introduction to Business
BSM 300 Economics for Managers
BSM 203 Organizational Communication
MAT 201 Introduction to Statistics

2. Apply to Accelerated MM

3. Accepted students may take the **MM core courses** below within their bachelor's degree program.

MMG 512 Organizational Environment
MMG 514 Accounting for Managers
MMG 517 Research Methods for Managers

4. Transition to Master's Program

Transition to Master's Program

- All undergraduate graduation requirements must be satisfied.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All admission requirements of the graduate School of Management and the degree/concentration must also be met before matriculation.

Upon matriculating into the master's program, students will be assigned a graduate advisor who will monitor their progress and work with them to complete the master's program.

Students will be expected to maintain their strong academic record as they progress through the graduate program.

Bachelor's Degree and Master of Education

Accelerated Bachelor's to M.Ed.: Mental Health Counseling or Psychological Studies

Both degrees: 120 + 36-66 credits • 5-6 years full-time

The Accelerated Bachelor's to Master's in the School of Psychology and Counseling allows qualified students to earn both a bachelor's and a master's degree within a reduced time frame and at a reduced cost. The program is open to students in any bachelor's degree program in the Cambridge College School of Undergraduate Studies. It can lead into any master of education degree offered by the Cambridge College graduate School of Psychology & Counseling.

1. Students who may wish to apply should work closely with their undergraduate program chair to complete all accelerated program prerequisites before they have completed 90 credits.

Accelerated Program Prerequisites

WRT 101-102 College Writing I-II

MAT 101-102 College Math I-II

CMP 130 Computer Applications

LRN 175 Principles of Adult Learning

CTH 225 Foundations of Critical Thinking

2. Apply to the accelerated program when 90 credits are successfully completed.

3. Accepted students may take the **SOPC core courses** below within their bachelor's degree program.

CCP 540 Personality & Counseling Theory

CCP 639 Career Development

CCP 630 Human Development Across the Lifespan

Each of these courses is taught in each academic term and fulfills requirements across all master's programs within the School of Psychology & Counseling.

4. Transition to Master's Program

Required to Apply

- 90 or more credits successfully completed in a Cambridge College bachelor's degree in any field, including all accelerated program prerequisites, with a GPA of 3.5+ based on a full record transcript including courses transferred in.
- Written approval of the student's undergraduate program chair and regional center director (if applicable), and SOPC dean.

Transition to Master's Program

- All undergraduate graduation requirements must be satisfied.
- Students will be expected to enroll in the graduate program in the term directly following the completion their bachelor's degree.
- All admission requirements of the graduate School of Psychology & Counseling and the degree/concentration must also be met before matriculation.

Upon matriculating into the master's program, students will be assigned a graduate advisor who will monitor their progress and work with them to complete the master's program (see *Mental Health Counseling* on page 254 and *Psychological Studies* on page 264).

Students will be expected to maintain their strong academic record as they progress through the graduate program.

Undergraduate Course Descriptions

Adult Learning (LRN)

LRN 175 Principles and Processes of Adult Learning - 3 credits

Students explore theories of adult learning. They clarify the fit between their academic program and their learning and career needs, and see how their prior learning fits in. They assess their academic skills of critical thinking, mathematics, writing, and computer literacy. Students become independent learners who can effectively manage the structures, processes and expectations of undergraduate education.

LRN 200 Career Development and Planning - 3 credits

This course will explore the interrelationships among lifestyle, work place, and career planning and execution. Career development theories; occupational educational and personal/social information sources and delivery systems; and organization of career development programs are studied. The course will also emphasize the role of self-assessment of interests, values, and skills. Then it will move to an understanding of the steps in career decision making, and learning the necessary employability skills to obtain roles that ultimately amount to a career.

Arts (ART)

ART 200 Introduction to Studio Arts - 3 credits

This course provides essential, hands-on familiarity with the materials of art and principles of design. It focuses on the “grammar” of visual arts and art materials: line, color, texture, scale and composition, and does so especially in the media of painting, drawing and collage. It enhances your frame of reference for evaluating criteria of beauty and your ability to use and understand visual art as an expressive means of communication within and between cultures.

ART 201 Studio Art II - 3 credits

This course builds on previously learned art studio skills and visual arts “grammar.” Students will be exposed to various extensions of ideas such as: art volume and space, focus, composition, pattern and placement. This course will expand the student’s experience of “seeing” and the translation of visual perception into art making, especially in media such as painting, drawing and collage. Works of art from multiple cultures will be treated. Methods and principles for learning will integrate visual literacy with written and spoken communication. The course will further the idea of visual art as a powerful collective and personal expression of the human experience.

ART 211 Experiencing the Visual and Performing Arts - 3 credits

ART211 provides an introduction to the visual and performing arts; examining the major historical developments, traditions and practices within the visual and performing arts. We explore artistic genres spanning dance, music, theater, and other visual and expressive arts. Through readings, lectures, presentations and other activities, students will develop an understanding of the theories and terminology of the major movements in the global history of the visual and performing arts.

ART 215 Introduction to the Theater - 3 credits

This course surveys major aspects of theatre from ancient Greece to the present. It includes study of significant playwrights, plays, theatre design, dramatic methods and principles. Given the public nature of drama, the relationship between the dramatic works and their cultural contexts will be explored.

ART 217 Storytelling Through Video and Film - 3 credits

This course is designed for people who want to become better film and video storytellers. It is also geared towards those who like movies and television and want to increase their appreciation of those forms. The course will introduce you to the basic building blocks of film and video language; such as, shot composition and framing, editing, sound and dialogue, and narrative structure.

ART 230 Western Arts I: A Survey of Art from Ancient Times to the Renaissance - 3 credits

Beginning with reference to ancient Minoan and Mycenaean art, this course surveys the development of Greek art to and beyond the classical period, the phases of Roman art, the Romanesque, early and late Gothic Art and the Renaissance in Europe. Students develop vocabulary and skills for the analysis of painting, sculpture and architecture, and an ability to communicate about them orally and in writing. The course examines style, technique, and iconography in their historical and cultural context, considering the religious, political, and intellectual climates expressed through the arts. We learn criteria for evaluating quality and beauty, examine how an object was made, for what purpose and audience. This course may be taken independently of ART231, Western Arts II.

ART 231 Western Arts II: Survey of Arts from the Renaissance to Post-Modernism - 3 credits

Beginning with the Renaissance, this course surveys the exciting proliferation of styles, symbolism and techniques in western visual arts during the past five hundred years. Major styles and periods include mannerism and the baroque, neo-classicism, romanticism, realism, impressionism and the many forms of modernism, among them, expressionism, surrealism, abstraction and pop art. Students strengthen their vocabulary and skills for the analysis of painting, sculpture, architecture, and gain enhanced ability to communicate about them in writing and speaking. The course examines style, technique, and iconography in historical and cultural context, considering the religious, political, social and intellectual climates articulated in the arts, including new systems of patronage and attitudes toward the public. We learn criteria for evaluating quality, beauty and accomplishment in the arts, and examine how an object was made, for what purpose and audience. ART230 Western Arts I is useful preparation but is not required.

ART300 Art in the Public Interest - 3 credits

Public art explores the role that art and artists play outside of the traditional structure of museums and galleries by investigating notions of the public and the private. Through analysis of publically-funded and commissioned art, site-specific art, guerilla art, and socially-engaged art, students consider the aesthetic, sociocultural, and political issues in creating art that engages with the public.

ART 301 Art and Society - 3 credits

Students learn how artists, art critics and philosophers think about and create visual arts, theatre, music and other arts. We examine the lives and works of artists, theories of creativity, and criteria for defining beauty and assessing quality. Students get direct experience of the arts through art exhibits, films, interviews, performances and other media.

ART 303 Modern Theatre and Public Consciousness - 3 credits

At the dawn of the 20th Century, the idea of theatre and its role in society changed. Public spectacle about the lives of kings and queens, as well as the overheated melodramas so popular in the mid-1800s, were increasingly replaced by a subversive theatre that challenged audiences to consider their own role in society, whether "realistically," "absurdly," or "magically." Ibsen's defiant heroes and Chekhov's waning aristocrats gave rise to American working-class heroes (and losers) in Clifford's *Odets* and Arthur Miller, the militant theatre of Bertolt Brecht, the absurd theatre of Ionesco and Beckett. Finally, the contemporary theatre must be contemplated in considering what such works as Tony Kushner's *Angels in America* and *Homebody: Kabul* and the public reception of them, have to say about us, our culture, our art, and our vision of humanity.

ART 305 Women and Film - 3 credits

This course focuses on how women are shown in key films of the 20th century. Films presented consider images of women that are one-dimensional (sex goddesses or saints, career women or mothers, vamps or all-American girls) as well as more complex, multidimensional characters. We explore the issue of how the star system, the Production Code, social values, and the personal vision of the directors affect women's depiction on the screen. We learn film vocabulary terms that help us discern and analyze how films use sound, visual, and narrative techniques to portray the image of women. Moreover, the course studies how and to what extent films today influence women's ideas about beauty, identity, marriage, motherhood, career, sexuality, and gender issues.

ART 400 The Harlem Renaissance - 1 credit

The Harlem Renaissance was a major movement in American cultural and social history. During a brief period in the 20s and 30s, Harlem, New York became the world capital of Black artistic life. In this one-credit class, we focus on visual art, dance, and music of the time while attending to literary works such as poems, essays, and short stories. We will focus on the intersections of race, gender, and sexuality, and how art relates to these intersections.

Cybersecurity (CBS)

CMP 251 Network Security and Communications - 3 credits

This course is designed to prepare students for the CompTIA (Information Security Specialist) Security+ Exam. This course will cover general digital security, cryptography, network attacks, wireless security, application security, device security, identity management, risk mitigation, and cybersecurity tools used by industry professionals. It is specifically constructed to prepare students for Security+ certifications, which is an important credential for IT security professionals in the workforce.

CMP 250 Fundamentals of Cybersecurity - 3 credits

This course introduces the foundational concepts, principles, technologies and techniques employed in the field of Cybersecurity. Topics include but are not limited to: categories of threats, information security architecture, hacking techniques, malware, and contemporary technologies to identify and combat cybersecurity incidents. The interactive framework of the course will provide students with the practical experience in identifying, assessing and responding to a range of Cybersecurity threats.

Computer Sciences (CMP)

CMP 130 Introduction to Computer Applications - 3 credits

Assessment available. This course provides a hands-on introduction to the personal computer, Windows, word processing, spreadsheet, presentation software, the Internet, and an overview of Word, Excel and Power-Point uses. Students begin with the basics of each application and progress through intermediate level.

CMP 230 Information Literacy - 3 credits

Prerequisite: CMP130 (course or portfolio) and familiarity with Windows and/or Mac operating system, or permission of instructor. Information literacy is necessary for lifelong learning and career advancement. It is the ability to analyze problems, research and select relevant information, create an effective presentation from that information, and, when appropriate, publish it in print or electronic formats. Students acquire the knowledge, skills, and abilities to apply principles of information literacy to their academic and professional lives. A problem-centered approach is used. Students use the Internet and e-mail news groups, file transfer and Netscape, and search engines. They learn to evaluate the credibility of information and use problem-solving paradigms.

CMP 310 Computer and Network Support: Part I - 3 credits

This is the first of two classes that provides the technical skills and knowledge students need to be successful in entry-level IT careers. Through a combination of lecture and hands-on work, students learn about PC hardware, operating systems, and basic networking.

CMP 320 Computer & Network Support: Part II - 3 credits

Prerequisite: CMP310. This is the second of two classes that provides the technical skills and knowledge students need to be successful in entry-level IT careers. Through a combination of lecture and hands-on work, students build on their existing knowledge of networking and learn PC imaging, operating system installation, and helpdesk soft skills.

CMP 330 Web Production I - 3 credits

This is the first of a two-part course on design and implementation of full-featured, interactive websites. Students become familiar with the principles of effective web design. They learn the tools and applications necessary to develop the front-ends to effective and dynamic web sites. Through hand coding and the use of WYSIWYG editors such as Dreamweaver, students develop proficiency in HTML, Cascading Style Sheets, and JavaScript.

CMP 340 Web Production II - 3 credits

This is the second of a two-part course on design and implementation of full-featured, interactive websites. Students tackle back-end issues pertaining to web development. First, they get an understanding of web/database interactions, and then learn to use various coding techniques and applications to create and manage these interactions. Moreover, students put their skills to use on various real-life projects for real external clients. Prerequisite: CMP330.

Communications (COM)

COM 322 Effective Oral Presentations - 3 credits

Through practical study and experience preparing and giving presentations, learners develop expertise and gain confidence in speaking before groups. Students gain competency in preparation, organization, time management, voice projection, enunciation, appearance, posture and body language in order to expand their professional communication skills.

Critical Thinking (CTH)

CTH 225 Foundations of Critical Thinking - 3 credits

We learn to engage in reasoned thinking. We learn to formulate hypotheses; conceive and state definitions, and understand logical consistency and inconsistency. We explore the differences between claims of fact, value, and policy; what constitutes credible evidence; the nature of assumptions. We learn what constitutes a persuasive argument as opposed to an emotive and propagandistic one, and critically examine them. Students learn to present clear, well thought out critical arguments in writing and oral presentations. We look at the relationships among thinking, writing, speaking and listening, laying a strong foundation for improving our capacity to write, speak, and listen well.

CTH 230 Critical Thinking in the Humanities - 3 credits

This course explores fundamental approaches to the thinking about, creating and evaluating works in the Humanities, including literature, history, philosophy, art and religion. This course uses core texts from various periods to examine works in these disciplines to explore essential questions: "Where do we come from? What are we? Where are we going?"

CTH 300 Critical Thinking Through Cinema - 3 credits

This course examines the development of film as a medium for recording and shaping history, for telling primal myths and archetypes, for entertainment, politics and commerce. We consider the vocabulary and methods of film and its limitations, especially when it transfers literature from the page to the screen.

Education (EMC)

EMC 200 Science in Elementary School - 3 credits

This course introduces day to day curriculum planning for sciences. Students learn the rationale, language, and ways of planning effective elementary classroom science teaching. Techniques, strategies and resources are addressed in an experiential class to develop skills that are immediately applicable in many courses 1-6.

EMC 201 Curriculum Development: Social and Cultural Studies: Elementary Grades - 3 credits

Students master the basics of developing their own social studies unit. They study essential topics and skills as stipulated in DOE frameworks. We analyze published curricula and textbooks. The skills to be developed include library skills, field trips, map-making, and neighborhood-based projects.

EMC 202 Classroom Testing and Measurement - 3 credits

Educators are experiencing greater pressure to become more knowledgeable about assessment techniques. This course introduces educational testing and measurement, including traditional teacher-made tests and newer methods. Prospective teachers try out new skills for classroom application. More experienced teachers "finally make sense" of some basic testing concepts including norm-referenced and criterion-referenced tests. We practice structuring test items and learn what constitutes content validity. We apply performance based measures and learn about portfolio assessment. An overview of basic statistical concepts increases confidence in interpreting test results. More importantly, new skills improve teaching and enhance learning.

EMC 210 Introduction to Early Education and Care - 3 credits

Students will learn about the skills necessary for being an early childhood teacher and what the profession offers and requires for career and professional growth. The topics covered include what it means to create a developmentally appropriate program for young children, issues of the daily care of children, and current and future trends of the profession. Included will be an understanding of how developmental, emotional, and educational needs of young children (birth to eight years of age) are integrated in the course of daily life.

EMC 215 Integrating Technology into Teaching and Learning - 3 credits

Technology is most effective when it seamlessly supports instruction. Standards-based software can provide key skills and concepts, give the students the opportunity to model dynamic systems, and allow them to express themselves through a variety of media. Presentation tools address a range of learning styles with visual and auditory cues. Internet resources allow learners to access original source material and provide a forum for discourse among classmates, and with the instructor. Properly integrated, technology forms a silent background for sound educational purposes.

EMC 300 Classroom Management and Discipline - 3 credits

This course is designed to support prospective teachers in the exploration of student differences in the classroom and how it impacts teaching and learning, specifically in regards to issues of classroom management and discipline. The course will focus on issues such as classroom management techniques, group dynamics, teacher/student interrelations, leadership styles, peer group dynamics, appropriate punishment, crisis control, coping with special students, teacher/student rights, teacher authority, and communication with parents and administration. A primary objective is to examine how well-organized and managed classrooms set the stage for student learning and achievement. This course, as such, explores both the theory and practice in the field of classroom management to provide students with a theoretical foundation and personal strategies that can be effectively implemented in the elementary classroom.

EMC 301 Integrated Language Arts & Reading - 3 credits

Students investigate the reading process and the rationale for integrating listening and speaking, reading, writing, and critical thinking by practicing all of these elements. Focus is on the principles and practice of language acquisition and activities that encourage creativity and methods of developing, linking and expanding a child's encounters with literature.

EMC 304 Language, Art and Music for Children - 3 credits

Students investigate methods of developing, linking and expanding children's encounters with literature. The course also integrates art, music and drama into the curriculum of early childhood classrooms. The course includes a weekly lab in which students design and present lessons in the creative arts. Students learn many reading, art and music activities that are age-group appropriate, and how to present them to children.

EMC 306 Mathematics for the Early Education Classroom - 3 credits

The course uses the Massachusetts Frameworks as the guideline to provide instruction on how to creatively teach number concepts, patterns, shapes, space, measurement, and data collection. Students learn how mathematics connects across disciplines and how this subject can be embedded in daily activities beyond the classroom, challenging teachers to be alert to opportunities for facilitating mathematical understanding.

EMC 307 Inclusive Teaching in Early Childhood Settings - 3 credits

This course will introduce the process of achieving an inclusive classroom. Topics addressed will include: the nature of various disabilities and the laws that govern their education; how to use best-practice strategies, accommodations, motivational interventions, and differentiated instruction so that ALL students benefit from instruction; how to work with other school professionals as part of a team that supports students with disabilities, as well as students from culturally and linguistically diverse backgrounds; and how to develop the affective skills of students, including behavior management strategies for behaviorally challenged students.

EMC 308 Observing and Recording in Early Education Classrooms - 3 credits

This course will provide strategies for authentic assessments of young children in school and family settings. Appropriate use of assessment and observation strategies to document development, growth, play, and learning will be studied. Students will learn the value of using data from assessment to enhance curriculum and instruction for the class and individual child. Students will also learn to work with families and other professionals to share assessments and resulting strategies to best serve children.

EMC 315 Developing Curriculum for Young Children - 3 credits

Students will demonstrate their ability to organize the environment and plan developmentally appropriate curriculum within a high-quality learning environment to facilitate young children's learning. They will identify the range of appropriate behaviors, activities and materials and be able to implement an integrated, comprehensive, developmentally appropriate curriculum in a supportive physical and social setting for children birth through age 8.

EMC 316 Effective & Positive Learning Environments in Early Childhood Settings- 3 credits

The emphasis of this course is on using appropriate guidance techniques to promote positive behavior in childcare settings. What is critical is to understand that interventions must be based on the different developmental, cultural and self-esteem needs of children. Students will be presented with discipline models to become competent practitioners of techniques for birth-8 that match the student's personality and philosophy of learning as well as what is appropriate for the developing child. They will learn to help children develop self-regulation, self-concept, coping mechanisms, self-comfort skills, and positive interaction with peers and adults.

EMC 317 Educational Perspectives in Early Childhood Growth and Development - 3 credits

This course covers theories of child development and the developmental sequences critical for early education with emphasis on physical, sensory, language, cognitive, and social-emotional development in the context of individual differences. The course will focus on how children (birth-8) learn based on research in early brain development and the impact of adults on this learning process. Students learn how to create safe, nurturing and challenging learning environments that are developmentally appropriate and promote growth, social skills and knowledge.

EMC 318 Successful Inclusion in the Classroom - 3 credits

Students will learn about different techniques and models that promote the successful inclusion of all students in elementary and early education classrooms. Students will gain knowledge about existing federal and state laws, how to adequately understand and develop individualized education plans, plan collaboratively with other teachers to meet students' needs, and enrich the learning environment for all.

EMC 319 Social Foundations of Education - 3 credits

The social foundations of education course is an exploration and analysis of the underlying issues within contemporary educational policies, practices, and theories. It is an attempt to ground the day-to-day realities of the classroom within larger philosophical, historical, anthropological, political, legal, and sociological contexts. Such an interdisciplinary perspective will allow students to begin to reflect upon the structures and practices of American education and provide a foundation from which to continue becoming reflective and critical educational practitioners.

EMC 322 Health, Safety & Nutrition for Early Childhood Settings - 3 credits

This course will focus on health, safety and nutrition as well as preventative health maintenance of the young child. Students will learn to recognize and respond to child abuse and neglect as well as other factors that may threaten a child's safety. Students will study current theories and practice problem-solving methods and conventional applications for in-class situations. The role of culture, language and ability on health decisions and how they impact young children will be assessed. Students will develop activities and resources for a health curriculum that encompasses all aspects of the healthy child.

EMC 323 Early Childhood Program Planning and Development - 3 credits

This course assesses the management of early childhood programs and child care centers. Topics covered include planning, managing and evaluating programs and environments for children. Subjects for discussion are marketing, record keeping, budgeting, licensing, accreditation, hiring, motivating/evaluating staff, family involvement and community collaborations. Emphasis will be placed on regulations, applicable laws, professional standards, policies and quality standards. Students will learn best practices in supervision and managing resources.

EMC 324 Partnering with Families and Communities in Early Childhood Settings - 3 credits

This course will help students understand diverse family structures and influences and develop consultation and interpersonal skills necessary for communication with coworkers, parents and community members. Students will learn strategies to build respectful and reciprocal relationships with families and the broader community allowing them to help families navigate community resources and schools. Intervention strategies and interviewing techniques will be stressed. Discussions include dynamics of the team process, roadblocks to communication, and analysis of a school system, with subsequent in-service recommendations. Students have an opportunity to apply these learned skills while examining theory concurrently.

EMC 325 Principles of Early Childcare Administration - 3 credits

This course will emphasize professionalism and leadership in early childcare settings, leading students to understand and adhere to ethical guidelines and professional standards. Students will learn the value of collaborative leadership where knowledge is shared, reflective practice is encouraged, decisions are informed by data, best practices are followed and diversity is valued. Students will learn to develop themselves as leaders and mentor others.

EMC 326 Supporting Diversity and English Language Learners in the Early Education Classroom - 3 credits

This course will focus on the theory and practice of multicultural education, providing students the skills and knowledge necessary to create classrooms that best serve all children. Students will explore how children's experience is shaped by their race, gender, class, ability, religion, language, etc. They will learn to create classrooms that will embrace diversity, valuing the contributions and cultures of all students. This course will also include specific strategies relative to best practices for serving English Language Learners.

EMC 330 Literature for Children - 3 credits

This course examines literature for children and young adults from a variety of perspectives. The literature includes classics of poetry, drama, folktales and other fiction. We seek to understand and appreciate the role that literature plays in the stages of a child's development assess the quality of the literature, and appreciate how and why it appeals to children and young adults.

EMC 321 Special Topics in Early Education and Care - 1-3 credits

This course will provide an in-depth review and analysis of a specially selected topic in early education. Topics vary by term and professor, and will be announced prior to the beginning of each term that it is offered. NOTE: This course is designed to provide an in-depth understanding of an advanced and highly specific topic in early education. EMC 321 is a variable-credit course which requires a minimum of 15 contact hours per credit. Topics and course content are determined by the professor and approved by the program chair in advance of the term.

EMC 401 Teaching Mathematics in Elementary Grades - 3 credits

This course provides elementary teachers with a strong foundation in mathematics language, principles, and teaching methods and strategies.

EMC 410 Current Issues and Topics in Education - 3 credits

This course focuses on current issues in the field of education. Topics for this course are selected from issues and /or concerns raised by the United States Dept. of Education, professional educational organizations, and state boards of education. Students study the historical roots of the selected issues and evaluate approaches to addressing the issues.

EMC 412 Storytelling and Playmaking - 3 credits

Students learn developmentally appropriate teaching practices through stories, writing, literature, arts, storytelling, and children's play. Students learn to observe and record the behavior of children ages three to seven and apply their knowledge of developmental stages and the characteristics of young children with and without special needs, to an integrated language arts curriculum. The course includes methods to create a classroom environment that recognizes racial, cultural, and linguistic diversity in young children and supports their learning.

EMC 415 Multidisciplinary Approach to Content Areas - 3 credits

Study of basic disciplines (social studies, arts and humanities, sciences) and how they may be related to enhance the teaching and learning experience including experience with designing lesson plans and effective teaching units.

EMC 420 Strategies for Teaching - 3 credits

This course introduces students to the field of education as an entrance into the challenges and opportunities of becoming a classroom teacher. The course provides a general overview of best practices in teaching and student learning within the context of how American education is organized. This course serves as a foundation for becoming an effective and moral teacher, and, as such, emphasizes understanding of national and disciplinary standards as well as overarching codes of ethics of being a teacher. In particular, the course uses the NCATE standards to highlight the need for a teacher to possess specific content knowledge, pedagogical skills, and dispositions. The course is applicable for elementary, middle, and high school teachers and will make use of both content-independent and content-specific pedagogical methods to demonstrate and apply applicable best practices.

EMC 402 Early Education and Care Field Experience - 3 credits

This course is an advanced field experience that includes observation, participation, and teaching in the early childhood setting (specifically preschool and kindergarten). Emphasis is on program planning including assessment for children in early childhood education. The candidate must apply to the Early Education and Care program chair one semester in advance to enroll in this course.

History (HIS)

HIS 101 World History I - 3 credits

This course provides an understanding of early civilizations from ancient times until c. 1650. Early civilizations include Egypt, Babylonia, India, China, Israel, Greece and Rome. European coverage includes Middle Ages, Renaissance, Reformation and beginnings of the Age of Discovery. This course includes cultural, intellectual, political and economic developments, and is the basis for the 2nd term, HIS102.

HIS 102 World History II - 3 credits

This course explores the historical foundations of the modern world. It reviews the Reformation, Renaissance and the effects of European trading and settlement throughout the world. It continues with the Age of Enlightenment, the American and French Revolutions, the Romantic period, nationalism, industrialization and urbanization, and the transforming 20th century movements in politics, the arts and technology.

HIS 201 U.S. History I - 3 credits

This course traces the development of the United States from the colonial period to the end of the Civil War, surveying the economic, political, social and cultural aspects of this development. The course covers the period of exploration, early settlements, colonial life and issues, the development of a unique political philosophy, conflict with Britain, the Revolution, the development of a government based on a new political theory and the development and problems of this new American society and government in its first seventy-five years. Constitutional development at the national and state levels is explored, with particular emphasis on the Massachusetts experience.

HIS 202 U.S. History II - 3 credits

This course traces the development of the United States from 1865 to its present status as a world power, analyzing economic, political, social and cultural factors. The functioning of American federal and state constitutions is analyzed, providing the knowledge and understanding needed by teachers and other professionals who interact with the public sector. The course covers the aftermath and effect of the Civil War, industrialization and its impact, waves of new immigration, western expansion, conflict with Native Americans, emergence as a world power, World War I, the Great Depression, World War II and later issues of the 20th century.

HIS 301 US History through the Media - 3 credits

This course explores the cultural, technological, political, and economic transformations of American life from the early 1900s to the present through various modes of mass media. The course uses visual and print media such as film, radio, and TV to examine critical issues and phenomena such as immigration, the world wars, the civil rights movement, and the rise of consumerism. Students will evaluate the content and context of new media formats and the role that such media played on the events covered.

HIS 300 Martin, Malcolm and the Movement - 3 credits

This course examines and analyzes the development of selected political and economic issues and structures that shape current events and public discourse. Topics vary by term and may include the evolution of the American political parties, of the Executive Branch, the effects of new media, globalism and others. Students learn to analyze source materials and to distinguish fact from opinion. This semester, historical perspectives on contemporary issues will focus on two central figures of the civil rights movement, Martin Luther King, Jr. and Malcolm X. This course seeks to critically examine the social context, the philosophical and ideological framework of Martin Luther King Jr. and Malcolm X. Through biographical and historical analysis, students will develop a greater appreciation of the two historical figures. In addition, we will critically evaluate and relate the methods of each to contemporary U.S.A. and Third World racial, social, political and economic problems. We will read and study the assigned material and bring to class questions on issues that we wish to critically examine through writings and class discussions. Your attendance and active participation is therefore crucial in this course. The instructional modes in class will be based primarily upon lectures, discussion/debates, DVDs, and audiotapes.

HIS 302 History of the Modern Middle East and North Africa - 3 credits

This course will explore the modern history of the Middle East and North Africa through an investigation of the historical, social, political, religious and economic forces that have sculpted the current cultural landscape across this vast region. Through readings, films, art and news reports, we will examine the impact and influence of imperialism, revolution, expansionism, hegemony, post-colonialism, nationalism, gender and modernity on the region, and develop an informed perspective of the current social and cultural realities across the Middle East and North Africa.

HIS 310 Perspectives on Ancient Egypt - 3 credits

Ancient Egypt figures in film, song, literature and history, but is the ancient Egypt that popular culture imagines now the same as the people saw for themselves then? Drawing upon historiography, archaeology, art history, history and comparative literature in juxtaposition with popular film, fiction and song, students will dissect images of ancient Egypt through time to come to an understanding of ancient Egypt, then and now.

HIS 321 Special Topics in History - 3 credits

This course examines and analyzes the development of political, cultural and economic issues and structures that shape current events and public discourse. Topics vary by term and may include the evolution and current nature of American political parties, of the Executive Branch, the effects of new media, globalism and others. Students learn to analyze source materials and to distinguish fact from opinion.

HIS 343 History of Massachusetts - 3 credits

This course focuses on major persons and events in the history of Massachusetts from Pilgrims, Puritans and Native Americans to the 20th century. Special attention is paid to the development of forms of representative government in the Colonial period and after independence, and to the integration of numerous immigrant groups to the Commonwealth in the 19th-20th centuries. The role of Massachusetts in driving industrial and technological change in America is considered, as is its role in inaugurating public education in America. The course satisfies a key content knowledge area for public school history teachers.

HIS 344 History of the Labor Movement - 3 credits

What are the origins of the modern labor movement? How is it changed and adapted in the 20th century? What new developments have occurred in the 21st century? What laws govern unions? What have unions done for workers? How have free trade, globalization, the economy, and current trends in political thought affected the effectiveness of unions? Is the labor movement still necessary and relevant to today's workers? This course will examine the formation of the AFL and the CIO, the merger AFL-CIO, and the new Coalition for Change. It will analyze the growth of industrialism and de-industrialism, consider the roles of race and class in the movement, and study the theories of the movement that brought it together and split it apart.

HIS 350 Introduction to Political Science - 3 credits

What is the perfect society? How much power should the government have? Is democracy the best form of government? Political science is the study of how and why people come together to form governing institutions. To understand the nature of government, political scientists study such issues as power and authority, human nature, freedom, obligations, justice and the organization of the state. In this course, we examine the work of some of the greatest political thinkers — Aristotle, Plato, Aquinas, Machiavelli, Hobbes, Rousseau, Nietzsche, Locke and Marx — and learn how they look at politics, government and the individual. The course explores a central issue of government: the difficulty of reconciling the good of an individual with the good of the public. In thinking about this question, students reflect upon the definition of justice, the nature and importance of freedom, the relation between an individual and the community, the best form of government, and the character of the ideal ruler.

Human Services (BHS)

BHS 125 Spanish for the Helping Professions - 3 credits

This course is designed for beginning level students in the helping professions such as workers in human services, community agencies, health care organizations, educators, and others who wish to learn Spanish. This course will enhance students' ability to communicate with Spanish speaking populations in work situations related to the health and human services, education and community work. This course will offer intensive exercises in oral communication, reading, listening and written practice of the Spanish language to enhance oral proficiency. Students will not become fluent as a result of this course, but will begin the process of learning how to communicate in a culturally sensitive manner within the context of the helping professions.

BHS 208 Financial Literacy - 3 credits

This course will provide an historical perspective on the creation and expansion of the wealth and opportunity gap within the United States. It will look at the role that education has played in narrowing the income gap, while also looking at the limitations of increased years of education in affecting change with regard to wealth. The course will seek to broaden students' awareness and knowledge of these gaps and provide concrete information and strategies for developing a solid understanding of how to create a financial base. It will cover basic economic literacy, financial planning, credit management, basic banking, home ownership, and the impact of policies that help and hinder the creation of wealth. The course will also create opportunities for students to have increased resources in the areas addressed

through the guest speakers who will present on each of the content areas. In essence, understanding of the history of wealth and asset building in this country, their current financial circumstances, how to better manage their money, and take control of their financial health. It will make explicit the role that building financial health has in creating healthier families and communities, in social mobility.

BHS 300 Domestic Violence: Risks, Trends, Resources - 1 credit

Domestic violence*, also referred to as intimate partner violence (IPV), affects men, women and children of all races and social and economic levels. In 2008 domestic violence reached epidemic proportions and was declared a public health emergency in Massachusetts (Comm of MA, 2015). This course will examine recent statistical trends in reported cases of IPV, the identified risks and behaviors that may serve as cautionary indicators in relationships, and the personal, community and legislative resources available to those who are subject to physical and psychological violence. Students will be guided in exploring their personal attitudes toward domestic violence, violence and gender as well as social acceptance of psychological violence. The role of the human service professional in working with families impacted by domestic violence will be explored.

*Domestic violence is the willful intimidation, physical assault, battery, sexual assault, and/or other abusive behavior as part of a systematic pattern of power and control perpetrated by one intimate partner against another. It includes physical violence, sexual violence, threats, and emotional abuse. The frequency and severity of domestic violence can vary dramatically.

BHS 302 Women and Addictions - 3 credits

This course explores addictions that women have struggled with historically and some now common to women. We discuss the relevance of gender-specific treatment for women, the "real life" complexities of women's lives, the barriers that keep them from receiving the treatment they need, and the most common co-occurring disorders faced by women who experience addiction problems. The impact of the media is also considered. Students examine various theories in relation to treatment of substance-abusing women. A systemic approach is taken to the complex circumstances of these women's lives.

BHS 305 Introduction to Human Services - 3 credits

This course provides an overview of the history, philosophies, structures and systems of delivery for human services. Drawing from a variety of resources including case studies, students learn what the programs are, whom they serve, and how they work; they explore protocols and procedures to evaluate their success. Particular attention is paid to questions of poverty and wealth and their impact upon public welfare. Students become familiar with ethical issues involved in working with diverse populations and communities, and consider the implications for public policy.

BHS 306 Case Management for Human Services - 3 credits

This course focuses on the practice of human services in a case management context. This course is designed to introduce students to a variety of ways in which case management is used to assess and assist clients with identified needs. A particular focus will be placed on how to develop effective service plans with clients and how to find necessary community resources for clients. All phases of the case management process will be discussed.

BHS 307 Substance Abuse and the Law - 3 credits

Students learn about the use of the courts, law enforcement, and other measures in the legal and criminal justice systems to prevent, intervene and treat substance abuse. Topics include: therapeutic jurisprudence, prohibition, supply-side versus demand-side interventions, and concerns of special populations. Special effort is directed toward understanding the impact of the legal and criminal justice approach to addiction problems, interacting with these systems, and improving communication between the legal and treatment systems.

BHS 310 The Art of Advocacy, Skills for Policy and Service Delivery - 1 credit

Advocacy is an art which integrates policy and passion with the skills of communication, social intelligence and change analysis to achieve a better world. Students will recognize how they already engage in advocacy while exploring systems and institutional level advocacy for social change. Each student will outline an advocacy campaign based on a social issue they have selected. The class will visit the Massachusetts State House and other sites. Students will communicate advocacy actions they have undertaken.

BHS 315 Understanding Family & Community Systems - 3 credits

This course builds on systems thinking by applying systemic concepts to understand the makeup and functioning of families and communities. Students review the characteristics and interrelationships among family and community systems, and learn how to assess their respective strengths, resources, needs, and coping strategies. Local community issues impacting families, such as kinds of employment opportunities and unifying traditions on the one hand, and violence and discrimination on the other, are addressed. Students use assessment models to look at their own life situations such as job, family, neighborhood. Students interact with their peers and others seeking to make an impact with families and communities.

BHS 320 Community Building Principles & Strategies - 3 credits

This course introduces the history, theory, and practice of community building in order to increase the effectiveness of people working to improve their communities. It increases students' capacity and engagement in community planning, advocacy, organizing, decision-making and evaluation. The fundamental principles of community building are explored: Such as incorporating those directly affected by policies at the heart of dialogue and community building; valuing racial and cultural diversity as the foundation for wholeness; promoting active citizenship and political empowerment, building on community strengths and assets; ensuring access to fundamental opportunities and removing obstacles to equal opportunity; supporting and enhancing the well-being of children and their families; fostering sustained commitment, coordination and collaboration based on a shared vision and mutual respect. This course is based on The Boston Community Building Curriculum, developed by the Boston Foundation and currently being implemented by Interaction Institute for Social Change.

BHS 321 School, Family and Community Partnerships - 3 credits

Students who are working or preparing to work in education and human services are engaged through interactive learning experiences to understand the development of partnerships with schools to reach, engage, and support families. The model for community success includes building partnerships and providing supports and opportunities that promote active and positive working relationships. Students gain a vision and practical knowledge of what effective partnerships look like and how to tap into community resources. Each student designs a plan to promote school and community partnerships.

BHS 322 Dynamics of Power in Communities - 3 credits

Understanding the theory and how power is used in communities is a key factor for community builders. Developing networks, relationships and strategies must be based on knowing what the forces are and how they interact. This course takes a close look at the underlying connections among the economic, social, political and personal forces of communities as to how they relate to power and change. The course will look at political structures and systems in families, workplaces, institutions and other organizations that make up a community, and the dynamics that occur in terms of decision making and the process of change.

BHS 324 Building Community through Media - 3 credits

Understanding the potentials and functions of media, particularly media that is available at the grassroots level, offers community people ways to reach and engage one another. The course aims to broaden students' understanding of media in general, and community media in particular, and how such media can impact a community's understanding of, and involvement in local issues. The course provides a hands-on, multimedia approach coupled with theory to help students gain a strong appreciation for what media is, how it addresses a diverse audience, how it is used and by whom, and its powerful effect upon communities depending upon who's making it and for what reason.

BHS 325 Community Planning and Development in an Urban Environment - 3 credits

The course will focus on community planning and development and how the process is continuous, guided, and ideally adheres to principles of community building. This course focuses on specific issues of community development where the physical and economic vitality of communities is improved through stakeholder interaction. The literature and activities used in this course will ground students in the issues and tools used to critically examine various community development approaches and projects through a community building lens. Students will be introduced to core theories and methods of city and neighborhood planning, will formulate a research design and scope of services to investigate existing conditions, and will learn how to collect and use data as part of the process of building on local assets to design effective and inclusive solutions to local needs.

BHS 327 Building Successful Organizations - 3 credits

Organizational capacity is the interaction of human capital (employees and clients) with organizational structures to solve collective problems and improve and maintain the well-being of that organization. This course will explore the concepts and practices of developing effective and evolving organizations. The course will be highly interactive and will emphasize the sharing of experiences, ideas, and insights from students. Students will be encouraged to ground the ideas discussed by applying them to their own organizations or those they are familiar with. Critical areas of strong organizations include creating effective teams, empowering employees and those receiving services as fellow decision-makers, and addressing the many challenges that emerge when people work together.

BHS 330 Group Facilitation for Community Building - 3 credits

Students who work with groups whose purpose is to strengthen the capacity of communities and other structures will learn how to work with groups to address issues and reach agreement. Skills associated with group development will be covered. The course is structured to provide students with an understanding of how facilitation skills and methodology that can be used in their practice working with groups and community building initiatives. Participants will learn how to apply group facilitation theory and use interactive methods to engage the hearts, minds, and energies of diverse groups of people in finding and implementing solutions to difficult problems.

BHS 335 Using Dialogue to Transform Communities and Organizations - 3 credits

Dialogue is essential to all relationship building. The course is designed for students to learn the theories of dialogue, how dialogue is used to engage large groups, and to prepare students to understand the potential changes in a community that can be sparked through specific kinds of dialogue. For community change to occur it is critical to have an understanding of the fundamental concepts of dialogue, and what constitutes dialogue for the purpose of making change. The large group dialogue process is an important component for community change whereby people come together to assess situations and develop strategies.

BHS 340 Youth Development and Community Practice - 3 credits

This course prepares students to work with youth in a variety of programs and environments. They will learn key concepts of youth development and explore strategies that can have an impact on individual and organizational practices, and in particular, how workers include youth in decision-making, leadership initiatives, and organizational structures. Students will learn what promotes and what hinders positive engagement with young people, and how to increase youth participation and partnership in projects, programs and especially in the community.

BHS 360 Ethical Issues in Substance Abuse - 3 credits

Prerequisite: BHS401 or experience in the field of addictions (permission from the instructor). This course explores current ethical issues common among a substance abusing population, such as mandatory treatment, involuntary treatment, duty to warn requirements, criminalization, and perinatal addiction. The course also covers professionals' competence, confidentiality, accountability, client welfare, emotional health/personal wellness, and financial concerns. Students begin to understand the ethical debates and the foundations the arguments are based on. This course uses as a foundational code of ethics the Principles of Professional Standards for Substance Abuse Professionals. Students gain increased awareness of the ethical issues in the field and a broader understanding of the debates; they can address client needs more holistically and engage in public discourse on the issues.

BHS 361 Adolescent Drug Prevention - 3 credits

This course is designed to provide a wide range of practical and theoretical information about the adolescent drug prevention programs. Student will learn about the adolescent substances of choice, extent of their drug use and abuse, and types of school-based and community-based interventions. Multicultural considerations in the development and assessment of prevention programs will also be examined. It is recommended that Introduction to Addictions be taken prior to taking this course.

BHS 362 HIV in Contemporary Society - 3 credits

This course provides a basic overview of HIV/AIDS and its impact on the individual, family and contemporary American society. We begin by reviewing the history of the AIDS movement and how that has shaped the politics of illness in the U.S. today. Comparisons with other social justice movements and illnesses/medical conditions are integrated throughout the course. We then look at HIV/AIDS through a variety of lenses. Through the medical lens, we view how HIV/AIDS is diagnosed and treated. As epidemiologists, we look at who is infected and what factors increase risk of infection. Through the health educator and human service worker lenses, we look at prevention strategies, case management challenges, and the mental health needs of people affected by HIV/AIDS. Lastly, we look at how civil rights and community activists respond to the legal, advocacy, and ethical issues associated with HIV/AIDS. Its impact on particular communities and population segments are also studied.

BHS 363 Caring for Elders with Alzheimer's and Memory Related Problems - 3 credits

This course will provide an overview of Alzheimer's Disease and other dementias. Students will gain understanding of common issues affecting people with Alzheimer's and other memory related problems. They will explore some of the ways in which patients with these diagnoses have traditionally been viewed both from a medical perspective as well as a societal one. We will move from a deficit-based approach of caring and labeling those having dementia to one that defines and includes their humanness as they are now living with a dementia. Students will gain understanding and insight into the unique perception, emotion and perspective that a person living with dementia experiences. Students will learn what a habilitative approach to care is and how to incorporate it with those they care for. Issues of the environment, self-care for the care partner and communication will be addressed.

BHS 364 Unequal Treatment: Disparities in Health and Human Services - 3 credits

This course will examine racial and ethnic disparities in health and human services and theories as to why those disparities exist. Students will consider policies that impact quality and equity of care. Specifically we will look at Title VI of the Civil Rights Act, which states that persons will not be treated differently on the basis of race, creed, or color; and how this important policy has been implemented and enforced over time. Students will critically review current efforts to address disparities in care and will focus on cultural competence.

BHS 365 Ethical Issues in Working With Families - 3 credits

This course explores current ethical issues that are common when working with families in a human service setting, such as child and elder abuse reporting, mandatory treatment, involuntary treatment, duty to warn requirements, research, and privacy. In addition, six areas of ethical concern are covered, including: professionals' competence, confidentiality, accountability, client welfare, emotional health/personal wellness, and financial concerns. Students begin to understand various aspects of ethical debates, as well as the foundations the arguments are based on. The goal of this class is to increase awareness of the ethical issues within human services and develop a broader understanding of the debates. The ultimate goal is to prepare students to address client needs more holistically and to engage in public discourse on the issues.

BHS 366 Family Interventions - 3 credits

How workers intervene with families matters. This course focuses on strategies for engaging families. Students learn how to apply a strengths-based approach in helping families achieve their goals. Students will learn from others in the field who work directly with families in a variety of situations. The Family Development Curriculum (FDC) for working with families fulfills the requirement for this course.

BHS 369 Legal and Ethical Issues in Human Services - 3 credits

This course surveys the intersection between legal issues, the clients served by human service agencies, and the agencies themselves. We develop an understanding of how the legal system impacts the client population with respect to various practice areas, as well as the release and exchange of information. The impact of the legal system upon the agencies and their employees is examined. We explore tensions between legal requirements and the provision of services. Finally, we examine the tools available to pursue an advocacy agenda on behalf of individuals, families and systemic reform.

BHS 378 Program Planning and Evaluation - 3 credits

Successful programs address client needs and deliver services utilizing an effective systems approach. Students discuss the issues programs face in establishing guidelines for short-term and long-term planning, recruiting and training staff, and in conducting ongoing evaluation of services. Students participate in a client/provider interview and create a program design. The course addresses systems theory, family relationships, governmental agencies and their relationship to community services, program planning, setting goals and objectives, conducting interviews and evaluations, applied critical thinking, assessment, professional writing, and grant writing. (formerly MAN424).

BHS 400 Family Life Cycle - 3 credits

Theories of growth and development are introduced and applied to the study of individuals and families. The impact of socioeconomic, cultural, ethnic, and social issues on the life cycle is discussed, emphasizing the diversity of developmental schemas. Physical, moral, cognitive, behavioral, and psychosocial development of individuals are addressed in the context of family development. Students trace developmental patterns and identify factors which facilitate or impede growth, using examples from their personal and professional lives.

BHS 401 Introduction to Addictions: Theory & Practice - 3 credits

This course presents concepts and practices related to a broad spectrum of addictions and addictive behaviors, including theoretical models of addiction, terminology, review of substances and their effects, treatment strategies and programs. The impact of culture and ethnicity on substance use and abuse is addressed. Important current issues are discussed, such as difficulties in combining mental health and substance abuse perspectives. Students learn first-hand about a variety of treatment programs through guest speakers. Attendance at at least one addictions support group is strongly encouraged (AA, NA etc.). Students will be NARCAN trained.

BHS 402 Special Topics in Justice Issues - 3 credits

This seminar will provide students with the opportunity to develop an understanding of the justice issues inherent in contemporary social attitudes and institutions. Students will utilize Circles as a forum for in-depth discussion of selected social issues such as race, poverty, juvenile delinquency, crime, war, terrorism, and the death penalty. Issues selected will vary.

BHS 411 Family Systems and Addictions - 3 credits

This course provides an overview of family systems, family therapy, and the history of efforts to deal with substance abuse/alcoholism in recent decades. Topics covered include theoretical models of working with families, terminology, the impact of various family members' substance use, agencies, the process of recovery, and treatment programs. We identify methods of working with families affected by substance abuse, considering social, cultural, and environmental factors. Students learn to work systemically with parents, spouses, and children. They learn what constitutes comprehensive family treatment and the resources that are available to families, including but not limited to Al-Anon. Current research is reviewed.

BHS 420 Strategies for Change - 3 credits

This course provides theoretical frameworks for understanding the process of change and its implications for individuals and families. We look at intervention systemically and in human service agencies, substance abuse treatment programs, medical and mental health centers, and schools. Students identify barriers to change and examine all aspects of an intervention process, from assessment and treatment planning, to choice of strategies, and implementation. A variety of techniques are presented for use with individuals, families and larger groups. Preventive, problem-solving approaches are discussed as well as strategies for creating new solutions. Students hear from agents of change, analyze their own personal and professional experience, and practice techniques in class and, as appropriate, at their work sites.

BHS 421 Mental Health and Substance Abuse - 3 credits

This course explores mental health issues and multiple problems that may be common among a substance-abusing population, such as depression, PTSD, schizophrenia, personality disorders, HIV/Aids, and homelessness. Students begin to understand major symptoms and terminology. We discuss advantages and disadvantages of assessment and diagnosis, and issues specific to gender and culture. The course develops a heightened awareness of mental health issues and a broad understanding of co-occurring disorders, enabling students to address client needs more holistically with a focus on their strengths.

BHS 430 Families with Special Needs - 3 credits

Students learn about the biological, situational, and psycho-social conditions defined as "special needs," and analyze their impact on families, communities, and other childhood environments. The history of governmental response and current laws and regulations applicable to this area are reviewed. Students become familiar with the components of individual and community programs that address special needs, including assessment and rehabilitation planning and the design of appropriate environments. Concepts of "family focus" and "family practice" are emphasized, and students hear from and interact with a number of community experts. Students develop a case study, either individually or in a group, to be presented in professionally written form and orally, in class.

BHS 434 Community Building Across Disciplines: "Portraits of Practice" - 3 credits

Given the multiple dimensions of community life students should be prepared to work with multiple disciplines, bringing community building principles and practices to these arenas. This course will bring together and focus on the potentials for various disciplines impacting community change, providing highly interactive and real world experiences to explore and understand the exciting possibilities of multidisciplinary practice. In teams, students will develop a project that has a potential impact on a community.

BHS 445 Leadership for Community Builders: Theory and Skills - 3 credits

This course will be an intensive exploration of leadership and power from personal, theoretical and historical perspectives. Class participants will reflect on their own leadership experiences, strengths and challenges. They will also develop their analytical understanding of economic, political and social forces at play nationally and locally. This course focuses on developing the skills for the 21st century collaborative and participatory leader whose job is to create the conditions for self-empowerment and leverage the wisdom and resources of multiple constituencies.

BHS 470 Human Services Field Education I - 4 credits

BHS 471 Human Services Field Education II - 3 credits

Human services field education gives students opportunity to practice knowledge and skills gained in the classroom, and to become familiar with the structure and functioning of organizations and community agencies. Under agency supervision, students provide counseling, advocacy, research, information, referral, and similar services, and then document and reflect on their activities. The accompanying seminar includes students from varied placements, who give and receive feedback on case presentations and agency and organization issues. All field sites must be approved in advance by the concentration director and close ties are maintained between the agency supervisor and the course instructor. Students wishing to use their place of employment as a site should contact the concentration director to start the approval process before signing up for this course. The parameters (number of hours, days, etc.) are negotiated between the site, the student, and the College; and a joint contract is signed. Site supervisors must be immediately available to students, and must provide weekly individual or small group supervision. Students should be at their field sites approximately 6-8 hours a week and participate in a 2-hour/week seminar. Satisfactory completion requires satisfactory work at the site and the College seminar. HS Field Education II continues HS Field Education I or covers a new or special situation; offered as a focused study.

BHS 490 Human Services Capstone - 3 credits

Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate human services program. It is an opportunity to explore a topic of personal or professional interest in human services and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BHS491 and pass before graduating.

BHS 491 Human Services Capstone Completion - 3 credits

Second or additional term(s) as needed to complete the Psychology Capstone.

Human Services Management (MAN)

MAN 350 Principles of Supervision - 1 credit

This course explores the use of supervision as a tool for professional development in human services professions. An action-reflection model maximizes the potential for personal and professional growth. Supervisors learn techniques for providing feedback that enhances supervisees' skills, strengthens their ability to reflect on performance, and encourages goal-setting. Supervisees gain competence in the use of supervision as a method of documenting professional development and progress in accomplishing goals.

Justice Studies (JUS)

JUS 200 Crime and Criminal Justice - 3 credits

This course provides an introduction to the nature of the crime problem in the United States, including patterns of victimization and offending and the ways in which the criminal justice system responds to these behaviors.

JUS 205 Introduction to Legal Studies - 3 credits

Introduction to Legal Studies introduces students to the legal system and the legal profession in the United States. The course will explore theoretical and historical influences on the American legal system and the practice of law, the origins of the legal system in English common law, the sources of American law, including an overview of the Constitution, state and federal status, the court system, and the legislative and trial process. Students will explore the legal profession and the varied roles assumed by the legal professional in contemporary society. Students will gain an understanding of the emergence of specialized areas of law and the knowledge and skills needed to pursue a law career.

JUS 225 Introduction to Social Justice - 3 credits

Social Justice, the state where conditions are met for all of creation to survive and flourish, is the bedrock with supports all other forms of justice. This course examines the understanding of Social Justice tradition that has developed over the last century. Principles of power, community, and responsibility will be examined in light of practical political and social problems - racism, sexism, hunger, poverty, and environmental issues.

JUS 300 Working With Adolescents: Group Leadership, Concepts and Techniques - 1 credit

The purpose of this class is to provide students with a basic understanding of effective group leadership skills, concepts and techniques in facilitating educational, life skill and process groups when working with the adolescent population. Students will learn the necessary skills to effectively lead group exercises for topics specific to adolescents. Students will be able to utilize a number of proven group leadership skills to enhance engagement, provide support for change, and increased communication skills.

JUS 301 Working With Families of Court-involved Youth - 1 credit

This class will focus on the skills necessary for students working with families of adjudicated youth. This class will offer a strength based approach to providing support and skills building for the family of adolescents and will highlight the characteristics of the family system, influences on behavior and the changing family. Students will learn to use an integrated, systemic approach to engage family groups characterized by the adolescent dynamic. The impact of economic stress, divorce, family conflict, abuse and neglect, and legal issues on the family system and adolescent behavior will be explored.

JUS 302 Adolescents and Anger Management - 1 credit

This course will focus on developmentally appropriate anger management and self regulation skills youth workers can model, communicate and teach to adolescents. The class will provide students with a basic understanding of the emotion, anger, during the stage of human development known as adolescence. This class will explore root causes of anger and the negative impact it can have on healthy development and interpersonal relationships. Students will learn strategies to assist adolescents in their ability to control and express anger in a healthy pro-social manner.

JUS 303 Mass Incarceration - 3 credits

This course explores the rate of incarceration in the United States. Although the U.S. makes up only 5% of the world's population, we hold 25% of the world's prison population — Why? Through challenging readings, including guest speakers, this course will introduce the student to social praxis as a cornerstone for recognizing the need for blending both theory and practice in confronting injustice. Through guided independent and collective study, we can begin to provide an answer as to why so many Americans are in prison; this awareness will create pathways for action resulting in change.

JUS 304 Foundations of Law Enforcement - 3 credits

Students will examine the basic concepts of law related to citizens' rights and officers' responsibilities to maintain a safe society. This course will offer a study of various careers in public safety including local and state police, environmental police, and federal law enforcement officers to include ATF, DEA, Military Police, DHS, Border Control and ICE. The course will explore the history and development of law enforcement in the United States as well as the roles and responsibilities inherent in community policing. Contemporary social policies, attitudes and recent controversies such as Black Lives Matter, Stand Your Ground, police use of force, and racial profiling will be discussed with the goal of achieving an unbiased understanding of the nature of conflict and possible strategies for resolution.

JUS 305 Introduction to Criminal Law - 3 credits

This course explores the role of law, legislation, prosecution and the courts within the criminal justice system. It examines legal elements of crime, how crimes are prosecuted and defended, types and classes of crime, sentencing, alternatives to prosecution and incarceration, juvenile delinquency and prosecution of minors, victims' services and restorative justice, and social functions of law. The overrepresentation of low-income, Black, and Brown people in the criminal justice system is emphasized, and how race and class inform policing, prosecution, sentencing, and punishment.

JUS 306 Courts and the Community - 3 credits

This course will explore the history of the Community Court system inclusive of Drug Courts and Mental Health Courts, methods employed in assessing behavior and recommending treatment, and the availability of appropriate community resources and strategies used to provide treatment and evaluate outcomes.

JUS 310 Women, Crime and Criminal Justice - 3 credits

This course focuses on the history and role of women as offenders, victims, and professionals within the criminal justice system. Emphasis will be placed on social and cultural norms that marginalize women and create the pathways to criminal behavior. The experience of women within the courts, the jail and prison system and upon returning to the community will be explored. Additionally, the impact of women as professionals within the criminal justice system will be discussed.

JUS 342 Girls and Delinquency - 3 credits

Historically, the Juvenile Justice field has developed program services based upon the needs and behaviors of adolescent males. Within the past five years the need for more gender-specific program and treatment models has been recognized. This course presents a gendered view of the causative issues contributing to female adolescent offending and current program initiatives developed to meet the treatment needs of girls.

JUS 343 Youth and Gangs - 1 credit

The emergence in the 1980s of youth gangs in the Boston area began a youth sub-culture that has taken root in geographically diverse urban communities. Students in this course will be introduced to gang culture, its origins and meaning. The reasons youth are attracted to gang life will be explored and delinquent behavior will be viewed within the context of gang expectation. Students will learn to identify gang colors, symbols and terminology and will gain insight into the personal experience of gang membership.

JUS 345 War, Peace and Non-Violence - 3 credits

Working from an international and local perspective, this course will explore roots of war and peace, connect theory with practice and address personal as well as political implications of war, peace and non-violence. The course will touch on Just War theory, but focus on positive alternatives to war—including a Just Peace framework and the range of strategies (and ways of life) that are often grouped under the umbrella of "non-violence." The course is an introduction, but we will offer time for participants to build community and dig more deeply into specific areas of interest through a final project.

JUS 350 Introduction to Juvenile Justice - 3 credits

This course introduces the history and principles of juvenile justice, focusing on delinquent behavior in the context of adolescence, family, and social/environmental factors. The course explores various societal responses to problem behavior from colonial time to the present, including various community-based and residential program models, and current national debates on treatment vs. punishment of juvenile offenders.

JUS 356 Youth and the Law - 3 credits

This course examines current legislative and judicial systems and practices of dealing with youth who have not reached the age of majority. Issues pertaining to due process, deinstitutionalization and waiver to the adult system are explored. Benefits and liabilities of the Massachusetts juvenile courts are analyzed .

JUS 357 Healing Circles - 1 credit

The circle process is an aboriginal and native way of being in relationship. Circles are used widely in these communities for resolving conflict and restoring community. In recent years the circle process has made inroads into communities and systems in the United States and Canada. Circles are being formed to help heal, support, connect, plan and problem solve within communities in ways that our traditional processes and methods of communicating have regularly excluded due to the nature of their structure. Whether circles

happen at the kitchen table, or within classrooms and systems, the result is always a turning to one another that leaves us with a new understanding of what it means to be in a community. Its implications for what true democracy means and requires of us are powerful and great.

JUS 358 Bullying Behavior - 1 credit

Bullying behavior has recently been identified as a serious threat to the emotional, psychological and physical well-being of both victims and aggressors. This course defines bullying behaviors and examines the role of communities and educators in finding solutions and developing comprehensive plans that protect children.

JUS 360 Contract Compliance and Risk Management for Human Service Programs - 1 credit

This course examines the clinical, personnel and environmental dynamics present within human service programs and the legal, fiscal and ethical responsibilities program leadership assumes to identify situations that may require immediate intervention. Students learn to develop and implement pro-active harm reduction strategies in order to achieve fiscal and programmatic contract compliance.

JUS 365 Adolescent Females and Cutting - 1 credit

This course studies the dynamics of the adolescent female self-mutilator in today's society. Key areas of study are: (1) What is self-mutilation, (2) Who is the self-mutilator; diagnostic factors, (3) How the disorder develops and progresses, (4) Reactions of others, (5) Attachment patterns and family dynamics, and (6) Treatment resources. Course materials are based on: Cognitive-Behavioral Treatment of Borderline Personality Disorder (M. Linehan), Self-Mutilation: Theory, Research and Treatment (Walsh and Rosen), Cutting: Understanding and Overcoming Self-Mutilation (Levenkron). The class presents clear and comprehensive information on the causes and effective treatment resources for this behavior based on the most current and relevant information from noted experts in the field.

JUS 368 American Immigration Law and Policy - 3 credits

This class explores many of the major trends in the history of American immigration and the legal and policy structures developed over time to regulate the flow of immigrant populations into the country. The course examines the politics and debates that have shaped major policy shifts since 1965, when the passage of the Immigration Act of 1965 marked a radical departure from a system of preference based on national origin, up to and including the immigration debate today. The class will be taught from a multidisciplinary perspective utilizing short readings drawn from legal and government documents, newspaper articles, historical essays, and oral histories to inspire class discussion and personal reflection.

JUS 376 Internet Research Methods for Juvenile Justice - 1 credit

Use of the internet is of great value when exploring a field as timely and diverse as juvenile justice. As the field, especially in Massachusetts, takes on a more global perspective, research and practice in countries like the U.K., Australia, New Zealand, Canada, Belgium, etc. becomes increasingly important to the learner/practitioner in a college environment. This course will explore aspects of the internet - worldwide web, usernet, listserves, ftp, etc. with a particular focus on the global dimension of Juvenile Justice.

JUS 377 Legal Process for Reporting Suspected Child Abuse - 1 credit

This course will cover the Massachusetts child abuse and neglect reporting law and regulations implementing that law. Students will learn the elements of law pertaining to what legally constitutes abuse, the responsibilities of mandated reporters in reporting suspected child abuse and neglect, what happens once a report is filed, and the laws governing child protection services.

JUS 415 Violence in American Society - 3 credits

In this course, students explore the roots of violence in this country. Students will identify risk factors for violence (e.g. interpersonal and intrapersonal violence, physical and psychological violence, social violence, war, terrorism). The risk and protective factors of violence from both current and literary examples will be discussed. They also examine existing, and construct new, strategies to prevent violence. Students explore a topic of personal interest in their final project.

JUS 416 History and Current Practice of Corrections - 3 credits

This course is a study of the history and evolution of corrections from medieval beliefs about the nature of punishment through the establishment of church-sponsored penitentiaries to current philosophies of punishment and incarceration. The purpose and function of U.S. jails and prisons, the different levels of security and the diverse approaches to treatment and rehabilitation vs. punishment will be examined. The course will also study recent theory and research pertinent to the effectiveness of prison programming in preparing men and women for successful reintegration back to the community. Current social issues and policies such as Mass Incarceration, Prison for Profit, Use of Solitary Confinement and Physical Restraint, Out of State Transfers, and the Age of Waiver to the Adult System will be debated. The physical and psychological impact of the correctional system on both inmates and correctional officers will be examined.

JUS 425 Program Models for Adjudicated Youth - 1 credit

This course explores the history and developing thinking in the design of programs for adjudicated youth. Current program models within a continuum of care are examined. Students are introduced to the basic issues and controversies in the juvenile justice field and program models utilizing social, medical, and behavioral approaches are compared and contrasted. Students develop needs assessments and service delivery plans.

JUS 430 Global Justice for Youth - 3 credits

The UN Declaration on the Rights of the Child has been signed by all UN nations except Somalia and the United States. This course examines our basic assumptions about the rights of children. Students explore particular factors such as gender disparity, economic disempowerment, and social class assignment which contribute to the inequities in available resource options. Universal principles of human rights and social justice are introduced. In light of these principles, students are encouraged to critically research local, national, and international laws and practices related to children and adolescents with a particular emphasis on juvenile justice systems.

JUS 435 Restorative Justice and Alternative Sentencing - 3 credits

An alternative to the retributive model of justice, Restorative justice offers a reconciliation model in which the victim, the offender, and the broader community can work toward a more personal and satisfying response to juvenile crime. The emergence and growth of several models such as balanced and restorative justice, VORP (Victim Offender Reconciliation Program), and circle conferencing are viewed within the context of adolescent offending. Attention is paid to issues of age, gender, and culture in various methods of conflict resolution.

JUS 315 Wealth, Poverty and Inequality - 3 credits

This course explores differing sociological theories of why inequality exists and how it affects us, and offers alternatives toward a more economically and socially just society. While the United States is the main focus, attention is also given to global inequality. The major emphasis is on socio-economic class, including intersections of class with race and gender. Students will learn about the U.S. upper class, middle class, working class, and poverty class.

Literature (LIT)

LIT 203 Introduction to Poetry - 3 credits

This course will survey the vast variety of poetic expression, from songs, storytelling and the spoken work, to modern experimental forms. Poems which confront the full range of human experience—love and death, politics and religion, comedy and tragedy - will be selected from several ages and cultures.

LIT 210 Topics in Literature - 3 credits

This course explores important themes and topics through in-depth study of literature. Topics vary from term to term, centering on themes of enduring interest that have been addressed by writers of various outlooks and styles.

LIT 215 Shakespeare - 3 credits

This course introduces the thought, dramatic techniques, language and moral psychology of the most influential writer in the English language. In this course, we slowly and carefully read some of the plays of this dramatist and poet, examining his treatment of the enduring issues of human individuality and relationships, including: parental preference and sibling rivalries; the needs, fears, and dignity of the elderly; ambition, loyalty, self-sacrifice, lust, cruelty and honesty; the ability of human beings to plan wisely while also accounting for human weaknesses and passions; the need for all individuals to eventually confront a moral dilemma that will define their character.

LIT 301 Exploring Our World Through Poetry - 3 credits

This course investigates the ways poetry helps us interpret and describe the world around us, our relationships with society, other people, and ourselves. The specific forms of verse in the English language tradition will be explored, as will poetic forms in other cultural traditions which have influenced English. The social functions of poetry in various contexts will also be examined. This course helps students become more effective communicators by appreciating the ethical and aesthetic qualities in both ordinary and poetic language.

LIT 309 Contemporary Latino/a Literature - 3 credits

Prerequisite: WRT101. This course examines the contributions to American literature made by Chicanos, Puerto Ricans, Cuban, Dominicans and other Latino/ Latina writers in the United States over the last fifty years. Through a variety of Latino/Latina writing, we will explore the ways in which these writers represent community, class, race, gender, culture, nation, and ethnicity in their works. We will also examine the ways in which Latinas(os) have manufactured identities within mainstream society, as well as the development of cultural hybrids and other forms of cultural registers. Representative works of various genres will be read and analyzed within a cultural context: the testimonial, the autoethnographic essay, the narrative (novel and short story), drama, poetry and film. Authors include Rudolfo Anaya, Gloria Anzaldua, Sandra Cisneros, Luis Valdez, Cristina Garcia, Julia Alvarez, Junot Diaz, Achy Obejas and Piri Thomas.

LIT 310 Gothic Fiction - Horror - 3 credits

This course explores texts, mainly fiction and poetry of the last two hundred years when a fascination with scientific theories and applied science mixed with a sense that art, nature and science might provide a new religion for human spirituality and perfection. Students read, discuss and write about the excitement and terrors that arose as individuals were encouraged to create a new and better world and to acquire god-like powers. Themes include a fascination with dream states, utopian hopes, progress, emphasis on friendship, empathy, enthusiasm, alienation, and worship of nature. Authors include Poe, Keats, Coleridge, Mary and Percy Shelley, Hawthorne, H.G. Wells, and others.

LIT 311 Studies in Literary Genres - 3 credits

This course deepens the student's initial encounter with literature by closely examining the specific ways in which the various literary genres work, why a writer might choose one genre over another, and how material may be transformed when adapted from one genre to another (when, for example, a film is based upon a novel). The course will study fiction, poetry, memoir, drama, and film. In each semester there may be a particular emphasis on one or more of these genres.

LIT 312 World Literature - 3 credits

Literature is one of the most effective ways to become familiar with cultures that are not one's own. In literature, we are invited, on the most intimate terms, into the homes and minds of people whose experiences we might otherwise know only from headlines or school textbooks. This course examines major texts from various nations, cultures, and periods, in the most reliable and readable English translations. Both universal themes and localized concerns will be discussed, as will the social and historical contexts of each text.

LIT 314 Introduction to Western Literature - 3 credits

This course presents a study of selected major works of Europe from the ancient world and Renaissance to the present, with attention to their historical and literary settings. This course provides insights into such issues as identity, authority, emotions, relationships and social change and structures, from a broad palette of significant writers. Students develop their ability to recognize literary themes, authorial style and the connections between literature and history.

LIT 315 American Literature - 3 credits

The American literary tradition encompasses a wide variety of cultures and social classes. In this course, we examine the literary heritage, selecting significant works and authors from the colonial through contemporary periods. Emphasis is on historical background, cultural context, and the literary analysis of selected prose, poetry, and drama. Students learn to interpret, analyze, and respond to literary works in their historical and cultural contexts. Students gain substantial knowledge of the major periods, authors, and themes in

American literature emphasized in the Curriculum Frameworks for Massachusetts teachers.

LIT 316 Survey of British Literature - 3 credits

This course provides an overview of great British Literature across the centuries and in several genres and styles. Texts may include medieval, Renaissance, Restoration, 18th century, Romantic, Victorian and 20th century literature. In reading, discussing and writing on these exciting texts, students will strengthen their vocabulary for evaluating the quality of literary works as they grapple with social, political and psychological issues, reveal facets of the culture from which they speak and examine timeless human concerns.

LIT 318 The Modern Literatures of Africa, The Caribbean and South Asia - 3 credits

This course will survey the postcolonial literatures of Africa, the Caribbean, and South Asia since 1950. Fiction, plays, and poems will be read within the social-historical context of the long colonial experience and the often trying tensions following political independence. A major theme will be the centrality of literature—of storytelling, song, and performance—in the popular responses to social change. Readings will include the work of women and men writers from more than a dozen countries in the former colonized world.

LIT 325 African-American Literature - 3 credits

Literature has provided the most powerful and perceptive expressions of the African-American experience, from slavery to our own day. Through a rich selection of folktales, songs, short stories, novels (and excerpts), drama, autobiography and poetry, this course will explore the contradictions, defeats and triumphs of Black individuals and communities over four tumultuous centuries. As the African-American story lies at the core of the larger American story, so African-American narratives lie at the core of American literature.

LIT 400 Themes in Literature: Outsiders, Authority, Law and Injustice - 3 credits

This course focuses on the struggle by experienced and caring executives to manage people with very different backgrounds, personal styles and issues. Each text dramatizes attempts to do justice through reason and law, tempered with compassion; focuses on the mystery of the individual personality or soul, particularly among those who have suffered loss; inquiries into the nature of madness; how being reasonable itself may blur the line between sanity and insanity; whether innocence can survive in the workplace; how an outsider calls into question 'business as usual'; and whether law can accommodate truth. There are ethical dilemmas, values, clarification under stress, presentation and analysis of various leadership models, attempts to gather and evaluate evidence, make moral choices, manage crisis and to comfort and resolve grief.

LIT 401 Enduring Themes in Great Literature - 3 credits

One test of greatness in literature is that it provides insights, knowledge and ways of understanding the varieties of human behavior and potential. Examining a small number of core texts in a variety of styles, students in this course will gain familiarity with themes, topics and dilemmas of timeless relevance to vital personal and professional concerns. Reading, discussing and writing about these works can help us understand and respond to issues including rites of passage, managing and delegating authority, determining effective methods of education, recognizing and mediating between divided loyalties, spiritual healing and well-being, social status and individual identity.

LIT 402 The Eastern Epic - 3 credits

This course emphasizes the study and consideration of the literary, cultural, and human significance of selected Eastern epics. An important goal of this course is to promote an understanding of the works in their cultural/historical contexts and of the enduring human values which unite the different literary traditions. The course's pedagogy gives special attention to critical thinking and writing within a framework of cultural diversity as well as comparative and interdisciplinary analysis. The course will consider the transition from oral culture to literate culture, address questions about poetry in general, and appreciate the formative and creative analogues of the Iliad and the Odyssey.

Management (BSM)

BSM 101 Business Writing - 3 credits

The course presents an introduction to the demands of business writing. Students learn how to develop the skills for effective written business communication including idea formulation, research, outlining, drafting, revising, peer editing, and presentation skills. Students will demonstrate an understanding of the relationship between reading and writing as well as the relationship between writers and their audience. They will gain a better understanding of the writing process. They will also acquire the tools to help them think conceptually, read critically, and write analytically. In the process they will learn the importance of, and how to, understand and better evaluate what they read. The course will provide opportunities to evaluate and discuss the ideas of their peers while learning to use these ideas as starting points in their own critical thinking, questioning, and idea development. This course will provide opportunities for students to understand their role as writers as well as their role as critics of each other's writing. As this course relies heavily on discussing assigned readings and on questioning various elements and tools of the writing process, active participation is mandatory; this class will only be as successful as the students make it!

BSM 125 Computer Networking & Support Internship - 3 credits

The internship experience provides students with the opportunity to put into practice the technical and support skills that they learn in the classroom and to gain valuable business experience working in a corporate environment. Under the guidance of the instructor and the internship supervisor, the student works on a helpdesk and/or provides desktop support in a professional environment. Students continue to build their computer networking and support skills through attending learning sessions and through use of journals and other writings and research.

BSM 126 Business Essentials - 3 credits

BSM126 explores the definitions and practice of professionalism in contemporary corporate environments, and how professional behaviors and habits positively impact an individual's success. Students learn how developing a professional persona and personal brand work to positively impact productivity and success in different professional environments, and to understand the importance of maintaining professional standards in the workplace. We review best practices and techniques for professional networking, identifying mentors and allies, developing interpersonal skills, managing corporate workplace standards through vertical and horizontal relationships, maintaining self-awareness, engaging in timely self-advocacy, and building trust with coworkers.

BSM 130 Customer Service Essentials - 3 credits

While manufacturing jobs have dwindled in the United States, the service sector has been on a rapid increase. Consequently, service related roles have been on a rapid increase. Often we think of customer service roles that are characterized as low wage, simple and repetitive. However, nothing could be further from the truth. Service roles vary from industry sector to sector. Roles range from helpdesk functions to more sophisticated consultative roles in finance, accounting, and human resources. In the ever increasing global market, service remains a hotly contested market. All service functions and roles require in-depth customer knowledge, attentiveness to detail, quality standards and a high level of dedication to the customer. This course's primary purpose is to equip students with the varied knowledge, skills and attitudes to be an integral part of an ever-evolving sector and organizational function.

BSM 200 Introduction to Business - 3 credits

Students learn how American business operates. The course begins with a study of business in its broader perspective, looking at the context within which American business fits, and the investment markets which provide the capital needed to grow. The external factors influencing business development and the role business plays in the world economy are examined. The course then focuses on the internal organization and the operations of American business, highlighting major issues associated with managing functional areas of a business, such as marketing, production, technology, and supply chain management. In the later part of the course, financial management, both personal and business, and financial institutions are studied.

BSM 201 Introduction to Wellness in the Workplace - 3 credits

With the cost of health care continually rising, there is increasing interest among employers to find effective ways to improve health while lowering costs. This course will provide students with an overview of the impact of bringing wellness initiatives into the workplace. In this introduction to workplace wellness, students will identify the elements of wellness, characteristics of wellness programs and the return on the investment for companies who have invested in wellness within their organizations, such as reduction of health care costs, reduced rates of absenteeism, increased productivity, improved morale and retention. They will identify how various elements of wellness can be introduced in the workplace and how organizations can sustain a culture of wellness.

BSM 203 Organizational Communication - 3 credits

This course focuses on developing the communication skills necessary to be an effective member of an organization. Students will apply basic communication principles to the creation of effective business documents and oral presentations. The role of communication in team building and the use of technology to enhance messages will also be emphasized.

BSM 204 Financial Accounting - 3 credits

This course introduces the principles that govern financial accounting systems and the income statement and balance sheet that are the principal end products. Students learn how accounting information is used to evaluate the performance and financial status of private, non-profit and public organizations. The course emphasizes the use of accounting information by managers within the organization and by shareholders, lenders, and other outside parties. Basic accounting terms and concepts, and the language of financial management are presented as well as the essentials of the accounting process. The course also builds an awareness of the ethical, information and regulatory environment of accounting.

BSM 205 Marketing - 3 credits

In this course, students master the basic principles and practices of modern marketing. The course offers a broad overview of the nature and fundamentals of marketing activity. It provides an introduction to managing the marketing activities of an organization including marketing information systems and research, the marketing organizational system, and the marketing planning and control system. Topics include analysis of the global marketing environment of the firm, market research, customer and client analysis, target marketing and segmentation, product and service planning, pricing, communications, advertising and sales promotion, distribution management, and the development of marketing and sales strategies and plans. The use of marketing concepts and tools by nonprofit organizations is discussed.

BSM 225 Fundamentals of Investment Management - 3 credits

Fundamentals of Investment Management provides an introduction to the financial industry and develops an understanding of the players, markets, economic interplay, products, clients and functional processing that exist in the world of investments. Subjects covered include the history of financial services, evolution of the industry, risk and return, industry laws and regulatory agencies, how the industry makes money, credits, exchanges and redemptions.

BSM 300 Economics for Managers - 3 credits

This course provides an overview of economics and establishes a foundation and vocabulary for future courses. It gives an applied, practical introduction to macroeconomics and microeconomics. At the macro-economic level the course helps the learner understand how the American economy functions, and what impact changes in the economy may have on the individual and the organization, as well as the impact of the global economy. At the microeconomic level the course examines how individuals and firms make economic decisions. This knowledge becomes the basis of understanding key concepts of supply, demand and pricing, as well as average and marginal costs and breakeven analysis.

BSM 305 Principles of Managing Organizations - 3 credits

This course focuses on the evolution of traditional and modern management theories, practices and behaviors for planning, organizing, leading and controlling in organizations, and considers the contemporary and changing forces that challenge the practice of management. It helps students understand the importance of the environment in which managers function, and explores the processes of strategic, operational and tactical planning. It considers various organizational structures, the contexts for which they are best suited, and the role of communication, decision-making and leadership in managing organizations. It also discusses the principles of organizational control and the role of control systems in improving organizational productivity and efficiency.

BSM 315 Diversity in the Workplace - 3 credits

This course looks at the significance of diversity in management and the implications of diversity for how organizations are organized and how they function. The changing demographics of the workplace are examined and the significance of diversity for domestic and international business are discussed. Organizational approaches to diversity are examined and analyzed. The course attempts to engage differences within the class and help students develop leadership skills for managing diversity, including consensus building, conflict resolution and talking through differences.

BSM 320 Operations Management - 3 credits

This course covers the essentials of the operating systems of manufacturing and service organizations that convert materials and other resources into finished goods and services. Topics covered include key performance metrics, process mapping and analysis, product and process design, new product introduction, supply chain management, plant location and capacity planning, total quality and effective resource management. The goal is to understand the concept of total product life cycle management, and the effect of strategy in the operations role, as well as tactical issues such as inventory control, quality assurance and operations scheduling. The course also discusses recent developments such as computer-integrated manufacturing, flexible-manufacturing systems, and just in time inventory. It considers the interrelationship of operations decisions with marketing, finance and the overall strategy of the organization.

BSM 326 Strategies for Selling - 3 credits

Successful selling requires good communication skills and an understanding of the stages of a sales call. Often a technical person who knows a product or services needs to be more effective in selling that product or service. This course presents a systematic approach to selling. This course is ideal for those who want to learn how to communicate in a more effective manner and to learn how to best present themselves and their products or ideas. The course explores the interrelationships between the psychological and technical aspects of the sales process. It helps develop and sharpen one's interviewing skills.

BSM 327 Customer Relations Management - 3 credits

Prerequisites: BSM205 and BSM326. Students will gain an understanding of Customer Relations Management (CRM) and how to implement CRM tools. Students will examine a holistic approach to using CRM, which can result in customer retention optimization, improved customer value management, and more effective customer service processes. The course will draw on the best practices of CRM which include compiling data from marketing, sales and financial analytics.

BSM 328 Marketing Communications - 3 credits

Prerequisite: BSM205. This course will provide the skills for Marketers to craft an organization's message, so its identity, purpose, and product/service is conveyed to potential customers and the general public. In this course the use of advertising, public relations, and various media are employed to develop content and substance for the broadcast of these messages to the intended audience. An examination of current examples; combined with the hands on development of a comprehensive communication plan, students develop skills that can be immediately applied in the workplace.

BSM 331 Principles and Practices of Consumer Credit - 3 credits

This course defines and examines consumer lending basics including regulations, credit policy, operations, loan closings and loan servicing, product knowledge and the decision-making process. The focus is on how to make an appropriate consumer loan by using a decision-making process which includes interviewing, investigating and knowing various loan products. This course includes lecture material and related case studies for students to develop fundamental credit skills and sound lending judgement.

BSM 333 Statistics for Business - 3 credits

Business Statistics presents the use of quantitative methods to define, analyze and choose among business alternatives. The scientific method of problem solving is presented to provide systematic analysis, selection and evaluation of business alternatives. Various statistical tools are introduced to collect, study and use information in support of rational business decision-making. Topics include decision-making under uncertainty, evaluating independent and dependent alternatives, selection of alternatives given limited resources, forecasting and simulation modeling.

BSM 334 Principles of Banking - 3 credits

This course covers the history, purpose and function of banking. It examines how banks, in today's competitive and changing economic environment, serve the financial needs of individuals, businesses, and the government. The course will also compare the financial services offered through traditional banking institutions and other financial service providers.

BSM 335 Human Resource Management - 3 credits

This introductory course surveys what current and aspiring general managers need to know about personnel and human resource management in business and nonprofit organizations. It is for students who are exploring career opportunities in personnel management rather than experienced personnel specialists. The course covers staff recruitment and selection, performance evaluation, compensation, and management training. It considers the impact of human resource policies on productivity, employee morale and turnover. It also covers the promotion of equal employment opportunity, with discussion of recent court decisions, government regulations, and technical advances that affect the personnel management function.

BSM 340 Managing Information Systems and Databases - 3 credits

This course presents the fundamentals of information management and provides an overview of the issues managers face in the selection, use, and management of information technologies. As economies have become globalized and competition has increased, organizations have turned with increasing frequency to information technology (IT) to help them deal with data processing and information management constraints. The first part of the course covers the basics of designing databases to serve the information needs of the enterprise. Relational database concepts are presented and students build a working database. In the second part of the course, a case study approach is used to cover topics related to the overall management of information systems such as system acquisition, requirements analysis, make-or-buy decisions, decision support systems, and the management of end-user computing.

BSM 350 Comparative Health Care Systems - 3 credits

This course surveys the historic development, organization and unique characteristics of the health care delivery system in the US. We explore the history and functions of health care providers in America; contrast that history and structure with those of other developed nations, discuss organizational patterns of health care facilities, current payment and reimbursement systems, external accrediting agencies, governmental regulation, and medical staff organization.

BSM 351 Human Resource Management in Health Care - 3 credits

This course provides an essential overview of policies, practices, and organizational structures within human resources management in health care settings. Students will compare and contrast the relationship between human resources management and general management; explore the roles, responsibilities, requirements and expectations of human resource management in health care organizations; review compensation and benefits, recruitment, selection and retention of staff, training and development, and other topics in the field of human resources management in health care.

BSM 352 Health Care Economics - 3 credits

This course is designed to give students an understanding of the fundamental characteristics, structures, policies and practices of health care economics in the United States. Students will develop an understanding of health care markets, including supply and demand, delivery, production, services, and costs. Additionally, this course explores practical economic analysis, a survey of insurance policies and programs, and a review of current regulations in health care.

BSM 354 Legal and Ethical Aspects of Health Care - 3 credits

This health law course surveys current federal and state regulatory structures and policies governing the provision of healthcare. Students will learn about professional licensure, malpractice, the provider-patient relationship, informed consent, the regulation of healthcare facilities, the organization of healthcare entities (such as integrated delivery systems), the regulation of health insurers and managed care providers, managed care liability, Medicare/Medicaid, federal self-referral and "anti-kickback" prohibitions, and other ethical topics.

BSM 355 Performance Management - 3 credits

Performance Management investigates control and performance evaluation, including revenues, costs, profits, and investment in assets. We emphasize the importance of understanding variance analysis based on flexible budgets and standard costs of operations in small, medium and large institutions. Additionally, this course reviews responsibility-accounting for revenue, operational costs, contribution and profit centers, and developing a balanced score card.

BSM 356 International Finance - 3 credits

Prerequisite: BSM442. This course describes how businesses evolve into multinational corporations (MNCs) in order to capitalize on international opportunities. Assessing the international environment, comparing various strategies, and how to manage risk will be emphasized. The course will describe the relationship between exchange rates and economic variables. Motives for direct foreign investment, multinational capital budgeting, trade financing, and international cash management will be covered.

BSM 357 Small Business Finance - 3 credits

Prerequisite: BSM225 and BSM442. This course provides an understanding of the financial requirements needed to manage a small business. Students will learn the elements of financial statement analysis, which reports to analyze, financial planning, capital budgeting, investment management, risk, profitability and forecasting. In addition students will learn how to make numbers align with goals, and what questions to ask their accountants to ensure the development of strategies that provide optimal tax advantages.

BSM 401 Health Care Management Fundamentals - 3 credits

Hospitals and other health service organizations are critical to our well-being. Skilled management is required to provide these sophisticated services. Health care managers must be knowledgeable in budgeting, capacity planning, process and job simulation and quality control. The course covers the planning, coordinating and management of these complex resources and skills needed to provide quality health care at affordable costs.

BSM 402 Grant Writing and Fund Raising - 3 credits

A critical skill in business, especially for non-profit organizations, is the ability to raise money by fund raising and grants. This covers the planning and proposal development phases of grant writing, strategies for fund raising, identifying and qualifying potential donors, and grant administration. Hands-on activities provide practice in the skills of grant preparation.

BSM 403 Personal Finance - 3 credits

Personal Finance develops an understanding of the financial alternatives from which an individual must choose in making their personal financial decisions. Subjects covered include financial goal setting, budgeting, financial institutions, consumer credit, insurance and investing.

BSM 404 Social Media for Community Businesses - 3 credits

Community and small businesses often gain a competitive advantage through the use of social media that builds upon their local connections and commitments. However, small businesses typically operate without a formalized marketing department, or the necessary training to use social media as a tool to listen to and engage more effectively with their customer communities. Social Media for Community Businesses is a fundamentals course designed to provide training in the use of social media to promote service and product awareness, community engagement, and customer interaction.

BSM 405 Corporate Finance and Investments - 3 credits

This advanced finance course serves as a detailed exploration of corporate finance and investments, and covers contemporary theories and practices of financial decision-making within corporations. Topics include types and measure of financial risk, portfolio management, options and futures, capital instruments for long-term financing, dividend policy, cost of capital, raising capital, managing and financing working capital, mergers and acquisitions, and international finance. We also review cash flow estimates, discounted cash flow concepts, net present value, internal rate of return, non-discounting analysis techniques, income tax implications for investment decisions, ranking investment projects, real options, and valuation models.

BSM 406 Introduction to E-Business - 3 credits

The course explores the systems, opportunities, challenges and strategies involved in successfully developing and maintaining electronic business. Issues covered include infrastructure design, server management, implementation, security, e-business strategy and marketing. It provides an overview of the key technologies for electronic commerce on the Internet, and reviews current trends and extensions to the technology of the World Wide Web. Electronic payment systems and related issues pertaining to authentication, security and privacy are covered. Organizational applications are explored, and the different business models underlying various types of business-consumer, business-business and intra-organizational commerce applications are analyzed. Students are also introduced to the key legal, ethical and policy issues underlying the use of electronic commerce.

BSM 407 International Business - 3 credits

International Business explores the challenges of managing across national borders and the complexities imposed by operating in multiple markets during an era of rapid globalization. The course examines the ethical and cultural context within which global managers must function and the strategic, organizational, and functional challenges the international environment poses for an effective global manager.

BSM 408 Business Law - 3 credits

This course provides an overview of the U.S. legal system and discusses current issues in business law and ethics. Topics include the role of the legal system in business commerce, consumer pricing, competition and global competitiveness. Students develop knowledge of the Uniform Commercial Code as it relates to the law of sales, commercial paper, and secured transactions. Special attention is given to the importance of ethics in business and potential ethical dilemmas.

BSM 409 Budget Preparation and Reporting - 3 credits

This course introduces students to the techniques and tools used in the development and reporting of budgets. A budget is an institution or department's structured plan which projects or anticipates the desired outcome of financial activity for a specific set of resources for a fixed period. Specific areas of study within this course include: estimated revenues and expenditures; asset receipts; liability receipts; expenditure receipts; internal revenues; internal revenue transfers; capital fund internal revenues, and interest on outstanding accounts/notes receivable. We discuss and analyze various types of expenditures, and how funds are distributed to best serve an institution's strategic plan.

BSM 410 Entrepreneurship - 3 credits

Entrepreneurship explores the challenges and rewards of operating a small business. Areas studied include opportunity evaluation, location, marketing, financing, organizing and operating start-up and small business. Of special interest are the issues of success and growth management.

BSM 411 Planning, Budgeting and Forecasting - 3 credits

Prerequisite: BSM333 Business Statistics. This course examines the financial planning process within private, public and non-profit institutions, and includes a review of standard budgeting concepts, annual profit plans and supporting schedules. Students will analyze different types of budgets, including activity-based budgeting, project budgeting, and flexible budgeting. This course will also investigate top-level planning and analysis within organizations, and strategies for forecasting; including quantitative methods such as regression analysis and learning curves.

BSM 412 Money and Banking - 3 credits

Prerequisite BSM300. For anyone in business it is important to understand the influence that the banking system has upon interest rates, economic growth, and price and employment stability. This course covers the banking system, credit, money and interest rates, and the interrelationship between the domestic and international financial institutions. The course begins by studying monetary systems from 5000 BC to modern times. Students learn how our economies evolved from barter societies to new forms of money such as credit cards and electronic funds transfer. Next, the course presents the commercial banking systems in the U.S. and foreign countries. Then the course covers the role of the Federal Reserve System's and other nations' central banks in influencing a country's economic status. Then a more detailed analysis of bank operations is presented and the analysis is expanded to other types of financial

institutions such as savings banks, credit unions, mortgage companies and government agencies. Finally, international banking institutions and international monetary exchanges are studied.

BSM 413 Strategic Business Planning - 3 credits

Strategic Business Planning explores strategic planning from the general manager's viewpoint. The course covers the range of strategic decision-making from establishing a strategic vision and mission, setting objectives, crafting and executing a strategy to achieve the objectives and evaluating performance and initiating corrective adjustments.

BSM 414 Strategic Management - 3 credits

The principles and tools of the strategic management process are the focus of this integrative course. Students will apply the knowledge and skills developed in the functional areas of management to formulate competitive, sustainable organizational strategies. Extensive use of case studies and simulations will require the ability to think critically and communicate clearly. The ethics of strategy implementation will also be emphasized.

BSM 415 Leadership Models - 3 credits

Constant changes in the world and fast-paced changes in technology call for effective leaders with vision. Leaders are the Change Agents. The course examines effective approaches to leadership. What constitutes an effective leader? What are the significant differences between leaders and managers? What importance does power hold in the transition process? The course analyzes leadership models, problem solving, ethics, strategic styles of interaction, decision-making techniques, and effective strategies for implementation of goals.

BSM 418 Internet Technologies - 3 credits

Internet Technologies presents an overview of current and emerging technologies relevant to electronic commerce. Topics include communications and networking, the Internet, programming languages, security, databases and archiving, web authoring tools, multimedia, transaction processing, search engines, and data mining. Students learn the function and interrelation of component e-commerce technologies and the modern vocabulary of e-commerce technology.

BSM 420 Internet Marketing - 3 credits

The course addresses marketing on the Internet. Integrating web marketing activities into organizational marketing strategies is a major challenge for ongoing businesses and startups alike. This course focuses on the capabilities that allow business and nonprofit organizations to develop distinctive marketing approaches on the Internet. Throughout, it emphasizes the role of Internet marketing in the overall marketing strategy of an organization as well as the need for careful integration between strategies executed in cyberspace and in the physical world. Students analyze varied Internet marketing cases and develop marketing plans that include major Internet elements.

BSM 421 Digital Marketing (DMM) - 3 credits

Prerequisite: BSM205. This course will emphasize the role of digital marketing in the overall marketing strategy of an organization, integrating on line and off line (TV, SMS [Short Message Service- text messaging], Radio, display advertising) marketing channels. Students will also learn how to identify customer needs and utilize social media, search engine optimization, content marketing, and email to successfully target desired audiences.

BSM 423 Business Analytics - 3 credits

Prerequisites: BSM205, BSM421, and MAT201. In this course the student will develop a working understanding of the principles of organizational data analysis. Students will learn how to apply scientifically based strategies to create decision-making frameworks based on how a clear understanding of data collection and analysis positively influences institutional outcomes.

BSM 424 Social Media Marketing (SMM) - 3 credits

Prerequisite: BSM205 or permission of instructor. This course focuses on social media platforms that allow business and nonprofit organizations to develop distinctive marketing approaches using Social Media. Throughout, it emphasizes the role of social media marketing in the overall digital marketing strategy of an organization. Students learn how to develop social media marketing content directed at targeted audiences, where the exchange of information between content providers and the targeted audience include major internet elements.

BSM 430 Nonprofit Organization Management - 3 credits

Nonprofit organizations are making an increased contribution to our society and economy on a domestic and global level. Managers of nonprofits face many of the issues faced by for-profit entities as well as the managerial, organizational, human resource and legal issues of nonprofits. The course explores the challenges faced by non-profit managers and approaches used to respond.

BSM 431 Introduction to Hotel and Restaurant Operations - 3 credits

Prerequisite: BSM200. This course will introduce students to hotel and restaurant industry and provide an overview of the different functions within the field. Students will gain a basic understanding of the restaurant and hospitality industry. Students will also gain an understanding of the evolution of the industry and explore current trends. The course will be delivered through a variety of lectures, site visits and class projects.

BSM 432 Hospitality Operations Management - 3 credits

Students will analyze the workings of a restaurant from all operational perspectives. These include menu design, location analysis, physical layout, front- and back-of-the-house design, and back-of-the-house work flow. This course will integrate material taught in other classes and result in an understanding of and appreciation for the complex world of successful restaurant operations.

BSM 433 Hospitality Marketing, Sales and Food Promotion - 3 credits

Prerequisite: BSM205. This course examines the principles of menu pricing, food and drink development and enhancement. The course will also provide students with the ability to properly develop marketing plans and understand how to target the appropriate customer base. Topics will include forecasting product requirements, researching menu trends, competitive analysis of restaurant concepts and how to manage the development of marketing concepts to target markets. Topics will also include personal selling by waitstaff, advertising, and public relations. Students will develop marketing plans and analyze current merchandising plans for food products and services.

BSM 434 Advanced Hospitality Operations - 3 credits

Prerequisite : BSM 431. This course will emphasize customer service, industry trends, sales, and merchandising. Students will explore the details that are necessary to create and maintain reservation and point of purchase systems. Students will learn how to plan and control inventory, learn the latest merchandising products and services and learn how to utilize customer relations management techniques and technology.

BSM 435 Food and Beverage Cost Control - 3 credits

Prerequisites: MAT102 and BSM204. This course will examine the information and skills necessary to analyze and improve the profitability of a foodservice establishment. Topics include forecasting sales, and controlling labor and food costs. Students will also analyze the complete purchasing cycle of a restaurant, beginning with product and vendor selection.

BSM 436 Legal Issues in the Hospitality Industry - 3 credits

Prerequisite: BSM200. This course gives students an overview of the legal issues surrounding the operations of a hospitality facility. Students will leave with an understanding of their legal obligations as an employer, business owner, and manager. This course will also give students an understanding of the legal concepts that are very specific to the hospitality industry such as ServSafe.

BSM 437 Current Trends and Issues in the Hospitality Industry - 3 credits

Must be taken in the student's final semester. This course will explore issues that currently impact the hospitality industry in the local, national and international arenas. The course will deal with employee development and assessment.

BSM 438 Hospitality Industry Internship - 3 credits

Prerequisite: BSM200. The internship provides participants with practical experience within an actual food service or hotel operation.

BSM 439 Consumer Behavior - 3 credits

Focuses on the basic concepts of consumer behavior in a variety of contexts. Understanding the decision process, attitude, and behavior of buyers is essential to developing marketing plans in today's competitive marketplace in which sophisticated customer relationship management approaches are dependent upon knowing the customer. Considers the major theoretical approaches to consumer behavior and examines how the concepts of affect and cognition, behavior, learning, and the environment can be used to design and maintain an effective marketing strategy. Offers students an opportunity to also gain a better understanding of their own buying behavior.

BSM 441 Business Ethics - 3 credits

Business Ethics provides an in-depth understanding of the ethical, social and political context of organizations today. It approaches social problems with an ethical framework for choosing among alternative courses of action. The course emphasizes the application of ethical reasoning to real business and management situations, problems and decision-making.

BSM 442 Financial Management - 3 credits

This course provides tools for managing business funds and making decisions that will affect the financial position of an organization. Students gain an understanding of financial analysis and its use in planning and control functions. Capital budgeting, discounted cash flow, and present/future value techniques are presented as well as the capital formation process, the advantages and disadvantages of various capital structures, and the long and short term uses of capital. Students gain an understanding of the workings of financial markets and institutions, financial instruments, and the domestic and international financial environment. Prerequisite: BSM204.

BSM 445 Organizational Theory & Behavior - 3 credits

This course examines the factors which influence individual, group and firm behavior in the work place. Topics include communication, motivation, group dynamics, leadership, power, and organizational design and development. Theories and frameworks, case discussions and skill-building exercises are used to understand and apply each topic. Class sessions and assignments help participants acquire the skills that managers need to improve organizational relationships and performance.

BSM 456 Intermediate Financial Accounting - 3 credits

Considerable attention will be given to examples from current accounting practice and the reporting requirements promulgated by the Financial Accounting Standards Board. The focus is on an external user perspective and financial accounting standards promulgated in the U.S.; however, international contrasts and/or constituencies are brought into the discussion of many of our topics. Ethical considerations and impact on various stakeholders are also an important component of our study of financial reporting practices. The course is for students preparing to become practicing accountants in either the public or private sector. In addition to prospective practicing accountants, the course provides valuable background for those looking forward to various managerial or financial careers.

BSM 460 Database Management - 3 credits

This course introduces the fundamental concepts necessary to design, use, implement and administer database systems. The course stresses the fundamentals of database modeling and design, the languages and facilities provided by database management systems, and the techniques for implementing and administering database systems. Students learn how to use SQL to create, update and query a relational database, build a database application, and perform basic database administration tasks. Data integrity and transaction controls techniques and the impact of networks and client-server architecture on database management systems are discussed.

BSM 465 Negotiation & Conflict Management - 3 credits

Networked organizations present different challenges for the negotiation and conflict resolution skills of managers. The fact that today's networked organizations are less hierarchical and more global makes negotiation at every level a necessity and increases the potential for conflict, while the lack of face-to-face communication and long-standing relationships make the resolution of conflict more difficult. This course examines the basic theories of integrative bargaining and problem solving and helps extend these models to the current realities of distributed work and collaboration. Through case studies and experiential exercises students analyze the processes of diagnosing conflict, planning for negotiation, and implementing solutions within networked organizations; and develop conflict resolution skills.

BSM 470 Project Management - 3 credits

This course introduces the principles of project management. In today's organizations, work is increasingly being organized in the form of temporary projects. The project manager is responsible for pulling together resources from across the organization and for delivering results on time. The course provides an overview of the basic management principles and procedures involved in starting, managing, controlling and terminating a project successfully. Topics covered include the project management process, controlling and managing a project, selecting the project team, understanding the relationships of projects to organizational goals, defining project scope, project scheduling, control and coordination techniques.

BSM 475 Information Technology - 3 credits

Technology is an integral part of every manager's work. An understanding of computer technologies is essential for today's successful manager. The course presents an overview of computer technology, its use, and strategic value across the enterprise environment. Subjects include hardware, software, security, networking and databases.

BSM 480 Small Business Accounting - 3 credits

Prerequisites: BSM204, BSM442, and BSM456. This course introduces accounting concepts and procedures relating to small business. Content includes a basic overview of the accounting cycle, data entry using manual and computerized systems, analysis and use of financial statement data.

BSM 481 Cost Management and Internal Controls - 3 credits

This course explores cost concepts, flows and terminology. Students investigate alternative cost objectives; cost measurement concepts, and cost accumulation systems including job order costing, process costing, and activity-based costing. Additionally we discuss overhead cost allocation; operational efficiency and business process performance topics such as JIT, MRP, theory of constraints, value chain analysis, benchmarking, ABM, and continuous improvement. Students will review risk assessment; internal control environment, responsibility and authority for internal auditing; types of audits; and assessing the adequacy of the accounting information system controls.

BSM 482 Internal and External Auditing - 3 credits

This auditing course will teach students the proper role of an internal and external auditor. Students will learn the value of an internal auditor in various business operations including purchasing, personnel, production and internal operations. Also the course will teach students the role of the external auditor in conducting an audit using sampling and statistical tools to evaluate the financial statements of an organization. Topics will include but are not limited to the purpose of internal/external auditing, audit pre-planning, collection of evidence and auditing industry software.

BSM 483 Taxation - 3 credits

Prerequisites: BSM204, BSM442, and BSM482. This course offers practical study of current federal income tax concepts, requirements, procedures and forms as they relate to businesses and individuals. Content includes income inclusions and exclusions, capital gains and losses, business and personal deductions and accounting methods.

BSM 484 Accounting Information Systems - 3 credits

Prerequisites: BSM204, BSM442, and BSM483. This course requires work with accounting systems to maintain books and prepare financial statements. Content includes preparation of source documents, flowcharts, journal entries, adjusting entries, general ledgers, subsidiary ledgers, bank reconciliations, depreciation schedules, payroll records, and financial statements, including the statement of cash flows. Microsoft Excel used in this course. Prior experience with the software not required.

BSM 485 Accounting Internship - 3 credits

Prerequisites: BSM204, BSM442, and BSM484. This internship experience gives students an opportunity to practice knowledge and skills gained in the classroom, and to become familiar with the structure and functioning of an organization's accounting procedures and systems. Under supervision, students provide accounting services for companies or non-profit agencies. The students and host organization will document and reflect on their activities.

BSM 490 Management Studies Capstone - 3 credits

Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate management program. It is an opportunity to explore a topic of personal or professional interest in the field of management and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BSM491 and pass before graduating.

BSM 491 Management Studies Capstone Completion - 3 credits

Second or additional term(s) as needed to complete the Psychology Capstone.

BSM 492 Management Field Experience - 3 credits

The management field experience gives students the opportunity to practice knowledge and skills gained in the classroom and to become familiar with the actual operational functions within a for profit or not for profit entity.

BSM 493 Decision Analysis and Risk Management - 3 credits

In this course, students learn to identify and analyze types of risk in corporations, assess measures of risk, and understand concepts of management-relevant data. We evaluate cost-volume-profit analysis, marginal analysis, and make vs. buy decisions. We will also investigate concepts of pricing, and will consider income tax implications for operational decision analysis, operational risk, hazard risk, financial risk, and strategic risk.

BSM 494 Financial Statement Analysis - 3 credits

Financial Statement Analysis will teach students the tools and methods to evaluate a company's current financial positioning and to predict potential earnings and/or losses. Students will use the skills learned to determine how an organization's financial statements are impacted by the organization's operations and strategies. These skills will allow the student to critically think about an organization's performance by analyzing the financial statements. Topics will include but are not limited to cash flow statement analysis, earnings quality analysis and ration and profitability analysis.

BSM 496 Financial Services Operations - 3 credits

Prerequisites: BSM225 and BSM442. This course provides an understanding of the knowledge required to enter the career path of investment banking and brokerage services. The Subjects covered include regulatory agency requirements, comprehensive valuation analysis, integrated cash flow modeling, leveraged buyout modeling, merger and acquisition modeling, investment banking processes & best practices, fraud prevention. Students will learn what information is required to analyze markets and investment tools, to understand market trends for investment products, to be able to oversee client investments.

Management: Health Care (HCM)

HCM 300 Health Insurance and Reimbursement - 3 credits

This course investigates health insurance models and the financing and delivery of healthcare services. Students explore reimbursement and payment structures, and examines insurance practices as they have evolved over time. Students discuss concepts in insurance, third-party and prospective payments, and managed care organizations.

HCM 301 Health Care Policy and Reform - 3 credits

This course examines the structure of the health system, current topics in health care reform, the policy process, and advocacy for public health. Attention will be given to disparities in access to care, the quality of care, the structure of the delivery system, the challenges of long term care and the aging population, and the drivers of cost growth.

HCM 490 Health Care Management Capstone Project- 3 credits

The Capstone is a comprehensive research project related to current issues within the health care industry. This project is the culminating academic activity that helps to synthesize students' learning. It is an opportunity to explore a topic of personal or professional interest and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed.

Mathematics (MAT)

MAT 100 Foundations of Mathematics - 3 credits

Math100 emphasizes the central mathematical ideas of logic, data-based reasoning, pattern recognition, analysis, and rational communication. By combining real-life problem solving with mathematical operations and investigation, we develop and enhance the essential concepts underlying undergraduate mathematics. Topics include a review of multiplication and division, fractions, decimals, percents, ratios, positive and negative integers, expressions, equations and inequalities, exponents, basic graphing, geometric functions, and the fundamentals of algebraic functions.

MAT 101 College Mathematics I - 3 credits

Prerequisite: MAT100 if assessment indicates need. This course introduces students to the value of mathematics for students' career and educational goals. Students will acquire mathematical study skills, gain strategies for problem solving, and develop a sound foundation for future mathematics coursework. The course is structured towards engaging students in active, applied, and real-life learning in order to facilitate mathematical problem solving and conceptual understanding.

MAT 102 College Mathematics II - 3 credits

This course develops students' mathematical thinking and problem solving around issues of both mathematical content and process. Students will acquire a conceptual and practical understanding of and familiarity with numbers and operations, algebra, geometry, measurement, and basic data analysis and probability. The course focuses on supporting students' understanding of problem solving, reasoning and proof, communication, connections, and representations. A key feature of the course is active student involvement to support communicating mathematics in everyday and academic contexts. Prerequisite: MAT101 If assessment indicates need. Challenge exam available.

MAT 200 Using and Understanding Algebra - 3 credits

This course covers the traditional topics of college algebra. In contrast to the traditional course, this course emphasizes real-life applications of mathematics, stresses understanding of concepts over practice and drill, and makes use of graphing calculators, the Internet, and other new technologies. The knowledge obtained in this course helps students understand mathematical concepts used throughout the physical and biological sciences as well as giving you a mathematical base to build on for more advanced math courses.

MAT 201 Introduction to Statistics - 3 credits

Statistics is the branch of mathematics that focuses on the collection of data, data analysis, probability, and statistical inference. In this course students will learn the principles of using data to identify patterns, ascertain distributions, conduct accurate group comparisons, and make data-based inferences and predictions. Concepts of spread, normal distribution, multi-modal distribution, standard deviation, statistical skewing, graphing, statistical significance, variance, validity, and probability will be covered.

MAT 203 Pre-Calculus - 3 credits

This course reviews and strengthens algebraic and logical reasoning skills necessary for the study of advanced math concepts. Topics include: operations with polynomials, literal equations, absolute value, linear equations, determinants, quadratic functions, synthetic division, rational functions, exponential and logarithmic functions, binomial theorem, and sequences and series. The trigonometric subsection studies topics of right triangle trigonometry, trigonometric equations, law of tangents, sines and cosines, identities and graphing of trigonometric functions. The course also explores limits and introductory ideas of rate of change.

MAT 310 Mathematical Thought - 3 credits

This course views mathematics as the science of reasoning. Topics include elementary set theory, logic, techniques of proof, basic properties of the real number system, mathematical induction and axiomatic systems, patterning in number and space.

Multidisciplinary Studies (BAM)

BAM 490 Multidisciplinary Studies Capstone - 3 credits

Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate multidisciplinary program. It is an opportunity to explore a topic of personal or professional interest in the field of multidisciplinary studies and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BAM491 and pass before graduating.

BAM 491 Multidisciplinary Studies Capstone Completion - 3 credits

Second or additional term(s) as needed to complete the Psychology Capstone.

Music (MUS)

MUS 100 History of Jazz - 3 credits

The purpose of this course is to familiarize students with the rich heritage of jazz, America's true artform, through historical and cultural data, examination of style, and an in-depth visual and aural evaluation of the great artists who have contributed to enrichment of society through this music.

Philosophy (PHI)

PHI 201 Introduction to Philosophy - 3 credits

How can we best understand the meaning of love, faith, friendship, truth, anger, forgiveness, or address the purpose of life? Can we know that God exists? What is justice, and do we live in a just universe? What is true happiness? What is the role and purpose of education in our lives? While we all confront these issues, few of us are able to formulate answers to them in a systematic way. When we do philosophy, we attempt to do just that. Philosophy comes from the Greek word meaning, "love of wisdom." This simple statement hints that philosophy combines passion and reason, emotion and intellect. This is why Aristotle wrote that experience of wonder is the beginning of philosophy. Nearly all human beings spend time wondering about the big issues mentioned above. All of us attempt some philosophy on our own. In this course, we work on it together. We read works by some of the people who have wondered most carefully about these issues. To do this, we develop our own capacities for rational inquiry. This means learning how to make sound arguments, ask good questions, and recognize logical errors in our own thinking and that of others. This course develops our capacity for rational inquiry and wonder so that we can confront and begin to resolve the questions and problems that matter the most to us.

PHI 235 Introduction to Philosophy Through Literature - 3 credits

This course explores the foundational questions in the Western philosophical traditions through classical and contemporary philosophical and literary texts. We address questions pertaining to the construction and practice of identity, knowledge, moral behavior, notions of beauty and justice; moreover, we examine how experiences of doubt, fate, and evil challenge these constructions.

PHI 300 Existential Philosophies - 3 credits

"Existence" literally means to step forth. Characteristic of existential philosophies is the inquiry into what it means to "step forth" in the journey of becoming a self, i.e. a journey involving freedom, anxiety, despair, risk, choice, and the joy of embracing life. The course examines writings by 19th century philosophers and writers, such as Kierkegaard, Nietzsche, Dostoyevsky, Kafka, whose texts contain existential elements that inspired the mid-20th century philosophical-cultural movement of existentialism (Sartre, Camus, Beckett) as well as the phenomenological response (Heidegger) to existentialism. Finally, the course discusses 21st century philosophical positions that both react to and are inspired by these previous philosophies.

PHI 310 Ancient Greek Philosophy - 3 credits

Both Plato and Aristotle held that all philosophy begins in wonder. This course examines the wonder that the ancient Greek felt and how it got transmuted into philosophy, that is, into the attempt to give an account of the world and human life within it. This account had to be based on principles and used a rational or logical methodology devised and applied by the intellect. But this view raised questions about the nature of the human intellect, the soul, and the nature of the knowledge which it could generate. These and related questions will be explored mainly through the works of the Pre-Socratics, Plato, and Aristotle.

PHI 315 Philosophy of Religion, Faith, Doubt and Reason - 3 credits

This course explores the human phenomena of faith, doubt, and reason primarily in their religion dimensions but also in their humanistic dimensions. We examine classical questions in Western philosophy of religion such as the various conceptions of the reality of God and challenges to these notions, the problem of evil as evidence against the existence of God; the function of religious language; and the pluralism of religious traditions. This leads to an inquiry into reason, faith, and doubt in a broader humanistic horizon where we ponder the impact of these phenomena on one's sense of self, trust in other persons, belief in institutions, and identification with values and ideas.

PHI 318 Ethical Analysis in Contemporary Society - 3 credits

The existential question "who am I?", perhaps the ultimate question of philosophy, is closely related to questions of morality/ethics such as "what ought I to do?" and "what are the principles for right conduct?". We are all continually being confronted with ethical situations and dilemmas, whether we choose to respond or not. Ethics is the study of the standards of human conduct and of the foundation for judgment. As such ethics addresses issues pertaining to individual and societal norms, and it involves reflecting on the role of the self in regards to others. With this base we identify contemporary social issues that need change as well as the ways in which such change can be brought about.

PHI 320 Philosophy of Film - 3 credits

This course examines how and why we watch films. The course studies films, film theory, and philosophical texts. It covers topics related specifically to film, e.g. the structure of film, the question of how film technology impacts film content, as well as topics pertaining to the humanities, such as the roles of gender and ethnicity. Through these topics, the class looks at how films see themselves and how films develop ideas of identity, including the meaning of being a spectator.

Prior Learning Assessment (PLA)

PLA 100 Prior Learning Assessment: Theory and Practice

PLA100 introduces students to the process of evaluation, documentation and written synthesis of prior learning. Through this online course, students will identify areas of prior learning, and discuss and apply experiential learning research, theory, and models in an evaluation of that learning. Students will prepare an academic narrative which gathers, organizes, and describes their prior learning; constituting a comprehensive portfolio that demonstrates learning outcomes comparable to college level coursework.

Psychology (PSY)

PSY 110 Systems Thinking in Psychology - 3 credits

Systems thinking in psychology is introduced as a theoretical approach to understanding the relationships and interactions of individuals, families, groups, and organizations. Attention is paid to application of the systemic model and how it differs from the linear model, when studying human interactions, analyzing social problems, and developing interventions. Students apply systems theory to problems they select from their daily lives or jobs.

PSY 120 Formative Ideas in Psychology - 3 credits

The CLEP exam in Introductory Psychology is accepted as equivalent. The field of psychology is introduced and the historical development of psychology as an academic discipline and as a professional career are surveyed. The major fields of psychology are explored and applied to understanding human beings as individuals, and as members of groups, and communities. The major methods of psychological research are introduced, including data collection and analysis.

PSY 130 Groups and Social Psychology - 3 credits

The nature and quality of individual experience can only be fully understood when simultaneously observed in its social context. This course introduces the essential sociological perspective that grows out of the psychological study of individuals and their experiences of groups, group behavior, and group membership. This perspective becomes an essential component of psychological understanding, especially as it relates to education, growth, and development. Students gain conceptual and practical knowledge of the ways groups form and develop, how they function and vie with each other, and the multi-dimensional influences groups have upon our lives.

PSY 210 Developmental Psychology - 3 credits

The CLEP exam in Human Growth and Development is accepted as equivalent. This course helps students understand the ways in which people from various cultures and countries develop and change over their lifetimes. Students focus on particular topics such as cognition, social development, or identity, and follow the topic across the lifespan. In this way, we get away from a “stage theory” approach and focus instead on the variety of ways that people live out developmental scripts. Students are introduced to terms and concepts which are basic to a cross-cultural view of development, such as developmental orientation, cross-cultural “perspective,” and a systems approach. These concepts are applied to each topic area, so that students learn, for example, how cognitive development is affected by living in different cultures and how one’s identity is influenced by the various systems within which we live. In addition to reviewing readings and discussion, each class features a group exercise to help students understand and apply information and concepts.

PSY 251 Infant and Toddler Development - 3 credits

This course covers infant and toddler development in the context of family life cycle issues and factors relating to the larger social environment. Physical, cognitive, social, personal and moral development are addressed, along with the resulting implications for creating optimal out-of-home care environments. Multicultural and multi-linguistic influences are considered throughout, and students become familiar with major child and family policy areas. The course focuses on general developmental trends and issues, and students bring in questions from their personal and professional lives. Students also learn report-writing and understanding of assessments.

PSY 253 Psychology of Social Media - 3 credits

This course provides a psychological foundation for understanding the pervasive and expanding nature of social media and how digital experiences shape, inform and impact individuals and collective lives. Drawing from a broad range of theoretical perspectives, we explore the personality, identity, emotional and belonging needs in the online world, social media and social/political movements on the internet.

PSY 310 Psychology of Learning - 3 credits

The conditions of learning are explored, from the prenatal through adolescence and early adulthood, emphasizing cognitive and emotional development. Current views of behavioral change and the learning process are introduced. The theoretical models of Piaget, Pavlov, and Erickson are covered. Students formulate original ideas and incorporate established theories to develop a better understanding of concepts and assist with transferring theory into practice. Topics include the nature-nurture controversy, Maslow’s hierarchy of needs, effects of prenatal development on learning, cultural and environmental effects of development, and multicultural awareness.

PSY 311 Group Dynamics and Diversity - 3 credits

Prerequisite: PSY120 recommended. This course examines the psycho-social dimensions of groups and explores the impact of diversity on group formation and process. Students use the classroom and/or other groups to which they belong as laboratories to study and apply the concepts learned in class. The course builds on the knowledge gained from PSY110.

PSY 315 Research in Psychology - 3 credits

Strongly recommended: at least two psychology courses including PSY120 or permission of instructor. This course introduces students to the major research findings that have had significant influence on the development of psychology as the science of human behavior throughout the twentieth century. Students will learn about the history and philosophy of specific research topics, research questions and methodologies and how they have affected the scope and direction of psychological knowledge and the practice of psychology as a profession. Particular attention is paid to the impact of culture and epistemological models implicit in both quantitative and qualitative research methodologies and how they have influenced the direction of research in the field of psychology.

PSY 316 Cross-Cultural Perspectives in Psychology - 3 credits

This course introduces cross-cultural, traditional, and psycho-spiritual views on human growth and development, wellness and illness, healing and belief, the ritual process, the roles of healers, altered states of consciousness, and comparative models of self-realization. Drawing from a wide range of cultures and perspectives, the course emphasizes the internal coherence of these views and how individuals experience and use them in their own lives and settings. Given recent trends in diversity and cross-cultural encounters, it has become critical to understand the views of those who embrace radically different ideas about the world we all share. Special emphasis is given to the practical implications of this understanding in a variety of human service, educational, and therapeutic settings.

PSY 317 Community Psychology - 3 credits

This course provides an introduction to the field of community psychology. Community psychology is concerned with how individuals and groups interact within their environments and how issues of health and the well-being of community members are addressed in response to shifting social and historical conditions, including crisis situations. Community psychologists seek to systematically understand people within their larger social worlds and as an applied discipline, work towards optimizing both individual and collective aspects of mental health. We will examine how community psychologists emphasize prevention of psychological distress, work towards empowering persons and communities often having few resources, and develop strategies to deal with a wide variety of social and environmental issues that impact individual lives.

PSY 321 Child Development: Themes and Topics - 3 credits

This course will examine human growth and development from birth through adolescence. Students will be provided with an overview of the key concepts and theories that comprise the field of child development through lectures, selected readings and films, and through a variety of educational activities that involve students’ own observations and experiences. We will study the work and theoretical models that have historically described child development drawn from some of the most influential authorities in the field and locate their observations within the context of prevailing social and historical trends. Recent developments and research directions in child development will be incorporated in the content and topics presented in class. The didactic materials and class assignments will enable students to develop pragmatic perspectives about children which can facilitate their own professional goals and aspirations.

PSY 325 Theories of Personality - 3 credits

This course is an introduction to the study of personality and examines a broad range of theoretical explanations for understanding personality development. Students will learn both historical and contemporary approaches to understanding personality including: psychoanalytic, humanistic-existential, social-cognitive, behavioral, biological and feminist perspectives and will also examine the impact of culture on personality development. The course will examine similarities and differences between various theories through case studies and students will be encouraged to explore the relevance of the material to their professional and personal understanding.

PSY 328 Forensic Psychology - 3 credits

This course is an introduction to the field of forensic psychology and examines how psychological theory and practice intersect with the law, the legal system and the field of criminal justice. It will offer a broad perspective of the field and will cover the role that psychology has played in a number of related areas including: theories of crime and criminal behavior, the nature of eyewitness testimony, criminal investigation, the psychological evaluation and understanding of criminal suspects and jury selection.

PSY 330 Adolescents in Search of Belonging - 3 credits

In this course we look at adolescents in traditional and non-traditional families and residential treatment communities. We explore the adolescent search for a sense of belonging in and beyond the family, and for acceptance and inclusion in adult society. We discuss the developmental tasks of adolescence including sexual maturation, identity, and autonomy. We explore adolescent culture, role development, and societal attitudes to adolescents. We research community responses to teen parenting, depression and suicide, substance abuse, and delinquent activity. We look at prevention, intervention, and restoration in the context of community systems.

PSY 332 Learning to Say Goodbye: Death, Dying and Grief in the 21st Century - 3 credits

Nothing is more profoundly human than the experience of loss and the awareness of our own mortality and those around us. It is unique, personal and informed by our community, our culture, and our sense of history. The ways in which society has experienced, processed and expressed such awareness will be examined through a review of centuries of literature, poetry, music and prayer. We will look at the cultural and historical rituals and beliefs that influence the manner in which we approach an understanding of our own mortality and the multiple losses we experience throughout our lives. While considering topics of grief, bereavement, aging and the dying process, emphasis will be placed on the complex bioethical questions of end of life care in the 21st Century. Among the topics to be considered are hospice care, palliative care vs. aggressive medical treatment, DNR orders, physician assisted death, organ donation, health care proxy and living wills. These topics will be considered from multiple perspectives including those of science, religion, culture and law.

PSY 340 Changing Lives: Psycho-Social Perspectives of Women - 3 credits

Students are introduced to women's issues, including current debates in feminist theory and the changing role of women in social institutions. The course addresses a wide range of theoretical perspectives, including psychology, social psychology, literature, and women's studies.

PSY 345 Psychology of Religion: Spiritual and Mystical Dimensions - 3 credits

Educators, clinicians and human service providers need to understand the impact of spiritual experience and religious traditions upon the lives of the people we work with and to recognize how such understanding is intrinsic to new and emerging holistic views of development. This interdisciplinary course explores the impact of the spiritual dimension upon education, psychological understanding, and development. Starting with the voices of children, our study draws from the psychology of religion, anthropology, education, and the humanities to examine the experiential core intrinsic to spiritual life. Special emphasis is given to helping students find practical ways to incorporate this learning into their professional activities.

PSY 351 Adolescents and Addiction - 1 credit

Within the framework of adolescent development, students are introduced to cognitive, personality, behavioral, social/environmental and biological/genetic risk factors which may contribute to adolescent addiction. Stages of substance abuse progression are discussed, as well as screening, assessment, prevention, and treatment strategies. Recovery is presented as a developmental process.

PSY 352 Sexual Activity as At-Risk Behavior - 1 credit

This class studies the developmental, familial, and societal influences on the sexual behavior of teens. It covers STD, HIV and AIDS, teen pregnancy and teen prostitution. Students learn to identify the risks and warning signs of "high risk" sexual behavior among adolescents; they gain the basic knowledge and skills to begin an intervention.

PSY 353 Suicide Assessment - 1 credit

This class covers developmental issues unique to adolescence, characteristics of youth who are at risk for suicide, and stressors including mental illness, family, and cultural issues. Students gain an elementary understanding of the dynamics present within a suicidal adolescent and the basic skills to provide safety and a complete suicide assessment. They are introduced to community referral, supports and prevention strategies.

PSY 354 Crisis Intervention - 1 credit

This course exposes students to the dynamics present in situations in which there is a risk of serious harm or death to self or others unless there is immediate intervention. Students examine crisis assessment and intervention techniques, with emphasis on techniques appropriate to adolescents.

PSY 359 Understanding Child Abuse and Neglect - 3 credits

This is course is an overview of child abuse, neglect, and interventions targeted to this social problem. This course will assist the student in understanding, through case studies and readings, contemporary definitions of child abuse, neglect, sexual abuse, institutional abuse, adolescent abuse and catastrophic maltreatment. Child abuse will be discussed in context of family stress and the course will examine the historical role of societal intervention. Additionally, childhood neglect and abuse and their impact on delinquent behavior will be discussed. The course will review theories related to family relationship and attachment, community empowerment and disadvantage and the impact on adolescent growth.

PSY 376 Psychological and Therapeutic Dimensions of the Arts - 3 credits

This course explores the psychological dimensions of the arts, creativity, and art-making and how the expressive arts are included in contemporary psychological thinking and therapeutic encounters. Using current and cross-cultural examples, we explore how music, dance, theater, painting, poetry, and theater deal with fundamental aspects of human experience and how this awareness informs our psychological understanding of human growth and development and the inner life. We consider how current psychological practice incorporates the arts in therapy and how creative art therapists work. Implications of this study are incorporated into the student's professional work.

PSY 377 Psychology, Meditation and Applied Neuroscience - 3 credits

In this course, students will learn about recent advances in brain science and their applications in the fields of psychology, education, and the helping professions. With recent research in neuroscience, a variety of psychological theories and methods can be understood in terms of what we know about the how the brain functions. They psychology of meditation, visualization and related modalities will be explored which can be applied in a variety of contexts, both personal and professional. The course will include both theoretical and experiential learning activities to help students understand the expanding role of neuroscience in psychology, wellness and related fields.

PSY 378 Psychology of Behavioral Addictions - 3 credits

Behavioral Addictions refer to chronic, compulsive or impulsive behaviors that result in severe negative consequences for a person and may be associated with a variety of normal, healthy behaviors of daily life with regard to: food, money, exercise, sex, work, computer gaming or other activities using technology and other means. This course will introduce students to the emerging field of Behavioral Addictions, the current state of research and understanding as to its underlying causes and expressions and the treatments that have emerged to help those who suffer from a variety of addictive behaviors. Similar to the more commonly known effects of alcohol or substance abuse, normal, healthy behaviors of daily life can also become dysfunctional when a person becomes overly preoccupied or unbalanced with them either by overly engaging in these activities or by avoiding them. Application of treatments to specific populations will be a major focus of the course.

PSY 390 Psychology of Aging - 3 credits

The life phase of old age is characterized by a dynamic interplay of internal and external adaptations including often, a prevailing sense of loss: loss of ones' capabilities and skills, one's physical abilities and health, the loss of friends, spouse or social world and of course, the increasing sense of the loss of ones' own future. And yet, Erik Erikson has also described old age at its best, as a time for the gathering of wisdom and the deepening of personal integrity which can be passed on to others for all to benefit. What does it mean to age "successfully"? What are the challenges, the rewards and the stresses of aging and how do they affect one's psychological experience of oneself and of those around an aging individual? In what ways can old age challenge or fulfill one's sense of oneself? This course will examine the components of successful aging as well as the psychological stressors older adults may experience as they travel through the last phases of the life-cycle. Topics include the influence

of age on cognitive processes, personality and psychological well-being. Special attention will be paid to the impact of culture, gender, and socioeconomics as one looks at the psychology of aging and we will describe strategies to reduce isolation and increase social interaction for the elderly.

PSY 395 Psychology of Race - 3 credits

This course explores the psychological and social factors that influence how we perceive race and how differing notions about race affect our interactions with people from different racial or ethnic groups. The course begins with an interdisciplinary examination of ideas about race, including biological, cultural and perceptual constructs. Cultural transmission theories including meme theory are used to examine how beliefs about race are acquired, reinforced and expressed. We explore the neuropsychology of perception and attribution theory to better understand how race influences our personal and social experience. We will consider the application of this understanding within a variety of psychological and educational contexts.

PSY 396 The Psychology of Women - 3 credits

This course critically examines psychological, behavioral and socio-cultural factors that impact women's lives across the lifespan. Students will learn about sex differences in brain and neuropsychological development, stereotypical gender roles and communication styles, gender differences in relationship expectations and goals and issues related to women's sexuality. Historical and current research on the psychology of women will be examined.

PSY 400 Personnel Psychology: Diversity and Empowerment - 3 credits

Managers and their organizations are trained to tap the full potential of the wide ranging talents and perspectives of their increasingly diverse, global workforces. Emphasis is on the management of diverse workforces and teams in profit and nonprofit organizations, and public and private workplaces. Students explore the principles and practices needed to develop people and work productively in organizations increasingly characterized by differences of color, gender, culture, style, and approach.

PSY 402 Themes in Adult Development - 3 credits

This course explores the development of emotional maturity, using concepts drawn from biological psychology, psychoanalytical theory, and cognitive-behavioral theory. The class identifies biological underpinnings of emotional maturity and focuses on early development, roadblocks, and unconscious pressures that contribute to the development of, resistance to, or retardation of emotional intelligence. Small groups study emotional maturity in the context of counseling, teaching, or the workplace.

PSY 403 Psychodrama and Drama Therapy - 3 credits

Prerequisite: at least nine prior psychology credits.

This course will provide a theoretical and skills-based overview of the uses of psychodrama and drama therapy and how they are therapeutically applied with a range of populations and psychological issues. We will examine the basic concepts and philosophy originating with J.L. Moreno, the founder of psychodrama, as well as other drama therapy pioneers to better understand the process and complexities of action-based psychotherapeutic modalities. In addition, psychodrama and drama therapeutic perspectives will be explored within the framework of individual, group, family, creative

arts therapy and community healing applications. This is a highly experiential, action-based class which combines theoretical and practical considerations of what psychodrama offers within the therapeutic encounter.

PSY 407 Principles and Practices of Art Therapy - 3 credits

This course addresses the foundations of art therapy including its history, major theoretical perspectives, pioneers in the field, and clinical application. The significance of the therapeutic alliance is covered, as well as skills to enhance the therapeutic relationship. The clinical application (individual and group) of art therapy to children, adolescents, adults, and families is examined. The diagnostic application of art therapy is also explored.

PSY 408 Movement and Healing - 3 credits

Drawing from recent theoretical and clinical developments in body-oriented psychotherapy and dance/movement therapy, this course explores the psychological, creative and spiritual dimensions of the body and how it is central to contemporary developments in psychological thinking and approaches to healing. We explore how movement and the body are connected with fundamental aspects of psychological awareness and how this impacts upon our emotional, social, creative and spiritual lives. We examine how current body-oriented approaches to psychology inform our understanding of growth and development, education, psychological diagnosis and treatment in areas such as trauma, body-image, eating disorders, depression, anxiety, and developmental delays.

PSY 409 Family Mediation Techniques - 1 credit

Conflicts among family members are particularly stressful for adolescents. This course offers techniques for successful mediation of family disputes. Emphasis is placed upon introduction of strong communication skills for family members. The role of the mediator is presented as an unbiased facilitator in the family's attempt to resolve conflict.

PSY 410 Theories of Motivation - 3 credits

This course examines current research and theoretical models of motivation in relation to the factors that give rise to, sustain, and direct behavior. Emphasis is on achievement and competence motivation and understanding diverse motivational needs of individuals and groups. Theoretical models explored include Elton Mayo and the Harvard Studies' impact of cooperation, camaraderie, participation and communication; Douglas McGregor's impact of management philosophy; Chris Argyris' impact of the organization; Abraham Maslow's hierarchy of human needs and high performance teams; Robert White (competence); Stanley Schachter (affiliation); and David C. McClelland (achievement). Topics for discussion and field analysis include: concepts of the self; environment; commitment and contribution; career counseling and planning; emotional maturity, needs, and security; human energy and shared vision; assessing and measuring achievement.

PSY 411 Conflict Prevention in a Multicultural World - 3 credits

Prerequisite: PSY110 recommended. Techniques and methods of understanding and addressing conflict in diverse groups, organizations, and communities are explored. The course helps students develop the characteristics and skills of a good negotiator/mediator, who can effectively facilitate constructive changes in themselves, their families, workplaces, and communities. Theories and methods are applied to the classroom experience and off-campus settings, as appropriate. Students examine their assumptions about people who are different from themselves and explore how those assumptions influence how they interact with, and are perceived by other people. This course builds upon systems thinking.

PSY 412 Perspectives in Psychopathology - 3 credits

This course surveys the history of attempts to categorize "deviance," introduces the current model which emphasizes pathology, and discusses selected syndromes (e.g. schizophrenia, depression). We also look at the mental health practices and social service systems for adults and children that have historically resulted from diverse concepts of "abnormal" behavior. Students explore the stress, coping, and resiliency model for viewing human behavior. This paradigm looks at the whole person, with both strengths and deficits, in an environment with factors that foster or debilitate resiliency. Students use this holistic model to assess individual case studies and develop strengths-focused intervention strategies. They grapple with the complexity of individual lives and the mysterious human psyche, and actual cases.

PSY 421 Psychology and Work Today: Introduction to Industrial and Organization - 3 credits

The DANTES exam in Organizational Behavior is accepted as equivalent. This course provides an overview of organizational psychology and examines how general psychological principles operate among individuals in social and organizational settings. The course provides in-depth application of theories and concepts in Organizational Psychology to public and private work settings, and profit and non-profit organizations. Learners acquire competencies based on practical applications of behavioral science research findings in motivation, decision-making, problem-solving, employee development, working conditions, and employee safety and health in the workplace.

PSY 426 Self-Care for Helping Professionals - 3 credits

Students learn about the impact of stress on physical and mental health, job functioning and learning, family and other relationships. Students learn ways to deal with the stress that is often inherent in the helping professions. Concrete skills help them take better care of themselves and pass these skills on to others. Topics addressed include stress management and relaxation techniques, physical activity, nutrition, time, cognitive restructuring, and attitude. Whether you work in human services, health care, schools, or corporate America, this course gives an understanding of stress and stress management and practical applications for you and your clients.

PSY 428 Holistic Psychology: An Integrated Approach - 3 credits

This is a course on integrative approaches across the healing disciplines, focusing on integrating body, mind and spirit in a variety of psycho-educational, human services, and healing contexts. Students learn a multidimensional approach to healing that integrates different techniques, therapeutic orientations and approaches. The course combines theory and research, experiential learning, and practical application of new techniques. We explore new information about ourselves, the ways we approach our professions, and how we can apply this knowledge in our work with various populations.

PSY 433 Existential Psychoanalytic Theory and Life - 3 credits

This course will examine major topics in psychoanalysis and existential therapy. The course focuses on both traditional and current developments in the field. There will be a review of the work of Sigmund Freud, Medard Boss, Rollo May and Viktor Frankl. Why do people do the things that they do? How can we free ourselves from our compulsion to repeat certain behavioral and emotional patterns? We'll explore the powerful forces that compel us to "act out" unconscious scripts. Issues covered will include: the repetition compulsion of addictions, the tyranny of anxiety and fear, the possibility of purpose and freedom, acceptance and commitment, love and will, and the relationship between "dreaming" and authentic living. A willingness to develop self-reflection and self-analytical skills is required.

PSY 470 Psychology Internship I - 3 credits

PSY 471 Psychology Internship II - 3 credits

Psychology Internships give students the opportunity to practice knowledge and skills gained in the classroom and to experience first-hand the practical applications of how psychology and psychological skills are practiced professionally in a wide variety of settings. All Internship sites and student's activities must be approved in advance by the program director and close ties are maintained between the on-site agency supervisor and the course instructor.

PSY 490 Psychology Capstone - 3 credits

Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate psychology program. It is an opportunity to explore a topic of personal or professional interest in psychology and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for PSY491 and pass before graduating.

PSY 491 Psychology Capstone Completion - 3 credits

Second or additional term(s) as needed to complete the Psychology Capstone.

PSY 440 Play Therapy - 3 credits

Prerequisite: at least 9 prior Psychology credits. A course in Developmental Psychology is strongly recommended. This course provides students with an introduction to the principles and practices of a variety of play therapy orientations, models and techniques. Students will learn about the history and development of play therapy as a therapeutic and developmental approach in working with children, parents and families. Specific skills, developmentally appropriate and cross-cultural approaches to play therapy will be explored which can be used when working with children and their families in a variety of clinical and educational settings. Experiential learning is a major component of this course.

Religion (REL)

REL 230 Religions of the World - 3 credits

The religious impulse expresses itself in innumerable systems of thought, belief and behavior in which people seek to give an account of the world, the forces of nature, and understand the meaning of human existence in every cultural and historical epoch. This course explores the philosophical, historical and cultural foundations of the world's major religions and in doing so, builds a framework in understanding the many ways religions offer prescribed ways of knowing, seeing, and being in the world. Interdisciplinary in nature, the course draws from the fields of history, philosophy, anthropology, sociology, psychology and the arts, as we examine how religion continues to shape and influence an astonishing range of human motivation and activity. The course will include study of the major religious traditions of the world: Christianity, Judaism, Islam, Buddhism, Hinduism, Taoism, Confucianism, indigenous native religions, shamanism, and the new religious movements found in the contemporary world.

REL 300 Religion, Justice, & Globalization - 3 credits

This class will seek to equip students with the resources to better understand religion's role in globalization. This will be achieved in two ways. First, we will spend time learning about the historical set of beliefs and rituals belonging respectively to Judaism, Christianity, Islam, and Buddhism in order that we grasp the theological values and assumptions which define their worldviews. Second, we will read authors whose work represents attempts to address from within their traditions some of the most controversial issues emerging from globalization. As a result of these readings, class discussion, and assigned writing, students will develop a knowledge base and set of critical faculties so that they may independently evaluate the various roles which some of the world's religions have come to play in the debates surrounding globalization.

REL 301 World Mythology - 3 credits

This course explores the origins and functions of mythologies across the world as well as throughout history. By examining such recurring mythological themes as the hero's quest and stories of world beginnings and endings, we inquire into what myth means to us, and as such we inquire into processes of meaning-making and identity construction. We consider various interpretative theories often applied in the study of myth and how interpretation shapes the meanings of myth.

REL 360 Religions of the East - 3 credits

This course explores the philosophical, cultural and historical foundations of the world's major Eastern religious traditions, including religious beliefs and ritual practice. Our study will include an in-depth investigation of: Hinduism, Buddhism, Sikhism, Jainism, Taoism, Confucianism and Shinto. Interdisciplinary in nature, the course draws from the fields of philosophy, anthropology, history, psychology and the arts, as we examine how these religious traditions continue to shape and influence an astonishing range of human motivations, activities and experiences around the world.

Sciences (SCI)

SCI 102 The Nature of Inquiry in the Natural Sciences - 3 credits

This course explores the history and application of empirical observation, conjecture, experimentation, analysis, and the scientific method, which serves as the foundation of all modern research within the Natural Sciences. We trace the development of the modern scientific approach through time, and examine and practice contemporary methods of observation, postulation, identification of data types, measurement, experimentation, analysis, and communication of findings.

SCI 131 Physical Science - 3 credits

This course provides education and training in the scientific method and opportunity to master the fundamentals of chemistry, physics and astronomy. This includes the study of atomic theory and structure, formation of compounds, chemical equations, acid and bases, and behavior of gases, as well as classical mechanics, kinematics, mechanical energy, magnetism and electric forces, reflection and refraction of light. The course emphasizes the effects of these contributions in science on modern living.

SCI 138 Physical Geology - 3 credits

This course provides an overview of the physical features, components, and geologic dynamics of the planet Earth. Topics include a study of rock and mineral types, volcanism, plate tectonics, and the physical effects of glaciers, oceans, rivers, wind, volcanoes, and earthquakes. Additionally, aspects of resource utilization and management, and the geologic histories of other planets in our solar system will be explored. SCI138 is an introductory course, suitable for students with a limited knowledge of physical geology.

SCI 214 The Elements of Geography - 3 credits

A study of the major elements of physical and human geography, with an overview of the world's regions. Emphasis is on global relationships and distributions, both environmental and cultural. This includes climates, natural vegetation, land forms, cultural origins and diffusions and economic patterns. Survey of weather elements as a basis of the regionalization of world climate as well as an examination of the human imprint on the environment.

SCI 201 General Chemistry I - 4 credits

This lab-based general chemistry course will begin with a brief introduction to matter and measurement, chemistry in the real world, and the scientific method; subsequent topics will include the development of atomic theory and the structure of the atom; the nomenclature of the elements and chemical compounds; chemical reactions and stoichiometry; chemical bonding theories; thermochemistry; and the properties of gases and the ideal gas law.

SCI 203 General Biology I - 4 credits

This survey course lays the foundation for study within the life sciences, including biology, biochemistry, biotechnology, health sciences, and other specialized life science fields. This laboratory-based course begins with the study of cellular structure, single-celled organisms, cellular metabolism, and reproduction, and then proceeds to the study of tissues and more complex organisms including multi-cellular plants, fungi and animals. Additional topics include genetics, evolution, ecology and the interrelationships between organisms and their environments.

SCI 204 General Biology II - 4 credits

This survey course serves as a continuation and expansion of General Biology I, laying the foundation for study within the life sciences,

including biology, biochemistry, biotechnology, health sciences and other specialized life science fields. This lab-based course includes an in-depth review of multicellular organisms; including the structure and evolution of plant, fungal, and animal life. Additional topics include metabolic function, biomechanics, and the interrelationships between multicellular organisms and their environments.

SCI 205 Anatomy & Physiology I - 4 credits

SCI205 provides a laboratory-based approach to the major anatomical and functional components of the human body, and is designed to help students develop an understanding of how these systems function together in health and disease. Topic coverage includes basic medical and diagnostic terminology, histology, and an in-depth examination of the body's anatomical and physiological systems including the integumentary, skeletal, muscular, nervous, and circulatory systems. The laboratory component of the course provides a hands-on experience within the study of anatomy and physiology, and consists of dissection techniques, histology, and other related procedures.

SCI 206 Anatomy & Physiology II - 4 credits

SCI206 serves as a continuation of Anatomy & Physiology I, and provides an in-depth study of body systems and system interactions. Topic coverage includes medical and diagnostic terminology, and an examination of the body's anatomical and physiological systems including the respiratory endocrine, lymphatic, immune, digestive, excretory and reproductive systems. It is laboratory-based and systemic in its approach, and requires the successful completion of SCI205 or permission of instructor in order to enroll.

SCI 207 Microbiology - 4 credits

This laboratory-based course focuses on the principles of microbiology and is designed to familiarize the student with the biology, ecology, and behaviors of microbes and viruses in human health, medicine and biotechnology. Topics include the general principles of microbial growth; the evolution and classification of microbes and viruses; the natural ecology of microorganisms; pathogenesis, diagnosis, and treatment, and the use of microorganisms in biotechnology and medicine.

SCI 217 General Chemistry II - 4 credits

This is the second in a two-part course on general chemistry. This laboratory-based course will begin with a brief recap of General Chemistry I, followed by subjects including: chemical equilibrium; chemical kinetics; thermodynamics; electrochemistry; solution equilibria; transition metals and coordination chemistry; nuclear chemistry; biochemistry; and polymer chemistry.

SCI 223 Physics I: Classical Mechanics - 4 credits

Physics I is a laboratory-based introduction to the basic principles of classical physics; emphasizing a quantitative and conceptual understanding of mechanics. Primary topics include kinematics, mass, force, momentum, energy transfer, drag and friction, and angular momentum. Laboratory demonstrations and experimentation provide hands-on support to conceptual learning throughout the course.

SCI 224 Fundamentals of Astronomy - 3 credits

A comprehensive approach to past and current astronomy: early astronomy, the distribution and properties of the stars, their life cycles and our galaxy. The course also encompasses the solar system, other galaxies, asteroids, comets, meteors, variable stars, x-ray stars, pulsars and quasars, as well as current space exploration and the latest discoveries and theories.

SCI 225L General Biology Lab - 1 credit

The hands on component of SCI 203 introduces students to laboratory techniques used in the study of general biology. The laboratory follows lecture topics presented in SCI 203 and takes a systemic approach to the study of general biology.

SCI 227L General Biology Lab II - 1 credit

This laboratory serves as a continuation of SCI225L, providing students with an intermediate hands-on experience within the study of general biology. It consists of intermediate laboratory protocols, scientific observation, experimentation, microscopy, and other procedures related directly to course material covered in SCI 204 (General Biology II).

SCI 231 Marine Biology - 3 credits

SCI231 is designed to introduce students to the principles of marine biology, oceanography and marine ecology. It is broad in scope and covers a number of diverse topics including basic oceanography, pelagic and coastal ecology, and the taxonomy and biology of marine invertebrates, fishes, reptiles, seabirds, and mammals. Additional course topics include a review of New England's history as a maritime economy, global conservation concerns, and responsible oceanic resource management. A background in general biology is recommended.

SCI 233L Anatomy & Physiology II Laboratory - 1 credit

The SCI233L laboratory provides students with continued hand-on experience within the study of anatomy and physiology, and consists of advanced dissection techniques, histology, and other related procedures.

SCI 235 Principles of Health & Wellness - 3 credits

An exploration of the psychological, emotional, spiritual, physical, behavioral, environmental and social health aspects of everyday living. Through self assessment inventories, students examine their health behaviors, identify problems and recommend lifestyle changes. Students refine their decision-making skills to help them make more educated decisions on personal and community health problems including drug and alcohol misuse and abuse. Students become knowledgeable on health-related topics enabling them to become educators themselves. Community health services, functions, eligibility or access are explained.

SCI 240 Systems of Thought in Science: How They Shape Our World - 3 credits

This survey course facilitates students' acquisition of the knowledge of theories and applications in cosmology, evolution, mathematics, life sciences, physics, and religion and science. Students examine the development of these domains of science, how they are converging and informing each other, and gaps in this convergence, which sometimes create contradictions within the various domains. Students explore how science affects social systems at the individual, community, and global level. Special focus is directed towards the pivotal connection between science and culture, and the systemic effects on education, government, domestic and international politics, economics, health care, family and community systems, and religion.

SCI 300 Principles of Ecology - 3 credits

Ecology is the study of the interactions between organisms and their environment, and the way in which these interactions determine the distribution and abundance of organisms. This course presents an introduction to the basic principles and outlines the essential principles of ecology from the theoretical fundamentals to their practical applications. The course is designed to present a comprehensive overview of all aspects of ecology, including evolution, ecosystems theory, practical applications, plants, animals, biogeochemical cycles, and global change. The science of ecology is examined from three levels: ecology of the individual, ecology of populations, and ecology of systems. Since ecologists often play a significant role in constructing and evaluating conservation or environmental management programs, we incorporate the application of ecological theory to current environmental problems throughout the course. The course will combine lectures and group learning dealing with both the theory of ecology and applied issues with a practical component of laboratory and field projects.

SCI 301 Global Ecology - 3 credits

This course will explore and analyze current global environmental issues and their existing and potential solutions. Human population growth, food production, energy use and conservation, air and water pollution, desertification, deforestation and climate change will be the topics of classroom discussion, class exercises, and field trips. Historic and current knowledge and understanding of each issue; its relationship to ecological and human social systems, and current potential solutions will be examined. The use of critical thinking skills and a problem solving process will be introduced and practiced throughout the course. Each global issue will be addressed through student research and solution proposals. The purpose of the course is to introduce students to current global environmental issues and their impact upon human well being, ecological health and contemporary culture. Students will explore and analyze current global environment issues through selected readings, critical thinking and a problem solving process. Students will be challenged to explore their role and potential solutions to the presented global environment issues.

SCI 302 Wetland Ecology - 3 credits

Wetland Ecology provides students with an introduction to the nature and function of wetlands and their conservation and management. Students will be introduced to: history of wetland loss in the U.S., wetland classification, wetland identification and delineation, biological adaptations to wetlands, wetland soils, hydrology and plants, human impacts on wetlands and the importance of wetlands in the water cycle and health of the environment. Wetland functions, the restoration of wetland functions, and the laws protecting wetlands will be reviewed during classroom discussion, exercises and field trips.

SCI 303 History of Technological Innovation - 3 credits

SCI303 traces the progression of technological development from its earliest examples to the current cutting edge of scientific and technological advances. Students will learn about the history of technological achievement, and consider that history within the context of the latest advancements in engineering, computing, medicine, robotics and other technologies. In addition, we will explore what emerging approaches are currently being developed, how they are being imagined, and why.

SCI 308 Principles of Engineering - 3 credits

Principles of Engineering is the process of applying scientific principles to the conception, design, construction and implementation of machines, technologies, structures, devices and materials. It is a broad field with many sub-fields, including but not limited to: mechanical engineering, electrical engineering, computer engineering, genetic engineering, civil engineering, aerospace engineering and chemical engineering. This course introduces students to the general theory, methods and processes of engineering, and explores the various applications of scientific engineering principles. Topics include the history and development of engineering principles, mechanics, design, construction, implementation and the integration of technologies into modern society.

SCI 310 Scientific Inquiry - 3 credits

This integrated course encompasses certain aspects of physics, chemistry, astronomy, earth sciences and emphasizes general principles and their application to real-world situations. This course is for students who have had some exposure to one or more of the basic sciences and are interested in a basic understanding of a variety of scientific fields and how they can be applied.

SCI 311 The Science of Exercise - 3 credits

This course provides an historical perspective on physical activity and fitness, and how changes in lifestyle, technology and other factors that have contributed to a more sedentary lifestyle and related health concerns. Students will examine various forms of physical activity and will be introduced to exercise physiology, the ways in which physical activity impacts biology, including physical health, mental health and the brain. The literature on various forms of exercise and the impact on health will be examined including but not limited to endurance, flexibility, strength, stamina, cognition, memory. We will investigate current trends in exercise, by factors such as age, culture and gender, and whether these factors are considered in our efforts to influence rates of physical activity.

SCI 335 Topics in Biology: Understanding Human Genome Project - 3 credits

Prerequisite: SCI225 or permission of instructor. This course is an investigation of the human genome project. We commence with a discussion of molecular biology. After achieving a command of the language of molecular biology, we study how the human genome was sequenced. To examine the method first hand we visit a DNA sequencing facility, meeting and observing scientists actively performing DNA sequencing techniques. We spend the last part of the term exploring how the data gathered from the human genome project impacts society, specifically discussing various benefits and drawbacks.

SCI 336 Drug Discovery: From the Laboratory to the Pharmacy - 3 credits

Prerequisite: SCI225 or permission of instructor. This course examines the journey of a variety of pharmaceuticals from their discovery to their use in everyday life. Students discuss how drugs are discovered and how scientists study, manufacture, proceed through clinical trials and the Food and Drug Administration approval processes. We investigate how certain drugs affect our bodies/cells and fight disease states. Throughout the term a variety of different pharmaceutical classes are discussed including but not limited to over-the-counter drugs, prescription drugs, "life-style" drugs, anti-viral drugs, allergy medications, and chemotherapeutic agents.

SCI 337L Microbiology Lab - 1 credit

This one credit laboratory is the counterpart to SCI 207. Microbiology. This lab focuses on the principles of microbiology and is designed to familiarize the student with the biology, ecology, behaviors, and the use of microbes and viruses in human health, medicine, biotechnology, and in nature.

SCI 338 Urban Ecology - 3 credits

The urban environment is characterized by highly altered landscapes and ecosystem function, and requires a specialized approach to its ecological study. Urban Ecology explores the distinctive human-generated ecological conditions and processes that typify urban environments, and presents evaluative methods unique to these highly-altered ecosystems. Course topics include: urban microclimates; water, carbon and nutrient cycles in the urban setting; urban vegetation; urban wildlife; urban soils; aquifer recharge and subsistence; and urban water and air quality. After gaining an understanding of how urban ecosystems function, students will explore current management techniques and policies which work to mitigate the adverse effects of altered landscapes on urban ecosystems.

SCI 339 Epidemiology and Public Health - 3 credits

Epidemiology and Public Health introduces the foundations of epidemiology and biostatistics as applied to the study, monitoring and maintenance of public health. This course focuses on the foundations and methods of epidemiologic investigation; accurate sampling, analysis and presentation of data, and the use of classical statistical approaches to describe the health of populations. Topics include the dynamic behavior of disease; outbreaks, spread, epidemics, pandemics, and control strategies. Additionally, this course discusses and reviews epidemiologic study designs, cause and effect, treatment efficacy, and ethical and legal issues in epidemiology.

SCI 400 Ethology: Principles of Animal Behavior - 3 credits

Prerequisite: general biology or permission of instructor. Ethology is the branch of zoology that focuses on the scientific study of animal behavior. This course is designed to introduce students to the specialized field of animal behavior analysis and the various conditions that shape both simple and complex behavioral constructs. In this course students explore animal behavior through the study of function, causation, development, and evolutionary history. We consider in-depth studies of fixed action patterns, animal communication, and imprinting, and use these analyses to shed light on the development of behaviors throughout vertebrate and invertebrate taxa.

SCI 406 Evolutionary Biology - 3 credits

Prerequisite: general biology or permission of instructor. This advanced course in biology explores the history, dynamics and analysis of evolutionary theory. It is broad in scope, and includes topical reviews of fitness, functional analysis, adaptation, optimization theory, selection theory, and the ethics of predictive modeling in sociobiology. Additional discussions of modern views and applications of evolutionary theory to business models, interpersonal relationships, and the development of human culture will be included.

Sociology (SOC)

SOC 120 Cross-Cultural Communication - 3 credits

Drawing on cross-cultural research in psychology, anthropology, and education, this course considers the role of culture in shaping and interpreting a wide range of verbal and non-verbal communication behaviors. We examine the physical, psychological, aesthetic and social dimensions of the communication process, how different cultures understand, symbolize and utilize them, and how specific meanings and the kinds of modalities employed in communication processes affect individual, collective, and inter-group experiences.

SOC 201 Cultural Anthropology - 3 credits

How do societies and cultures work? How do we know how to behave? What are the rules that make our society function? Do these rules differ from other societies'? How do minority groups fit in? Cultural anthropology asks all these questions, and the process of discovering answers changes the way students think about themselves and their actions in society. Students analyze the behavior of people in groups and realize that practices contrary to their own may be logical from another's point of view.

SOC 212 Introduction to the American Legal System - 3 credits

To be effective citizens, employees, parents, and members of society we must comprehend the conceptual frameworks of the law and its implications in our daily lives. This course introduces legal concepts and activities, and their pragmatic applications: contract law, civil rights law, employment law, family law, and patient rights. We also discuss how the United States Constitution impacts contemporary legal issues including government regulation of private business, separation of church and state, right to privacy, government funding of educational and religious institutions, and property rights versus environmental and other governmental constraints.

SOC 215 Language and Society: Introduction to Linguistic Anthropology - 3 credits

Language is so essential to culture that it is the only topic to which anthropology devotes an entire branch of study. Linguistic anthropologists examine the role language plays in society, linguistic structural components, and how languages evolve over time and in different circumstances. In this course we explore such questions as: Could society exist without language? What does language allow us to do? Why are people the only animals to speak? Or are we? Are our brains wired for language or is it something we are taught? Through discussion, direct observation/experimentation and readings, students will understand the relationship between our linguistic abilities and the nature of our humanity.

SOC 228 A Social History of Food - 3 credits

Throughout the world and history, people have come together over food. We are what we eat: we eat what our family, friends and society tells us is "food." But, our ancestors did not always eat the same foods as we do now. Both the types of food and more importantly, cultures, change through time and space. How has the development of towns, the exploration of the globe, religion, the slave trade, the social presentation of self and status been expressed through food? Contemporary approaches to food world-wide will also be examined. The class will bake their own sourdough bread, visit historical sites & ethnic restaurants, do oral histories, produce a cookbook and, of course, eat lots of food!

SOC 260 Themes in Sociology - 3 credits

This course develops specific themes in sociology to better understand sociology as a way of understanding the world. Sociology is a field of study that explains social, political, and economic phenomena in terms of social structures, social forces, and group relations. This course will serve as an in-depth examination of a set of contemporary issues, including themes of socialization, culture, the social construction of knowledge, inequality, race and ethnic relations, poverty, education, and political sociology.

SOC 311 Images of Women - 3 credits

This course studies the ways in which women are seen historically and in the world today. This course draws from literature, sociology, anthropology, speeches, advertising and other forms of mass communication. Study of traditional images of women in both eastern and western cultures contributes to an understanding of the origin and basis of gender roles. Self-imaging and self-empowerment are significant components in this course.

SOC 322 Women in the Workforce - 3 credits

Women have contributed significantly to this country's social, political and economic history through their roles in the workforce. This course will trace women's roles as workers from the 18th century to the present time, detailing the difficulties they have faced, the evolution of their roles, and their accomplishments. It will examine their leadership in reform movements and unions, and relate their work to the students' lives and experiences as workers and educators.

SOC 413 Women, Sexuality, and Society - 3 credits

Sex and sexuality are socially, biologically, and politically determined concepts. Sexual behaviors, identities, and norms vary across time and across culture. In this course we will examine female and female-identified sexuality within the social context in which sexuality occurs, asking how ideas about sexuality develop and about the consequences associated with those ideas. Topics will include the sexual response cycle, erotic plasticity, morality and social control, the androcentric model of sexuality, and consent.

Spanish (SPA)

SPA 100 Spanish I - 3 credits

Spanish I serves as an introductory course to spoken and written Spanish. This course covers four important aspects of new language acquisition: listening, speaking, reading and writing. Students are immersed in a highly interactive environment where they learn Spanish through associative and mnemonic methods rather than direct translation into their mainstream language. This innovative method encourages students to think in Spanish and to understand rather than translate the message into their native languages. Course coverage includes vocabulary, grammar and verb conjugation, and idiomatic expressions that are in common use for the Spanish native speaker. Pronunciation, articulation and enunciation are emphasized throughout the course.

SPA 200 Spanish for Heritage Speakers I - 3 credits

A heritage speaker is a person who has limited proficiency in, or a cultural connection to a specific language. **This course** introduces academic and formal Spanish to native speakers, quasi-native speakers and bilingual speakers of varying abilities. Through the study of Hispanic cultural heritage, students will develop their communication and literacy skills in Spanish. The class is designed to address language and grammar issues, vocabulary, oral communication and writing skills particular to heritage learners.

SPA 201 Spanish for Heritage Speakers II - 3 credits

This course serves as a continuation and expansion of Spanish for Heritage Speakers I. A heritage speaker is a person who has limited proficiency in, or a cultural connection to a specific language. Heritage speakers will develop advanced Spanish language skills with emphasis on grammar, pronunciation and individual or particular language issues. The class provides opportunities to reinforce writing, reading, oral communication and listening comprehension skills.

Wellness & Health Promotion (PHW)

PHW 300 Introduction to Wellness and Health Promotion - 3 credits

This course introduces students to the concepts, theories and research related to wellness and health promotion. We will examine the state of health, our current model of care in the U.S. and the implications for adopting a wellness or health promotion approach. Students will research factors that influence wellness and health promotion, such as nutrition, exercise, stress reduction and sleep. We will explore wellness and health promotion initiatives and challenges related to implementing and sustaining them within various settings and with diverse populations. Future trends and efforts towards prevention will be explored. Students will research career opportunities in prevention, health maintenance, education and promotion, such as health and wellness coaching.

PHW 301 Understanding Obesity - 3 credits

This course explores the current epidemic of obesity; what factors influence the development and persistence of this public health problem and what efforts are underway to address the weight of the nation. This course will include a review of the literature on the burden, causes, consequences and prevention of obesity for both children and adults. We will explore how we got here, the costs we currently encounter and why individual will power is not enough to change this epidemic. Stigma, bias and environmental factors that impact obesity will be examined. Students will identify and develop effective prevention strategies.

PHW 302 Research in Health Promotion - 3 credits

Research plays a key role in efforts focused on enabling people to take greater control in increasing health life styles for themselves, their families, within organizations, communities and populations. Students learn to evaluate/critique existing research; examine its function in proposing and evaluating health promotion programs and influencing policy. Students are introduced to the critical steps needed to conduct research, including the role of theory and ethics and gain experience in developing a proposal within the field of health promotion.

PHW 303 Nutrition and Health Promotion - 3 credits

In this course students will gain a foundation in the basics of nutrition and how the body utilizes nutrients that contribute to health. Students will examine theories and current research on elements of nutrition and their relationship to chronic disease. They will also have the opportunity to assess the nutritional value of foods and examine strategies for modifying nutritional intake in the context of life cycle, culture and environment.

PHW 320 Brain Health - 3 credits

The brain is the most complex organ in the human body and affects every aspect of our lives, yet most efforts to promote health fails to address how to keep your brain healthy. Students will examine the impact of lifestyle factors such as diet, exercise, stress, and sleep on brain functioning, disease prevention and optimizing health. Students will identify strategies to assist in improving brain health throughout the lifespan.

PHW 402 Lifestyle Change to Promote Health - 3 credits

This course explores why changing lifestyle is critical for increased health and wellbeing and how to assist in the process of bringing about needed change. Students will look comprehensively at the role of lifestyle change in promoting health and will critically examine the related evidence. They will examine theories aimed at explaining and predicting health behaviors and identify factors that influence decision-making. Students will apply their knowledge in designing interventions and policies that promote health.

PHW 420 Leadership in Promoting Health - 3 credits

Prerequisites: PSY110, PHW300, PHW401. Leaders in health promotion mobilize people and efforts to prevent disease and increase health. business leaders measure financial returns, health promoting leaders measure quality of life. Students will critically examine theories, practices and ethics of leaders focused on promoting health. Students will expand their leadership abilities to promote health through the identification and cultivation of key skillsets and mindset to meet the needs of diverse communities and populations.

PHW 470 Field Education Wellness & Health - 3 credits

Field Education gives students the opportunity to put into practice the knowledge and skills gained throughout their program. They will learn how diverse organizations and groups work to increase health and wellness across a wide range of settings. Department chair and instructor approval are required in advance of registering. Students are expected to be engaged in 90 hours of field education for the term, have ongoing agency supervision, and attend a weekly seminar.

PHW 490 Capstone Wellness & Health Promotion - 3 credits

The Capstone is a comprehensive research project that is the culminating academic activity that helps to synthesize students' learning in the undergraduate Wellness and Health Promotion program. It is an opportunity to explore a topic of personal and professional interest in wellness and health promotion and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for PHW491 and pass before graduating.

Writing (WRT)

WRT 101 College Writing I - 3 credits

Through challenging readings, class discussion, small group collaboration, and different forms of writing, students learn the skills and process of "thinking on paper." They learn to construct an argument or discussion that supports a clear thesis and present it effectively in a well-organized essay that observes the conventions of written English. They write academic papers that analyze and synthesize the issues suggested in two or more readings. Critical reading, critical thinking, research skills, and forms of documentation are also introduced.

WRT 102 College Writing II - 3 credits

WRT102 acquaints students with the academic research paper as both process and product. The course begins with an intensive review of the strategies and techniques for writing an academic essay that are covered in WRT101 and then moves to selecting and narrowing a topic, preliminary research, and establishing a focus for a 12-15 page argument research paper. The final paper includes an abstract, an introduction, discussion, conclusion, and references. Students learn how to write an annotated bibliography and use APA documentation for in-text citations and references.

WRT 104 The Art of Grammar - 1 credit

This course reviews basic grammatical, mechanical, and usage skills of written English language. Students develop knowledge of the form, meaning, and use of grammar structures, focusing on the use of English grammar structure in college-level writing and communication. Through revision of their own writing and the writing of others, students learn to articulate ideas using a variety of sentence structures.

WRT 201 The Craft of Research - 3 credits

Prerequisites: WRT101, 102 or equivalent.

WRT201 acquaints students with the academic research paper both as process and product. This includes selecting and narrowing a topic, preliminary research, and establishing a focus for 1 10-15 page research paper. Throughout the process, students use information literacy skills to analyze problems, research and select relevant information, and evaluate the credibility of that information. Primary research is introduced. The final paper includes an abstract, an introduction, literature review, discussion, conclusion, and references. The course focuses on the use of APA documentation for in-text citations and references.

WRT 202 Introduction to Creative Writing - 3 credits

This course explores the many ways in which fiction and non-fiction are developed, and the methods of effective storytelling. It offers a workshop environment where students work as individuals and groups to thoughtfully analyze and develop poetry and fiction in various forms, and a non-fiction memoir. Short assigned readings and discussion facilitate this process of growth and expressive, multi-faceted literacy building.

School of Education

The **SCHOOL of EDUCATION** (SOE) offers graduate studies at the M.Ed., CAGS and Ph.D. (BCBA) level designed for individuals seeking licensure or certification in MA as educators within the state's PK-12 school districts. Students pursuing careers in other educational settings that do not require state-level certification may register for M.Ed. non-licensure degree options. The SOE also provides a M.Ed. in Interdisciplinary Studies tailored for those seeking self-selected study in specific areas related to education. In addition, the school houses programs for school nurses. The SOE also offers Master's and PhD programs for those professionals interested in seeking certification as Board Certified Behavior Analysts (BCBA).

Professional Ethics & Core Principles

The SOE upholds the professional ethics valued in the field of education. These include an unwavering commitment to working with all learners, regardless of the educational setting, and to the profession itself in ways that engender public trust in our respective roles as teachers and leaders in both PK-12 and in higher education. The goal is that all graduates of the SOE will teach and lead well in their professional roles and be ethical, principled, and effective in working with the learners, families, and communities served. Core principles upheld by the faculty in the SOE related to this work include a commitment to:

- Innovation
- Diversity
- Academic Excellence
- Social Justice
- Integrity
- Building Community

Learning Community

The SOE's learning community is comprised of a diverse group of students and faculty committed to the principles of academic excellence and equitable access to quality learning environments for all. Faculty are all experienced professionals in PK-12 who are scholar-practitioners passionate about their work and committed to making a difference in the lives of others. Classes led by faculty embody principles of adult learning with a rich focus on content and applications specific to the program-of-study. Faculty also share a commitment to establishing clear learning outcomes supportive of students' academic success, quality advising of program requirements and key assessments in courses offered, and have high expectations for the professional standards and ethical principles specific to the field. Classes offered also support critical thinking, communication, and decision-making skills reflective of the program and are designed to assist educators in being responsive, capable, and discerning leaders in the schools, districts, and communities served. Distance learning is now available in all of our programs, either completely or in a hybrid format.

Program Selection & Consultation

Applicants should carefully review all requirements for the academic program of interest before applying to SOE programs, then schedule an in-person or phone consultation with the program chair (CC-Boston), site coordinator (CC-Lawrence, CC-Springfield), or site director (in CC-California, CC-Puerto Rico). The consultation is designed to assist applicants with making informed choices for program selection and understanding all entry requirements prior to submitting the application. For those entering licensure programs, the consultation is also an opportunity for the SOE to discuss the required documents needed for the application and to clarify the academic and professional expectations required to successfully complete the program. (If planning to enroll at our CC-Boston location, please contact the SOE office to schedule appointments with program chairs.)

Candidates in licensure programs must, without exception, uphold professional ethics specific to the field of education and the SOE's core principles. At all times, candidates must demonstrate the conduct becoming of an educator or leader, including the College's requirements for student conduct.

Consultation with the designated program chair (CC-Boston) or site coordinator (CC-Lawrence, CC-Springfield) is required prior to program entry and course registration.

New Student Orientation

Students entering SOE academic programs for the first time are required to attend the New Student Orientation offered prior to the term of initial enrollment. The orientation is a valuable opportunity to: (a) clarify academic and program expectations with Program Chairs and faculty teaching in these areas; (b) share details required to successfully launch graduate studies; and (c) gain critical information about the support teams, services, and events available to students.

Academic Success Panels & Colloquia

A variety of events are held each term both at the College and SOE level supportive of students enrolled. These co-curricular events are designed to enhance the learning opportunities and assist with professional growth.

Communication Competency

The SOE is committed to producing graduates who think critically and communicate clearly in verbal and written form. Performance expectations include positive communication with individuals, within teams, and when interacting with others online (e.g., via email and virtual learning environments). Upon application, the SOE uses the Personal Statement to assess entry-level writing skills. Once enrolled, written assignments and papers further assist students with obtaining the communication competency required for academic and professional success. To gain the most from the learning experience and to assist with writing skills, students in the SOE also have access to the College's e-tutors available through the Center for Learning and Teaching (CELT) who can facilitate writing supportive of academic success. Students may also be referred to take writing assessments, as needed, to facilitate their success.

Transfer Credit & Analysis

Requests to transfer credit from graduate-level courses completed at other institutions must be submitted with the application for admission using the SOE's Transfer Credit Request Form. Courses accepted for graduate credit into SOE programs must meet the criteria, content, and academic requirements aligned to existing courses offered by the SOE. (See also SOE *Cambridge College Admission Requirements School of Education* on page 16.)

Academic Program Requirements

All students must uphold College policies and SOE deadlines, and all requirements and practices related to academic program enrolled.

Once admitted into a SOE degree program, regardless of location, only the SOE's dean/designee (California and Puerto Rico) can approve a change of program. A Change of Program form, including an analysis of all remaining course requirements must be completed in consultation with and submitted by the program chair (CC at Boston), site coordinator (CC at Springfield, CC at Lawrence), or site director (CA, Puerto Rico).

Students admitted into the SOE program are responsible for self-monitoring academic progress, maintaining effective communications with faculty and staff, and understanding the requirements for the academic program enrolled. In order to do this more effectively, students and advisors are asked to communicate through the *Starfish Student Success* portal.

Licensure Programs

SOE programs offered for licensure are designed for those seeking licensure as teachers and leaders in PK-12 schools and districts located in MA. Programs offered are aligned to MA professional standards and state regulations and are subject to change. Teacher education programs are further awarded accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP).

Applicants to all licensure programs must meet SOE requirements for admissions in the program selected and complete all conditions specific to certification in MA.

Applicants who have successfully passed the Communications and Literacy MTEs are immediately entered into the licensure program of their choice. Those who have not taken or have not passed the Communication and Literacy MTEs must enroll in the licensure program of their choice (and remain) in the non-licensure option aligned with the licensure area and type selected until all conditions for entry are met. Once met, a Change of Program form requesting entry into the corresponding licensure program can then be submitted for review.

All applications for entry must be reviewed and written approval received prior to entering a licensure program. Even when all conditions for entry are met, acceptance into the licensure program is not guaranteed. Applicants must demonstrate clear evidence of readiness to enter the program on all dimensions assessed.

Consultation with the designated program chair (CC-Boston) or site coordinator (CC-Lawrence, CC-Springfield) is required prior to program entry and course registration. Unless all requirements are fully met with evidence submitted to the appropriate department in the School of Education upon admission into the College, prospective candidates must first enroll in the non-licensure program that parallels that of the licensure area.

Candidates admitted into licensure programs must maintain a GPA of 3.0. Should the GPA drop below 3.0, an academic warning will be issued by the SOE and the candidate placed on academic probation. If not resolved within one term, the candidate must submit a Change of Program form and complete the non-licensure degree option.

Non-Licensure

Applicants who are not seeking licensure in MA must select (and remain in) the non-licensure program option in their chosen area.

Candidates accepted from non-licensure programs must enter the licensure program aligned only with the program previously enrolled, including the type and level of licensure.

Practicum

An application to enter the practicum is required for all candidates in SOE licensure programs. All teacher licensure candidates must complete EDU 704 Practicum Readiness prior to being accepted into practicum. Those in Ed Leadership must complete an application prior to enrolling in practicum.

From the beginning of the program, candidates are required to purchase *TaskStream*, an electronic portfolio used to document all requirements for completion in the program enrolled. For certification purposes, the e-portfolio is assessed at several points during program completion by program chairs and site coordinators for advising purposes; and by the Assistant Dean of Field Placements *upon program completion for licensure purposes*.

Pre-Practicum and Practicum Placements

Before entering the Practicum and Practicum Seminar, candidates enrolled in licensure programs in teacher education must:

- Pass all required courses.
- Successfully complete the program-specific pre-practicum hours.
- Pass the state-required MTEL exams required for licensure
- Satisfy the SEI 605 requirement (SEI 705 for principal/assistant principal)
- Take EDU704 Practicum Readiness.
- Attend a *Practicum Orientation* session
- Complete an *Application for Practicum* and Placement Approval form at least one term prior to enrollment, and submit them to the Assistant Dean of Field Experiences.

Candidates in all licensure programs who are not employed in MA schools and districts must notify the Assistant Dean of Field Experiences for placement purposes by announced deadlines each term and no later than one week prior to the first day of class each term.

All placements for SOE licensure must be conducted in MA locations recognized by the MA Department of Elementary and Secondary Education (DESE) for licensure purposes.

Candidates must also attend and participate in the Practicum Seminar designed to facilitate successful application of MA professional standards for teachers and school administrators.

Hours and Documentation — Pre-Practicum and Practicum hours vary depending on the program enrolled. Candidates must be aware of and complete all required hours established by the program in which they enrolled.

Candidates must document the number of hours completed for the pre-practicum and practicum using SOE adopted forms for this purpose and upload these to their e-portfolio in *TaskStream* once all signatures are obtained.

Principal/Assistant Principal — Candidates seeking licensure as a principal or assistant principal are further required to have all four tasks for the MA Performance Assessment for Leaders (MA-PAL) completed no later than the end of their Practicum. All candidates in the CAGS program are further required to have the Action Research Project (ARP) completed by the end of their Professional Seminar IV.

Legal Status

Legal status as a U.S. citizen or lawfully admitted resident is required for a license from any state agency; see Title 8, U.S. Code Section 1621. This rule applies to all licensure types.

Fingerprinting and Criminal Offender Record Information (CORI)

Candidates in licensure programs are required to complete fingerprinting prior to entering schools for field experiences, pre-practicum, practicum, or clinical/internships. This includes all students, including those in early childhood classes and care centers or any of the SOE and SOPC licensure programs. See your program chair and advisor for details related to this process.

Additionally, all students are required to complete a CORI (Criminal Offender Record Information) check when entering schools. This is completed by visiting the Human Resources or Superintendent's Office in the school district of choice and is submitted directly at this level prior to entering a school for pre-practicum observations.

Partnerships

Evergreen Center, Beacon Services, & Criterion Child Enrichment

The School of Education partners with the Evergreen Center, Beacon Services, and Criterion, Inc. in Milford, MA to offer expanded opportunities for experienced teachers and professionals working with students diagnosed with autism or other autism spectrum disorders to pursue M.Ed., BCBA, and professional development opportunities. Faculty hired by Cambridge College also actively practice within partnership settings. As scholar practitioners, these faculty teach courses, serve as program coordinators, and work in collaboration with colleagues in the SOE to guide curricular decisions for the M.Ed. Autism/BCBA degree. Lead faculty assigned as program coordinators also teach and are responsible for maintaining the academic integrity of the approved course sequence designed specifically for professionals seeking eligibility to take the exam for national BCBA certification.

The Evergreen Center is a residential treatment center and school serving students diagnosed with autism and related developmental disabilities. The Center focuses on social competence as a reliable predictor of successful adjustment to a lifestyle centered in community participation. Evidence-based, applied behavior analytic procedures are employed to achieve academic outcomes recommended by the National Center on Educational Outcomes and the adaptive behaviors that enhance independent living skills. All staff receive specialized training in behavioral and educational procedures designed to develop self-help, academic, and vocational skills that may be applied in fully integrated community settings. Presentation of effective treatment techniques developed by Evergreen staff, including scholar practitioners and lead faculty teaching at Cambridge College, are further shared at national presentations during professional conferences.

Behavior Education, Assessment, and Consultation (BEACON Services) is a private practice of behavioral educators founded on the principles of applied behavior analysis (ABA). BEACON is committed to using only empirically validated approaches for the treatment of autism and related disorders. The agency provides intensive home and school-based education, behavioral consultation, behavioral assessment, and training services for early interventionists, parents, and public schools. BEACON works with public schools to develop partnership programs supporting their efforts to provide high quality ABA services to children and families. BEACON is committed to the dissemination of applied research completed in educational settings, including studies conducted by lead faculty at Cambridge College, through presentations at regional, national, and international conferences.

Criterion Child Enrichment is a private, non-profit agency dedicated to providing high quality early childhood education and support to families with young children and serves over 7,000 families. The SOE provides professional development opportunities for highly qualified staff working within the agency in the area of literacy development.

MA Schools and Districts

The School of Education partners with PK-12 schools and districts to provide professional development opportunities. Current work in this area highlights General Science and STEM-related programs. Additionally, the SOE is committed to advancing pipeline diversity within area districts and faculty serving as scholar practitioners are actively engaged in PK-12 schools. Faculty hired as scholar practitioners in certification programs also currently practice as licensed teachers, principals, and superintendents in area schools.

Inactive Programs

We are no longer admitting new students into the following programs as of Fall 2020:

- English as a Second Language Certificate
- Autism Certificate
- Curriculum & Instruction track of the CAGS in Educational Leadership

If you are enrolled in a program that is no longer active, please confer with your academic advisor and continue to follow your program plan as outlined in the Academic Catalog published in the year you entered your program. All back issues of the Academic Catalog may be found at <https://www.cambridgecollege.edu/academic-catalogs-back-issues>.

Master of Education

Autism/Applied Behavior Analysis

- CIP code 422814 • 38 credits, 6 terms
- ABAI Verified Course Sequence meets coursework eligibility criteria for the Behavior Analyst Certification Board exam.

Program Description — Autism is becoming more prevalent in our society and the need for specialists dedicated to serving this population is growing rapidly. This program provides knowledge of the autism spectrum and the skills necessary to meet the needs of individuals with autism. By completing the Applied Behavior Analysis (ABA) program, students meet the academic requirements to sit for the national BCBA examination, earning a credential that is in high demand.

Learning Outcomes — Students will demonstrate knowledge of applied behavior analysis (ABA) and associated scientific principles that govern human behavior and the treatment of individuals with autism spectrum disorders (ASD). Students will demonstrate knowledge of clinical, educational and ethical issues pertaining to the application of ABA across a broad range of treatment contexts and behaviors.

Careers — Careers/BCBA certification — Students who complete the ABA course sequence, supervised fieldwork, and successfully pass the BCBA examination will earn a national certification and also be eligible for licensure in Massachusetts. They will be able to work in a wide range of clinical and treatment settings as a BCBA in the treatment of individuals with autism spectrum disorders and other behavior and learning challenges. There is currently significant demand for persons with the BCBA credential, so that it is highly portable and desired across the state, the country and internationally.

Required to begin the ABA course sequence:

- Bachelor's degree required for the master's program. Individuals with a master's degree may enroll in the ABA coursework only.
- Active employment in a relevant, related field with at least one year of experience in an ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Student responsibility: A high level of professional acumen and decorum is required. Students are expected to be fluent in the BACB ethics standards from the start and throughout the program. Students must have basic competence with technology-based academic applications.

Program and course schedule subject to change.

Program director: Daniel Almeida, Ph.D.
 • daniel.almeida@cambridgecollege.edu

Program chair:
 Joseph Vedora, Ed.D., BCBA-D, LABA
 • joseph.vedora@go.cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Autism & Special Education Courses 14 credits

- This course sequence is strongly recommended.

	Fall Entry	Spring Entry
ESP 610 Autism: History, Prevalence, Diagnosis & Characteristics	Fall 1 . . .	Spring 1
ESP 630 Social & Psychological Perspectives in Autism Spectrum Disorders	Spring 1 . . .	Spring 2
ESP 616 Communication Disorders (ASD)	Summer 1 . . .	Summer 1
ESP 615 Assistive Technology: Modifying Curric for Diverse Learning Styles	Fall 2	Fall 2
ESP 594 Collaboration & Consultation Techniques (2 credits)	Fall 2	Fall 1

ABA Course Sequence 24 credits

- All courses 3 credits @ 45 contact hours, unless otherwise noted.
- Courses **must** be taken in the order delineated here.

	Fall Entry	Spring Entry
ABA 715ABasic Applied Behavior Analysis I (4 credits)	Fall 1 . . .	Spring 1
ABA 715BBasic Applied Behavior Analysis II (4 credits)	Spring 1 . . .	Summer 1
ABA 726 Ethics in Applied Behavior Analysis	Summer 1 . . .	Summer 2
ABA 716 Behavior Assessment	Fall 2	Fall 1
ABA 718 Research Methods	Spring 2 . . .	Spring 2
ABA 719 Behavioral Interventions	Spring 2 . . .	Spring 2
ABA 722 Supervision & Management in Applied Behavior Analysis	Summer 2 . . .	Summer 2
ABA 721* Applied Behavior Analysis Fluency Seminar (1 credit) required at end of program	Summer 2	Fall 2

*Students who do not pass ABA721 after two semesters must re-enroll in the course. Students may contact the program chair to discuss a non-endorsement option.

Timely completion of ABA course sequence: ABA coursework, including supervision and fieldwork, are specifically aligned with current BACB standards and its corresponding edition of the BCBA exam. Standards and exam are subject to change, therefore timely completion is essential.

Master of Education

Autism Specialist

• CIP code 131013 • 31 credits, 3 terms full-time • This program does not satisfy licensure requirements for K-12 public school teachers.

Program Description (MEd) —Teachers in general education and special education today are working with more and more students diagnosed with Autism Spectrum Disorders (ASD). This program answers the growing need for more understanding and better preparation for those working with students with severe disabilities. It is designed for experienced teachers and para-professionals, to enhance their working knowledge of the field. It also provides opportunities to explore new opportunities this knowledge would provide. ***This is not a licensure program and does not lead to BACB certification.***

Learning Outcomes — Graduates will demonstrate knowledge and understanding of autism, behavioral issues and severe special needs. They personalize their learning through an Independent Learning Project that enhances their preparedness as a professional educator.

Careers — This program will enhance the skills and understanding of:

- Experienced special educators, wanting more information to better serve the needs of this growing population.
- General educators who wish to work more effectively in their inclusion classes.
- Para-professionals currently working with students with severe disabilities, to gain a better understanding of the autistic needs and behavioral issues of the students they serve.
- Anyone wanting to know more about this growing field.

Courses 31 credits

- EDU 558 Introduction to Graduate School (1 credit) . . . every term
 - ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learning Styles . . . every term
 - ESP 610 Autism: History, Prevalence, Diagnosis & Characteristics Fall, Spring
 - ESP 695 Laws & Regulations Pertaining to Special Education Fall, Spring
 - ESP 689 Theories of Typical & Atypical Human Development Fall, Summer
 - ESP 621 Assessment & Appraisal Process (ASD) Spring
 - ESP 625 Behavior Management (ASD) Fall, Summer
 - ESP 616 Communication Disorders (ASD) Fall, Summer
 - ESP 630 Social and Psychological Perspectives in Autism Spectrum Disorders Summer
 - ESP 635 Teaching & Curriculum Development for Students with Severe Disabilities Summer
- One approved 3-credit School of Education elective.

Program and schedule subject to change.

Program chair: Louise Andrews, Ph.D.
 • louise.andrews@go.cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Post-Master's Certificate

Autism Specialist Endorsement Certificate

• CIP code 13100

15* credits, 2-3 terms, part-time • Endorsement program for Massachusetts licensed educators

Program Description — This DESE endorsement recognizes specialized study in Autism by individuals with an Initial or Professional license and two years' teaching experience. This program provides educators in special education with a contextual and practical understanding of the Autism Spectrum and how to support families and schools while meeting the needs of students. The endorsement is not required for licensure or employment in schools. This program requires four courses and a 150-hour field-based experience.

The program and coursework are all online.

Learning Outcomes —

- Meet the unique and complex educational needs of students on the Autism Spectrum.
- Assist public schools in including students on the Autism Spectrum in developing and implementing IEPs and participating in regular education settings.
- Assist families of students on the Autism Spectrum to participate meaningfully in their children's education.

Careers — Career options are defined by the educator's original certificate. However, the Autism Specialist Endorsement indicates that the educator has acquired specialized knowledge and skill in assisting students on the Autism Spectrum. School districts have authority to require candidates to hold or be eligible for the Autism Specialist Endorsement in addition to the original license.

Courses required may vary based on transcript analysis.

Courses 15 credits

ESP 610	Autism: History, Prevalence, Diagnosis & Characteristics — <i>required first course</i>	Fall
ESP 625	Behavior Management (ASD)	Fall
ESP 616	Communication Disorders (ASD).	Spring
ABA 702	Field Experience Internship and Seminar: Autism Specialist	Fall, Spring
*ESP 607	Psycho-Educational Assessment for Teaching Exceptional Students	Spring

*If students have already completed ESP607 outside of this program, students are instead required to take ESP630:

ESP 630	Social and Psychological Perspectives in Autism Spectrum Disorder
---------	---

Admission requirements:

Candidates are expected to enter the program based on prerequisite criteria to ensure that they have the prerequisite skills to be effective in the licensure role:

- Valid Massachusetts initial or professional license as: Teacher of Students with Moderate Disabilities, Teacher of Students with Severe Disabilities, Teacher of Visually Impaired, Teacher of the Deaf and Hard of Hearing.
- School of Education requirements for certificate programs.

Transcript analysis: Subject Matter Competency will be evaluated through transcript analysis by the program chair, following the Subject Matter Knowledge Standards for the Massachusetts Autism Specialist (see www.doe.mass.edu). Only coursework completed within the last five years, with grades of B or better will be considered.

***Program credits:** Additional credits may be required for competencies not satisfied before enrollment; credits may be reduced if any competencies have already been covered acceptably.

Please Note: This program has not yet been approved for financial aid.

Program subject to change.

Program chair: Louise Andrews
• louise.andrews@go.cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Post-master's Certificate

Behavior Analyst Certificate

• CIP code 422814 • 24 credits, 6 terms

• ABAI Verified Course Sequence meets coursework eligibility criteria for the Behavior Analyst Certification Board exam.

Program Description — The ABA program is designed specifically for those who are currently practicing in ABA-based treatment settings who wish to pursue national certification as a Board Certified Behavior Analyst (BCBA™). Formal access to BCBA supervision is essential to the academic requirements and is a prerequisite for program entry.

The ABA course sequence is delivered in a hybrid learning model that includes both live (in-person) and asynchronous course content. For successful completion of the program students must be both familiar with and able to effectively use technology-based instructional formats and be highly disciplined in meeting deadlines for required work assignments. Effective and timely communication skills are also essential to student success.

Learning Outcomes — Students in the ABA program will be able to demonstrate knowledge of applied behavior analysis and associated scientific principles that govern human behavior, which is achieved by completing a functional assessment project and a written behavior support plan under the guidance of the faculty and their BCBA field work supervisor and a literature review. Students will complete a range of behavior analytic projects during their ABA courses specific to the topics covered during each course and the current BACB task list. Finally, all students will demonstrate knowledge of the current BACB ethics standards as well as the current BACB Task List content specified in the course syllabus.

Careers/BCBA certification — Students who complete the ABA course sequence, supervised fieldwork, and successfully pass the BCBA examination will earn a national certification and also be eligible for licensure in Massachusetts. They will be able to work in a wide range of clinical and treatment settings as a BCBA in the treatment of individuals with autism spectrum disorders and other behavior and learning challenges. There is currently significant demand for persons with the BCBA credential, so that it is highly portable and desired across the state, the country and internationally.

ABA Course Sequence 24 credits

- All courses 3 credits @ 45 contact hours, unless otherwise noted.
- Courses **must** be taken in the order delineated here.

	Fall Entry	Spring Entry

ABA 715B Basic Applied Behavior Analysis II (4 credits)		Spring 1 . . Summer 1
ABA 726 Ethics in Applied Behavior Analysis		Summer 1 . . Summer 2
ABA 716 Behavior Assessment	Fall 2	Fall 1
ABA 718 Research Methods		Spring 2 . . . Spring 2
ABA 719 Behavioral Interventions		Spring 2 . . . Spring 2
ABA 722 Supervision & Management in Applied Behavior Analysis		Summer 2 . . Summer 2
ABA 721* Applied Behavior Analysis Fluency Seminar (1 credit) required at end of program		Summer 2 Fall 2

*Students who do not pass ABA 721 after two semesters must re-enroll in the course. Students may contact the program chair to discuss a non-endorsement option.

Timely completion of ABA course sequence: ABA coursework, including supervision and fieldwork, are specifically aligned with current BACB standards and its corresponding edition of the BCBA exam. Standards and exam are subject to change, therefore timely completion is essential.

Required to begin the ABA course sequence:

- Master's degree or higher in education, special education, or psychology in an area that meets the current BACB™ standards at time of enrollment. Please consult the BCBA program chair prior to enrollment.
- Active employment in a relevant, related field with at least one year of experience in an ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Student responsibility: A high level of professional acumen and decorum is required. Students are expected to be fluent in the

BACB ethics standards from the start and throughout the program. Students must have basic competence with technology-based academic applications.

(All courses @ 3 credits except as noted.)

Post-Master's Certificate

Digital Literacy Computer Science Certificate

• CIP code 130501 • 15 credits, 2-3 terms

Program Description — The Digital Literacy Computer Science Certificate (DLCS) serves licensed science, math and library teachers who seek this additional add-on license. The course work provides the necessary depth and content knowledge needed to support the expectations outlined in the Massachusetts Curriculum Framework 2016 and addresses the subject matter knowledge as outlined by the Massachusetts Dept. of Elementary and Secondary Education for the new Digital Literacy and Computer Science licensure (K-12).

The demand for this license is great since the state government has issued guidelines for all schools to integrate digital and computer science literacy and courses K-12 to prepare students for high tech working environments.

The program and coursework are all online.

Learning Outcomes — Graduates demonstrate the knowledge and skills expected of professional educators by regional, state and national accreditation bodies. They understand the principles and concepts of computing and society, including cyberbullying, safety security issues, and technology laws as well as recovery strategies. They evaluate the impact of technology and assistive technologies in people's lives, commerce and society. They demonstrate advanced research skills and strategies to identify and evaluate and credit sources and information. In addition, they utilize digital tools and resources to enhance communication and collaboration, solve problems, and publish online by demonstrating an understanding of computer systems, programming and computational thinking.

Careers — Computer science teacher (5-12)

Courses required may vary based on transcript analysis, reviewed by Program chair.

Courses 15 credits

- SCI 634 Computational Thinking: Data Structures & Algorithms
- SCI 636 Computers, Software & Networks
- SCI 637 Computers & Society
- SCI 638 Computer Programming
- SCI 640 Network Security & Safety

Admission requirements:

- School of Education requirements for certificate programs.
- Master's degree required.
- Massachusetts teachers who hold an initial or professional license may elect to add this digital literacy license by submitting this coursework on their own to the Massachusetts Department of Elementary and Secondary Education (DESE) for transcript approval. Part of the approval process will include 150 hours of teaching digital literacy in a school setting; this can be submitted by a school principal on official letterhead. There is no MTEL for this license.

Transcript analysis: Subject Matter Competency for Digital Literacy will be evaluated through transcript analysis by the program chair, following the Subject Matter Knowledge Standards for the Massachusetts Digital Literacy License (see www.doe.mass.edu). Only coursework completed within the last seven years, with grades of B or better will be considered.

***Program credits:** Additional credits may be required for competencies not satisfied before enrollment; credits may be reduced if any competencies have already been covered acceptably.

Program subject to change.

Program chair: John Papadonis
• john.papadonis@cambridgecollege.edu

All courses 3 credits except as noted.

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

Early Childhood Teacher (PreK-2)

- CIP code 131210 • For licensure: 31-34* credits, 4 terms full-time
- Non-licensure: 30-32 credits, 3 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The Early Childhood PreK-2 program is for students who plan to teach in public or private schools. They are prepared with the appropriate skills and knowledge that will assist them in pursuing their initial license in Early Childhood PreK-2 With and Without Disabilities. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates demonstrate the disposition, knowledge and skills expected of professional educators articulated by state and national accreditation bodies. They understand the principles of early childhood education, including developmentally appropriate lessons and activities for educators working with children in preK-grade 2 settings and utilize inclusive practices appropriate for children with learning disabilities and for diverse students (including but not limited to English language learners) to enhance the abilities of their children. They utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development; set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Careers — Graduates who have completed the licensure option are eligible for initial licensure and are qualified for employment in public or private preschool/kindergarten as well as in the early childhood arena.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams. Two approved School of Education electives (total 4-6 credits) also required.

***Program credits:** 31 credits total if SEI is completed before enrollment, 34 credits if SEI is completed at Cambridge College.

Program and course schedule subject to change.

Program chair: Christy Reynolds, Ed.D.
 • christy.reynolds@go.cambridgecollege.edu

Courses — program chair will advise on sequence 26 credits

- EDU 558 Introduction to Graduate School (1 credit) . . . every term
- ELE 500 Teaching Phonological & Phonemic Awareness & Phonics (0 credit; req. for ECE612) every term
- ESP 592 Adapting Materials for Students w/Disabilities in Gen Ed Classrooms (1 credit) every term
- ESP 594 Collab & Consultation Technq (2 credits) . . . every term
- ECE 600 Development of Young Children Summer
- ELE 653 Teaching Science & Technology in Early Childhood & Elementary Curriculum Fall
- ESP 512 Inclusion & Behavior Management Fall, Summer
- ELE 656 Teaching Social Science, History & Multicultural Educ in Early Childhood & Elementary Curric. . . . Spring
- ECE 612 Developmental Reading for Early Childhood Birth to Eight Fall, Spring
- ELE 620 Integration of Children’s Literature in Early Childhood & Elementary Curriculum Fall, Summer
- MAT 700 Inclusion in Math Class every term
- ELE 594 Integrating Physical Education into Early Childhood & Elementary Curriculum (1 credit) . . Summer

Practicum Prerequisites 1-4 credits

- Pass all MTEls required by Massachusetts for this license: Communication & Literacy, Early Childhood, and Foundations of Reading (MTEL).
- SEI 605 Sheltered English Immersion (3 credits) or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar (licensure students only) 4 credits

- ECE 794 Practicum**— 300 hours (2 credits) Fall, Spring Guided and evaluated by a licensed/certified early childhood teacher in the classroom and a Cambridge College early childhood supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.
- ECE 791 Practicum Seminar** (2 credits) Fall, Spring Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

Master of Education

Educational Leadership

• CIP code 130401 • For Principal/Assistant Principal 31-33* credits • Non-licensure 32 credits • 4 terms full-time
• Licensure program approved by the Mass. Dept. of Elementary & Secondary Education (DESE).

Program Description — The M.Ed. in Educational Leadership is specific to leadership roles in P-12 settings. The program is based on standards upheld by the Educational Leadership Constituent Council and follows the Massachusetts Department of Elementary and Secondary Education’s (DESE) Professional Standards for Administrators. The program supports the acquisition of prerequisite knowledge and professional skills to serve as competent, caring, ethical, and highly qualified leaders in the schools, districts, and communities served.

The degree supports career advancement for currently licensed practitioners in P-12 settings with at least three years of employment in a Massachusetts-approved school or district. The Principal/Assistant Principal license (PK-8 or 5-12) is for those seeking to lead schools. The non-licensure option is designed for seasoned professionals in educational settings or agencies that do not require the Massachusetts license.

Outcomes — With guidance of the program chair, seminar leaders, faculty, and licensed, current practitioners in schools and districts within Massachusetts, candidates for the M.Ed. in Educational Leadership demonstrate an ability to engage in site-based leadership that: (a) promotes the learning and growth of all students, (b) cultivates a shared vision for effective schools, (c) ensures a safe, efficient, and effective learning environment, (d) ensures the effective use of resources, and (d) promotes the involvement of all stakeholders, and (e) promotes the success of all students. Effective leadership is further evidenced through written reflections, key assessments, tasks assigned and field experiences documented in an e-portfolio and submitted via TaskStream. Specifically, candidates must demonstrate the ability to:

Principal/Assistant Principal

- Create a physically and emotionally safe school environment.
- Provide effective instructional leadership supportive of student learning and attainment of school achievement goals.
- Build a professional culture supportive of reflective practice, high expectations, and continuous improvement of teaching and learning.
- Engage school communities including teachers, parents, district leaders, and community partners in ways supportive of the school’s and district’s mission.
- Effectively and efficiently manage all school operations including curriculum implementation, personnel, facilities, schedules, and budgets.

Careers — Graduates typically pursue leadership or policy related positions in PreK-12 schools. Principal/Assistant Principal graduates become school leaders or pursue management positions in education-related organizations and agencies. Those in the non-licensure option typically lead private or charter schools and later return to pursue licensure through the CAGS program in order to pursue further advancement in Massachusetts public schools and districts.

M.Ed.—Licensure

Program Entry — Evidence of successful completion of the MA Communications and Literacy (MTEL) test and GPA requirement are required for program entry. If the MTEL is not available, students seeking licensure must first matriculate into the non-licensure pathway, then complete a Change of Academic Program signed by the program chair, educational leadership and dean, School of Education once this requirement is met. Evidence of current license as a practitioner in a Massachusetts approved school or district is also required.

Practicum Prerequisites—*All documentation is verified and signed by the professional seminar advisor and program chair, then uploaded in TaskStream.*

- Signed acknowledgement of area/level of licensure sought, PreK-8 or 5-12
- Successful completion of all courses with a grade of “B” or better.
- Unless evidence is submitted that the SEI RETELL or SEI MTEL was successfully completed prior to program admission, all candidates must take the SEI 705 Sheltered English Immersion for School Administrators.
- Pre-Practicum logs documenting hours embedded in courses appropriate to the area of licensure.

Practicum Logs, Portfolios, MA PAL

- All practicum logs evidencing completion of all hours must be verified by the supervising practitioner, professional seminar advisor, and program chair before uploading logs into TaskStream.
- All candidates must submit an electronic portfolio by uploading all documents specific to licensure, including reflections, key assignments, practicum logs, and evidence of current licensure in TaskStream.
- Candidates for the Principal/Assistant Principal licensure option are required to have successfully completed all required tasks for the Massachusetts Performance Assessment for Leaders (PAL).

Education Leadership—M.Ed. Non-Licensure

If licensure is not desired, students must sign a form attesting that they understand that this option is not eligible for licensure upon degree completion.

All program components are required (including pre-practicum) **except** the licensure components: MTEL, MEPID, MA-PAL, SEI, and Practicum. Non-licensure students take Educational Leadership courses, Professional Seminar, and the Independent Learning Project.

***Program credits:** 31 credits total if SEI is completed before enrollment, 33 credits if SEI is completed at Cambridge College.

Program and course schedule subject to change.

Program chair: Stephen Maio, Ed.D.

Educational Leadership

Principal/Assistant Principal Licensure

Term 1

- EAD 712 Curriculum Development, Assessment & Improvement for the School Administrator
- EAD 684 Selection, Development & Supervision of Educational Personnel
- EAD 691 Professional Seminar I (2 credits; *25 practicum hours*)

Term 2

- EAD 688 Legal Aspects of School Administration
- EAD 690 Finance & Business Administration for the School Administrator
- EAD 692 Professional Seminar II (2 credits; *50 practicum hours*)

Term 3

- EAD 662 Contemporary Issues & Topics in Educational Administration
- EAD 782 Organizational Change for School Leaders
- EAD 693 Professional Seminar III (2 credits; *75 practicum hours*)

Term 4

- SEI 705 Supervision of Sheltered English Immersion Instruction for Administrators (2 credits) — only if needed.
- EAD 694 Professional Seminar IV (2 credits; includes *15-page paper on an action research issue related to practicum*)

EAD 790 H or J Practicum 500 hours Completion (5 credits) and *all MA-PAL requirements*

- EAD 790 **H** Principal/Asst Principal (PreK-8)
- EAD 790 **J** Principal/Asst Principal (5-12)

Total 31-33 credits with 500 hours of documented practicum.

Education Leadership—M.Ed. Non-Licensure

Term 1

- EAD 712 Curriculum Development, Assessment & Improvement for the School Administrator
- EAD 684 Selection, Development & Supervision of Educational Personnel
- EAD 691 Professional Seminar I (2 credits)

Term 2

- EAD 688 Legal Aspects of School Administration
- EAD 690 Finance & Business Administration for the School Administrator
- EAD 692 Professional Seminar II (2 credits)

Term 3

- EAD 662 Contemporary Issues & Topics in Educational Administration
- EAD 782 Organizational Change for School Leaders
- EAD 693 Professional Seminar III (2 credits)

Term 4

- EAD 721 Supervision, Induction & Coaching of New Teachers
- EAD 800 Independent Learning Project
- EAD 694 Professional Seminar IV (2 credits)

Total 32 credits; no practicum

(All courses @ 3 credits except as noted.)

Educational Leadership - CAGS

- CIP code 130401 • School Administration 36-38* credits • 4 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE) for Principal/Assistant Principal (PreK-8 or 5-12)

Program Description — The Certificate of Advanced Graduate Studies (CAGS) in Educational Leadership is a post-master’s option designed for educators to advance their knowledge and skills specific to leadership in P-12 schools and districts. The focus is to advance teaching and learning through school transformation, with a concentration in school administration or curriculum. The program is based on standards upheld by the Educational Leadership Constituent Council and follows the Massachusetts Department of Elementary and Secondary Education’s (DESE) Professional Standards for Administrators. Emphasis is on the role power and politics play in schools and districts along with research skills and data analysis required to support and advance caring, competent, and qualified teachers and school leaders.

Outcomes — Graduates: (a) demonstrate the knowledge and ability to create a physically and emotionally safe school environment, (b) demonstrate a knowledge of and sensitivity to school and system organization; (c) understand that improving teaching and learning is an intricate process that requires a willingness to change, an educational vision, and persuasive communication; (d) pursue action research and data collection to inform decision making and create meaningful professional development for faculty; and (e) explore technology, inclusive strategies for reaching a diverse student body, and develop skills in teaching students with special needs and those for whom English is a second language. As a result, graduates perceive their educational setting as part of a larger system and are able to identify workable solutions for positive change supportive of teaching and learning.

Careers — Graduates enter into the full range of school leadership positions in public, private, and charter schools and in corporate and community education. Positions held include teacher-leaders, department chairs, assistant principal, and principal. In addition, graduates hold offices at the district level as coordinators and directors.

An administrator license is required for employment half-time or more as director, department head, or curriculum specialist.

All students who enter CAGS must select a concentration and level of licensure if desired, and submit a signed Declaration of Intent **by the end of their first term of enrollment**. All students must consult the program chair and have their approval *prior* to submitting the Declaration of Intent.

CAGS-Licensure — Program Completion Requirements

- All CAGS requirements for licensure must be met, including those outlined for program entry, all CAGS courses, and field experiences (pre-practicum and practicum).
- Sheltered English Immersion or successful completion of the SEI RETELL or SEI MTEL offered through DESE.
- A total of 500 hours of field experiences, including the Pre-Practicum and Practicum, in the role and level of licensure sought.
- Massachusetts Performance Assessment for Leaders (PAL) — required of candidates seeking licensure as a principal or assistant principal.
- Exit Performance Portfolio via TaskStream.

Practicum Prerequisites—*All documentation is verified and signed by the professional seminar advisor and program chair, then uploaded in TaskStream.*

- Signed acknowledgement of area/level of licensure sought, PreK-8 or 5-12
- Successful completion of all courses with a grade of “B” or better.
- Unless evidence is submitted that the SEI RETELL or SEI MTEL was successfully completed prior to program admission, all candidates must take the SEI 705 Sheltered English Immersion for School Administrators.
- Pre-Practicum logs documenting hours embedded in courses appropriate to the area of licensure.

CAGS-Non-Licensure — Program Completion Requirements

All CAGS components are required except for those specific to licensure (e.g., the Massachusetts Communications and Literacy MTEL, SEI, MA-PAL).

***Program credits:** 36 credits total if SEI is completed before enrollment, 38 credits if SEI is completed at Cambridge College.

Program and course schedule subject to change.

Program chair: Stephen Maio, Ed.D.

Total 36-38 credits with 500 hours of documented practicum.

**MA Department of Elementary and Secondary Education
required practicum hours for licensure:**

- Principal/Assistant Principal: 500 hours

(All courses @ 3 credits except as noted.)

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

Elementary Teacher (1-6)

- CIP code 131202 • For licensure: 32-35* credits, 4 terms full-time
- Non-licensure: 30 credits, 3 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The Elementary Teacher 1-6 initial licensure program is for students who plan to teach in public schools or collaboratives. Students are prepared with appropriate skills and knowledge that will assist them in pursuing their initial license as an Elementary Teacher 1-6. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates demonstrate the disposition, knowledge and skills expected of professional educators articulated in regional, state and national accreditation bodies. They utilize best practices for teaching students with diverse abilities and languages and scientifically-based practices for teaching reading and mathematics; inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development; set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Careers — Graduates who have completed the licensure option are eligible for initial licensure and are qualified for employment in public schools and collaboratives, teaching elementary grades 1-6.

Courses — program chair will advise on sequence 27 credits

- EDU 558 Introduction to Graduate School (1 credit) . . . every term
- ELE 500 Teaching Phonological & Phonemic Awareness & Phonics (0 credit; req. lab for ELE521) . . . every term
- ELE 653 Teaching Science & Technology in Early Childhood & Elementary Curriculum Fall
- ELE 630 Classroom Mgmt with Models of Teaching Fall, Spring
- ELE 510 Developmental Psychology Spring
- ELE 656 Teaching Social Science, History & Multicultural Educ in Early Childhood & Elementary Curric. Spring
- ELE 620 Integration of Children’s Literature in Early Childhood & Elementary Curriculum Fall, Summer
- ELE 521 Development of Reading & Writing Skills for Early Childhood & Elementary Curriculum . . . Fall, Summer
- MAT 623 Common Core Math Fall, Summer
- ELE 594 Integrating Physical Education into Early Childhood & Elementary Education (1 credit) . . . Summer
- ELE 593 Integration of Visual Arts for Early Childhood & Elementary Curriculum (1 credit) Spring
- MAT 700 Inclusion in Math Class every term

Practicum Prerequisites 1-4 credits

- Pass all MTEs required by Massachusetts for this license: Communication & Literacy, General Curriculum, math sub-test, and Foundations of Reading (MTEL).
- SEI605 Sheltered English Immersion (3 credits) or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar (licensure students only) 4 credits

- ELE 794 Practicum**— 300 hours (2 credits)
Guided and evaluated by a licensed/certified elementary teacher in the classroom and a Cambridge College elementary supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.
- ELE 791 Practicum Seminar** (2 credits)
Electronic exit portfolio (Taskstream) required for credit.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams. One approved 3-credit School of Education elective also required.

***Program credits:** 32 credits total if SEI is completed before enrollment, 35 credits if SEI is completed at Cambridge College.

Program and course schedule subject to change.

(All courses @ 3 credits except as noted.)

Graduate Certificate

Elementary Science Specialist (1-6) Certificate

- CIP code 131316 • 17* credits, 3 terms
- Add a (1-6) science license for elementary classroom teachers

Program Description — The Elementary Science Specialist Certification in General Science is designed for classroom teachers who hold an initial license in elementary teaching, or another relevant field, who want to “add-on” an endorsement in General Science, 1-6. The program addresses the subject matter knowledge competencies in science content and scientific practices required for endorsement in General Science, grades 1-6 and integrates essential science content with best practices in hands-on, inquiry-based science education. The program includes a blend of seated and online content science courses. This certificate is firmly rooted in the Massachusetts 2016 Science/Technology and Engineering Standards. Students are required to submit completed coursework to the Massachusetts Department of Elementary and Secondary Education for the license endorsement.

Learning Outcomes — Teachers understand basic principles and concepts of the life sciences appropriate to the elementary school curriculum; basic principles and concepts of the physical sciences appropriate to the elementary school curriculum; philosophical theories in science, and identify common misconceptions; identify socially important issues including the impact of technology on our environment. They design and conduct scientific inquiries to test scientific hypotheses, using appropriate tools and techniques to gather, analyze, and interpret data; develop descriptions, explanations, predictions, and models using evidence, communicate scientific procedures and explanations; and know how science, technology, and math inform each other and serve as mechanisms for inquiry into the nature of the universe. They teach science content through engaging learners in the scientific practices and the engineering design process. They use “best practices” in teaching inquiry-based science and develop a balanced approach to hands-on science instruction using appropriate methodology and appropriate safety procedures as described in state standards.

Careers — Elementary science specialist, grades preK-5; middle school general science teacher/earth, life, physical and engineering sciences, grades 5-8; science museum educator, nature center specialist/guide, aquarium and zoo educator.

Courses required may vary based on transcript analysis.

Science Methods..... 14 credits

ELE 653 Teaching Science & Technology in Early Childhood & Elementary CurriculumFall, Spring

Methods & Materials for Teaching:

SCI 686 Physical Science. Fall
 SCI 690 Teaching Engineering & Technology (2 credits). Fall
 SCI 682 Life Science Spring
 SCI 684 Earth Science Spring

Science Content.....3 credits

Online courses @ 1 credit

Select one course:	SCI 601	Aquatic Ecology
	SCI 600	Cell Biology
Select one course:	SCI 603	Electricity & Magnetism
	SCI 609	Transfer of Energy
	SCI 615	Forces in Motion
Select one course:	SCI 607	Structure of the Earth
	SCI 613	Earth's Place in the Universe
	SCI 629	Practical Meteorology

Admission requirements:

- School of Education requirements for certificate programs.
- Valid Massachusetts elementary PK-2 or 1-6 initial license. (No MTEL is required for General Science, Grades 1-6.)

Transcript analysis: Subject Matter Competency for General Science will be evaluated through transcript analysis by the program chair, following the Subject Matter Knowledge Standards for the Massachusetts 1-6 Science Specialist License (see www.doe.mass.edu). Only coursework completed within the last seven years, with grades of B or better will be considered.

***Program credits:** Additional credits may be required for competencies not satisfied before enrollment; credits may be reduced if any competencies have already been covered acceptably.

Program subject to change.

Program chair: John Papadonis, M.S.
 • john.papadonis@cambridgecollege.edu

(All courses @ 3 credits except as noted.)

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

English as a Second Language (PreK-6 or 5-12)

- CIP code 131401 • For licensure: 33 credits, 4-5 terms full-time
- Non-licensure: 30-31 credits, 3-4 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The Teaching English as a Second Language program prepares candidates with the disposition, knowledge and skills to create learning environments that enable English Learners (ELs) to become proficient in English and access the academic content area curriculum. The program meets all state regulations for licensing of Teachers of English as a Second Language, with the SEI Endorsement. Courses present nationally recognized research-based models for first and second language learning, address curriculum mandates, and the developmental characteristics of students in grades PreK-6, 5-12, and adult levels. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates demonstrate the disposition, knowledge and skills expected of professional educators as articulated by regional, state and national accreditation bodies. They understand language as a system, the structure and nature of language, and language variation and change. They understand language acquisition and literacy development, including practices for reading skills/comprehension in a first language at different levels; first and second language differences for reading instruction; English phonemic awareness for students not literate in their first language; effect of first language literacy on second language learning/literacy; role of oral language development in literacy development for ELs; formal/informal reading assessment with English learners; listening/speaking/reading/writing vocabulary, and practices for developing writing skills/writing tools; formal writing elements; oral/aural English fluency at different proficiency levels; social and academic content English; metalinguistic skills and vocabulary for cognitive, academic, and language proficiency. They utilize research-based ESL approaches and best practices and apply socio-cultural and socio-emotional considerations. They understand the role of community, families, and schools in EL education and the laws pertaining to education of ELs.

ESL graduates utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development. They set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams. One approved 2- or 3-credit School of Education elective also required; total 30-31 credits.

Program and course schedule subject to change.

SEI is included within the M.Ed. degree for initial licensure in ESL.

Program chair: Leba Heigham, M.Ed.
 • leba.heigham@cambridgecollege.edu

Careers — Candidates who complete the ESL licensure program are able to teach ESL in public, private, and charter schools, educational collaboratives, and community programs. They are also eligible for the Massachusetts SEI Teacher Endorsement. Non-licensure M.Ed. graduates are able to provide ESL support and tutoring in schools; and to teach/tutor ESL in other settings including higher education intensive ESL, other countries, immigrant support programs, and workplace ESL.

Courses — program chair will advise on sequence. . . . 28 credits

- ESL 500 Introduction to Education for English Learners (1 credit) every term
- ESL 610 Linguistics & Language Variations Fall, Summer
- ESL 615 Methods & Materials for ESL. Fall, Spring
- ESL 620 Teaching Reading & Writing to ESL Students Spring, Summer
- ESL 625 Technology for Linguistically Diverse Classrooms Fall, Summer
- ESL 630 Equitable Assessment of ESL Learners Fall
- ESL 631 Second-Language Acquisition & Culture . . . Fall, Summer
- ESL 635 Sheltered Instruction & Assessment Spring
- ESL 640 Identification & Instruction of ESL Learners with Disabilities & Limited Formal Schooling Fall
- ESL 650 Teaching Content to ESL Learners Spring, Summer

Practicum Prerequisites 1 credit

- Pass all MTEs required by Massachusetts for this license: Communication & Literacy, and English as a Second Language (MTEL). Take MTEL in Year 2.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum (licensure students only) 4 credits

ESL 794A Practicum (PreK-6) or ESL 794B Practicum (5-12) 300 hours (2 credits)

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

General Science (1-6 or 5-8)

- CIP code 131316 • For licensure: 32-35* credits, 5-6 terms full-time
- Non-licensure : 30 credits, 4 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The General Science Education program provides essential science content, integrated with best practices in hands-on, inquiry-based science education. The curriculum is firmly rooted in the 2016 Massachusetts science education model with a balance of earth, life, physical and engineering sciences. The program focuses on candidates' understanding of how to integrate the eight Practices of Science with the Subject Matter Knowledge Content standards in PK-8 General Science. Students experience a blend of seated and online content science courses. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates demonstrate the disposition, knowledge and skills expected of professional educators articulated by state and national accreditation bodies. They design and conduct scientific inquiries to test scientific hypotheses, using appropriate tools and techniques to gather, analyze, and interpret data; develop descriptions, explanations, predictions, and models using evidence, communicate scientific procedures and explanations; and know how science, technology, and math inform each other and serve as mechanisms for inquiry into the nature of the universe. They use "best practices" in teaching inquiry-based science and develop a balanced approach to hands-on science instruction using appropriate methodology and appropriate procedures as described in state standards. They set high expectations and create a safe and collaborative learning environment to engage all students in their learning. They implement well-structured lessons with measurable assessments of learning and engage in ongoing reflection on practice.

Careers — Elementary science specialist, grades preK-5; middle school general science teacher/earth, life, physical and engineering sciences, grades 5-8; science museum educator, nature center specialist/guide, aquarium and zoo educator.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams. Eleven credits of science content coursework are required. These courses must be selected in consultation with the program chair.

***Licensure program credits:** 32 credits total if SEI is completed before enrollment, 35 credits if SEI is completed at Cambridge College.

Program subject to change.

General Science (1-6 or 5-8)

Practicum Prerequisites 1-4 credits

- Pass all MTELEs required by Massachusetts for this license:
Communication & Literacy test and:
1-6: Successful completion of coursework
5-8: General Science 5-8 MTEL test
- SEI 605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar (licensure students only) 4 credits

Practicum – 300 hrs in an elementary (1-6) or middle school (5-8) science classroom (2 credits)

SCI 794A Practicum 1-6 • SCI 794B Practicum 5-8

Guided and evaluated by a licensed/certified general science teacher in the classroom and a Cambridge College general science supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.

SCI 791 Practicum Seminar (2 credits)

Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

General Science (1-6 or 5-8) Initial Licensure Teaching Certificate

- CIP code 131316 • For licensure: 20-23* credits, 3 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — This program is designed for individuals who hold an undergraduate degree in science and are interested in teaching general science in the Massachusetts public school system at the middle school (1-6 or 5-8) grade level. This is a license-only pathway and does NOT result in a graduate degree; credits earned can be used toward the M.Ed. in General Science. The program will focus on the necessary pedagogical skills needed to teach in Massachusetts Public/Private Schools.

Learning Outcomes — Graduates teach science content through engaging learners in the elementary and middle grade level in the scientific practices and the engineering design process. They design and conduct scientific inquiries to test scientific hypotheses, using appropriate tools and techniques to gather, analyze, and interpret data; develop descriptions, explanations, predictions, and models using evidence, communicate scientific procedures and explanations; and know how science, technology, and math inform each other and serve as mechanisms for inquiry into the nature of the universe. They use “best practices” in teaching inquiry-based science and develop a balanced approach to hands-on science instruction using appropriate methodology and appropriate safety procedures as described in state standards. They set high expectations and create a safe and collaborative learning environment to engage all students in their learning. They implement well-structured lessons with measurable assessments of learning and engage in ongoing reflection on practice.

Careers — Middle school general science teacher/earth, life, physical and engineering sciences, grades 1-6 or 5-8; science museum educator, nature center specialist/guide, aquarium and zoo educator.

Admission requirements

- School of Education requirements for certificate programs.
- Bachelor's or master's degree in a STEM field.
- Pass Communication & Literacy (MTEL).

Transcript analysis: Subject matter competency for General Science 1-6 or 5-8 will be evaluated through transcript analysis by the program chair, following the Massachusetts standards for the license (see www.doe.mass.edu). Only coursework completed within the last seven years, with grades of B or better will be considered.

***Program credits:** 20 credits total if SEI is completed before enrollment, 23 credits if SEI is completed at Cambridge College. Additional credits may be required for competencies not satisfied before enrollment; credits may be reduced if any science methods have already been covered acceptably.

Program subject to change.

Program chair: John Papadonis, M.S.
• john.papadonis@cambridgecollege.edu

Courses required may vary based on transcript analysis.

Science Methods..... 16 credits

Methods & Materials for Teaching:

SCI 686	Physical Science.	Fall
SCI 690	Teaching Engineering & Technology (2 credits).	Fall
SCI 692	Logistics of Teaching Science (2 credits).	Spring
SCI 682	Life Science	Spring
SCI 684	Earth Science	Spring
SCI 688	Middle School Chemistry	Summer

Practicum Prerequisites..... 1-4 credits

- Pass all MTEs required by Massachusetts for this license: Communication & Literacy and General Science 5-8 tests.
- SEI 605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar..... 4 credits

SCI 794A Practicum 1-6 – 300 hrs in a middle school (1-6) science classroom (2 credits)

SCI 794B Practicum 5-8 – 300 hrs in a middle school (5-8) science classroom (2 credits)

Guided and evaluated by a licensed/certified general science teacher in the classroom and a Cambridge College general science supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.

SCI 791 Practicum Seminar (2 credits)

Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

Graduate certificate

Health/Social Emotional Education for School and Community Certificate

• CIP code 131307 • 12 credits, 2 or more terms

Program Description — This Health/Social Emotional Education certificate is for physical educators, community and public health educators, wellness and fitness center employees who want current knowledge of health and how to teach it effectively. Students learn to teach skills-based health education based on the Massachusetts performance indicators and the National Health Education Standards.

Two courses are required and two are selected from the initial licensure courses of the Skills-Based Health/Social Emotional Learning master's program.

Learning Outcomes include increased competency in health education content and teaching skills.

Pre-Practicum field experience: Students completing the certificate do not need to complete pre-practicum field experiences. However, students who matriculate at a later time must complete all pre-practicum field experiences associated with these courses.

Successfully completed courses may be accepted into the Skills-Based Health/Social Emotional Learning (SEL) initial licensure program if taken within 5-7 years of matriculation (subject to change).

Program and course schedule subject to change.

Program chair: Mary Connolly, CAGS, CHES
• mary.c.connolly@go.cambridgecollege.edu

Required Courses **6 credits**

- EHE 622 Implementing Curriculum in the Health/SEL Classroom Fall
- EHE 632 Teaching About Human Sexuality Fall

Electives in Health Education **choose 6 credits**

- EHE 613 Principles of Health/Social Emotional Promotion & Public Health Issues Fall
- EHE 642 Promoting Wellness: Building Positive Health/SEL Behavior. Spring
- EHE 652 Preventing Unintentional Injury & Violence Summer
- EHE 662 Promoting Mental/SEL Health Through School-Based Intervention. Spring
- EHE 672 Improving School Health/SEL Through Coordination Summer
- EHE 682 Health-SEL Skills for Risk Reduction & Positive Behavior Change Summer

(All courses @ 3 credits except as noted.)

Master of Education

Interdisciplinary Studies

• CIP code 130101 • 32 credits, 3 terms full-time

Program Description — The Interdisciplinary Studies program enables students to develop their own program in consultation with a faculty advisor to augment their knowledge and professional skills and, in some instances, prepare for a career transition. Students select courses from among the College’s offerings in any or all disciplines. They are expected to articulate a rationale for each course selected. (Note: the program does not prepare students for licensure.)

Assessment — Students meet with their faculty advisor to assess their progress in meeting their program goals as part of a formative evaluation process.

Independent Learning Project — Students will research and write about a topic that supports their post-graduate endeavors and/or personal growth.

Learning Outcomes — Students who complete the degree requirements for Interdisciplinary Studies will be able to:

- Integrate information and knowledge from interdisciplinary perspectives.
- Demonstrate advanced cultural competence.
- Improve higher order cognitive skills, capacity for independent thinking, and autonomous action.
- Employ meta-cognition in the classroom, the work place, and life circumstances.
- Demonstrate advanced critical thinking skills by making profound connections between and among seeming dissimilarities as required for effective analyses and performances in social, professional, and cultural contexts.
- Appreciate and enjoy questions, ambiguity, and paradox.
- Interrogate world views and become cognizant of ethical dimensions of human systems, institutions, issues, and dilemmas.

Careers — Our graduates pursue a wide variety of jobs that involve a significant element of educating. They are tutors and teachers; personal, academic, and athletic coaches; actors; family advocates and mediators; clergy; college faculty and administrators; and more. They work in schools and colleges, nonprofit organizations and human services, the criminal justice system; religious organizations, community planning and development, and corporations.

Professional Seminar & Project9 credits

- EED 691-693 Professional Seminar I-III (3 terms @ 2 credits)
- EED800 Independent Learning Project

Theory & Practice2 credits

- EED 590-591 Theory & Practice of Education — Fall and Spring only (2 terms @ 1 credit)

Preparing for Success3 credits

- EED 604 Graduate Level Writing for Social Science Research

Foundation Courses choose 6 or more credits

- EED 564 Motivation & Teaching: Theories & Practices
- EED 610 Strategies for Teaching Critical Thinking Across the Curriculum
- EED 636 Rereading Global Oppression
- EED 647 Human Brain, Human Learning
- EED 680 America Through its Literatures
- EED 705 Multicultural Diversity Issues in Workplace & Classroom

Elective Courseschoose up to 12 credits

- EED, ENG Any EED or ENG course(s)
- ELM 517 Literature for Young Adults
- ELM 523 Children’s Literature
- EDU 612 From Writing to Reading
- EDU 622 Active Assessment for Active Reading
- EDU 632 Understanding Reading K-5
- EDU 635 Developing Writing Skills in the Early Childhood Years
- EIT 711 Advanced Technologies in Education
- EIT 712 Using Educational Technology to Improve Teaching & Learning in Math, Science & Language Arts

Or, with prior approval of the seminar leader, appropriate dean, program chair, and the IS program chair, students may take no more than:

- Four 3-credit courses in any program outside the Interdisciplinary Studies program.
- Two 3-credit independent studies courses.
- Two 1-credit courses.

Changing program: If entering Interdisciplinary Studies from another Cambridge College graduate program, students must consult with the program chair to plan their program. The following (at minimum) must be taken within Interdisciplinary Studies:

- Final Professional Seminar: EED 692 or 693
- Independent Learning Project: EED 800 or EED 801
- One 3-credit course in EED, EDU, ELM, or ENG.

Program NOT approved by the Mass. Dept. of Elementary & Secondary Education (DESE).

If 9-12 external transfer credits are accepted:

- Professional Seminar is reduced to two terms: EED 691-692
- EED800 Independent Learning Project required
- Theory & Practice is reduced to one credit: EED 590 or 591
- Four 3-credit courses required: EED, EDU, ENG courses (others by permission)
- Program may be completed in two terms.

Program chair: Diane Harper, M.A.
• Diane.Harper@cambridgecollege.edu

All courses 3 credits except as noted.

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

Mathematics (5-8 or 8-12)

- CIP code 131311 • For licensure: 35-38* credits, 4 terms full-time
- Non-licensure: 30 credits, 3 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The Mathematics Education program prepares students to effectively teach mathematics at the middle (5-8), and high school levels (8-12). Students learn the concepts, language, and procedures of mathematics; and develop competence in mathematics and interest in applying it to the world around them. The program builds on the College's successful student-centered curriculum that links theory and practice in a collaborative learning environment. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates have strong mathematical content knowledge and the skills to help students they teach in accessing and learning that content and support positive attitudes towards the subject. They understand and apply mathematical problem solving processes and construct rigorous mathematical arguments. They make connections among ideas in mathematics and other fields, using varied representations of mathematical ideas to communicate mathematical thinking and deepen students' understanding. They embrace technology as an essential tool for mathematics, are proficient in computation, understand relationships among quantities, use measurement concepts and tools, spatial visualizations and geometric modeling and understand data analysis, statistics, and probability. Graduates who teach in the secondary levels, understand the concepts, techniques and applications of calculus and discrete mathematics. They utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development. They set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Careers — The program is ideally suited for: a) adults who want to work with and help children learn the language of mathematics; b) current teachers who wish to add mathematics as a new subject area; c) those wishing to become National Board Certified mathematics teachers, mathematics coaches, mathematics specialists, and mathematics coordinators/directors; d) non-mathematics majors who wish to earn a highly qualified title to their academic experience to enhance and broaden their teaching careers; and e) career changers who wish to pursue a more meaningful career in working with children. Teachers of mathematics at all school levels remain in high demand nationally; and individuals coming from careers in business, engineering, finance and the military are often very successful in relating the importance of the mathematics they teach, to the real world they have worked in for many years.

Courses 30 credits

Take courses for your licensure level 5-8...8-12

- MAT 603 Arithmetic to Algebra: Developing Math Patterns & Ideas •
- MAT 607 College Algebra •
- MAT 609 Euclidean Geometry •
- MAT 615 History of Math •
- MAT 623 Common Core Math •
- MAT 605 Technol in Math Learning & Teaching •
- MAT 611 Calculus I •
- MAT 613 Discrete Math •
- MAT 633 Probability & Statistics •
- MAT 708 Diagnosis & Remediation of Learning Problems in Mathematics
- or MAT 700 Inclusion in Math Class •
- MAT 625 Number Theory •
- MAT 627 Abstract Algebra •
- MAT 629 Non-Euclidean Geometry •
- MAT 631 Calculus II •
- MAT 635 Applied Math •

Practicum Prerequisites 1-4 credits

- Pass all MTEL teacher tests required for this license: Communication & Literacy, and Middle School Mathematics or Mathematics (8-12)
- SEI 605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar (licensure students only) 4 credits

Practicum in Mathematics — 300 hours (2 credits)
 Guided and evaluated by a licensed/certified math teacher in the classroom and Cambridge College mathematics supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.

MAT 794B Practicum 5-8
 MAT 794C Practicum 8-12

MAT 791 Practicum Seminar in Mathematics Teaching (2 credits)
 Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

Graduate Certificate

Mathematics Specialist Certificate

• CIP code 131311 • 12 credits, 2 terms

MEd

Continued

Mathematics (5-8 or 8-12)

Math placement test: Applicants for levels 5-8 and 8-12 must take a Cambridge College math placement test. Based on test results and program chair's recommendation, selected lower level math courses may be required before initial licensure courses.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams.

***Program credits:** 35 credits total if SEI is completed before enrollment, 38 credits if SEI is completed at Cambridge College.

Program and course schedule subject to change.

Program Description — This program is best suited for current classroom teachers who wish to add mathematics as a new subject area to their professional skills; and to new teacher candidates entering the teaching profession who are non-mathematics majors, and who wish to earn a highly qualified title to their academic experience and broaden their teaching careers as a mathematics specialist or mathematics coach.

Choose math specialist option in elementary/middle school or high school math, and take courses as outlined below.

3-credit courses for your Math Specialist choice

	Elem/Middle School	High School
--	--------------------	-------------

MAT 603	Arithmetic to Algebra: Developing Math Patterns & Ideas.	•
MAT 623	Common Core Math.	•
MAT 605	Technol in Math Learning & Teaching	•
MAT 700	Inclusion in Math Class	•
MAT 611	Calculus I	•
MAT 609	Euclidean Geometry	•

If a student wishes to cover both levels, one four-course certificate for one level must be completed, and then the student may re-enroll to complete a second certificate for the other level: Complete the remaining two courses above, and two more courses below, for a total of four courses:

- MAT 615 History of Math
- MAT 613 Discrete Math

The two certificates may not be taken concurrently.

COURSE OFFERINGS PLAN / PREREQUISITES

MAT 700	Inclusion in Math Class	every term
MAT 623	Common Core Math	Fall, Summer
MAT 605	Technol. in Math (preqs. 607, 609, 611, 613)	Fall
MAT 609	Euclidean Geometry	Fall
MAT 625	Number Theory (preq. MAT 611)	Fall
MAT 611	Calculus I (preqs. MAT607, 609)	Fall, Spring
MAT 618	Math Essentials	Fall, spring
MAT 615	History of Math (preqs. MAT 607, 609, 611)	Spring
MAT 708	Diagnosis & Remediation of Learning Problems in Mathematics	Fall, Spring
MAT 790-791	Practicum and Practicum Seminar	Fall, Spring
MAT 631	Calculus II (preq. MAT 611)	Spring
MAT 613	Discrete Math (preqs. MAT 607, 609)	Spring
MAT 635	Applied Math (preqs. MAT 611, 631)	Spring
MAT 603	Arithmetic to Algebra	Summer
MAT 607	College Algebra	Summer
MAT 627	Abstract Algebra (preq. MAT 607)	Summer
MAT 629	Non-Euclidean Geometry (preq. MAT 609)	Summer
MAT 633	Probability & Statistics (preq. MAT 613)	Summer

Prerequisites as listed or program chair's approval.

Course delivery format of all courses is face-to-face (F2F).

(All courses @ 3 credits except as noted.)

Post-Master's Certificate

Perrone-Sizer Institute for Creative Leadership

• CIP code 130101 • 15 credits, 3 terms, full-time

Program Description — The Perrone-Sizer Institute (PSi) for Creative Leadership is a graduate certificate program that prepares emerging leaders to continuously apply a creative, adaptive approach to challenges and engage in meaningful collaboration with other leaders and organizations to help students and families flourish. By developing leaders from the perspectives of Educator, Artist, and Community leaders, PSi builds the skills, capacity and confidence to lead innovative, democratic, urban schools that prioritize student agency, family engagement, and community partnership, championing access, equity, and diversity.

This certificate is comprised of in-seat and hybrid courses.

Learning Outcomes — Students who complete the program will show competency in becoming:

- A Creative Leader—engaging, persisting, using design and studio thinking in their work.
- A Reflective and Ethical Practitioner—exhibiting moral courage and racial and cultural self-knowledge, calm and level headed under pressure, and embracing racial justice, human imperfection, and uncertainty.
- A Effective Communicator—communicating regularly, proactively, clearly, inspirationally, and harnessing people’s minds and hearts to create change.
- A Skilled Politician and Community Leader—convening the community around common values, a common mission and vision, and a dynamic organizational strategy.
- A Head Teacher—demonstrating performance-based instructional leadership and deep commitment to academic/intellectual/social/emotional/civic development of students within an ethos of equity.
- A Chief Talent Developer—recruiting, nurturing, and retaining a diverse and high-quality community of colleagues.
- A Entrepreneurial and Competent CFO—managing the fiscal resources of the organization, understanding the role of fundraising and use of data and their impact on equity.

Careers — PSi prepares emerging school and youth-focused nonprofit leaders to take the next step in leadership, whether as a school principal, assistant principal, teacher leader, or nonprofit executive. PSi provides extensive coaching so that interested participants complete the Massachusetts Performance Assessment for Leaders (PAL), a requirement for principal licensure.

PSi graduates join an expanding network of alumni who bring new innovations and improvements in achievement and wellbeing to the 21,000+ young people they serve each year. They report an increased sense of agency in their work, seeing themselves as actors catalyzing institutional change in both positional and nonpositional roles. Our graduates are turning around schools, reviving nonprofits, addressing unmet student needs, and knitting together vibrant cohorts of parents and teachers, neighbors and nonprofits focused on student achievement and helping their communities thrive.

Courses 15 credits

Term 1

ADM 610	PSi Research Design	3
ADM 686A	PMI Part time Practicum in Educational Administration	1.5

Term 2

ADM 655	Advanced Seminar in Supervision and Evaluation	3
ADM 686B	PMI Part time Practicum in Educational Administration	1.5

Term 3

ADM 603	Organizational Change	3
ADM 606	Sociocultural Change	3

Admission requirements:

You will be asked to upload your resume/curriculum vitae and your personal statement as part of the application. You must also provide contact information for two professional references, one of whom should be your supervisor.

This program has been approved for financial aid.

Licensure:

For participants seeking to qualify for Massachusetts principal licensure, PSi provides significant coaching support to complete PAL Tasks at no additional cost.

Participants seeking to qualify for Massachusetts principal licensure are also required to arrange their own placement in a 500 hour apprenticeship under the supervision of a licensed principal in a Massachusetts public or charter school.

Program subject to change.

Program chair: Linda Nathan

• lnathan@artistryandscholarship.org

This program was added to the 2020-2021 Academic Catalog in March 2021

Graduate Certificate

PK-12 Online Learning Certificate

• CIP code 130101 • 6 credits, 1-2 terms

Program Description — The PK-12 Online Learning Certificate is a six-credit distance-learning certificate designed to offer classroom teachers, school counselors, school administrators, and other educators the tools needed to be successful working with students in an online or distance education environment. The Certificate consists of two three-credit classes. Each course offers specific strategies to help educators meet the needs of their students in distance education scenarios.

The program and coursework are all online.

Learning Outcomes

1. Develop learning experiences to account for the backgrounds, abilities, and levels of students' knowledge
2. Use alternative teaching methods to engage students and deliver educational content effectively online
3. Develop a wide range of instructional practices, approaches, methods and curricula materials to support learning by students with or without disabilities
4. Implement active learning techniques and effective universal design theories and practices to promote student learning and engagement
5. Create comprehensive lesson plans specific to your grade level context
6. Create and implement appropriate assessments to evaluate student learning and inform instructional decision making.
7. Evaluate technologies to determine which will be most effective to communicate with students, parents, colleagues and other stakeholders.

Careers — The educator can live anywhere as the program will be offered online. The program will not add any type of certification to a teaching license, but it will help educators be better prepared to work with students in an online setting. Educators will learn about communication, the use of apps, Universal Design, Flipped Learning, using websites, using various technologies and working with students with disabilities in the online setting.

Courses6 credits

- EOL 500 Online Learning in the PK-12 Classroom
- EOL 501 Serving Students with Disabilities in the Online Classroom

Admission requirements:

- School of Education requirements for certificate programs apply
- The program is a graduate level certificate for teachers/educators.

Program subject to change.

Program chair: Leba Heigham, M.Ed.

- leba.heigham@cambridgecollege.edu

All courses 3 credits except as noted.

Master of Education

School Nurse Education

• CIP code 130101 • 32 credits, 4 terms full-time

• In Massachusetts, this degree may lead to school nurse professional licensure. In other states, this program does not satisfy licensure requirements. You must check with your state licensing/credentialing authorities.

Program Description — Inspired by increased responsibilities of school nurses in the past decade, our M.Ed. in School Nurse Education strengthens the knowledge of school nurse professionals. The curriculum focuses on nursing processes with school age children, management and evaluation of school health programs, leadership skills, research in the field, and legal and ethical issues in this unique nursing specialty.

The program builds upon the standards of the National Association of School Nurses and reflects competency requirements outlined by the Massachusetts Department of Elementary and Secondary Education (DESE).

Learning Outcomes — Students will discover their learning style and strengths, becoming lifelong learners. They will make sense of previous experiences and build on them to integrate new information, skills, and attitudes. They will gain competencies in research and analysis, and understanding of evidence-based health program outcomes, practice protocols and policies. They will serve more effectively as nurses and educators of children and adults from diverse backgrounds with diverse needs, creating learning environments and presentations. They will have a network of relationships with fellow learners, Cambridge College faculty, and the faculty of their own schools, a ready resource for their career growth in collaborative school health leadership.

Careers — Graduates will grow in confidence and competence in their professional role as an expert school health manager and leader in each of their school systems. They are encouraged to publish in professional journals, present at local and national conferences for educators and school nurses, develop and initiate new policies/health care protocols within their school districts, mentor new school nurse hires, and apply for and advance into formal leadership roles.

Program and course schedule subject to change.

Contact: Tahia Bell-Sykes.

• tahia.bell-sykes@cambridgecollege.edu

SUMMER 1 on site 14 credits

- ESN 691 Professional Seminar I2
- ESN 660 Principles, Process, Practc of School Health Mgt3
- ESN 710 Dealing With Grief & Loss: Role of Educators & School Nurses.3
- ESN 725 Legal Responsibilities & Ethical Issues for School Nurses . .3
- ESN 780 School Nurse Leadership in School & Community.3

FALL 1 online learning 5 credits

- ESN 692 Professional Seminar II2
- ESN 750 Evaluation of School Health Programs.3

SPRING 1 online learning 7 credits

- ESN 693 Professional Seminar III.1
- ESN 800 Independent Learning Project3
- One elective3

SUMMER 2 on site6 credits

- Two electives6

All courses 3 credits except as noted.

Electives must be in health, family & consumer sciences, counseling psychology, school guidance, special education, or Interdisciplinary Studies. If courses in these areas are not available, other courses in education may be taken as electives with program chair's approval.

Nine transfer credits in education or nursing may be accepted as electives. Transfer courses must meet all general criteria for transfer (see *Transfer of Credit* on page 48).

Program changes effective Summer 2012.

No more than 15 credits can be completed through Cambridge College online learning courses.

If you enter in the fall or spring, work with program chair to choose electives and begin research for the Independent Learning Project.

(All courses @ 3 credits except as noted.)

Skills-Based Health/ Social Emotional Learning

- CIP code 131307 • For licensure: 36 credits, 4 terms full-time
- Non-licensure: 31 credits, 3 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE) for Health/Family & Consumer Science (all levels) initial licensure

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The Skills-Based Health/Social Emotional Learning (SEL) initial licensure program prepares health educators to be proficient in the Massachusetts Professional Standards for Teachers, the National Health Education Standards, and the CAEP health education teacher education (HETE) standards. Program completers are career-ready, technologically savvy, exhibit intercultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates demonstrate expertise in health education content, able to conduct a needs assessment, plan and implement curriculum, assess student learning, coordinate school health, advocate for health education, and serve as a resource to the school, students and their families, and the community.

They exhibit confidence in their ability to teach comprehensive skills-based health education as a component of coordinated school health; identify student risk factors and help young people reduce those behaviors to improve their personal health and academic performance. They utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development. They set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice. They advocate for health/SEL by conducting, implementing, and sharing the results of action research.

Careers — Graduates teach (preK-12) and work as health educators in many settings: local health departments, hospitals and clinics, business and industry. In colleges, they also teach courses and conduct research.

SEI endorsement optional — Students are not required to be endorsed in Sheltered English Immersion. Students interested in SEI endorsement should take SEI 605 (program total will be 39 credits).

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams.

Program and course schedule subject to change.

Program chair: Mary Connolly, CAGS, CHES
 • mary.c.connolly@go.cambridgecollege.edu

Courses 31 credits

- EHE 695 Action Research I (2 credits) Fall
- EHE 697 Action Research III (2 credits) Fall
- EHE 613 Principles of Health/Social Emotional Promotion & Public Health Issues Fall
- EHE 622 Implementing Curriculum in the Health/SEL Classroom Fall
- EHE 632 Teaching about Human Sexuality Fall
- EHE 696 Action Research II (2 credits). Spring
- EHE 698 Action Research IV (1 credit) Spring
- EHE 642 Promoting Wellness: Building Positive Health/Social Emotional Behavior Spring
- EHE 652 Preventing Unintentional Injury & Violence Summer
- EHE 662 Promoting Mental/SEL Health Through School-Based Intervention. Spring

- EHE 682 Health-SEL Skills for Risk Reduction & Positive Behavior Change Summer

Practicum Prerequisites1 credit

- Pass all MTEs required by Massachusetts for this license: Communication & Literacy, and Health/Family & Consumer Sciences
- Completed course in anatomy and physiology.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Practicum & Seminar (licensure students only).....4 credits

HEA 794 Practicum – 300 hrs: 150 hrs in an elementary school setting & 150 hrs in a secondary setting (2 credits)
 Guided and evaluated by a licensed/certified educator in the classroom and a Cambridge College supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.

HEA 791 Practicum Seminar (2 credits)
 Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

Graduate certificate

Skills-Based Physical Education/Social Emotional Learning Certificate

• CIP code 131307 • 12 credits online, 2 or more terms

Program Description — This Physical Education/Social Emotional Learning (SEL) certificate provides graduate course work based on SHAPE America's Grade Level Outcomes for K-12 Physical Education and the CASEL Social Emotional Competencies, for educators to enhance their knowledge of physical education content and pedagogical skills.

Students with a Massachusetts initial license in Physical Education may submit the credits earned in this program when applying for or renewing their Massachusetts professional license.

Learning Outcomes include increased competency in teaching physical/SEL education .

Courses 12 credits

- EHE 704 Best Practices in Physical/Social Emotional Education. Summer
- EHE 706 Assessment in Physical/Social Emotional Education. Spring
- EHE 710 Model Based Instruction in Physical Education Fall
- EHE 718 Strategies for Inclusion in Physical Education . . Summer

Please Note: These programs have not yet been approved for Financial Aid.

Program and course schedule subject to change.

Program chair: Mary Connolly, CAGS, CHES
 • mary.c.connolly@go.cambridgecollege.edu

Graduate certificate

Skills-Based Health/Social Emotional Learning Certificate

• CIP code 131307 • 12 credits online, 2 or more terms

Program Description — This Health/Social Emotional Learning (SEL) certificate provides graduate course work based on the National Health Education Standards and the CASEL Social Emotional Competencies, for educators to enhance their knowledge of health content and pedagogical skills.

Students with a Massachusetts initial license in Health/Family & Consumer Science may submit the credits earned in this program when applying for or renewing their Massachusetts professional license.

Learning Outcomes include increased competency in teaching skills-based health/SEL education.

Courses choose 12 credits

- EHE 701 Current Research on the Interrelations of Risk Factors Spring
- EHE 703 New Perspectives in Teaching Human Sexuality. Summer
- EHE 705 Promoting Health-Social Emotional Wellness in Media-Saturated Society. Summer
- EHE 713 Assessing Skills-Based Health/Social Emotional Literacy Spring
- EHE 716 Health/Social Emotional Education for the Culturally & Language-Diverse Classroom Fall

Graduate Certificate

STEM Certificate: Science, Technology, Engineering and Mathematics

• CIP code 131316 • 12 credits, 2 terms or more part-time

Program Description — The Stem Certificate in Science, Technology, Engineering and Mathematics provides early childhood, elementary, special education and middle school educators with the core background skills and content knowledge necessary to become highly-qualified mathematics, science and engineering educators serving our younger students.

The courses combine math, science and engineering content with methodology at the elementary and middle school levels. The 12 graduate credits include both seated and online courses, making for a very user friendly learning experience.

Learning Outcomes — Participating teachers will:

- Gain significant mastery of science content, preparing their students for the Massachusetts grade 5 and 8 MCAS exams and for science and technology challenges into their future.
- Integrate earth, life and physical science concepts to solve engineering problems.
- Apply design process steps to solving engineering and science problems.
- Recognize and use connections, relationships and patterns among mathematical ideas; and use representations to model and interpret physical and technical phenomena.
- Gain the necessary mathematical skills in order to become highly qualified and competent teachers of elementary and middle school mathematics.

Careers — After the completing the STEM certificate program, teachers may wish to add a Massachusetts state certification in Mathematics (1-6), Mathematics (5-8), General Science (5-8), or Mathematics/Science (combo 5-8) by taking and passing the appropriate Massachusetts MTEL exam.

Science and Engineering Courses6 credits

- ELE 653 Teaching Science & Technology in Early Childhood & Elementary Curriculum
- SCI 619 Teaching Project Based Science (online, 1 credit)

Choose two science content courses (online, @1 credit):

- SCI 601 Aquatic Ecology
- SCI 613 Earth in the Universe
- SCI 617 Earth's History
- SCI 603 Electricity & Magnetism
- SCI 607 Structure of the Earth

Mathematics Courses6 credits

- MAT 605 Technology in Math Learning & Teaching
- MAT 613 Discrete Math

COURSE SCHEDULE — All courses offered at least once/year.

Satisfactory academic progress — All students must maintain a minimum GPA of 3.0 or be placed on academic probation.

Program subject to change.

Program chair: John Papadonis, M.S.
 • john.papadonis@cambridgecollege.edu

Teacher of Students with Moderate Disabilities (PreK-8 or 5-12) & Applied Behavior Analysis

• CIP code 131001

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

- For licensure: (PreK-8) 54-57* credits, (5-12) 57-60* credits; 4-5 terms full-time
- Non-licensure: (PreK-8) 49 credits, (5-12) 52 credits; 3-4 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)
- The ABA course sequence is a Verified Course Sequence as determined by the Behavior Analyst Certification Board.
- Graduates are eligible to sit for the BCBA examination.

Program Description — The Teacher of Students With Moderate Disabilities & Applied Behavior Analysis program offers a unique opportunity for educators to become licensed special educators and certified behavior analysts. The program prepares special educators and behavior analysts to be caring and competent in the classroom with the essential and critical skills to understand the use of diverse curriculum design and development and also provide all the services necessary to implement behavior plans in schools. Graduates are prepared to become highly motivated educators who are practitioners of educational innovation, and meet the regulations for licensure of Teacher of Students with Moderate Disabilities (preK-8 and 5-12). They are prepared to take the exams required by the Behavior Analyst Certification Board. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Outcomes — Graduates demonstrate the knowledge, skills and values necessary to enable their students to excel academically and socially. They understand how moderate disabilities affect progress in learning academic content of the general curriculum that their non-disabled peers learn. They understand their responsibility to provide strategies for their students to access the regular education curriculum. They are also prepared to become behavior analysts upon completion of the BACB exam. They utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development. They set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Careers — Students who complete this program will be eligible for licensure to teach in grades Pre-K-12 as a co-teacher, a consulting teacher or a teacher of record in resource room settings. They will also be eligible to become certified behavior analysts with a teaching license, creating opportunities for multiple opportunities for employment in fields which are in high demand.

(All courses @ 3 credits except as noted.)

Special Education Foundation Courses

	PreK-8: 25 credits
	5-12: 28 credits
EDU 558	Introduction to Graduate School (1 credit) . . . every term
ESP 689	Theories of Typical & Atypical Human Development Fall, Summer
ESP 594	Collab & Consultation Technq (2 credits) . . . every term
ELE 500	Teaching Phonological & Phonemic Awareness & Phonics (0 credit) every term
MAT 700	Inclusion in Math Class every term
ESP 680	Pedagogy in Reading & Eng Lang Arts . Spring, Summer
ESP 615	Assistive Technology: Modifying Curric for Diverse Learners every term
ESP 607	Psycho-Educational Assessment for Teaching Exceptional Children. Spring, Summer
ESP 698	Laws and Regulations Pertaining to Behavioral Intervention and ABA (1 credit) Spring
ESP 800B	Supervised Learning Project (2 credits) Spring
ESP 662	Principles of Language Dev Bridging Differences & Disorders. Fall, Summer
ESP 592	Adapting Materials for Students w/Disabilities in Gen Ed Classrooms (1 credit) every term

One additional course for 5-12 (licensure and non-licensure):
SCI 680 Attaining Science Literacy Fall
or ESP 636 Teaching Social Science, History and Multicultural Education in Grades 5-12 Spring

Practicum Prerequisites

- Pass all MTELs required by Massachusetts for the license:
 - PreK-8:** Communication and Literacy, General Curriculum (multi-subject) + math subtest (Elementary Math (53), Middle School Math (47) or Mathematics (09) will also meet the math subtest requirement.) + Foundations of Reading (Reading (08) will also meet this requirement.).
 - 5-12:** Communication and Literacy, Foundations of Reading, and either the General Curriculum test or a subject matter test in an approved academic subject: English, mathematics, science (biology, chemistry, earth science, general science, and physics), history, middle school humanities, middle school mathematics/science, or political science/political philosophy (5-8 or 8-12).
- SEI 605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
- Pass all required courses.
- Pre-Practicum — Successfully complete program-specific hours in diverse settings (0 credit)
- EDU 704 Practicum Readiness (1 credit)
- Submit Practicum Application and Placement Approval Forms.

Teacher of Students with Moderate Disabilities & Applied Behavior Analysis

Continued

Practicum & Seminar: Moderate Disabilities

(licensure students only) **4 credits**

Guided and evaluated by a licensed/certified special educator in the classroom and by a licensed/certified Cambridge College supervisor. Practicum locations are subject to DESE regulations and must be discussed with the program chair and approved by the pre-practicum/practicum coordinator.

ESP 794A Practicum (PreK-8) — 300 hours in an inclusive general education setting or 75 hours in an inclusive general education setting and 225 in a separate or substantially separate setting for students with moderate disabilities. (2 credits) Fall, Spring

or

ESP 794B Practicum (5-12) — 300 hours in an inclusive general education classroom or 150 hours in an inclusive general education classroom and 150 hours in a separate setting for students with moderate disabilities. (2 credits) Fall, Spring

ESP 791 Practicum Seminar (2 credits) Fall, Spring
Electronic exit portfolio (Taskstream) required for credit.

Students must complete all special education foundation courses including the Practicum and Practicum Seminar prior to entering into the ABA course sequence. Exceptions must be approved by ABA program chair. Consultation with ABA program chair required before entering the ABA course sequence.

ABA Course Sequence **24 credits**

- All courses 3 credits @ 45 contact hours, unless otherwise noted.
 - Courses **must** be taken in the order delineated here.
- ABA 715ABasic Applied
Behavior Analysis I (4 credits) Fall1... Spring 1
- ABA 715BBasic Applied
Behavior Analysis II (4 credits)Spring 1.. Summer 1
- ABA 726 Ethics in
Applied Behavior Analysis Summer 1.. Summer 2
- ABA 716 Behavior Assessment Fall 2.Fall 1
- ABA 718 Research MethodsSpring 2. . . Spring 2
- ABA 719 Behavioral InterventionsSpring 2. . . Spring 2
- ABA 722 Supervision & Management in Applied
Behavior Analysis Summer 2. . Summer 2
- ABA 721*Applied Behavior Analysis Fluency Seminar (1 credit)
required at end of program Summer 2.Fall 2

*Students who do not pass ABA721 after two semesters must re-enroll in the course. Students may contact the program chair to discuss a non-endorsement option.

Timely completion of ABA course sequence: ABA coursework, including supervision and fieldwork, are specifically aligned with current BACB standards and its corresponding edition of the BCBA exam. Standards and exam are subject to change, therefore timely completion is essential.

Required to begin the ABA course sequence:

- Master's degree or higher in education, special education, or psychology in an area that meets the current BACB™ standards at time of enrollment. Please consult the ABA program chair prior to enrollment.
- Active employment in a relevant, related field with at least one year of experience in an ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Student responsibility (ABA): A high level of professional acumen and decorum is required. Students are expected to be fluent in the BACB ethics standards from the start and throughout the program. Students must have basic competence with technology-based academic applications.

Non-licensure option: All program components are required (including pre-practicum) *except* for SEI, Practicum Readiness course, Practicum, Practicum Seminar, and MTEL exams.

Endorsement: Candidates are endorsed for licensure in moderate disabilities upon completion of the entire Moderate Disabilities/ABA program.

Students are responsible for:

- Monitoring and understanding the requirements established by the Behavior Analyst Certification Board and for ensuring that their program of study complies with all requirements for BCBA certification.

- Discussing options for licensure practicum with the program chair or regional site director prior to enrollment.
 - Supervision and field experiences specific to national standards at the time of application to the BCBA.
- In addition, graduates must pass the BCBA examination to become a Board Certificated Behavior Analyst.

***Program credits (PreK-8):** 49 credits total if SEI is completed before enrollment, 52 credits if SEI is completed at Cambridge College.
(5-12): 52 credits total if SEI is completed before enrollment, 55 credits if SEI is completed at Cambridge College.

Online courses, Moderate Disabilities only: 50% or more of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.\

Program and course schedule subject to change.

Program chair, Moderate Disabilities: Louise Andrews, Ph.D.

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

Teacher of Students with Moderate Disabilities (PreK-8 or 5-12)

• CIP code 131001

- For licensure: (PreK-8) 36-39* credits, (5-12) 39-42* credits; 4-5 terms full-time
- Non-licensure: (PreK-8) 31 credits, (5-12) 34 credits; 3-4 terms full-time .
- Program approved by the Mass. Dept. of Elementary & Secondary Education (DESE)

Program Description — The Teacher of Students with Moderate Disabilities program prepares graduates to be caring and competent special education teachers and leaders with the essential and critical skills to make the general education curriculum accessible to all students, especially those with moderate disabilities. Graduates are also prepared to become highly motivated educators who are practitioners of educational innovation. The program meets the regulations for licensure of Teacher of Students with Moderate Disabilities PreK-8 or 5-12. Program completers are career-ready, technologically savvy, exhibit inter-cultural competence and are equipped to advance social justice.

Learning Outcomes — Graduates are knowledgeable of the public school curriculum and ways to engage students with moderate disabilities in accessing that curriculum. They utilize educational terminology specific to mild to moderate disabilities. They prepare, implement, and evaluate Individualized Education Programs (IEPs); design or modify curriculum material and classroom environments for students with moderate disabilities. They are familiar with augmentative and alternative communication and other assistive technologies; are knowledgeable of services provided by other agencies; federal and state laws and regulations pertaining to special education; child development, including basic theories of cognitive, social, emotional, language, and physical development from childhood through adolescence; and of characteristics and instructional implications of moderately and severely disabling conditions. They utilize inclusive practices to create a safe and collaborative learning environment that fosters positive socio-emotional development. They set high expectations for all students; implement well-structured lessons, with measurable assessments of learning; and engage in ongoing reflection on practice.

Careers — Students who complete this program are eligible to be special educators in grades PreK-8 or 5-12 as a co-teacher, consulting teacher or teacher of record in resource room settings.

Post-Master's Certificate

Transition Specialist Endorsement Certificate

• CIP code 131001

15* credits, 2-3 terms, part-time • Endorsement program for Massachusetts licensed educators and counselors

Program Description — This DESE endorsement provides specialized training in assisting students with disabilities and IEPs to transition from school to adult life. The program will provide licensed and experienced educators and counselors with the legal, ethical, and practical knowledge necessary to effectively support students, families, and schools throughout the student’s transition. The program requires four courses, and a 150-hour field-based experience.

The program and coursework are all online.

Learning Outcomes —

- Meet the unique and complex educational needs of students with disabilities and IEPs to transition from school to adult life.
- Assist public schools with inter-agency collaboration and coordination.
- Assist families of students with disabilities and IEPs to participate meaningfully in planning their children’s transition from school to adult life.

Careers — Career options are defined by the educator’s original certificate. However, the Transition Specialist Endorsement indicates that the educator has acquired specialized knowledge and skill in assisting students with disabilities and IEPs to transition from school to adult life. School districts have authority to require candidates to hold or be eligible for the Transition Specialist Endorsement in addition to the original license.

Courses required may vary based on transcript analysis.

Courses 15 credits

ABA 725	Introduction: Foundations and Laws Pertaining to Transition — <i>required first course</i>	Fall
ABA 705	Transition Leadership & Effective Collaboration	Fall
ABA 710	Transition Assessment & Post-Secondary Goals	Spring
ABA 712	Effective Transition: Systems & Supports.	Spring
ABA 720	Field Experience Internship and Seminar: Transition Specialist	Fall, Spring

Admission requirements:

Candidates are expected to enter the program based on prerequisite criteria to ensure that they have the prerequisite skills to be effective in the licensure role:

- Valid Massachusetts initial or professional license as: Teacher of Students with Moderate Disabilities, Teacher of Students with Severe Disabilities, Teacher of Visually Impaired, Teacher of the Deaf and Hard of Hearing, School Guidance Counselor, Social Worker/School Adjustment Counselor, or Rehabilitation Counselor.
- Two years' experience under one of the above licenses, per ESE Guidelines. (No additional MTEL required)
- School of Education requirements for certificate programs.

Transcript analysis: Subject Matter Competency will be evaluated through transcript analysis by the program chair, following the Subject Matter Knowledge Standards for the Massachusetts Transition Specialist Initial License (see www.doe.mass.edu). Only coursework completed within the last five years, with grades of B or better will be considered.

***Program credits:** Additional credits may be required for competencies not satisfied before enrollment; credits may be reduced if any competencies have already been covered acceptably.

Please Note: This program has not yet been approved for financial aid.

Program subject to change.

Program chair: Louise Andrews
• louise.andrews@go.cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Doctorate Degree

PhD in Applied Behavior Analysis with Specialization in Autism Intervention

• CIP code 422814 • 48 credits • 9 terms full time

Program Description — The PhD in Applied Behavior Analysis with Specialization in Autism Intervention will prepare students to serve in leadership positions in private companies and public entities that provide ABA services to underserved populations. Coursework is designed to further develop students' clinical skills and enhance their ability to conduct, evaluate, analyze, and apply research findings in their clinical settings. The curriculum will have two primary points of emphasis. First, clinical leadership training will be designed to prepare students for leadership roles within human service organizations and within the field of Applied Behavior Analysis. The second focus involves advanced research and dissemination of applied behavior analysis. Additional coursework will ensure that students develop the supervisory and management skills necessary to succeed in high-level leadership positions. The proposed ABA doctoral program will be a three-year, 48-credit course of study that will include summer residencies during the first two years. The program will follow a distance-learning model during all other semesters. An applied dissertation will also be required.

Students are expected to enroll in 5-9 total credits per (fall and spring) term during the first two years of the program. During the third year, students are expected to enroll in the Dissertation Research course. In all subsequent semesters and until completion of all degree requirements, students enroll in a Dissertation Continuation course.

Learning Outcomes — In this program, students will:

- Analyze published research across a range of behavior analytic content, including evaluating the experimental methods used and interpreting the results
- Synthesize published research on a particular topic and consider gaps in the research to develop research questions for their applied work and to articulate the impacts of these gaps on service delivery
- Formulate systematic research studies using valid experimental designs to enable them to qualify for full membership in the ABAI and to present findings at regional and national ABA conferences
- Develop experimental methods to address the research question in their applied dissertations
- Evaluate published research addressing skill development and behavior reduction procedures for individuals with autism spectrum disorders (ASD) and synthesize that research to create a taxonomy of empirically supported treatment procedures.
- Create assessment procedures for evaluating treatments, conduct assessments, analyze the outcomes of those assessments, and synthesize the results of assessments to develop function-based treatment plans and instructional programs
- Propose and adapt empirically supported staff training models and systems
- Design and conduct trainings in advanced ABA content across a range of audiences (students, parents, stakeholders, etc.)

Upon graduation, eligible graduates may seek the BCBA-D designation from the Behavior Analyst Certification Board.

Courses 48 credits

This program combines summer residencies at Cambridge College's Boston campus during the first two years with a distance learning model during the non-residency semesters.

Term 1 Summer
PAB 700	Introduction to Doctoral Studies (1 credit)
PAB 705	Advanced Single Subject Research Design in ABA
PAB 710	Communication and Dissemination of Advanced Principles of Behavior
Term 2 Fall
PAB 715	Early Intensive Behavioral Intervention (EIBI)
PAB 720	Topics in Advanced Research
Term 3 Spring
PAB 725	Evaluation and Treatment of Severe Behavior Disorders
PAB 730	Ethics in Applied Behavior Analysis
Term 4 Summer
PAB 735	Experimental Analysis of Behavior I
PAB 785	Dissertation Proposal Seminar I
Term 5 Fall
PAB 745	Organizational Behavior Management
PAB 780	Experimental Analysis of Behavior II
PAB 786	Dissertation Proposal Seminar II
Term 6 Spring
PAB 794	The Application of Behavior Analysis Across the Life Span
PAB 740	Behavior Analytic Perspective on Child Development - Specialization in Applied Behavior Analysis
PAB 787	Dissertation Proposal Seminar III
Term 7 Summer
PAB 795	Dissertation Research
Term 8 Fall
PAB 788	Dissertation Research (1 credit)
Term 9 Fall
PAB 789	Dissertation Completion & Defense (1 credit)

Admission requirements: BCBA Certification, live interview with Program Chair and faculty, and other School of Education requirements.

Program director: Daniel Almeida, Ph.D.
 • daniel.almeida@cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Cambridge College California

**School of Education - M.Ed. and Certificate programs
offered only at the Southern California campus**

Master of Education

Autism/Behavior Analyst (California)

• CIP code 422814 • 38 credits, 6 terms

Program Description — Autism is becoming more prevalent in our society and the need for specialists dedicated to serving this population is growing rapidly. This program provides knowledge of the autism spectrum and the skills necessary to meet the needs of individuals with autism. By completing the Behavior Analyst program, students meet the course requirements to sit for the national BCBA examination, earning a credential that is in high demand. To sit for the BCBA examination, coursework completed in this program must be reviewed by the BACB for required content for the minimum amount of instructional hours. The BACB will only make determinations about the acceptability of non-verified coursework as either (a) part of a formal application for exam or (b) an independent application for coursework evaluation.

Learning Outcomes — Students will demonstrate knowledge of applied behavior analysis (ABA) and associated scientific principles that govern human behavior and the treatment of individuals with autism spectrum disorders (ASD). Students will demonstrate knowledge of clinical, educational and ethical issues pertaining to the application of ABA across a broad range of treatment contexts and behaviors.

Careers — Careers/BCBA certification — Students who complete the ABA course sequence including supervised fieldwork and successfully pass the BCBA examination may apply for national certification. They will be able to work in a wide range of clinical and treatment settings as a BCBA in the treatment of individuals with autism spectrum disorders and other behavior and learning challenges. There is currently significant demand for persons with the BCBA credential, so that it is highly portable and desired across the state, the country and internationally.

Required to begin the ABA course sequence:

- Master's degree or higher in education, special education, behavior analysis or psychology in an area that meets the current BACB™ standards at time of enrollment. Please consult the BCBA program coordinator prior to enrollment.
- Active employment in a relevant, related field with at least one year of experience in an ABA-based treatment setting.
- Be working with or supervised by certified BCBA personnel. (Supervisor name and contact information must be submitted and verified upon program entry.)

Student responsibility: A high level of professional acumen and decorum is required. Students are expected to be fluent in the BACB ethics standards from the start and throughout the program. Students must have basic competence with technology-based academic applications.

Program and course schedule subject to change.

Program coordinator:

Marissa Congdon, PhD, BCBA-D
• marissa.congdon@cambridgecollege.edu

Autism & Special Education Courses 14 credits

- This course sequence is strongly recommended.

	Fall Entry	Spring Entry
ESP 610 Autism: History, Prevalence, Diagnosis & Characteristics	Fall 1	Fall 2
ESP 630 Social & Psychological Perspectives in Autism Spectrum Disorders	Spring 1	Spring 1
ESP 616 Communication Disorders (ASD)	Summer 1	Summer 1
ESP 615 Assistive Technology: Modifying Curric for Diverse Learning Styles	Summer 1	Summer 1
ESP 594 Collaboration & Consultation Teaching (2 credits)	Fall 2	Fall 2

ABA Course Sequence 24 credits

- All courses 3 credits @ 45 contact hours, unless otherwise noted.
- Courses **must** be taken in the order delineated here.

	Fall Entry	Spring Entry
ESP 710 Intro to Applied Behavior Analysis ABA I (4 credits)	Fall 1	Spring 1
ESP 717 Advanced Applied Behavior Analysis ABA II (4 credits)	Spring 1	Fall 1
ESP 718 Ethics & Professionalism in Applied Behavior Analysis	Fall 2	Fall 1
ESP 706 Research Design in Applied Behavior Analysis	Spring 2	Spring 2
ESP 702 Applications of Applied Behavior Analysis in Multiple Settings	Fall 2	Spring 2
ESP 716 Behavior Assessment in ABA	Summer 2	Summer 2
ESP 700 Systematic View of Supervision and Management in ABA	Summer 2	Summer 2
ESP 705 Applied Behavior Analysis Fluency Seminar (1 credit) required at end of program	Spring 2	Spring 2

Timely completion of ABA course sequence: ABA coursework, including supervision and fieldwork, are specifically aligned with current BACB standards and its corresponding edition of the BCBA exam. Standards and exam are subject to change, therefore timely completion is essential.

(All courses @ 3 credits except as noted.)

Post-master's Certificate

Behavior Analyst Certificate

• CIP code 422814 • 24 credits, 6 terms

Program Description — The ABA program is designed specifically for those who are currently practicing in ABA-based treatment settings who wish to pursue national certification as a Board Certified Behavior Analyst (BCBA™). Formal access to BCBA supervision is essential to the academic requirements and is a prerequisite for program entry.

The ABA course sequence is delivered in a hybrid learning model that includes both live (in-person) and asynchronous course content. For successful completion of the program students must be both familiar with and able to effectively use technology-based instructional formats and be highly disciplined in meeting deadlines for required work assignments. Effective and timely communication skills are also essential to student success.

Learning Outcomes — Students in the ABA program will be able to demonstrate knowledge of applied behavior analysis and associated scientific principles that govern human behavior, which is achieved by completing a functional assessment project and a written behavior support plan under the guidance of the faculty and their BCBA field work supervisor and a literature review. Students will complete a range of behavior analytic projects during their ABA courses specific to the topics covered during each course and the current BACB task list. Finally, all students will demonstrate knowledge of the current BACB ethics standards as well as the current BACB Task List content specified in the course syllabus.

Careers/BCBA certification — Students who complete the ABA course sequence including supervised fieldwork and successfully pass the BCBA examination may apply for national certification. They will be able to work in a wide range of clinical and treatment settings as a BCBA in the treatment of individuals with autism spectrum disorders and other behavior and learning challenges. There is currently significant demand for persons with the BCBA credential, so that it is highly portable and desired across the state, the country and internationally.

Post-baccalaureate (Master Level) Certificate

Empathy Certificate

• CIP code 130101 • 16 credits • 3 terms full time • Accepted in TSM or IS

Program Description — Too often the study of history occurs from the perspective of looking at dates and manipulated facts. This program utilizes an empathy pedagogy that focuses on constant teacher-student interaction, attentive listening and interchange of roles. In this context, we will apply empathy and storytelling as a means of analyzing the Underground Railroad from its historical sense. At the conclusion of this program, students will be equipped to incorporate the content from this program and Empathy techniques into their classroom and develop new educational models for positive social change.

Pedagogical approach — An Empathy pedagogy includes understanding the students’ perspectives and giving value to their experiences. When the channels of communication are open and teachers get into their students’ shoes, material relevant to the students’ experiences is presented at the second stage, while students are encouraged to question the prevailing status quo and to raise their voices in institutional contexts in which they have traditionally been silenced. Finally, during the third stage, students disseminate self-gained knowledge and thoughts with a view to creating a better future and a different society, as part of the broader mission of informed, democratic, critical, empathetic and active citizens.

Learning Outcomes — Upon completing this graduate certificate program, students will be able to:

- Explain and analyze the Underground Railroad as a key historical event
- Understand and evaluate the diversity of the human experience as influenced by religion, race, culture, and politics in US history.
- Apply historical processes that shape individuals and communities, drawing on detailed knowledge about the history of the area under study
- Think critically about the complexity of experiences found in the historical record of the United States during the Underground Railroad, and utilize Empathy to explore diversity as a critical component of history
- Distinguish between primary and secondary sources, and understand how each are used to make historical arguments
- Assess, use, and synthesize different kinds of evidence from a variety of historical sources to make a coherent argument about the past
- Effectively conduct research and write a coherent historical essay or research paper that articulates a clear argument, effectively interprets multiple forms of evidence, identifies arguments in secondary historical texts, and uses appropriate citations.
- Understand the difference between opinions and substantiated scholarly claims
- Produce new works to be used within the classroom setting
- Utilize storytelling in a classroom setting

Academic Requirements

(Four 3-credit classes and one 4 credit class/tour)

Term 1

- EMP 600 Reframing Our Stories: Empathy and the Underground Railroad
- EMP 601 Underground Railroad: From Bondage to Abolition

Term 2

- EMP 602 Unraveling Our History: Grappling with Race and Culture in America
- EMP603 From Oppression to Social Change

Term 3

- EMP 604 Footsteps to Freedom (4 credits)

Careers and Further Study — Graduates may be eligible for advancement in human service careers that do not require licensure. They will NOT be eligible to return to study towards mental health licensure at the CAGS level.

Careers — K-12 teachers, parents, administrators, community leaders and college faculty will benefit from this certificate program.

Admission requirements: Bachelor’s degree and other School of Education requirements.

Program chair: Hardy Brown II, MA, and Diane Harper, MA
• diane.harper@cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Not applicable for licensure

Offered only in Southern California

Master of Education

Teaching Skills & Methodologies

• CIP code 130301 • 32 credits, 3 terms full-time

• This degree program does not satisfy licensure requirements for K-12 public school teachers.

TEACHING SKILLS & METHODOLOGIES is a program for mid-career teachers.

Outcomes — Students gain *current*, strategic skills and knowledge that can revitalize teachers' classrooms.

Students effectively research, write and submit a professional, master's project that enhances the students' learning for post graduate endeavors;

Careers — K-12 teachers and college faculty will benefit from Teaching Skills and Methodologies. (The program does not lead to licensure.)

12 transfer credits may be accepted: Transfer courses must meet all general and *current* criteria for transfer (see *Transfer of Credit* on page 48). *Three credits must be in content courses;* nine credits must be in up-to-date teaching skills and methodologies.

If nine or more transfer credits are accepted, the Professional Seminar is reduced to two terms and the Theory & Practice of Education to one credit.

Program subject to change.

Program chair: Diane Harper, M.A.

• Diane.Harper@cambridgecollege.edu

Professional Seminar & Project9 credits

EED 691-693 Professional Seminar (3 terms @ 2 credits)

EED 800 Independent Learning Project (take with Seminar III)

Theory & Practice2 credits

EED 590-591 Theory & Practice of Education — 2 terms @ 1 credit

Skills & Methodologies choose 12 credits

Some of these courses are offered each term:

EED 503 Teaching Children With Different Learning Styles

EED 564 Motivation & Teaching: Theories & Practices

EED 610 Strategies for Teaching Critical Thinking
Across the Curriculum

EED 615 Introduction to Integrative Learning & Learning Styles

EED 628 Effective Schools

EED 704 Seminar in Current Educational Issues

EED 705 Multicultural Diversity in Workplace & Classroom

EED 710 Alternative Assessment Strategies Across the Curriculum

EIT 712 Using Educational Technology to Improve Teaching
& Learning in Math, Science & Language Arts

ELE 630 Classroom Management with Models of Teaching

ESL 625 Technology for Linguistically Diverse Classrooms

ESP 701 Students with Disabilities & the Visual Arts

Content Electives choose 9 credits

Choose content courses in Literature, English, Social Studies, Mathematics, Science, Health, Literacy, English as a Second Language.

Course offerings plan for Boston, subject to change without notice. Other Cambridge College locations set their own schedules but offer the same program of study.

(All courses @ 3 credits except as noted.)

Cambridge College Puerto Rico

School of Education—M.Ed. Programs

Master of Education

Elementary Education 4-6 (Puerto Rico)

- CIP code 131202 • 30 credits, 4 terms full-time; 36 credits with Subspecialization in Teaching Spanish as a Second Language
- Program approved by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The program for elementary level teacher recertification admits students who aspire to teach in public schools or private institutions. Students are prepared with the appropriate skills and knowledge to help them find their first job as a fourth to sixth grade elementary educator. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes. Those who choose to subspecialize in teaching Spanish as a Second Language will be prepared to teach any curriculum courses for students in grades 4-6 who are not fluent in Spanish.

Learning Outcomes — Students learn the principles and knowledge elementary educators need, including teaching strategies for students with diverse abilities and languages in different academic areas. This includes, but is not limited to, working in collaborative learning groups and co-teaching exercises that transfer to the classroom. Students will investigate best classroom practices and creation of teaching reports. Learning is personalized through independent projects that help to prepare the educator for the profession. If electing the subspecialization in teaching Spanish as a Second Language, students will acquire the competencies needed to teach non-fluent Spanish-language students.

Careers — Graduates may request recertification from the Department of Education of Puerto Rico if they already possess certifications in other areas, and are qualified for employment in public and private schools, and/or to establish elementary teaching partnerships. Upon completion of the subspecialization, student may pursue a career as a bilingual Spanish teacher.

Program for recertification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area or discipline required.

Program and courses subject to change.

Program chair: Christy Reynolds, Ed.D.
 • christy.reynolds@go.cambridgecollege.edu

Core Courses 27 credits

All courses are offered in Spanish

- ELE 510 Developmental Psychology
- ELE 522 Teaching Reading & Writing Skills for Elementary Grades 4-6
- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learners
- MAT 623R Teaching Numerical & Geometric Structures for Elementary 4-6 Students
- ELE 654 Teaching Science & Technology 4-6
- ELE 621 Integration of Children's Literature for Elementary Grades 4-6 Curriculum
- ELE 657 Teaching Social Science, History & Multicultural Elementary Curriculum 4-6
- EIT 712 Using Educational Technology to Improve Teaching and Learning
- ELE 600 Alternative Assessment: Theory and Practice

Electives

Students who do not wish to specialize further will choose only one elective, while those pursuing the subspecialization in Teaching Spanish as a Second Language will take three electives as prescribed.

Elementary Education 4-6 3 credits

- ELE 630 Classroom Management with Models of Teaching **OR** any one (1) of the courses below.

Elementary Education 4-6 with Subspecialization 9 credits

Teaching Spanish as a Second Language

- ELE 601R Foundations of Bilingual Education K-12
- ELE 602R Teaching Spanish as a Second Language K-12
- ELE 603R Sociolinguistics Fundamentals

All courses 3 credits except as noted.

Maestría en Educación

Nivel Elemental 4-6 (Puerto Rico)

- CIP code 131202 • 30 créditos, 4 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Educatio Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — El programa para la recertificación de los educadores del nivel elemental admite estudiantes que aspiran enseñar en las escuelas públicas o instituciones privadas. Los estudiantes son preparados con las habilidades y los conocimientos adecuados que contribuyan en la búsqueda de su primer empleo como educador del nivel elemental de cuarto a sexto grado. Graduados estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social.

Resultados del aprendizaje — Los estudiantes aprenden los principios y conocimientos que necesitan los educadores del nivel elemental, incluyendo las estrategias para la enseñanza de los estudiantes con diversas habilidades e idiomas en las diferentes áreas académicas. Esto incluye, pero no se limita, a trabajar en grupos de aprendizaje cooperativo y ejercicios de coenseñanza que transfieren al salón de clases. Los estudiantes investigarán respecto a las mejores prácticas a desarrollarse en el salón de clases y la rendición de cuentas del maestro.

Carreras — Los graduados están preparados para solicitar la recertificación del Departamento de Educación de Puerto Rico si ya poseen certificaciones en otras áreas, y están calificados para el empleo en las escuelas públicas y privadas, y/o establecer alianzas en beneficio de la enseñanza para el nivel elemental.

Cursos 30 créditos

Todos los cursos se ofrecen en español

Teaching English as a Second Language (Secondary Level • Puerto Rico)

- CIP code 131401 • 30 credits, 4 terms full-time
- Program approved by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — Puerto Rican and North American classrooms include students whose first language is not English. These English Learners (ELs) are faced with learning a new language and culture, while simultaneously receiving the same academic standards as their classmates whose first language is English. The Teaching English as a Second Language Program produces informed, compassionate, and committed educators who create learning environments that work for English Learners (ELs) and value their contributions. This program is for educators who want to get to know their students and who want to help them learn. The faculty members are professionals with extensive knowledge of language acquisition and the cultural factors that affect learning, and are experienced in using the best practices in the classroom. These teachers present relevant material and motivate their students to: value their prior knowledge as a basis for discussing new ideas; read and write critically; apply new skills; demonstrate and assess their own learning.

All English as a Second Language (ESL) program courses present nationally recognized research-based models that shape the curriculum and the development characteristics of students in grades Pre-K-6, 5-12, and adult levels. Participants explore the implications for teaching and learning at each level and apply the course concepts to the established goal. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes.

Learning Outcomes — Students will: understand what it means to acquire a language; be aware of the cultural factors that affect their academic achievements; grasp the current theories, research, and best practices for literacy in English. They will use research-based methodology to help English Learners (ELs) to achieve mastery of the language and know how to use Sheltered English Instruction (SEI) strategies to understand the class content standards. Students will plan a curriculum, teach effectively, manage their classroom, promote equality, and fulfill their professional responsibilities. Learning is personalized through independent projects that help to prepare the educator for the profession.

Careers — Graduates may request recertification from the Department of Education of Puerto Rico if they already possess certifications in other areas, and are qualified to teach English as a Second Language (ESL) in public and private schools. They can provide ESL teaching support and tutoring in schools and in other settings including higher education intensive English as a Second Language.

Courses 30 credits

- ESL 600 Teaching Adolescent Literature to ESL Students
- ESL 610 Linguistics & Language Variations
- ESL 615 Methods & Materials for ESL for Secondary Students
- ESL 620 Teaching Reading & Writing to ESL Secondary Students
- ESL 625 Technology for Linguistically Diverse Classrooms
- ESL 630 Equitable Assessment of ESL Learners
- ESL 631 Second Language Acquisition & Culture
- ESL 635 Sheltered Instruction & Assessment
- ESL 640 Identification & Instruction of ESL Learners with Disabilities & Limited Formal Schooling
- ESL 650 Teaching Content to ESL Secondary Learners

Program for recertification by the Puerto Rico Department of Education. Prior valid Puerto Rico certification as teacher of English (elementary level) or another area required.

Program and courses subject to change.

Program chair: Leba Heigham, M.Ed.
 • leba.heigham@cambridgecollege.edu

All courses 3 credits except as noted.

Enseñanza de Inglés Como Segundo Idioma (Nivel Secundario . Puerto Rico)

- CIP code 131401 • 30 créditos, 4 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Educatio Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — Las aulas de Puerto Rico y norteamérica incluyen estudiantes cuyo primer idioma no es el inglés. Estos estudiantes de inglés (ELs) encaran el aprendizaje de un idioma y una cultura nueva, a la vez que, simultáneamente, reciben los mismos estándares académicos que sus compañeros de clases cuyo primer idioma es el inglés. El Programa de Enseñanza de Inglés Como Segundo Idioma prepara educadores informados, compasivos y comprometidos que crean ambientes de aprendizaje funcionales para los estudiantes del idioma de inglés (ELs) y valoran sus contribuciones. Este programa es para educadores que quieren conocer a estos estudiantes y desean ayudarlos a aprender. Los facultativos son profesionales con amplio conocimiento en la adquisición del lenguaje y en los factores culturales que afectan el aprendizaje y son quienes han experimentado utilizando las mejores prácticas dentro del salón de clases. Estos maestros presentan la pedagogía relevante, motivan a sus estudiantes a valorar su conocimiento previo como base para discutir nuevas ideas, leer y escribir críticamente, aplicar nuevas destrezas y demostrar y evaluar su propio aprendizaje.

Todos los cursos en el programa de inglés como segundo idioma (ESL) presentan unos modelos basados en investigaciones reconocidas a nivel nacional que guían el currículo y a las características de desarrollo de los estudiantes en los grados de 7-12 y a nivel de adulto. Los participantes exploran las implicaciones en la enseñanza y aprendizaje de cada nivel y aplican los conceptos del curso al nivel de objetivo establecido. Graduados estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social.

Resultado del aprendizaje — Los estudiantes entenderán lo que significa la adquisición de un idioma; los factores culturales que afectan sus logros académicos; las teorías actuales, la investigación y las mejores prácticas de alfabetización en inglés. Utilizarán metodología basada en investigaciones para ayudar a los estudiantes del idioma de inglés (ELs) a lograr el dominio del idioma y saber utilizar las estrategias de *Sheltered English Instruction* (SEI) para permitirles conocer los estándares del contenido de las clases. Los estudiantes planificarán un currículo, impartirán una instrucción efectiva, dirigirán su salón de clases, promoverán la equidad y cumplirán con sus responsabilidades profesionales.

Carreras — Los graduados son capaces de solicitar la recertificación del Departamento de Educación de Puerto Rico si ya poseen certificaciones en otras áreas, y están calificados para enseñar inglés como segundo idioma en las escuelas públicas y privadas. Pueden proveer apoyo en ESL y enseñar o ser tutor de inglés como segundo idioma (ESL) en otros escenarios incluyendo inglés como segundo idioma (ESL) intensivo a nivel de educación superior.

Cursos 30 créditos

Master of Education with Specialization in

Health (Puerto Rico)

- CIP code 131307 • 30 credits, 4 terms full-time
- **Program approved** by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The program prepares health educators to be proficient in the Puerto Rico Professional Standards for Teachers and other educators. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes.

Learning Outcomes — Our graduates are experts in health education content, capable of performing needs assessments, planning and executing study plans, assessing student learning, coordinating health, advocating for health education, and serving as a resource for schools, students and their families, and communities.

Our students graduate with confidence in their ability to teach comprehensive skills-based health education as a component of coordinated school health. They know how to identify student risk factors and help young people to reduce risky behavior and improve their personal health and academic performance. Learning is personalized through independent projects that help to prepare the educator for the profession.

Careers — Graduates can teach in grades preK-12, undergraduate level in Puerto Rico, and as health educators in many settings: local health departments, hospitals and clinics, businesses and industry. In Puerto Rico one must be certified by the Puerto Rico Health Department to work as a health educator, but the coursework prepares the student for the state exam. Graduates can also teach courses and conduct research at universities.

Action Research.....7 credits

- EHE 695 Action Research I (first term @ 2 credits)
- MMG 525 Statistical Decision Techniques for Managers (second term)
- EHE 697 Action Research III (third or fourth term @ 2 credits)

Courses 23 credits

All courses are offered in Spanish

- EHE 613 Principles of Health/Social Emotional Promotion & Public Health Issues
- EHE 622R Planning, Implementing, and Administering Curriculum in Health/SEL Programs
- EHE 632 Teaching About Human Sexuality
- EHE 642 Promoting Wellness: Building Positive Health/Social Emotional Behavior
- EHE 652 Preventing Unintentional Injury & Violence
- EHE 682 Health-SEL Skills for Risk Reduction & Positive Behavior Change
- EHE 711 Evaluation of School Health/Social Emotional Programs
- HEA 794 Practicum: HFCS (300 hours: 150 elementary and 150 secondary) - 2 credits

Program for recertification by the Puerto Rico Department of Education as a health educator.

Program and courses subject to change.

All courses 3 credits except as noted.

Maestría en Educación con especialización en

Salud (Puerto Rico)

- CIP code 131307 • 30 créditos, 4 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Educatio Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — El programa prepara a los educadores de la salud para ser competentes en los Estándares Profesionales para Maestros y otros profesionales educadores en salud de Puerto Rico. Los graduados estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social. Además, puede ofrecer clases a nivel subgraduado en áreas de salud.

Resultados del aprendizaje — Nuestros graduados son expertos en el contenido de educación en salud, capaces de realizar una evaluación de las necesidades, planificar y ejecutar planes de estudio, evaluar el aprendizaje del estudiante, coordinar la salud escolar, abogar por la educación en salud y servir como recurso para las escuelas, los estudiantes y sus familias y las comunidades.

Nuestros estudiantes se gradúan con confianza en su capacidad para enseñar educación en salud integral basada en habilidades como un componente de la salud coordinada. Ellos saben cómo identificar los factores de riesgo de las personas y ayudar a los jóvenes a reducir su comportamiento de riesgo y mejorar su salud personal y el rendimiento académico.

Carreras — Los graduados pueden enseñar en grados preK-12, e instituciones de educación superior a nivel subgraduado, además como educadores en salud en muchos entornos: departamentos de salud locales, hospitales y clínicas, negocios e industrias. En Puerto Rico se requiere obtener la certificación como educador en salud provista por el Departamento de Salud de Puerto Rico, pero todos los cursos preparan al estudiante para el examen del Estado. Los graduados también pueden enseñar cursos y realizar investigaciones en las universidades.

Investigación en acción..... 7 créditos

Librarianship (Puerto Rico)

- CIP code 131334 • For certification by the DEPR: 32 credits, 5 terms full-time
- Without certification by the DEPR: 30 credits, 4 terms full-time
- Program approved by the Puerto Rico Board of Postsecondary Institutions

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The Librarianship Program prepares candidates who are committed to improving student learning and providing exceptional library programs that engage students and teachers/faculty in the development of information, media, and technology skills, as well as life-long learning. Twenty-first century libraries provide learning environments that ensure students and employees are effective, ethical, and creative users of ideas and information. By working with teachers/faculty to plan, mediate, and assess student learning, librarians play a crucial role in expanding on and delving into lessons given in the classroom using a variety of resources and specialized skills they have available. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes. The licensure program prepares certified teachers to be recertified as School Librarians by the DEPR.

Learning Outcomes — Our Librarianship Program candidates are prepared to develop and promote quality library programs. They understand and use multiple technologies for individual and group learning, empowering students to be critical thinkers, enthusiastic readers, researchers, and ethical users of information. They understand the history and the present role of libraries in education and learning. They are ready to assume a leadership role in education and information literacy, technology skills, and media literacy. They work in collaboration with other educators to promote a love of learning and reading, ensuring equal access to information resources, and to develop the knowledge and skills needed to stimulate and integrate quality reading and analysis skills in classrooms, laboratories, and libraries. Learning is personalized through independent projects that help to prepare the educator for the profession.

Careers — Graduates choose from a number of library/technology-related careers, including school library teachers, technology and information center directors, and media literacy consultants, library technicians, assistant librarians, publicity assistants, education program vendors, and information services.

Program for certification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area required.

Non-Certification option: All program components are required, except for the practicum, practicum seminar, and the PCMAS.

Program and courses subject to change.

Program chair: Donna Guerin, M.Ed.

- donna.guerin@cambridgecollege.edu

Required Courses..... 27 credits

All courses are offered in Spanish

- ELM 509 Introduction to Librarianship (*required first course*)
- ELM 521 Reference Resources and Services
- ELM 532 New Technologies in the Library
- ELM 533 Information Literacy
- ELM 561 Production of Instructional Materials
- ELM 600 User Needs and Selection of Information
- ELM 601 Cataloguing of Information Resources
- ELM 700 Research in Librarianship
- ELM 701 Library Management

Elective Course.....3 credits

Three credits for non-certification students.

The following elective course is recommended:

- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learners

Practicum Prerequisites

- Pass all teacher certification tests required by DEPR for this license.
- Pass all required courses.

Practicum & Seminar (licensure students only)..... 5 credits

ELM 790 Practicum — 300 hours (3 credits)

In a school library, divided into two 150-hour experiences at two of the three school levels (elementary, middle, high school).

Guided and evaluated by a librarian and a Cambridge College supervisor.

Practicum locations are subject to the regulations and must be approved by the program director. Students are responsible to discuss options for the practicum with the program director or regional center director.

ELM 791 Practicum Seminar (2 credits)

Electronic exit portfolio (Taskstream) required for credit.

All courses 3 credits except as noted.

Bibliotecología (Puerto Rico)

- CIP code 131334 • Para certificación del DEPR: 32 créditos, 5 términos a tiempo completo
- Sin certificación del DEPR: 30 créditos, 4 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Education Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — El programa de Bibliotecología prepara a los candidatos que comparten el compromiso para mejorar el aprendizaje estudiantil y proveer programas de bibliotecas escolares excepcionales que involucran a estudiantes y maestros/facultad en el desarrollo de información, medios y destrezas tecnológicas, así como aprendizaje de por vida. Las bibliotecas del siglo 21 proveen ambientes de aprendizaje que aseguran que los estudiantes y empleados sean usuarios efectivos, éticos y creadores de ideas e información. Al trabajar con maestros/facultad para planificar, mediar y evaluar el aprendizaje estudiantil, los bibliotecarios tienen un rol crucial en el proceso de amplificar y profundizar en las lecciones que se ofrecen en la sala de clases, con una variedad de recursos y destrezas especializadas disponibles para ellos. Los graduados des este programa estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social. El programa para recertificación prepara maestros certificados para ser recertificados como bibliotecarios por el DEPR.

Resultados de Aprendizaje — Nuestros candidatos del programa de Bibliotecología son preparados para desarrollar y promover programas de bibliotecas de calidad. Ellos entienden y aplican múltiples tecnologías para el aprendizaje individual y en grupo, apoderando a los estudiantes para ser pensadores críticos, lectores entusiastas, investigadores y usuarios éticos en el uso de la información. Ellos entienden la historia y el rol actual de las bibliotecas en la educación y el aprendizaje. Ellos están listos para llevar un rol de liderazgo en la educación y en la alfabetización de la información, destrezas tecnológicas y alfabetización de medios. Ellos trabajan colaborando con otros educadores para promover el amor al aprendizaje y la lectura, asegurar acceso equitativo a recursos de información y a desarrollar conocimiento y destrezas que son necesarias para estimular e integrar la lectura de calidad y destrezas de análisis en el salón de clases, laboratorios y bibliotecas.

Carreras — Los graduados seleccionan de entre un número de carreras relacionadas a bibliotecas y tecnologías, incluyendo bibliotecarios(as) escolares, directores de centros de tecnologías e información y consultores de alfabetización de medios, técnicos(as) bibliotecarios(as), bibliotecarios(as) auxiliares, asistentes de publicidad, vendedores de programas educativos y servicios de información.

Programa aprobado para recertification por el DEPR.

Opción de no certificación: Todos los componentes del programa son requeridos, excepto la práctica, el seminario de práctica y las PCMAS.

Programa y cursos sujeto a cambios.

Directora del programa: Donna Guerín, M.Ed.
 • donna.guerin@cambridgecollege.edu

Cursos requeridos 27 créditos

Todos los cursos se ofrecen en español

- ELM 509 Introduction to Librarianship (*primer curso requerido*)
- ELM 521 Reference Resources and Services
- ELM 532 New Technologies in the Library
- ELM 533 Information Literacy
- ELM 561 Production of Instructional Materials
- ELM 600 User Needs and Selection of Information
- ELM 601 Cataloguing of Information Resources
- ELM 700 Research in Librarianship
- ELM 701 Library Management

Curso electivo 3 créditos

3 créditos para candidatos que no aspiran a certificación.

Se recomienda el siguiente curso electivo:

- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learners

Pre-requisitos de Práctica

- Aprobar todos los exámenes de maestro requeridos por el DEPR para la certificación.
- Aprobar todos los cursos requeridos.

Práctica y seminario

(estudiantes para la certificación únicamente) 5 créditos

ELM 790 Práctica — 300 horas (3 créditos)

En una biblioteca escolar, dividido en dos experiencias de 150 horas en dos niveles de escuela (elemental, intermedia y superior).

Ser guiado(a) por un(a) Maestro(a) Bibliotecario(a) y un supervisor de Cambridge College. Las ubicaciones de los centros de práctica están sujetas a las regulaciones y deben ser aprobadas por el director del programa. Los estudiantes son responsables de discutir las opciones para la práctica con el director del programa o director del centro regional.

ELM 791 Seminario de Práctica (2 créditos)

Portafolio Electrónico de Salida (TaskStream) requerido para crédito.

(Todos los cursos son de 3 créditos excepto aquellos marcados)

Mathematics (7-12 . Puerto Rico)

- CIP code 131311 • 30 credits, 4 terms full-time
- **Program approved** by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The Mathematics program prepares students to teach mathematics at the secondary level (7-12). Students learn the concepts, language, and procedures of mathematics and develop competence in mathematics as well as an interest in applying the discipline to the world around them. The program is based on the successful student-focused curriculum which links theory and practice in a cooperative learning environment. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes.

Learning Outcomes — Teacher candidates will understand and apply mathematical problem-solving processing and construct rigorous mathematical arguments. They will understand how mathematics is learned and taught effectively, supporting positive attitudes towards the discipline. They will establish connections between ideas in mathematics and other fields. They will use diverse representations to communicate mathematical ideas and deepen students' understanding. They will use technology as an essential resource for mathematics. They will develop fluency in mathematical computations, understand the relationships between amounts, and will use measurement tools and concepts, spatial visualization, and geometric modeling. They will understand data analysis, statistics, and probability. For intermediate and upper levels, they will also be able to understand the concepts, techniques, and applications of calculus and discrete mathematics. Learning is personalized through independent projects that help to prepare the educator for the profession.

Careers — The program is ideal for: a) Adults who want to work with and help youngsters and adults learn the language of mathematics; b) current teachers who want to add mathematics as a new area of study; c) those who want to become National Board Certified mathematics teachers, specialist trainers, and mathematics coordinators/directors; d) non-mathematics majors who want to earn a highly qualified title to their academic experience to enhance and broaden their teaching careers; and e) career changers who want to pursue a more meaningful career working with youngsters and adults. Mathematics teachers at all school levels continue to be in high demand nationally, and individuals coming from careers in business, engineering, finance, and the military are successful when relating mathematics to the real world where they worked for many years.

First Required Course

According to the student's academic background in mathematics, the student will begin the master's program with one of the following courses. The academic director will decide which course each student will take.

- MAT 603 Arithmetic to Algebra: Developing Patterns and Ideas
- or** MAT 607 College Algebra
- or** MAT 613 Discrete Mathematics

Subsequent Courses 30 credits

All courses are offered in Spanish

- MAT 605 Technology in Mathematics Learning & Teaching
- MAT 611 Calculus I
- MAT 631 Calculus II (preq. MAT611)
- MAT 604 Teaching Mathematics for the Secondary Level
- MAT 633 Probability & Statistics
- MAT 625 Number Theory (preq. MAT611)
- MAT 627 Abstract Algebra
- MAT 629 Non-Euclidean Geometry
- MAT 635 Applied Math (preq. MAT611 & MAT633)

Program for recertification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area required.

Program and courses subject to change.

All courses 3 credits except as noted.

Matemáticas (7-12 . Puerto Rico)

- CIP code 131311 • 30 créditos, 4 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Educatio Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — El Programa de Educación Matemática prepara a los estudiantes para enseñar matemáticas en el nivel secundaria (7-12). Los estudiantes aprenden los conceptos, el lenguaje y los procedimientos de las matemáticas y desarrollan las competencias en matemáticas y el interés en aplicar la disciplina al mundo que les rodea. El programa se basa en el éxito del currículo centrado en el alumno que vincula la teoría y la práctica en un entorno de aprendizaje cooperativo. Graduados estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social.

Resultados del aprendizaje — Los candidatos a maestros entenderán y aplicarán los procesos de la solución de problemas matemáticos y construirán argumentos matemáticos rigurosos. Comprenderán cómo las matemáticas se aprenden y enseñanza de una forma efectiva, apoyando las actitudes positivas hacia la disciplina. Establecerán conexiones entre ideas en matemáticas y otros campos. Utilizarán diversas representaciones para comunicar ideas matemáticas y profundizar la comprensión de los estudiantes. Utilizarán la tecnología como un recurso esencial para las matemáticas. Desarrollarán fluidez en los cálculos matemáticos, comprenderán las relaciones entre cantidades, utilizarán herramientas y conceptos de medición, visualizaciones espaciales y modelos geométricos. Comprenderán el análisis de datos, estadística y probabilidad. Para los niveles intermedio y superior, también podrán comprender los conceptos, técnicas y aplicaciones del cálculo y matemática discreta. El aprendizaje se personaliza mediante un proyecto independiente que contribuye a la preparación profesional del educando.

Carreras — El programa es ideal para: a) Los adultos que quieren trabajar con y ayudar a los jóvenes y adultos a aprender el lenguaje de las matemáticas; b) los maestros actuales que deseen añadir las matemáticas como una nueva área de estudio; c) aquellos que deseen ser certificados por la Junta Nacional de Profesores de Matemáticas, como maestros de matemáticas, entrenadores especialistas y coordinadores/directores de matemáticas; d) concentraciones no relacionadas con matemáticas que desean obtener un título altamente cualificado a su experiencia académica para mejorar y ampliar sus carreras docentes y e) los agentes de cambio que desean seguir una carrera más significativa en el trabajo con los jóvenes y adultos. Los profesores de matemáticas en todos los niveles escolares continúan siendo una carrera de alta demanda a nivel nacional y las personas procedentes de las carreras relacionadas con el comercio, la ingeniería, las finanzas y los militares son exitosos cuando relacionan la matemática con el mundo real que han trabajado por varios años.

Rutas para ingreso — primer curso de requisito

De acuerdo al trasfondo académico del estudiante en áreas de contenido matemático, el estudiante iniciará su grado de maestría con uno de los siguientes cursos. El director académico decidirá en cuál curso debe matricularse el estudiante.

- MAT 603 Arithmetic to Algebra: Developing Patterns and Ideas
- or MAT 607 College Algebra
- or MAT 613 Discrete Mathematics

Cursos siguientes 30 créditos

Todos los cursos se ofrecen en español

- MAT 605 Technology in Mathematics Learning & Teaching
- MAT 611 Calculus I
- MAT 631 Calculus II (preq. MAT611)
- MAT 604 Teaching Mathematics for the Secondary Level
- MAT 633 Probability & Statistics
- MAT 625 Number Theory (preq. MAT611)
- MAT 627 Abstract Algebra
- MAT 629 Non-Euclidean Geometry
- MAT 635 Applied Math (preq. MAT611 y MAT633)

Programa para recertification por el DEPR. Requiere poseer un certificado válido del DEPR como maestro en otra área.

Programa y cursos sujeto a cambios.

(Todos los cursos son de 3 créditos excepto aquellos marcados)

Autism Specialist (Puerto Rico)

• CIP code 131013 • 30-39* credits, 4-5 terms full-time

• **Program approved** by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

Teachers in general education and special education today are working with more and more students diagnosed with Autism Spectrum Disorders (ASD). This program answers the growing need for more understanding and better preparation for those working with students with severe disabilities.

Program Description — It is designed for experienced teachers and para-professionals, to enhance their working knowledge of the field. It also provides opportunities to explore new opportunities this knowledge would provide. **This is not a licensure program and does not lead to BACB certification.**

Learning Outcomes — Graduates will demonstrate knowledge and understanding of autism, behavioral issues and severe special needs.

Careers — This program will enhance the skills and understanding of:

- Experienced special educators, wanting more information to better serve the needs of this growing population.
- General educators who wish to work more effectively in their inclusion classes.
- Para-professionals currently working with students with severe disabilities, to gain a better understanding of the autistic needs and behavioral issues of the students they serve.
- Anyone wanting to know more about this growing field.

Program only for recertification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area required.

This program satisfies the licensure requirements for public and private schools (K-12).

Program and courses subject to change.

Program chair: Louise Andrews, Ph.D.
 • louise.andrews@go.cambridgecollege.edu

***Program credits:**
39 credits for those who do not have Special Education teacher certification from the DEPR and who desire recertification as Autism Teacher.
30 credits for those who have Special Education teacher certification from the DEPR, or who do not aim to be recertified.

All courses are offered in Spanish

Courses for Autism 30 credits

- ESP 610 Autism: History, Prevalence, Diagnosis & Characteristics
- ESP 695 Laws & Regulations Pertaining to Special Education
- ESP 621 Assessment & Appraisal Process (ASD)
- ESP 689 Theories of Typical & Atypical Human Development
- ESP 616 Communication Disorders (ASD)
- ESP 630 Social and Psychological Perspectives in Autism Spectrum Disorders
- ESP 635 Teaching & Curriculum Development for Students with Severe Disabilities
- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learning Styles
- ESP 625 Behavior Management (ASD)
- ESP 721R Teaching Spanish Language Arts, Math, History and Science for K-12 Special Education Students

Additional Courses for Special Education 9 credits

Only for those who aim to be recertified by the DEPR, who do not have a valid teacher certificate in special education.

- ESP 662R Principles of Spanish Language Development Bridging Differences & Disorders
- ESP 602 Teaching Numerical & Geometrical Structures for Special Education K-12 Students
- ESP 681 Pedagogy in Reading & Spanish Language Arts for Special Education Students

All courses 3 credits except as noted.

Especialista en Autismo (Puerto Rico)

- CIP code 131013 • 30-39* créditos, 4-5 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

Los maestros en educación general y educación especial hoy día están trabajando con más y más estudiantes diagnosticados con el Desorden del Espectro Autista (DEA). Este programa responde a la creciente necesidad de una mayor comprensión y una mejor preparación para los que trabajan con estudiantes con discapacidades severas.

Descripción del programa — Está diseñado para maestros y para-profesionales con experiencia, para mejorar su conocimiento de trabajo en el campo. También ofrece oportunidades para explorar nuevas oportunidades que este conocimiento podría proporcionar. **Este no es un programa que conduce a la certificación BACB.**

Resultados del aprendizaje — Los graduados demostrarán conocimiento y comprensión del autismo, problemas de comportamiento y las necesidades especiales severas.

Carreras — Este programa fortalecerá las habilidades y la comprensión de:

- Maestros de educación especial con experiencia, con ganas de más información para servir mejor a las necesidades de esta población en crecimiento.
- Educadores de educación general quienes desean trabajar más efectivamente en sus clases inclusivas.
- Para profesionales que actualmente trabajan con estudiantes o personas con discapacidades severas, para obtener una mejor comprensión de las necesidades de niños con autismo y problemas de comportamiento de los estudiantes que sirven.
- Cualquier otra persona que quiera conocer más acerca de esta área en crecimiento.

Programa solamente para recertificación por el DEPR. Requiere poseer un certificado válido del DEPR como maestro en otra área.

Este programa satisface los requisitos de licencia para escuela pública y privada del K-12.

Programa y cursos sujeto a cambios.

Program chair: Louise Andrews, Ph.D.
 • louise.andrews@go.cambridgecollege.edu

***Program credits: / Créditos de programa:**

39 créditos para aquellos que no tienen certificado de maestro en Educación Especial del DEPR y aspiran a recertificarse como maestros de autismo.

30 créditos para aquellos que poseen el certificado de maestro en Educación Especial del DEPR o no aspiran a recertificarse.

Todos los cursos se ofrecen en español

Cursos para Autismo..... 30 créditos

- ESP 610 Autism: History, Prevalence, Diagnosis & Characteristics
- ESP 695 Laws & Regulations Pertaining to Special Education
- ESP 621 Assessment & Appraisal Process (ASD)
- ESP 689 Theories of Typical & Atypical Human Development
- ESP 616 Communication Disorders (ASD)

- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learning Styles
- ESP 625 Behavior Management (ASD)
- ESP 721R Teaching Spanish Language Arts, Math, History and Science for K-12 Special Education Students

Cursos adicionales para Educación Especial 9 créditos

- Solamente para aquellos que aspiran recertificarse por el DEPR, que no posean certificado de maestro de Educación Especial
- ESP 662R Principles of Spanish Language Development Bridging Differences & Disorders
 - ESP 602 Teaching Numerical & Geometrical Structures for Special Education K-12 Students
 - ESP 681 Pedagogy in Reading & Spanish Language Arts for Special Education Students

(Todos los cursos son de 3 créditos excepto aquellos marcados)

Special Education (Puerto Rico)

- CIP code 131001 • 32 credits, 5 terms full-time
- **Program approved** by the Puerto Rico Board of Postsecondary Institutions and offered in compliance with the recertification regulations of the Puerto Rico Department of Education (DEPR).

The Teacher Education Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — The Special Education Teacher program prepares special education teachers and leaders to be caring and competent, with the essential and critical skills to understand how to develop and design different curricula. Graduates are prepared to become highly motivated teachers who are practitioners of educational innovation and meet the regulations for licensure of special education teachers for kindergarten through eighth grade students. Graduates are career-ready, technologically savvy, and culturally competent to advance social justice causes.

Learning Outcomes — Graduates demonstrate the necessary knowledge, skills, and values to enable their students to excel academically and socially. They understand how a moderate disability can affect progress in learning academic content in the general curriculum that their non-disabled peers learn. They understand their responsibility to provide strategies for their students to access the regular education curriculum.

Careers — Graduates are eligible to obtain the certificate to teach from pre-kindergarten through twelfth grade as full-time classroom teachers, consulting teachers, or resource room teachers.

Program for recertification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area required.

Program and courses subject to change.

Program chair: Louise Andrews, Ph.D.
 • louise.andrews@go.cambridgecollege.edu

Courses 32 credits

All courses are offered in Spanish

- ESP 594 Collab & Consultation Technq (2 credits)
- ESP 695 Laws & Regulations Pertaining to Special Education
- ESP 689 Theories of Typical & Atypical Human Development
- ESP 602 Teaching Numerical & Geometrical Structures for Special Education K-12 Students
- ESP 681 Pedagogy in Reading & Spanish Language Arts for Special Education Students
- ESP 662R Principles of Spanish Language Development Bridging Differences & Disorders
- ESP 512 Inclusion & Classroom Behavior Management
- ESP 607 Psycho-Educational Assessment for Teaching Exceptional Children
- ESP 615 Assistive Technology: Modifying Curriculum for Diverse Learners
- ESP 721R Teaching Spanish Language Arts, Math, History and Science for K-12 Special Education Students

All courses 3 credits except as noted.

Educación Especial (Puerto Rico)

- CIP code 131001 • 32 créditos, 5 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico y ofrecido en cumplimiento con las regulaciones de recertificación del DEPR.

El programa de educación de maestros de Cambridge College recibió acreditación TEAC por la Inquiry Brief Commission of the Council for the Accreditation of Educatio Preparation (CAEP) por un período de cinco años, desde mayo de 2014 hasta mayo de 2019, extendida hasta junio de 2021. La acreditación no incluye cursos de educación individual que el EPP ofrece a educadores para desarrollo profesional, volver a obtener la licencia, o para otros fines.

Descripción del programa — El programa de Maestro de Educación Especial prepara a maestros de educación especial y líderes para ser sensibles y competentes, con las destrezas esenciales y críticas para entender el uso de diversos diseños y desarrollo de currículos. Los graduados se preparan para convertirse en educadores altamente motivados que practiquen la innovación educativa y cumplan con las regulaciones para obtener la licencia de maestro de educación especial para estudiantes de Kinder a octavo grado. Graduados estarán preparados para ejercer una profesión, tecnológicamente adeptos y con competencias culturales para adelantar causas de justicia social.

Resultados del aprendizaje — Los graduados demuestran el conocimiento, las destrezas y los valores necesarios que permitan a sus estudiantes sobresalir académica y socialmente. Ellos entienden cómo una discapacidad moderada afecta el progreso en el aprendizaje del contenido académico del currículo general que aprenden sus pares sin discapacidad. Ellos entienden su responsabilidad de proveer estrategias para que sus estudiantes tengan acceso al currículo educativo regular.

Carreras — Los graduados son elegibles a obtener el certificado para enseñar desde pre-kínder hasta grado duodécimo como maestros, de salón a tiempo completo, maestro consultor o maestro de salón recurso.

Programa para recertification por el DEPR. Requiere poseer un certificado válido del DEPR como maestro en otra área.

Programa y cursos sujeto a cambios.

Educational Administration (Puerto Rico)

- CIP code 130401 • For certification by the DEPR: 32 credits, 5 terms full-time
- Without certification by the DEPR: 30 credits, 4 terms full-time
- Program approved by the Puerto Rico Board of Postsecondary Institutions

Program Description — The Educational Administration program reflects the current standards established by the Educational Leadership Constituent Council (ELCC), the Massachusetts Department of Elementary and Secondary Education (DESE) and the Department of Education of Puerto Rico. The program prepares aspiring and experienced leaders for schools, districts and other educational settings who have demonstrable skills in instructional leadership, management and operations, family and community engagement, and fostering of a professional culture. The ultimate goal is to create competent, caring, and qualified educators, based on the principles of the Council for the Accreditation of Education Program (CAEP). Certification components are aligned exclusively for licensure in the Commonwealth of Puerto Rico.

Learning Outcomes — Graduates will be able to: (a) demonstrate a realistic understanding of the expectations and responsibilities of workplace administrators, (b) promote student learning, and (c) support professional development and personal success by cultivating a shared vision that puts the teaching and learning process at the center of education. They will also work effectively, safely, and efficiently by using resources to implement the curriculum, and programming, hire staff, create partnerships with families, community organizations, and other interested parties to support the specific school, district, or other educational missions, and to encourage and maintain a culture of reflective practice, high expectations, and continuous learning for all involved.

Careers — Graduates will be qualified to obtain certification as an administrator, receive management- and policy-related duties in PK-12 public school contexts or other educational settings. In general, graduates become leaders for teachers, subdirectors, and directors or seek administrative positions in organizations and agencies specializing in education. Similarly, graduates without certification normally seek leadership positions in private institutions and charter schools, as well as positions where they provide workforce development through training of education policy.

Administrative licensure is required for part- or full-time employment as a director, department head, or curriculum specialist.

Program for certification by the Puerto Rico Department of Education. Prior valid Puerto Rico teacher certification in another area required.

Admission requirements:

- Bachelor's degree and other School of Education requirements for Education Leadership programs (see Admission)
- Valid Puerto Rico teacher certification if pursuing a PRDOE license.
- Three consecutive years of employment as a teacher if pursuing a PRDOE license.
- 3.0 GPA required to enter the program for certification; must be maintained throughout the program.

Program and courses subject to change.

Program chair: Stephen Maio, Ed.D.
 • stephen.maio@cambridgecollege.edu

M.Ed. — Certification

Program entry:

GPA 3.00 required to enroll in the program. For certification as a director or school facilitator, the DEPR's criteria include possessing a regular teaching license.

Practicum prerequisites:

- Provide evidence of academic certification.
- Pass all courses with a grade of "B" or higher.
- Document having completed all the practicum hours in the corresponding certification course areas.

Practicum

Once all the prerequisites have been successfully completed, licensure candidates in one of the certification areas for the M.Ed. in Educational Administration must complete a placement application to perform the Practicum and be approved by the Director. The candidate will be guided and assessed by a certified administrator practicing Educational Administration and a Cambridge College supervisor. The practicum includes documented evidence of practice, summary, and assessment of all the area-specific performance standards for certification:

EAD790G Practicum for School Director PK-12

Note: The DEPR offers licensure for K-12 Director with no subdivision by level. Courses are assigned, so students have an opportunity to practice at the level that meets their needs and interests.

Program completion

To complete the program, candidates must have completed all the program entry requirements, practicum prerequisites, and the practicum.

All candidates for certification in Puerto Rico must present an electronic portfolio to the seminar leader.

M.Ed. — Without Certification

If candidates do not want to obtain certification, they sign a document indicating that they understand that they will not be eligible to obtain certification after completing the degree. All program components are required even though certification by the Department of Education of Puerto Rico is not sought, except the practicum, which will be replaced by an elective course.

Continued

Educational Administration (Puerto Rico)

All courses are offered in Spanish

Term 1

- EAD 684 Selection, Development, & Supervision of Educational Personnel
- EAD 712 Curriculum Development, Assessment & Improvement for the School Administrator

Term 2

- EAD 690 Finance & Business Administration for the School Administrator
- EAD 688 Legal Aspects of School Administration
- MMG 525 Statistical Decision Techniques for Managers

Term 3

- EAD 662 Contemporary Issues & Topics in Educational Administration
- EAD 782 Organizational Change for School Leaders

Term 4

- EAD 600 Advanced Technologies in Education for Puerto Rico Administration
- ESP 695 Laws & Regulations Pertaining to Special Education

Only for non-certification:

- EED 623 Classroom Management Using Accelerated Learning

Practicum Prerequisites

- Pass applicable Puerto Rico teacher test, PCMAS, if not already passed at undergraduate level.
- Pass all courses.

Term 5

Practicum—Only for candidates seeking DEPR Director certificate:

- EAD 790**G** Practicum for School Director PK-12 (3 credits)
must be taken concurrently with EAD 694
- EAD 694 Professional Seminar IV (2 credits; includes a *paper of 15 pages or more on an action research issue related to practicum*)

All courses 3 credits except as noted.

Administración Educativa (Puerto Rico)

- CIP code 130401 • Para certificación del DEPR: 32 créditos, 5 términos a tiempo completo (aspirantes a certificado de director o facilitador escolar)
- Sin certificación del DEPR: 30 créditos, 4 términos a tiempo completo (aspirantes que no aspiran a certificado)
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico

Descripción del programa — El Programa en Administración Educativa refleja las normas vigentes establecidas por el Educational Leadership Constituent Council (ELCC), el Departamento de Educación Primario y Secundario de Massachusetts (DESE), y el Departamento de Educación de Puerto Rico. El programa prepara a líderes experimentados y aspirantes para los escenarios escolar, districtados, y otros que demuestran habilidades en liderazgo instruccional, gerencia y operaciones, familia y participación de la comunidad, y fomentando una cultura profesional. El objetivo final es crear educadores competentes, considerados y cualificados, basados en los principios del Consejo de Acreditación de Educación Docente (CAEP). Los componentes de la certificación están alineados exclusivamente para el Estado del Puerto Rico.

Resultados del aprendizaje — Los graduados podrán: (a) demostrar una comprensión realista de las expectativas y responsabilidades de los administradores en el lugar de trabajo, (b) fomentar el aprendizaje de los estudiantes y (c) apoyar el desarrollo profesional y éxito personal mediante el cultivo de una visión compartida que hace del proceso de enseñanza y aprendizaje el foco central de la educación. También trabajan de manera efectiva, segura y eficiente al utilizar recursos para implementar el currículo, personal y programación, establecer alianzas con las familias, organizaciones comunitarias y otras partes interesadas en apoyo de la misión específica a la escuela, distrito, u otra entidad educativa, y para nutrir y mantener una cultura de práctica reflexiva, altas expectativas y aprendizaje continuo para todos los involucrados.

Carreras — Los graduados cualificarían para obtener el certificado como administrador, recibir dirección y cargos relacionados con la política en contextos de escuela pública PK-12 u otra entidad educativa. Por lo general, los graduados se convierten en líderes de profesores, subdirectores y directores o aspiran a posiciones administrativas en organizaciones y agencias especializadas en educación. Del mismo modo, egresados sin certificación normalmente aspiran a posiciones de liderazgo en instituciones privadas y escuelas charter; así como a posiciones donde desarrollen la fuerza laboral mediante capacitación o política educativa.

Se requiere certificado administrativo para empleo parcial o tiempo completo como director, jefe de departamento o especialista en currículo.

Programa para certificación por el DEPR. Requiere poseer un certificado de maestro válido del DEPR en cualquier área.

Requisitos de admisión:

- Bachillerato y otros requisitos generales (ver documento de admisión).
- Licencia de maestro del DEPR si aspira a certificarse.
- Tres años de empleo consecutivo como maestro si aspira a certificarse.
- 3.0 GPA para entrar al programa con licencia; mantenido el mismo a lo largo del programa.

Este programa está sujeto a cambios.

Director de programa: Stephen Maio, Ed.D.

- stephen.maio@cambridgecollege.edu

M.Ed. — Certificación

Para entrar al programa:

Requisito de GPA de 3.00 son necesarios para matricularse en el programa. Para certificación como director o facilitador docente, el DEPR establece sus criterios, entre los cuales está poseer un certificado regular de maestro.

Requisitos previos a la Práctica

- Proveer evidencia de una certificación académica.
- Completar con éxito todos los cursos con una calificación de "B" o más.
- Documentar el haber completado todas las horas de práctica en los cursos correspondientes al área de certificación.

Práctica

Una vez todos los prerrequisitos se completan con éxito, los candidatos para obtener el certificado en una de las áreas de certificación para el M.Ed. en Administración Educativa deben completar una solicitud de ubicación para realizar la Práctica y ser aprobados por el Director. El mismo será guiado y evaluado por un administrador licenciado/certificado y con práctica en la Administración Educativa y un supervisor de Cambridge College, la realización de la práctica incluye evidencia documentada de la aplicación, síntesis y evaluación de todos los estándares de rendimiento específicos de un área de certificación:

EAD790G Practicum for School Director PK-12

Nota: El DEPR ofrece certificados para Director K-12, no subdivide por niveles. Los cursos se asignan para que el estudiante tenga la oportunidad de practicar en el nivel que satisfaga sus necesidades e intereses.

Cumplimiento con el programa

Para terminar el programa, los candidatos deben haber completado todos los requisitos de entrada al programa, requisitos previos de práctica y la práctica.

Todos los candidatos para la certificación en Puerto Rico deben presentar un portafolio electrónico al líder de seminario.

M.Ed. —Sin Certificación

Si no se desea obtener la certificación, los candidatos firman un documento indicando que entienden que no serán elegibles para obtener la misma al finalizar el grado. Todos los componentes del programa se requieren aunque no se aspire a obtener la certificación del Departamento de Educación de Puerto Rico; excepto la práctica, la cual se sustituiría por otro curso electivo dirigido a las necesidades de los líderes educativos contemporáneos.

Término 4

- EAD 600 Advanced Technologies in Education for Puerto Rico Administration
- ESP 695 Laws & Regulations Pertaining to Special Education

Solo para candidatos que no aspiran al certificado de Director del DEPR:

- EED 623 Classroom Management Using Accelerated Learning

Pre-requisitos de Práctica

- Haber aprobado las PCMAS (pruebas para la certificación de maestros), si no fue aprobada en el nivel subgraduado será necesaria para obtener su certificado de director o facilitador de parte del DEPR.
- Haber aprobado todos los cursos de esta concentración.

Término 5

Práctica (estudiantes aspirantes a la certificación únicamente)

- EAD 790G Practicum for School Director PK-12 (3 créditos; *debe ser tomado concurrentemente con EAD 694*)
- EAD 694 Professional Seminar IV (2 créditos; *incluye un escrito de un mínimo de 15 páginas referente a una investigación en acción íntimamente ligada a la práctica*)

(Todos los cursos son de 3 créditos excepto aquellos marcados)

Education Course Descriptions

Not all courses are offered every term or at every Cambridge College location. See online course schedules each term on the MyCC web portal.

Autism . . . See Special Education (ESP).

Applied Behavior Analysis (ABA)

ABA 702 Field Experience Internship and Seminar: Autism Specialist Endorsement - 3 credits

This is a supervised 150-hour field-based experience, 75 hours of which will be completed in a Massachusetts public school, approved private special education school, or educational collaborative. An additional 75 hours will be completed in any school setting working with students with autism. Candidates will also be observed, mentored and assessed during practicum. Seminar includes opportunities to share best practices and learn effective transitions systems, strategies, and supports that produce quality programming/services. Prerequisite: All other requirements and courses in the program must be successfully completed and the practicum setting must be approved.

ABA 705 Transition Leadership and Effective Collaboration - 3 credits

This course focuses on the development of effective leadership and collaborative skills to support developing and delivering high-quality transition programs and services to transition-aged youth: Leadership skills supporting effective facilitation and across settings; effective collaboration and consultation skills; the IEP process and identification, development and delivery of transition services; partnerships with employers, institutes of higher education, public/community service agencies, and other stakeholders. Prerequisites: Students must have an Initial or Professional license and at least two years experience as a Teacher of: Students with Moderate (or Severe) Disabilities, Visually Impaired, Deaf and Hard of Hearing, or a counselor in School Guidance, School Social Worker/Adjustment, Rehabilitation, or certification as a Rehab Counselor.

ABA 710 Transition Assessment and Post-Secondary Goals - 3 credits

This course focuses on the use of age and disability appropriate transition assessment, the Transition Planning Form, and development of measurable post-secondary goals and IEP objectives to inform transition services and supports. Participants will assess student interest, strengths, preferences, and needs relating to transition and will explore individualized and customized transition assessments supporting age-appropriate, measurable goals for educational, employment, independent living needs, and social, communication and functional skills. Prerequisites: Students must have an Initial or Professional license and at least two years experience as a Teacher of: Students with Moderate (or Severe) Disabilities, Visually Impaired, Deaf and Hard of Hearing, or a counselor in School Guidance, School Social Worker/Adjustment, Rehabilitation, or certification as a Rehab Counselor.

ABA 712 Effective Transition: Systems and Supports - 3 credits

This course provides an overview of effective transition systems, supports, and structures that identify, coordinate and deliver quality services to support transition-aged youth to develop effective skills to support post-secondary success. Topics include the identification,

development and delivery of high-quality transition programming for the unique characteristics of transition-aged youth. Also discussed are evidence-based transition strategies, methods of delivery, resources, materials and curricula that promote self-awareness, self-determination and self-advocacy. Prerequisites: Students must have an Initial or Professional license and at least two years experience as a Teacher of: Students with Moderate (or Severe) Disabilities, Visually Impaired, Deaf and Hard of Hearing, or a counselor in School Guidance, School Social Worker/Adjustment, Rehabilitation, or certification as a Rehab Counselor.

ABA 715A Basic Applied Behavior Analysis I - 4 credits

The course introduces the science of behavior analysis, and the basic concepts and principles of behavior analysis (e.g., reinforcement, punishment). It includes the philosophical underpinnings of the science of behavior analysis including goals, philosophical assumptions, dimensions of applied behavior analysis, radical behaviorism, experimental analysis of behavior, and professional practice. This course is a prerequisite for all other ABA courses in the sequence. The course will provide credit hours towards eligibility for the behavior analysis certification examination.

ABA 715B Basic Applied Behavior Analysis II - 4 credits

ABA 716 Behavior Assessment - 3 credits

This course reviews basic concepts and principles of applied behavior analysis (ABA), building upon knowledge learned in Basic ABA I. An emphasis will be placed on the application of concepts and principles to real-world situations.

ABA 718 Research Methods - 3 credits

This course focuses on single-subject experimental designs and human behavior. The students will learn about the characteristics of science and the rationale for having behavior as a focus. The student will be exposed to different issues related to measurement, specific research designs, and important issues, such as variability, associated with the designs. How to accurately interpret research data from a variety of research experiments will also be discussed. The student will also learn about the ethical standards and guidelines that professionals in the field of applied behavior analysis must follow when working with humans. This course provides credit hours toward education qualifications required to sit for the behavior analysis certification exam.

ABA 719 Behavioral Interventions - 3 credits

ABA 720 Field Experience Internship and Seminar: Transition Specialist Endorsement - 3 credits

This is a supervised 150-hour field-based experience of 100 hours to be completed in a Massachusetts public school, approved private special education school, or educational collaborative and 50 hours in a community-based setting working with transition-age youth with the goal of assisting them to transition from school to adult life. Candidates will also be observed, mentored and assessed during practicum. Seminar includes opportunities to share best practices and issues. Prerequisite: All other requirements and courses in the program must be successfully completed and the practicum setting must be approved.

ABA 721 ABA Fluency Seminar - 1 credit

This one-credit course is designed to strengthen students' ability to demonstrate key core knowledge competencies in the field of applied behavior analysis. During the course of the term, students will engage in a number of fluency based instructional activities that will enable them to demonstrate knowledge in all of the BCBA task list content areas. Students will be required to practice these skills both during class sessions and via software specifically designed to support fluency training and competence demonstration. Students must demonstrate proficiency in each of the task list content areas in order to successfully pass this course.

ABA 722 Supervision and Management in Applied Behavior Analysis - 3 credits

This course helps prepare students for management and supervisory positions within the field of applied behavior analysis. The course provides students with behavior analytics strategies for managing, supervising, and training personnel. The use of a functional assessment approach and function-based strategies, along with performance monitoring and feedback, will be reviewed. This course also includes a review of several behavior-change procedures. This course is based on the BACB®'s Task List (Fifth Edition).

ABA 725 Introduction: Foundations & Laws Pertaining to Transition - 3 credits

This introductory course will provide the historical and legislative background of the development of laws and regulations pertaining to transition. Participants will learn about state and federal transition laws and policies and review past and current legislation and the impact that it has on supports and services for transition-aged youth. In addition, participants will explore current topics in special education related to transition planning and services as well as key terminology, transition resources and supports, career readiness, post-secondary options, and models of effective transition.

ABA 726 Ethics in Applied Behavior Analysis - 3 credits

This course prepares students for the ethical and professional practice of Applied Behavior Analysis. Students will learn the importance of ethical conduct as it relates to the professional practice of tasks identified in the Fifth Edition Task List. Students will learn about the foundations of ethical and professional behavior to endure a high quality of practice in both behavior analysis and education in general. The Behavior Analyst Certification Board (BACB) Professional and Ethical Code for Behavior Analysts will be reviewed and discussed in detail. This course provides credit hours towards eligibility for the behavior analysis certification examination.

Education: Across Programs (EDU)

EDU 558 Introduction to Graduate School - 1 credit

This course will assist the new student in planning and developing a graduate study program that is appropriate to the student's academic and professional needs. When students are accepted into the program, they should enroll immediately only in this course and work with an advisor to schedule additional courses. In addition, this course will offer opportunities for more direct advising, introduction to College protocols such as TaskStream and other opportunities for academic success.

EDU 704 Practicum Readiness - 1 credit

This course is specifically designed to determine readiness for the practicum. It will assist teacher candidates to develop their skills to be ready to assume the role of student teacher from the first day of practicum. Students will understand the requirements of CAP by engaging in and completing the forms for each of the "essentials" and completing their own goals. All of the TaskStream components, other than the practicum documents, will be completed. MTEs will be completed. Those having difficulty with the MTEs will be directed for support. Field work assignments will be required.

Educational Leadership (EAD)

(School Administration)**EAD 600 Advanced Technologies in Education for Puerto Rico Administration - 3 credits**

This course introduces students to actual and potential ways in which technology is used in school through a combination of practice-based theory and hands-on technology applications. Students will learn to evaluate the technology needs of their school or work organization, to plan for those needs, and to evaluate the success of technology programs. From a theoretical perspective, it focuses on using new technologies to serve various pedagogical philosophies and the impact of new technologies on instructional design, teaching and school reform.

EAD 662 Contemporary Issues and Topics in Educational Administration - 3 credits

Effective educational administrators actively pursue further study in their field. By so doing, the administrator strives to acquire a knowledge base which will help deal with contemporary issues that will affect students, staff, community and the organization of the school. This course, therefore, features research and in-depth discussion of topics of immediate concern to the educational administrator. The topics may include, but will not necessarily be limited to strategic planning, organizational change, effective staff development, team building, outcomes based learning, the use of data for decision making, interpersonal skills necessary for site-based management, teacher evaluation, issues of equity, and community relationships. Practicum hours of directed field-based training required.

EAD 684 Selection, Development, and Supervision of Educational Personnel - 3 credits

This course alerts students to the wide range of activities covered by the term "personnel management" and presents the best of current practices in the field. Students are prepared to select, develop and supervise teachers and other staff effectively. The school is presented as a learning organization - a place where all are supported in continuous growth and describes the administrator's role in creating that culture. Formative and summative techniques for feedback about performance are emphasized. The course also includes the topics of the legal and ethical aspects of evaluation, hiring and dismissal. The importance of the administrator's role as an instructional leader is emphasized. Practicum hours of directed field-based training required.

EAD 688 Legal Aspects of School Administration - 3 credits

This course explores the legal principles which apply to current educational practice. It specifically deals with issues of students' rights and teachers' rights which impact and influence the operation of schools and the related tension created by multiple structures. Laws/ regulations and court decisions related to free speech, equal rights, and school discipline are studied. In addition, laws and policies dealing with IDEA (special education) and Every Student Succeeds Act (ESSA) are examined in depth. Practicum hours of directed field-based training required.

EAD 690 Finance and Business Administration for the School Administrator - 3 credits

This course prepares educators to understand and effectively manage the fiscal aspects of a school or school district. The work focuses on school finance as a matter of public policy and law, the different sources of school financing, and the funding mechanism at various levels of government. Proposition 2 1/2, the Massachusetts foundation budget process, financing procedures in other states, and the financing of charter, choice and voucher programs are examined. In addition, educators study school budgets, the role of the school's community in developing and establishing the budget, and different approaches to the budgeting process. Finally, educators address the issues of plant management, custodial care, building maintenance, preventive maintenance, scheduling, energy management, collective bargaining and purchasing of materials for plant management. Practicum hours of directed field-based training required.

EAD 692 Professional Seminar II: Educational Leadership - 2 credits

Prerequisite: EAD691. The second seminar emphasizes the development and functioning of organizations and the study of organizational behavior. Attention is paid to the leader's role in culture and climate. Students examine the culture and climate of their own work setting within frameworks reviewed in the seminar. Key concepts in finance and business administration relevant to school and district leaders will be introduced. Students are expected to identify a research topic and complete a proposal for the ILP or action research paper. Pre-practicum/Practicum hours of directed field-based training required.

EAD 693 Professional Seminar III: Educational Leadership - 2 credits

Prerequisite: EAD692. The third seminar emphasizes the study of introducing and supporting change efforts in schools. Topics include responding to the need for change, managing change, dealing with varying attitudes toward change and, finally, institutionalizing change. Supporting topics include the use of vision, goal setting, identifying priorities, allocating resources and collecting data on learning. Students should develop the initial draft of their ILP or action research paper this term. Those students completing a practicum this term will present for discussion issues and questions that arise during their field experience. Practicum hours of directed field-based training required.

EAD 694 Professional Seminar IV: Educational Leadership - 2 credits

Prerequisite: EAD693. The final seminar emphasizes linking practice and theory. Particular attention is paid to processing the issues and questions that arise during the practicum experience. Interpersonal aspects of leadership are revisited in the context of the field experience. Students discuss issues connected with obtaining a leadership position including resumes, the interview process and contracts. The ILP or action research paper is completed and presented to the members of the seminar, providing a basis for the discussion of the relationship of action research to the reality of school reform. Practicum hours of directed field-based training required.

EAD 712 Curriculum Development, Assessment & Improvement for the School Administrator - 3 credits

Pre-practicum: Fifteen hours of directed field-based training is required. Development, assessment and improvement of curriculum to engage students in the learning process and prepare them to be active contributors in the information age is a challenge for school administrators nationwide. This course familiarizes students with proven practical techniques, methods and strategies for developing, implementing and evaluating curriculum. Current theories, research and practices related to effective teaching, curriculum designs and frameworks, and national state standards are explored. Internet resources and research sites are examined to aid students in understanding the complexities of curriculum development. Students also address different learning styles, cultural awareness, ethnic minorities, equity issues, and the use of community resources while designing and evaluating curriculum. Practicum hours of directed field-based training required.

EAD 720 Advanced Systems Theory - 3 credits

It is essential that educational administrators in the central office understand systems theory and the dynamics of complex social entities such as schools and school systems. With knowledge of the system and subsystems that make up the total school organization, a school leader will be able to understand better the impact that decisions have on the entire school organization and therefore manage change more effectively. This course is required of all candidates for the license of Superintendent and Assistant Superintendent. Practicum hours of directed field-based training required.

EAD 721 Supervision, Induction & Coaching of New Teachers - 3 credits

This course is designed to build capacity among teacher leaders in the implementation of performance assessment systems tailored for the improved enhancement of teacher practice reflective of state regulatory requirements. The course is structured to support effective supervision and coaching of new teachers specific to professional practice in Pk-12 settings. Included are techniques designed to facilitate improved student learning and retention of school personnel.

EAD 782 Organizational Change for School Leaders - 3 credits

This course emphasizes organizational theory and the varied forces shaping learning environments in P-12 schools, including the myriad contexts influencing the shifting roles and expectations of school leaders in responding to change at multiple levels. Also explored is the intentionality and collaboration required at the building, district, and community level to manifest constructive change supportive of teaching and learning and the use of data in designing, analyzing, reporting, and monitoring effective change initiatives.

EAD 790A Practicum (Supt/Asst Supt) (All Levels) 300 hours - 5 credits

Superintendent License, all levels, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL). Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field-based training for students pursuing licensure as district superintendents/ assistant superintendents. Students work with the guidance and support of experienced school administrators and observe their administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions and provides opportunity to share ILP experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 790E Practicum (Supervisor/Director) at level of prerequisite license - 5 credits

Director License, all levels, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility and some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field based training for students pursuing licensure as supervisor/director. Students work with the guidance and support of experienced school administrators and observe their administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions; and provides opportunity to share action research paper experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

Puerto Rico only

EAD 790G Practicum for School Director PK-12 - 3 credits

This course includes 150 hours of documented field-based experience specific to the application of professional practice as school directors and supervisors in PK-12 settings. The Practicum is required for the level of license sought and guided by a College supervisor and cooperating practitioner certified in the area. The Practicum must be taken simultaneously with EAD694 Professional Seminar IV and include reflection on professional growth and the application of theory in practice.

EAD 790H Practicum: Principal/Asst Principal (Pre K-8) 500 hours Completion - 5 credits

Principal License, levels PreK-8, 500 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL). Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2014: 500 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 500 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 500 should be logged during vacation periods. This practicum experience provides field based training for students pursuing licensure for principal/assistant principal (PreK-8). Students work with the guidance and support of experienced school administrators and observe their administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions; and provides opportunity to share action research paper experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 790J Practicum: Principal/Asst Principal (5-12) 500 hours Completion - 5 credits

Principal License, levels 5-12, 500 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL). Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2014: 500 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 500 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 500 should be logged during vacation periods. This practicum experience provides field

based training for students pursuing licensure for principal/assistant principal (5-12). Students work with the guidance and support of experienced school administrators and observe their administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions; and provides opportunity to share action research paper experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 800 Independent Learning Project: Educational Leadership - 3 credits

Prerequisites: EAD691-693. The Independent Learning Project (ILP) is a culminating learning experience required only for non-licensure students, that helps educational leaders integrate their personal and formal learning and their professional experiences into a meaningful whole and articulates the individual's educational and administrative philosophy. The project is research and action based on a focused topic chosen by the student within the area of intended practice. It engages students in sustained research into educational leadership.

Early Childhood Teacher (ECE)

ECE 600 Development of Young Children - 3 credits

An introduction to the child, from birth to age eight, as a learner with needs to explore and communicate, as well as to develop social-emotional competencies. Explanation of current themes/theories of child development is provided with special emphasis on understanding children's developmental levels through childhood. Topics covered include: conception, heredity and prenatal development, infant development, the child in the family, toddlerhood and early childhood. The impact of developmental theories on the education of children with disabilities is examined. Formulation of a developmentally appropriate Individual Educational Plan is required. Observation in a childcare center or preschool setting is a requirement of this course.

ECE 612 Developmental Reading for Early Childhood Birth to Eight - 3 credits

This course emphasizes the development of children's reading and writing skills from pre-kindergarten to grade two and the learning environment that supports the development of such skills. Candidates examine relationships between the theories and current research on emergent literacy, oral language, vocabulary development, comprehension, the reading and writing processes and assessment will be reviewed and analyzed by the members of this course. In addition, participants will review and discuss the following topics: balanced literacy, effective teaching strategies, use of research-based programs, Sheltered English Immersion, literature-based instruction, use of different assessment tools to inform instruction, standards-based instruction, the Common Core, fiction, and non-fiction genres and differentiated instruction.

ECE 692 Professional Seminar II: Early Childhood - 2 credits

In this second professional seminar students continue their study of the areas of instructional performance to be demonstrated by all teacher candidates seeking license to teach in our public schools and the knowledge and skills requirements specific to the field and level of licensure. Research-based instructional practices that correlate with student learning gains across the content areas are examined. Instructional practices specific to their chosen discipline of study are also examined. An in-class lesson implementation is required. Students gather data related to the Independent Learning Project (ILP). A subscription to TaskStream is required.

ECE 693 Professional Seminar III: Early Childhood - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in early childhood education. This seminar explores ways to create a standards-based, inclusive early childhood setting. The seminar explores multicultural education, inclusive teaching, assessment strategies, management techniques and parent-community relationships. There is a continuation of planning teaching strategies for language arts, math, and science and classroom management. The cohort continues to study the professional standards, subject matter knowledge for early childhood teachers, and the requirements for state licensure. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ECE 791 Practicum Seminar: Early Childhood - 2 credits

Practicum required concurrently. The seminar, based on the Professional Standards for Teachers in Massachusetts, provides opportunities for classroom experience and supports students' growth as they assume the teaching role. Candidates receive feedback on lesson plans, and develop instructional practice by analyzing case studies, engaging in role play and viewing of instructor-selected video tapes that depict examples of practice. Candidates upload required key assessments into an Exit Portfolio in TaskStream.

ECE 794 Practicum: Early Childhood PK-2 - 2 credits

A 14-week supervised field experience of a minimum of 300 hours in which candidates demonstrate proficiency in meeting the Professional Standards for Teachers. The practicum must meet the hours and setting requirements for the license sought, under the guidance of a supervising practitioner with the appropriate license, with Cambridge College supervision. Assessment follows the Candidate Assessment of Performance (CAP) and assesses ability with respect to: well-structured lessons, high expectations, meeting diverse needs, adjustment to practice, safe learning environment, professional culture/reflective practice, as well as formative assessment, differentiation and providing academic feedback. Artifacts are uploaded into an Exit Portfolio. An Application to Practicum is required.

ECE 800 Independent Learning Project: Early Childhood - 3 credits

The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning with their professional experiences into a meaningful whole. It reflects the general guidelines for early childhood educators and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development in early childhood education.

Elementary Education (ELE)

ELE 500 Teaching Phonological and Phonemic Awareness and Phonics - 0 credit

This course is a prerequisite for ELE521. This course will emphasize the development of children's phonemic awareness, phonological awareness and phonics skills and the learning environment that supports the development of such skills. It will also cover concepts of print, explicit/implicit instruction, analytic/synthetic methods, word analysis skills, the alphabetic principle, and language development.

ELE 510 Developmental Psychology - 3 credits

This course explores basic theories and concepts in cognitive, social, emotional, and physical development from childhood to adolescence; and the characteristics and instructional implications of moderately and severely disabling conditions. These theories are then applied to instruction, with emphasis on Piaget's theory of cognitive development. Students explore multiple theories of intelligence and learning, and strategies for a curriculum reflecting the diverse intellectual needs of children as learners. The stages and characteristics of child development are introduced and students apply this knowledge to the classroom through the use of integrated curriculum. Participants investigate methods of systematic observations and recording of child behavior in light of child development theories, and utilize this information in their planning and implementation of instruction. Formulation of a developmentally appropriate Individual Educational Plan is required. Pre-practicum hours of directed field-based training required.

ELE 521 Development of Reading & Writing Skills for the Early Childhood & Elementary Curr. - 3 credits

Prerequisite: ELE500. This course emphasizes the development of children's reading and writing skills in the primary to upper elementary grades and the learning environment that supports the development of such skills. The relationships between the theories and current research on emergent literacy, oral language, vocabulary development, comprehension, the reading and writing process and assessment will be reviewed and analyzed by the members of this course. In addition, participants will review and discuss the following topics: scientifically-based reading instruction, whole language, balanced literacy, effective teaching strategies, use of research-based programs, literature-based instruction, use of different assessment tools to inform instruction, standard-based instruction, federal funding, culture and democracy. Candidates implement well-structured lessons that reflect knowledge of the essential elements of scientifically-based reading instruction, formative assessment, differentiated instruction, cooperative learning, and the role of academic feedback, and questioning to support higher-order thinking. Pre-practicum hours of directed field-based training required.

Puerto Rico only

ELE 522 Teaching Reading and Writing Skills for Elementary Grades 4-6

This course will emphasize the development of children's reading and writing skills in upper elementary grades and the learning environment that supports the development of such skills. The course reviews and analyzes relationships between theories and current research on emergent literacy, oral language, vocabulary development, comprehension, the reading and writing process, and assessment. Participants review and discuss whole language, balanced literacy, effective teaching strategies, use of research-based literacy programs, literature-based instruction, use of different assessment tools to inform instruction, standards-based instruction, federal funding, culture, and democracy.

ELE 593 Integration of Visual Arts for the Early Childhood & Elementary Curr. - 1 credit

The Arts enable teachers to better engage their students while also addressing student's different learning styles and allowing student creativity to flourish. This course will give participants an introduction to using the visual arts as a vehicle for learning in the classroom. Teachers will learn ways to use the arts and art materials as a pathway toward gaining knowledge and using higher order thinking skills. Presentation of material will be part reading, part lecture and part hands on participation and exploration. Students will leave the course with a deeper understanding of art materials, art language and how to use visual arts in the early childhood and elementary classroom that includes special needs and ESL students.

ELE 594 Integrating Physical Ed. in Early Childhood & Elementary Education - 1 credit

This course reflects current thinking and practices in physical education for the classroom teacher. Emphasis is on the importance of quality physical education programs and to raise awareness of teachers combining their expertise and content to integrate with other disciplines.

Puerto Rico only

ELE 600 Alternative Assessment: Theory and Practice - 3 credits

This course explores alternative assessment. It answers the questions regarding what assessment is, what it does and what it measures. Assessment types and strategies are studied along with multiple assessment uses. Students gain a thorough understanding of portfolio techniques, open ended questions and the design, use, and evaluation of performance tasks. They explore assessment procedures such as exhibition, interview, journals, observation, peer assessment, and self-evaluation. Students are encouraged to use with confidence alternative assessment strategies in the classroom as an integral component of the curriculum-instruction-assessment link.

ELE 620 Integration of Children's Lit. in Early Childhood & Elementary Curr. - 3 credits

This course introduces some of the best literature—children's, young adult, adult and contemporary—and helps children become lifelong learners and readers. Students gain knowledge of the Massachusetts English Language Arts Curriculum Frameworks/Common Core Standards. Many genres of literature are explored, along with basic literacy elements and techniques including the necessary basics of the English language with emphasis on correct grammar, usage and composition. Lesson plans and models for teaching literature are presented. Candidates implement well-structured lessons that reflect knowledge of the essential elements of scientifically-based reading instruction, formative assessment, differentiated instruction, cooperative learning, and the role of academic feedback, and questioning to support higher-order thinking. Pre-practicum hours of directed field-based training required.

Puerto Rico only

ELE 621 Integration of Children's Literature for Elementary Grades 4-6 Curriculum - 3 credits

The goal of this course is to introduce participants to some of the best literature—children's, young adult, adult and contemporary, and as a result, help children become lifelong learners and readers. Participants acquire knowledge about Puerto Rico's Spanish language arts curriculum framework. They examine the standards and how they relate to reading instruction in the classroom. They look at many genres of literature including fiction, non-fiction, historical fiction, poetry, fairy tales, tall tales, multicultural selections, and current favorite authors. Participants will practice integrating literature into other disciplines, including math, science, social studies, and the fine arts. Participants apply the Puerto Rico required professional standards in planning, teaching, and assessing units of instruction in language arts.

ELE 630 Classroom Management with Models of Teaching - 3 credits

In this course students learn the basic components of an effective inclusionary program. Participants learn strategies and techniques to fully include all students into the regular classroom. Students observe, analyze, and discuss a variety of teaching models including information processing, group investigation, social inquiry, inductive models, non-directive teaching models and problem-solving. Emphasis is on interpersonal relations, arrangement of space, management of time, working with individual students, small group and large group structures and working with content and process. The Massachusetts Frameworks and teacher licensure competencies are taught to fully support teacher/student learning and instruction techniques. Course assignments including lesson plans connect theories to classroom practice. Pre-practicum hours of directed field-based training required.

ELE 653 Teaching Science & Technology in Early Childhood & Elementary Curr. - 3 credits

This course provides the knowledge, tools and methods for making early childhood and elementary science an exciting, hands-on learning experience for children. Educators learn how to develop lessons that address student experimentation and design techniques using readily available materials. Safe laboratory practices for the classroom are also addressed. A standards-based approach to science education is our template for lesson development, covering the major domains in science: life, physical, earth, inquiry-applied and engineering technology; and historical scientific discoveries in each area. Alignment of curriculum is emphasized; national benchmark standards in elementary science are also supported. Analysis of elementary summative science assessments, based on the National Science Standards is incorporated in the coursework. Pre-practicum hours of directed field-based training required.

Puerto Rico only

ELE 654 Teaching Science & Technology 4-6 - 3 credits

Each student will learn a variety of methods for making elementary science a "hands-on" learning experience for their students. The primary objective of the course will be to provide each participant with the knowledge, tools and desire to make science an exciting learning experience. Special emphasis will be placed on alignment of curriculum with the Puerto Rico Frameworks in Science and Technology. Students will also learn how to develop lesson plans that address student experimentation and design techniques. A standards-based approach to science education will serve as the template for the students' lesson development. Examples of open-response questions used on the Puerto Rico state test at grade five will be examined.

ELE 656 Teaching Soc. Sci. Hist. & Multicul. Early Childhood & Elementary Curr. - 3 credits

This course prepares candidates to teach social studies that includes the multicultural contributions of the world. They gain a basis for researching issues in social studies and history that give their students more universal perspectives. The materials chosen are appropriate to the Massachusetts Curriculum Frameworks/Common Core Standards in history and social studies. Educators will gain the basic information and know the principles for teaching social sciences, history and geography as outlined in the Massachusetts regulations for educator licensure. Candidates produce and implement well-structured lessons that center of core disciplinary ideas in the K-12 social studies curriculum, utilize primary source materials, and reflect knowledge of formative assessment, differentiated instruction, cooperative learning, and the role of academic feedback, and questioning to support higher-order thinking. Pre-practicum hours of directed field-based training required.

Puerto Rico only

ELE 657 Teaching Social Sciences, History & Multicultural Elementary Curriculum 4-6 - 3 credits

This course prepares educators to teach social studies that includes the multicultural contributions of the world. They gain skills and varied methods for teaching basic information in social studies, history and geography. They gain a basis for researching issues in social studies and history that give their students more universal perspectives. The materials chosen are appropriate to the Puerto Rico Department of Education Curriculum Frameworks/Common core Standards in history and social studies. Educators will gain the basic information and know the principles for teaching social sciences, history and geography in Puerto Rico for grades 4-6.

ELE 692 Professional Seminar II: Elementary Education (Initial) - 2 credits

In this second professional seminar students continue their study of the areas of instructional performance to be demonstrated by all teacher candidates seeking license to teach in our public schools and the knowledge and skills requirements specific to the field and level of licensure. Research-based instructional practices that correlate with student learning gains across the content areas are examined. Instructional practices specific to their chosen discipline of study are also examined. An in-class lesson implementation is required. Students gather data related to the Independent Learning Project (ILP). A subscription to TaskStream is required.

ELE 693 Professional Seminar III: Elementary Education (Initial) - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar explores ways to create a standards-based curriculum, education evaluation in an inclusive classroom setting. The seminar explores multicultural education, inclusive teaching, assessment strategies, management techniques and parent-community relationships. There is a continuation of planning teaching strategies for language arts, working with math manipulatives, and effective classroom instruction. The seminar leader is the students' academic advisor and guides them through their graduate program. The cohort continues to study the professional standards and subject matter knowledge for elementary teachers and the requirements for state licensure. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished project.

ELE 791 Practicum Seminar: Elementary Education - 2 credits

Practicum required concurrently. The seminar, based on the Professional Standards for Teachers in Massachusetts provides opportunities for classroom experience and supports students' growth as they assume the teaching role. Candidates receive feedback on lesson plans, and develop instructional practice by analyzing case studies, engaging in role play and viewing of instructor-selected video tapes that depict examples of practice. Candidates upload required key assessments into an Exit Portfolio in Task Stream.

ELE 794 Practicum: Elementary Teacher (1-6) - 2 credits

A 14-week supervised field experience of a minimum of 300 hours in which candidates demonstrate proficiency in meeting the Professional Standards for Teachers. The practicum must meet the hours and setting requirements for the license sought, under the guidance of a supervising practitioner with the appropriate license, with Cambridge College supervision. Assessment follows the Candidate Assessment of Performance (CAP) and assesses ability with respect to: well-structured lessons, high expectations, meeting diverse needs, adjustment to practice, safe learning environment, professional culture/reflective practice, as well as formative assessment, differentiation and providing academic feedback. Artifacts are uploaded into an Exit Portfolio. An Application to Practicum is required.

ELE 800 Independent Learning Project: Elementary Education - 3 credits

The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for elementary educators and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development in elementary education.

Education Online (EOL)

EOL 500 Online Learning in the PK-12 Classroom - 3 credits

This course is designed to help teachers and school leaders develop and implement meaningful lessons and units in online and blended environments. Topics include the use of PK-12 learning management platforms, remote cooperative learning, differentiating instruction online, effective use of online meeting technologies, keeping students engaged in learning, making online learning hands on, project based learning online, engaging students through their preferred learning styles, differentiation of instruction in the online environment and effective communication strategies between the school and students' families.

EOL 501 Serving Students with Disabilities in the Online Classroom - 3 credits

Federal law mandates that students with disabilities receive educational services as outlined in their Individualized Education Plans (IEPs). This course focuses on providing the services students are entitled to when they are unable to attend school due to a community wide crisis and must attend school via distance learning. Students will explore the various web based technologies to enhance communication, examine ways to differentiate instruction in an online course, engage with web based assistive technologies and successfully communicate with students and their families. The course is based in the best practices as outlined by the Council for Exceptional Children.

Empathy (EMP)

EMP 600 Reframing Our Stories: Empathy and the Underground Railroad - 3 credits

The impact of slavery, disenfranchisement, and systematic oppression of minorities still impacts American culture and politics. Learners in this course will gain an understanding of the Underground Railroad freedom movement and apply the pedagogies of empathy to navigate through the emotional complexities of race, politics, culture, and engagement.

EMP 601 Underground Railroad: From Bondage to Abolition - 3 credits

This course analyzes the creation of African-American culture in North America, the establishment of race-based slavery throughout the North American/Colonies, the realities of slave life, African-American resistance to slavery and the experience of free blacks in both the North and South.

EMP 602 Unraveling Our History: Grappling with Race and Culture in America - 3 credits

From chattel slavery to Black Lives Matter, political and cultural ruptures in American history necessarily deal with difference and dissonance. Students in this course will analyze and examine how racism and the immigrant experience led to oppression in the United States.

EMP 603 From Oppression to Social Change - 3 credits

Wherever there are groups oppressing others, there are leaders who resist and work for change. Students in this course will examine social identity development, privilege, power and activism. Through the use of storytelling exercises, we will identify and examine social justice in our personal and professional lives, and envision how we can practice education in a way that values and affirms each person's experiences and creates an environment of change.

EMP 604 Footsteps to Freedom: Underground Railroad Field Study - 4 credits

In the culminating summer course, four participants learn firsthand about the incredible courage of the people who sought freedom or who helped others achieve it along the route of the Underground Railroad. Students will learn firsthand the steps that enslaved Americans traveled to gain their freedom and experience actual locations along the route to better understand what enslaved Africans underwent for freedom in this country.

English as a Second Language (ESL)

ESL 500 Introduction to Education for English Learners - 1 credit

This course provides the new student with an initial introduction to the academic, linguistic, and cultural world of English learners. Building on the student's prior knowledge, this course will enable the student to read, observe and interact with English learners in academic settings, analyze what they see, and discuss issues that provide a foundation for understanding the academic and pedagogy content of future courses.

Puerto Rico only

ESL 600 Teaching Adolescent Literature to ESL Students

Course will focus on developing ESL teachers' knowledge of quality literature available for adolescents. Teachers will read various literary genres (essays, short stories, poetry, novels) to analyze and evaluate their content to be able to select those which will best adapt to their ESL students. Course promotes literature to motivate reading and writing about topics related to students' lives, culture and social issues. Strategies to improve students' reading comprehension and analytical skills will be studied.

ESL 610 Linguistics and Language Variations - 3 credits

Participants are introduced to language and linguistics (system, functions, registers, variation, change). They consider language structure (phonology, morphology, syntax, semantics, pragmatics, discourse, social/academic language, registers, writing conventions). They discuss language acquisition and literacy: significant theories/practices for English first-language reading skills and comprehension at different grade levels, and the relevance of linguistic differences between first and second language for reading instruction in English. They understand socio-cultural and socio-emotional considerations in teaching ESL: regional, socioeconomic, and developmental factors influencing language variation and bilingualism/multilingualism

ESL 615 Methods and Materials for English as a Second Language - 3 credits

In this introductory course, participants reinforce and apply knowledge of structure and nature of language (phonology, morphology, syntax, semantics, pragmatics, discourse, social/academic language, registers, writing conventions). They discuss and model instructional approaches and best practices for teaching ESL (instructional foundations, theories and sheltered strategies for developing English language skills in listening, speaking, reading and writing for English language learners in bilingual/multilingual classes from primary grades on and research-based practices for English language development.

ESL 620 Teaching Reading and Writing to ESL Students - 3 credits

Participants apply understanding of language and linguistics, reinforce knowledge of language acquisition and literacy: theories/practices to develop reading skills/comprehension in English as a first language at different educational levels; linguistic differences between first/second language for English reading instruction; differences in initial instruction for students not literate in their first language; first language literacy effects on second language literacy; formal/informal measures for assessing skill development with ESL learners; developing listening/speaking/reading/writing vocabulary; approaches for developing writing skills and use of writing tools; writing process and formal writing elements; English oral/aural fluency; social/academic English and content language; metalinguistic skills and vocabulary appropriate to cognitive, academic, and language proficiency levels.

ESL 625 Technology for Linguistically Diverse Classrooms - 3 credits

Participants develop knowledge of language and linguistics functions and registers of language, discourse varieties, aspects of social/academic language, rhetorical registers, and writing conventions. They reinforce knowledge of practices for development of listening, speaking, reading, and writing vocabulary, approaches for developing writing skills and use of writing tools. They reinforce knowledge of social/academic English and academic language for content areas. They apply knowledge of planning/implementing standards-based ESL and content instruction. They develop knowledge of instruction, assessments, resources, research, and advances in the field of ESL.

ESL 630 Equitable Assessment for ESL Learners - 3 credits

Assessment of English Learners (ELs) is affected by federal/state regulations, including state-wide adoption of the WIDA ACCESS Test for ELs. Course participants will understand laws and issues pertinent to the education of ELs, and use of tests, performance tasks and self-assessments for identification, placement, and reclassification of ELs. They will learn to interpret ACCESS results, consider the effects of socio-cultural, psychological, political, and individual learning variables, and apply these to design differentiated assessment measures that enable ELs to use academic language in demonstrating content knowledge and English proficiency. Participants will have the opportunity to observe and interact with ESL students in field-based classroom situations.

ESL 631 Second Language Acquisition and Culture - 3 credits

Participants in this introductory course develop knowledge of language and linguistics: system, functions, registers, variations, changes. They discuss language acquisition theory/research; cultural/linguistic differences affecting reading instruction; ESL socio-cultural, socio-economic, socio-emotional, and developmental factors influencing bilingualism/multilingualism; cultural intersection with teaching and learning; cultural/racial/ethnic/linguistic identity; inter-cultural communication, role of community, families, and schools in EL education. They apply theoretical, political, historical foundations of education for ELs, and strategies for school collaboration, family outreach, and community involvement for English language learners. They consider curriculum and planning as well as family and community engagement.

ESL 635 Sheltered Instruction and Assessment - 3 credits

This course is designed for teachers and administrators experiencing the challenge of meeting the academic needs of multilevel, diverse classrooms PreK-12 that require sheltered instruction techniques and state mandated assessment instruments for English Learners (ELs). This course will provide participants with multiple opportunities to learn and apply sheltering content instruction strategies to enable ELs to meet grade level academic standards by utilizing the Sheltered Instruction Observation Protocol (SIOP) as demonstrated in national research on best practices for effective instruction. Pre-practicum hours of directed field-based training required.

ESL 640 Identification and Instruction of ESL Learners with Disabilities - 3 credits

This course will provide a framework for developing a comprehensive system for the assessment and instruction of ESL learners preK-12 with disabilities and/or limited or interrupted formal schooling. Participants will gain an understanding of the second language acquisition process, literacy development in the second language, culture, alternative assessment measures, and appropriate instructional methodology for ESL learners with disabilities and/or ESL learners with limited or interrupted formal schooling. They will identify key issues in the assessment and instruction of ESL learners with disabilities and/or limited or interrupted formal schooling, including under-representation and over-representation in special education, appropriate assessment measures, and legal responsibilities. Participants will have the opportunity to discuss the use of alternative assessment measures for distinguishing between disability, literacy development, and developmental process of second language learning. They will also develop appropriate second language instruction for ELs with disabilities and/or limited formal schooling.

ESL 650 Teaching Content to ESL Learners - 3 credits

This course provides educators working with second language learners a theoretical and practical framework for integrating academic language development into content area instruction in grades preK-12. Students will be presented with an overview of instructional concepts and approaches that recognize the role that language plays as the major medium of instruction and learning including language across the curriculum, CALLA (cognitive academic language learning approach), process writing, cooperative learning and cognitive instruction. Participants will have guided practice in using and applying effective teaching strategies that support the linguistic and academic development of ESL learners within the context of the content area classroom. They will learn how to plan and deliver instruction to help ESL learners understand academic content, develop academic language, increase higher order thinking skills, and strategically apply learning strategies.

ESL 692N Professional Seminar II: English as a Second Language (Initial) - 2 credits

The Professional Seminar is a signature element of the adult learning model, grounding learning in a cohort group of students with a faculty leader experienced in teaching English Learners (ELs). The seminar is a forum for discussion of professional issues in education of ELs. Students integrate and reflect on their learning from classes, workshops, and experience. The seminar also supports students' work on their independent learning projects, from identifying topics that are relevant to teaching ESL, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESL 791 ESL Practicum Seminar - 2 credits

The seminar for classroom experience supports students' growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of their state's curriculum frameworks and become familiar with the current reforms and changes in state regulations on educator licensure.

ESL 794A ESL Practicum Pk-6 - 2 credits

The practicum is a supervised field experience in which teacher candidates demonstrate proficiency in the Professional Standards for Teachers. The program supervisor and the supervising practitioner collaborate to help the candidate complete the minimum 300 hours, with a minimum of 100 hours of full teaching responsibility, at the practicum site. The practicum student is supported by the Practicum Seminar, ESL791, which is taken concurrently with this course. Each teacher candidate is assigned a supervisory team. Assessment follows the mandated Candidate Assessment of Performance (CAP) that includes a minimum of two announced and two unannounced observations, a mid-way formative assessment and a culminating summative assessment. An application is required.

ESL 794B ESL Practicum 5-12 - 2 credits

The practicum is a supervised field experience in which teacher candidates demonstrate proficiency in the Professional Standards for Teachers. The program supervisor and the supervising practitioner collaborate to help the candidate complete the minimum 300 hours, with a minimum of 100 hours of full teaching responsibility, at the practicum site. The practicum student is supported by the Practicum Seminar, ESL791, which is taken concurrently with this course. Each teacher candidate is assigned a supervisory team. Assessment follows the mandated Candidate Assessment of Performance (CAP) that includes a minimum of two announced and two unannounced observations, a mid-way formative assessment and a culminating summative assessment. An application is required.

ESL 800 Independent Learning Project: English as a Second Language - 3 credits

The Independent Learning Project is a culminating learning experience that helps educators to integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for ESL teachers and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.

Skills-Based Health/Social Emotional Learning (EHE, HEA)

Acronyms used in course descriptions below:

- MA PSTs — Massachusetts Professional Standards for Teachers
- SMKs — Subject Matter Knowledge (Massachusetts)
- NBPTS — National Board for Professional Teaching Standards
- SEL — Social Emotional Learning

Puerto Rico only

EHE 610 Principles of Health Promotion and Disease Prevention: Public Health Issues - 3 credits

Candidates acquire the knowledge and skill to teach children to develop and maintain healthy behaviors and identify public and community health agencies, resources and prevention practices youth need to protect themselves, their families, and communities from life-threatening and disabling conditions. Assessments include analysis of case studies, a literature review, health awareness campaign, public health unit, and a community service learning project. Course assessments are aligned with MA PSTs and SMKs.

EHE 613 Principles of Health/Social Emotional Promotion and Public Health Issues - 3 credits

This course highlights the collaboration between school health and public health. Acquire the knowledge and health/social emotional skill to teach children to develop and maintain healthy behaviors, to identify public and community health agencies, access resources, and identify prevention practices youth need to protect themselves, their families, and communities from life-threatening and disabling conditions. Assessments include case studies, discussion questions, a literature review, and an Advocacy Project. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience is not required.

Puerto Rico only

EHE 620 Curriculum Implementation in the Health Classroom - 3 credits

Implementing skills-based health education in the health classroom provides teacher candidates with the knowledge and skill to design and implement skills-based health education based on state and national standards. Candidates access and analyze youth risk behavior data, use backwards design, infuse performance indicators, and plan assessment and instruction, including a skills-based unit and lesson plans. Course assessments are aligned with MA PSTs and SMKs.

EHE 622 Implementing Curriculum in the Health/SEL Classroom - 3 credits

Implementing skills-based health/SEL education in the health classroom provides teacher candidates with the knowledge and skill to design and implement skills-based health/SEL education based on state and national standards. Candidates access and analyze youth risk behavior data, use backwards design, infuse performance indicators, and plan assessment and instruction, including a skills-based unit and lesson plans. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

Puerto Rico only

EHE 622R Planning, Implementing, and Administering Curriculum in Health/SEL Programs - 3 credits

Planning, implementing and administering skills-based health/SEL education in health programs provides health educator candidates with the knowledge and skill to design and implement skills-based health/SEL education based on state and national standards. Candidates access and analyze youth risk behavior data, use backwards design, infuse performance indicators, and plan assessment and instruction, including a skills-based unit and lesson plans. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

Puerto Rico only

EHE 630 Growth & Development, Human Sexuality and Family Management Skills - 3 credits

Candidates learn how pre-natal development, infant and child care, parenting skills, consumer and environmental health issues affect adolescents and their families. Diversity in sexual orientation and gender identity are also examined. Demographic research, class discussions, activities, and development of a skills-based lesson prepare the candidate to teach age and culturally appropriate sexuality lessons that address reproductive health, family values, sexual orientation and gender identity. Course assessments are aligned with MA PSTs and SMKs. Prepracticum experience required.

EHE 632 Teaching About Human Sexuality - 3 credits

Learn how human growth and development, social emotional learning, and sexual health affect adolescents and their families. Diversity in sexual orientation and gender identity are also examined. Demographic research, class discussions, activities, and development of a skills-based lesson prepare the candidate to teach age and culturally appropriate sexuality lessons that address reproductive health, family values, social emotional learning, sexual orientation and gender identity. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

Puerto Rico only

EHE 640 Promoting Wellness: Building Positive Health Behavior - 3 credits

Candidates discover how nutrition, physical activity and fitness impact learning and prevent cardiovascular and pulmonary disease. The course identifies key nutrients, analyzes media messages, utilizes dietary and fitness guidelines, and designs strategies to develop and monitor progress in achieving personal goals for lifetime health behavior. Candidates conduct a mini-lesson, host a school-wide event, conduct a school health index, and build a skills-based unit. Course assessments are aligned with MA PSTs and SMKs.

EHE 642 Promoting Wellness: Building Positive Health/Social Emotional Behavior - 3 credits

Promoting wellness weaves together the CDC content areas and risk behaviors, national and state standards, SEL competencies, brain research, and the transfer of effective teaching practices to the classroom. Candidates examine the components of wellness and design strategies to help students build positive health behaviors that impact their health and lifelong wellness. Assessments include a mini-lesson, a school event, and a skills-based unit. Course assessments are aligned with MA PSTs and SMKs. Pre-Practicum required.

Puerto Rico only

EHE 650 Preventing Unintentional Injury & Violence - 3 credits

Candidates learn to teach the knowledge and skills necessary to help youth avoid injury and violence. Candidates examine research, behavioral surveys, resources for students affected by violence, science-based curricula, negotiation and mediation skills, bullying, sexual harassment and assault, domestic violence, homophobia and racism. Assessments include evaluating curriculum, making group presentations, presenting a mini-lesson, creating a resource book, and designing and implementing violence prevention curriculum. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

EHE 652 Preventing Unintentional Injury and Violence - 3 credits

Learn to teach the knowledge and health/social emotional skills to help youth avoid injury and violence. Examine research, behavioral surveys, resources for students affected by violence, science-based curricula, negotiation and mediation skills, bullying, sexual harassment and assault, domestic violence, homophobia and racism. Assessments include evaluating curriculum, making group presentations, presenting a mini-lesson, creating a resource book, and designing and implementing violence prevention curriculum. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

Puerto Rico only**EHE 660 Family and Interpersonal Health: Promoting Mental Health Through School-Based Intervention - 3 credits**

Candidates learn to identify youth who need school-based intervention and how to refer to professional counseling, psychological and social services. Candidates investigate and assess student assistance models, access to mental health services, and practice strategies that assist youth to build resilience, communicate constructively with peers and families, manage stress, and seek help. Through case studies, candidates acquire the knowledge and skills to promote mental health. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

EHE 662 Promoting Mental/SEL Health Through School-Based Intervention - 3 credits

Learn to identify youth who need school-based intervention and how to refer to professional counseling, psychological and social services. Investigate and assess student assistance models, access to mental/social emotional health services, and practice strategies that assist youth to build resilience, communicate constructively with peers and families, manage stress, and seek help. Through case studies, acquire the knowledge and skills to promote mental/social emotional health. Course assessments are aligned with MA PSTs and SMKs. Pre-practicum experience required.

Puerto Rico only**EHE 670 Improving School Health Through Coordination - 3 credits**

The effectiveness of skills-based health education is increased when it is part of a coordinated approach where school staff, administration, family and the community cooperate, collaborate and coordinate to support the health of students, staff, and the school community. Candidates build and implement a coordinated school health program by using data, information technology, research, and collaboration while recognizing the unique academic, cultural and language needs of students. Course assessments are aligned with MA PSTs and SMKs.

EHE 672 Improving School Health/SEL Through Coordination - 3 credits

The effectiveness of skills-based health/social emotional learning is increased when it is part of a coordinated approach where school staff, administration, family and the community cooperate, collaborate and coordinate to support the health of students, staff, and the school community. Build and implement a coordinated school health program by using data, information technology, research, and collaboration while recognizing the unique academic, cultural and language needs of students. Course assessments are aligned with MA PSTs and SMKs.

Puerto Rico only**EHE 680 Teaching Skills for Risk Reduction and Positive Behavior Change - 3 credits**

Candidates examine the factors that contribute to youth risk behaviors and positive behavior change. Using the state and national standards, candidates learn pedagogical strategies to reduce risk behaviors, increase protective factors, encourage positive behavior change, and promote the development of youth leadership and social responsibility. Assessments include the implementation of a mini-lesson and a community advocacy project.

EHE 682 Health-SEL Skills for Risk Reduction and Positive Behavior Change - 3 credits

Examine the factors that contribute to youth risk behaviors and positive behavior change. Using the state and national standards, candidates learn pedagogical strategies to reduce risk behaviors, increase protective factors and social emotional learning, encourage positive behavior change, and promote the development of youth leadership and social responsibility. Assessments include the implementation of a mini-lesson and a community advocacy project. Pre-practicum experience required.

EHE 695 Action Research I: Defining a Problem of Practice - 2 credits

This course includes an introduction to action research and skills required to conduct an effective literature review supportive of the continuous improvement of professional practice specific to teaching and learning in PK-12 settings. Supportive of the capstone Action Research Project students review the literature, identify a problem, develop a research question, validate the project, and identify outcomes for a self-selected inquiry.

EHE 696 Action Research II: Study Design and Implementation - 2 credits

Prerequisite EHE695. In the course students identify the research design and submit a proposal for a self-identified action research project. Once approved, the proposal is implemented with guided practice of faculty. Progress is reported as a shared learning community supportive of providing constructive feedback to peers and as a mechanism for deep thinking about the topic selected related to professional practice. Journaling and documentation of activities related to work as a reflective practitioner are central to the course.

EHE 697 Action Research III: Research and Data Analysis - 2 credits

Prerequisite EHE696. In this course students use qualitative and quantitative methods to analyze data collected in the previous course and prepare a preliminary paper of 16-24 pages that summarizes research findings as they relate to professional practice. Additionally, students present preliminary findings for their self-selected action research project to program cohort and faculty.

EHE 698 Action Research IV: Conclusions and Recommended Action- 1 credit

Prerequisite EHE697. In this course students finalize a written report for the action research project pursued over the three previous terms and prepare a presentation for the public dissemination of research findings. During the presentation, students are required to share the process of their research, resulting conclusions, and recommended actions for further development.

EHE 701 Current Research on Interrelationship of Risk Factors - 3 credits

This course examines youth risk behaviors and protective factors. Students analyze societal, psychological, family, and environmental influences on behavior as well as the inter-relationship between depression, tobacco use, drug and alcohol use, violent behavior and sexual activity. Students investigate strategies that build health/social emotional skills and identify support services available in the school and community. The course is aligned with MA PSTs.

EHE 718 Strategies for Inclusion in Physical Education - 3 credits

The purpose of this course is to empower physical educators with the information and tools necessary for the successful inclusion of students with varying needs. In particular, this course focuses on students that may need modifications beyond typical planning. This course is intended to provide resources with practical applications and easily implemented planning and assessment strategies for physical educators, adapted physical educators, special education teachers, therapeutic recreation specialists and parents.

EHE 703 New Perspectives in Teaching Human Sexuality - 3 credits

Students investigate trends in comprehensive sexuality education such as: cultural and religious attitudes, gender identity, homophobia, strategies for building support for gay, lesbian, bisexual and transgender youth, and building acceptance and involvement of diverse family structures. Social emotional learning is integrated throughout the course. Assessments include a parent education project, skills-based health/social emotional sexuality lesson, examination of attitudes about teaching sexuality, and skills for supporting LGBT students. The course is aligned with MA PSTs.

EHE 704 Best Practices in Physical-Social Emotional Education - 3 credits

Teaching for learning is the first element for quality physical education. Students learn to promote and teach physical literacy, understand and incorporate a teaching for learning approach, and how to motivate students. The second element is teaching to the national standards and incorporate assessments that measure grade level outcomes. To accommodate for student social-emotional well-being, the course aligns the CASEL SEL competencies and related skills to SHAPE America's National Standards and Grade Level Outcomes.

EHE 705 Promoting Health-Social Emotional Wellness in Media-Saturated Society - 3 credits

Analyze how media influence youth decisions regarding alcohol and other drugs, injury, violence, tobacco use, nutrition, physical activity, and risky sexual behaviors. Learn to decrease these risk factors by implementing content and health/social emotional skills. Assessments include class activities, a literature review, investigative reporting, data analysis, a mini-lesson presentation, a reflective paper. The course is aligned with MA PSTs.

EHE 706 Assessment in Physical Education - 3 credits

Assessment in Physical Education is designed for K-12 teachers who seek innovative assessment ideas in physical education. Teachers link standards and objectives using practical in class assessments. Assessment strategies assist in the evaluation of student learning as well as curriculum and teaching practice. Assessments include a mid-term literature review that explores assessment practices that enhance the social-emotional well-being of students. The key assessment is the development of an inventory of assessment practices and strategies.

EHE 710 Model Based Instruction in Physical Education - 3 credits

This online course deepens knowledge and strategies to implement Model-Based Instruction in Physical Education. Students evaluate personal philosophies of teaching physical education, analyze their instructional practices, investigate assessment and implementation strategies, and survey best practice models of instruction including but not limited to: Direct and Indirect Instruction, Personalized System for Instruction, Cooperative Learning, Sport Education, Peer Teaching, Inquiry Teaching, Tactical Games, and Teaching for Personal and Social Responsibility.

EHE 711 Evaluation of School Health/Social Emotional Programs - 3 credits

The evaluation of school health/social emotional programs involves a comprehensive examination of the strengths and needs of a program and a design to address each. This course presents the theory and practice of program evaluation with an emphasis on coordinated school health design, implementation, diagnosis, and action plans. Assessments include class assignments, literature reviews, evaluation theory, key assessment and reflection. The course is aligned with MA PSTs.

EHE 713 Assessing Skills-Based Health/Social Emotional Literacy - 3 credits

To assess health/social emotional literacy, students design and implement skills-based health/social emotional curriculum. Through backwards design, students access and analyze youth risk behavior data, select standards to decrease the risk, then design assessment and skills-based health/social emotional instruction. Assessments include the design and implementation of formative assessments, including how to give effective feedback, and the design of summative performance assessments including criteria referenced rubrics. The course is aligned with MA PSTs.

EHE 716 Health/Social Emotional Education for the Culturally and Language-Diverse Classroom - 3 credits

Examine a range of languages and cultures in the health classroom and how they impact student learning. Students gain the knowledge and skill to develop language and culturally relevant skills-based health/SEL instruction by examining best practices for English learners and racial, sexual, and gender identity models for students from diverse cultural backgrounds. Assessments include a mini lesson, analysis of best practices, cultural proficiency assessment, and a key assessment. The course is aligned with MA PSTs.

HEA 791 Practicum Seminar: Health/Family/Consumer Sciences - 2 credits

The seminar for classroom experience supports student growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of their state and national curriculum frameworks, develop the skills necessary for the teacher tests, and become familiar with recent developments in local, state and global health education issues. Practicum required concurrently.

HEA 794 Practicum: HFCS (300 hours: 150 elementary and 150 secondary) - 2 credits

A supervised field experience of a minimum of 300 hours (150 elementary, 150 secondary) in which candidates demonstrate proficiency in meeting the Professional Standards for Teachers. The practicum must meet the hours and setting requirements for the license sought, under the guidance of a supervising practitioner with the appropriate license, which Cambridge College supervision. Assessment follows the Candidate Assessment of Performance (CAP) and assesses ability with respect to: well-structured lessons, high expectations, meeting diverse needs, adjustment to practice, safe learning environment, professional culture/reflective practice, as well as formative assessment, differentiation and providing academic feedback.

Interdisciplinary Studies, Teaching Skills & Methodologies

(EDU, EED) See also Electives section (below).

EED 503 Teaching Children with Different Learning Styles - 3 credits

This course discusses various learning styles of children from infants to teenagers. The course reviews the internal and external environment responsible for the development of learning styles and how we can provide a positive environment to inculcate good habits and learning styles and how to recognize children's learning styles in order to facilitate learning. Current research and literature are reviewed.

EED 512 Inclusion and Behavior Management - 3 credits

In this course students learn the basic components of an effective inclusionary program. In addition, they understand the etiology of learning problems and strategies to remediate these problems. They learn how to fully include students with disabilities in the regular classroom. Emphasis is on learning behavior management skills that are effective with both regular and special education students.

EED 518 Effective Classroom Discipline Strategies - 3 credits

Educators will evaluate their expectations for students' behavior and learn practical strategies to increase student responsibility, self-control and self-management. Teachers will learn how to create a classroom environment that will allow them to spend the major part of their contact time in instructional activities.

EED 520 Civil Rights and Social Justice: The History of the Civil Rights Movement - 3 credits

This course is an historical review of the civil rights movement. Participants come to understand the context and conditions under which African American children live. Topics covered include desegregation of public schools, the tactics of nonviolence, the role of young people in the movement, the struggles for the right to vote, the relationship between protest and legislative action, affirmative action, the 1967 uprising in Detroit, the founding of the Black Panthers, Malcolm X, the connections between the war in Vietnam and the problems of poverty in the United States, and the call for black power. Participants view the video series *Eyes on the Prize* and discuss the societal implications of the civil rights movement. Social justice and social responsibility are the key concepts which serve as a model for action. Participants create curriculum resources which can empower teachers and students.

EED 544 The Teacher as Artist - 3 credits

Materials fee. This course provides classroom teachers with the basic concepts and methodology of traditional art experience. This class has been a constant source of inspiration to those with "limited" art experience as well as to those who are practicing art teachers. The course is committed to the philosophy that you need not be an "artist" to take this course because you already are one. Activities include an introduction to drawing and color theory, creative visualization, and a final symbolic self portrait.

EED 564 Motivation and Teaching: Theories and Practices - 3 credits

The strategies teachers use in many classrooms to reinforce learning are based on the theory, "If you learn this, then I will give you that." Much of what is taught is reinforced by extrinsic rewards such as praise, kisses and hugs, or gold stars. However, many teachers feel frustrated because they want children to love learning and to see learning as a reward in and of itself. This course will examine current research and theoretical models which can help educators understand how to develop a child's intrinsic desire to learn by satisfying certain needs we all have within us.

EED 584 Images and Information: An African American Woman's Notebook - 3 credits

Literature-based curriculum can develop a student's critical reading and writing skills using entire novels as a method of discovery and a source of information. This course will explore novels written by African American women from autobiographical, historical, and cultural perspectives unique to the Black woman's experience. These novels trace the lives of contemporary African American women who made their marks on society.

EED 590A/591A Theory & Pract of Educ: Parenting and Teaching Issues - 1 credit

This course will address important issues in parenting and raising positive children. There will be discussions of parenting and teaching in the home and classroom. It will address development stages of children and adolescence. A key question for discussion, What do children expect from themselves and their parents in the area of education, social settings, familial relationships, friendships and getting along with siblings. All are welcome! Teachers are parents and parents are teachers with their various roles in children and young adult lives.

EED 590B/591B Theory & Pract of Educ: Researching Your Independent Learning Project - 1 credit

This course will focus on research methods, ILP requirements, and technology integration as you research and write the ILP. The following will be covered: identifying a topic; defining key words; searching the online library for journal articles; identifying scholarly sources for research; preparing a webliography; developing a research plan; writing a literature review; and using the American Psychological Association (APA) format for in-text citations and references.

EED 590C/591C Theory & Pract of Educ: Diversity Issues in the Workplace - 1 credit

The purpose of this course is to educate the public and create an environment that is appreciative of its diverse population and influence positive change. This course will address the following issues: national origin, age, sex discrimination, religion, disability, race, creed, ancestry and language. It is the hope of this course to help increase and heighten your level of awareness with regard to all the unique skills, cultural differences, one's presentation free from harassment of any kind and differences are accepted and valued.

EED 590D/591D Theory & Pract of Educ: Resume Writing and Interviewing - 1 credit

The course will cover the employment counseling aspect, preparation for the career change/opportunity, resume writing, direct and relevant job hunting skills and interviewing techniques. There will be a series of group discussions, mock interviews regarding the resume format and specifically content to address direct and relevant skills, experience, qualifications and education. Please bring (2) copies of your resume for discussion.

EED 590E/591E Theory & Pract of Educ: Brain Dominance, Key to Academic & Career Success - 1 credit

Why is it that some students always do better than others? Why is it that some people do well in some careers but are a disaster in others? There are four quadrants in the brain and each one is wired to perform very specific tasks. Participants will learn the functions of each quadrant and will take an assessment to determine their own brain dominance. With this knowledge students will learn what careers they are best suited for, what their major should be, and specific strategies to be successful in school and life.

EED 590F/591F Theory & Pract of Educ: Differentiated Instruction - 1 credit

This workshop provides an understanding and application of the steps and strategies needed to enhance learning for academically diverse students. Using concepts from learning preferences frameworks and the taxonomies, participants will learn how to plan differentiated lessons to meet the needs of a variety of learning styles and cognitive abilities found in their classrooms.

EED 590G /591G Theory & Pract of Educ: Reflective Practice for Educators - 1 credit

This one-credit course is designed to help teachers improve their classroom practices through daily reflections on their work. By developing a greater level of self-awareness about the nature and impact of their performance, it is anticipated that they will understand the how and why of what they do as they teach, manage their classrooms, and develop curriculum. This will enable them to gather information about their professional practices and take major steps to improve their teaching.

EED 604 Graduate Level Writing for Social Science Research: Writing your ILP

The Independent Learning Project (ILP) involves researching a topic and communicating the findings in writing. This course is designed to support the writing of social science research projects. It explores the following: determining the research statement, developing an outline and design, organizing information, and mechanically correct writing. The course covers both the "thesis-type" project and the "project-type" ILP as outlined in the Cambridge College ILP handbook. Enrollment limited to 20.

EED 610 Strategies for Teaching Critical Thinking Across the Curriculum

Critical thinking is approached through a holistic model that stresses creative and analytic strategies. Participants consider cognitive development issues informing the design of instructional materials and methods which promote higher-order thinking. Practical strategies for immediate classroom application are a priority. An open environment promotes collegial exchange that builds on professional experiences while cultivating new skills that engage students in active learning and independent thinking.

EED 615 Introduction to Integrative Learning and Learning Styles - 3 credits

This course introduces a full-spectrum, whole-brain learning and teaching method known as integrative learning. This highly effective model of teaching has resulted in enhanced teacher motivation, creativity, positive attitude, improved school climate and organizational transformation in many schools and corporations. Learning styles research is used to assist educators and trainers to design effective teaching strategies for learners with different learning styles.

EED 617 Foundations of Social Justice - 3 credits

What are the norms and values that characterize a socially just society? This course is designed to explore this question. We will examine justice under the follow contexts: theories of justice, principles and scope of social justice, why social justice matters, the machinery of social injustice, targeting injustices, identifying inequities on the basis of social group memberships, advocating for social justice, and teaching social justice. This course heightens awareness of contemporary social issues and helps learners develop action plans that foster action for socially just principles. We examine values, discuss social commitment, and develop critical thinking and social inquiry skills necessary for engaging in social justice action for social change.

EED 618 Integrative/Accelerated Learning: Classroom Applications - 3 credits

This course helps teachers develop effective instructional strategies to address the various learning styles found in classrooms. Educators study current brain-based research about memory and learning and how to translate this research into classroom practice. Integrative/accelerative learning theories are explored and used to create a carefully orchestrated positive learning environment. Techniques and activities are incorporated into lessons to increase understanding and recall, including multi-sensory teaching strategies, experiential activities, dramatic and improvisational activities, music, speaking clearly and effectively, and educational kinesiology exercises.

EED 623 Classroom Management Using Accelerated Learning - 3 credits

Accelerated learning is used to explore strategies for creating an environment, which supports students and minimizes teacher stress. Traditional strategies including control of movement, time and space management, establishing effective rules, interpersonal relationships, small and large group dynamics, behavior modification, as well as relaxation, mood setting, win-win solutions and a range of alternative methods of intervention and curriculum strategies are explored through role play, group activities, multi-media and readings.

EED 628 Effective Schools - 3 credits

This course helps students attain a basic understanding of the major dimensions of effective schools. The class examines research findings and personal reflections of noted educators on the determinants of effective schooling in which all children learn; where teacher and other school employee satisfaction is at a high level; and where public confidence in the schools is very strong. Particular emphasis is on the pivotal role of school administrators, teachers, parents and students in the development and maintenance of effective schools.

EED 636 Re-Reading Global Oppression: the Last 500 Years - 3 credits

This course examines, from a systems perspective, the last 500 years of socio-political, psychological, cross-cultural, educational, religious, and economic dimensions of various world atrocities that have led to and continue to sustain current oppression of diverse peoples across the globe. It is designed to prepare learners to be knowledgeable about and to challenge individual, group, and institutional biases and how these contribute to discrimination and oppression. Equally important, this course will examine the adaptive strategies and strengths of oppressed/marginalized groups and will assist students in understanding the complex nature of their own personal values, beliefs, and behaviors that may limit their ability to practice effective methodologies in their schools, communities, and areas of work. Students critically analyze both written and visual texts that include but are not limited to documentaries, film, poems, novels, essays, trade cards, advertisements, etc. This course is both reading and writing intensive; written and oral work challenge learners to move beyond reflecting on personal experience alone to identify and challenge contemporary systems of oppression.

EED 644 Theories of Leadership for Educ. /s and Administrators

Leadership is defined as working through and with people to accomplish organizational goals; it represents a blend of theory and experiential activities. Participants discuss leadership, motivation, effective use of personal and organizational power, and teacher empowerment. Learning is supported through sharing new ideas, debating current issues and understanding certain trends in managerial practice and leadership behavior.

EED 647 Human Brain, Human Learning - 3 credits

This introductory course in brain-compatible teaching and learning will entail a review of some of the latest research findings from the neurosciences, cognitive psychology, information science, psychobiology and neurolinguistic programming. The goal of this course is to provide educators and trainers with the opportunity to learn about the role of the brain / mind in the learning process so that they will be able to read and understand current brain / mind research and apply some of the findings to their teaching practice. Some time will also be spent on accelerated learning techniques. The course would be appropriate for educators of all grade levels and subject areas as well as for corporate trainers and other trainers of adult learners.

EED 663 Teaching Social Studies: the United States Through the Media - 3 credits

This intensive survey course explores social, political, economic, and cultural values of the United States from Colonial times to the present through an examination of electronic and print media. Topics include but are not limited to Colonial times, the pre-industrial North, the Antebellum South, the westward movement, the Civil War, Reconstruction, and immigration/migration, World War I and the Depression, Prohibition, the rise of the white gangster/hero, the Harlem Renaissance, World War II, Civil Rights, Vietnam, and the Women's Movement, the rise of domestic and global terrorism, etc.

EED 680 America Through Its Literatures - 3 credits

This intensive survey course explores literary depictions of America (the United States) through literature. The texts may include short stories, poems, plays, books, film, music, advertising, television, political speeches, and comic strips. The class develops pedagogical strategies to introduce students to mythologies, dystopias, deconstruction, hauntologies, palimpsests, panopticism, hybridity, colonial and post colonial debates, and the ways in which authors create parallel universes to comment on the America we now inhabit. Students become aware of other *Americas* that exist in parallel with our own, realities from which many of our students come.

EED 681 Visualizing Social Justice - 3 credits

This intensive course explores the different ways that artists of different persuasions have treated the subject of social justice both at present and in the past. The term "visualizing" is meant to include all of the arts (i.e. the "visual arts," drama, dance, literature and poetry, music, etc.). The class develops pedagogical strategies to introduce students to methodologies and philosophical vehicles and to integrate such methods into their own curriculum.

EED 691-693 Professional Seminar: Education—three terms - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The seminar is a forum for discussion of professional issues in education, such as what it means to be an educator today, and how educators can work in the organizational culture of schools and contribute to social progress. Students integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and lifelong learners. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

EED 699 Language and Literacy for Teachers K-12 - 3 credits

This course considers modern approaches to a balanced literacy program, including reading, writing, listening, and speaking. It gives an overview of the historical unfolding of the transmission and transaction approaches to learning and teaching reading and writing. It reviews recent research on the development of language and literacy in childhood and youth. Based on this, students investigate best practices at different stages — emergent literacy, the guided reading stage, and methods such as literature circles for independent readers and older students. Modern strategies are reviewed, such as authentic assessment, new approaches to phonics and spelling, writing as process, and the reading-writing connection.

EED 704 Seminar in Current Educational Issues - 3 credits

This course defines some concepts, philosophies, that serve as foundations for structuring schools and learning environments, including: humanistic education, essentialism, perennialism, progressivism, social reconstructivism, and critical theory. The seminar also examines critical practical realities including: change, the economy, technology and science, leisure and work, communications, the human population, ecology, government and politics, values and lifestyles. Students explore and evaluate school / learning environment structures and teaching strategies, and they make compelling arguments for their professional points of view.

EED 705 Multicultural Diversity Issues in the Workplace and Classroom - 3 credits

This course studies (1) ethnic-cultural history, (2) prejudice, biases and value systems, and (3) the appreciation of diversity in professional skills and personal strengths. Students discuss teaching cultural diversity in various learning environments, and individuals' power in realizing differences and similarities. Students explore ethnicity, race, gender and class from an historical and contemporary perspectives. The class looks at teaching styles and ways to manage culturally diverse classrooms. The importance of building students' self-esteem and sensitivity to their varied learning styles are addressed. Students should come prepared with a brief overview of their ethnic/cultural history (e.g., photo albums, letters, journals, and family trees).

EED 710 Alternative Assessment Strategies Across the Curriculum - 3 credits

This course enhances educators' ability to develop a conceptual framework of assessment procedures to improve their teaching techniques for the wide variety of learning styles found in the classroom today. Assessment is an important component of our educational system. However, many educators are now questioning the heavy emphasis on standardized tests and the decreasing attention to the value of classroom assessment. Dissatisfied with the current methods of assessment, and motivated by the desire to improve public education, educators, policy makers, parents, and community members are focusing increased attention on how we go about determining what our students know and can do, from kindergarten through grade 12.

EED 800 Independent Learning Project - 3 credits

The Independent Learning Project (ILP) is a comprehensive, culminating learning experience in the master's program. Students relate their learning experiences in the Master of Education to their experiences as educators and to their professional development interests. The ILP may take a number of forms: a traditional thesis, a professional or curriculum project for use in the classroom, or a creative project with discussion of its pedagogical value. The Professional Seminar leader provides support, advice, and oversight throughout the ILP process; the seminar group and some of its activities provide additional support.

ENG 701 Integration of Reading and Writing With Children's Literature - 3 credits

This course is designed to allow teachers to revisit literature as an expression of the imagination and creativity, as well as critical/expository writing and to assist teachers in integrating reading and writing skills/competencies with the teaching of children's literature. By recognizing the value in teaching reading and writing with authentic, well-written literature, having rich and varied vocabulary, teachers will learn to integrate the teaching of reading and writing with both literary and expository written and "visual" texts. It will address language arts, specifically reading and writing, as primary areas of concern in the Massachusetts Common Core Standards and Teacher Licensure Objectives.

Librarianship (ELM)

Puerto Rico only

ELM 509 Introduction to Librarianship - 3 credits

This course studies the evolution of librarianship as a professional field specialized in the management and organization of information for the offering of various services, and to educate users about the correct use of information. The development of the process of academic, school and public libraries over the years is studied for a better understanding of the role of professionals. Pre-practicum hours of directed field-based training required.

ELM 515 Evaluation, Selection and Management of Learning Resources - 3 credits

The course examines the collection development process, policies and procedures for the acquisition and maintenance of print, digital, online and government and community resources that support the teaching and learning process and best meet the needs of all learners, including English language learners. Emphasis is on organization of the collection including; the standards and systems for the creation and maintenance of records, the classification system, subject headings, bibliographic/authority control; MARC21, the components of automated library systems. Additional topics covered are: professional library selection tools; collection evaluation; identification of user needs; the relationship between the curriculum and the collection; cooperative collection development with faculty and the public library; funding; intellectual freedom; equity of access. Pre-practicum hours of directed field-based training required.

ELM 517 Literature for Young Adults - 3 credits

This survey course introduces classic and contemporary literature considered appropriate for young adults, that bridges the gap between children's and adult books. It provides educators with the knowledge and skills needed to integrate young adult literature into classrooms and libraries. Thematic approaches are explored along with practical activities to promote lifelong reading, writing and appreciation of literature. Critical review sources and selection tools are also examined along with the standards and systems for the creation and maintenance of records.

ELM 521 Reference Resources and Services - 3 credits

This course provides the skills and knowledge needed to manage reference services and resources in different types of libraries. Students explore reference resources in different formats and their use to meet the user's need. Students look at professional library selection tools to locate the best and most relevant information resources in a variety of options to bring service to local or remote users. This course emphasizes lay issues for the information professional, including information needs and seeking behaviors, the reference interview and the reference and instructional librarian as a professional. It also explores the communicative strategies and social aspects of information.

ELM 523 Children's Literature - 3 credits

The course enhances and extends students' knowledge of literature for children through in-depth involvement with books. The course focuses on selection, evaluation, and methods of sharing and discussing various types of literature, using print and other media. Students read widely from a broad range of literature and develop methods of incorporating literature into classroom and library experiences. Critical review sources and selection tools are also examined along with the standards and systems for the creation and maintenance of records.

ELM 532 New Technologies in the Library - 3 credits

This course explores access to online databases, educational use of the Internet, policies, copyright, and major issues in media literacy. The student will explore the process of integrating technology in the 21st century education and library services; understand the impact of the internet on library services, and identify different technology tools for libraries, educational services, and distance learning. The student will design and evaluate the technology used to enhance their productivity and professional practice.

ELM 533 Information Literacy - 3 credits

The course focuses on the integration of information literacy standards into the school library program and the teaching of information literacy skills, their theoretical foundations, and the strategies to teach these skills to K-12 library users. The library teacher candidate examines instructional design and strategies, national and state information literacy standards and skills, exemplary information search models, and learner assessment methods. Pre-practicum hours of directed field-based training required.

ELM 561 Production of Instructional Materials - 3 credits

This hands-on course introduces multimedia technology and its instructional uses in designing authentic learning environments. Librarianship candidates gain experience creating multimedia projects for classrooms, school libraries, colleagues and students. They examine a variety of Web 2.0 tools, presentation software and tools for teaching. Basic production vocabulary and concepts of media literacy are also studied.

ELM 600 User Needs and Selection of Information Resources - 3 credits

This course introduces students to the techniques and methods that can be used to diagnose a user's needs and how they are used for the effective selection of information resources. Students will also learn about the development of library policies, such as the collection development policy, including donations and policy for discarding information sources.

ELM 601 Cataloguing of Information Resources- 3 credits

Pre-requisite: ELM509. This course studies the principles of the organization and cataloguing of information for its access and effective use. The norms for the catalog and documentary description, the selection of access points, including the descriptors, subject headings, and the classification of systems are examined. It reflects on the importance of the information professional in the organization of information to facilitate their access.

ELM 692 Professional Seminar II: Library Teacher K-12 - 2 credits**ELM 693 Professional Seminar III: Library Teacher K-12 - 2 credits**

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional standards for school library teachers, licensure requirements and process, and the job search. It also links them with wider networks in the field. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners.

ELM 700 Research in Librarianship - 3 credits

Pre-requisite: ELM509. This course studies the theoretical foundations of scientific research and its application in librarianship. We work with the development of knowledge and skills in research to start this activity. Opportunities will be provided to work with quantitative and qualitative research techniques. It reflects on the value of research in Library Science, as well as its benefits in the search for solutions to problems in the field.

ELM 701 Library Management - 3 credits

Pre-requisite: ELM509. The course emphasizes the development of the management and administration of information units of the XXI Century. It covers basic aspects of the organizational structure, planning, budget management, human resources and library management. In addition, it covers concepts related to the assessment and evaluation of library services to guarantee the continuity and value of the library in its environment. This course explores both the theory and practice of the management of digital services in the information units and emphasizes the social and ethical responsibility of the information units with the community.

ELM 790 Practicum: Library Teacher K-12 (300 hours) - 3 credits

Prerequisites: Pre-practicum, pass all initial licensure courses, pass all teacher tests required by Massachusetts for this license. 300 hours in a school library; divided into two 150 hour experiences at two of the three school levels (elementary, middle, high school). Practicum Seminar required concurrently.

The Practicum experience is in the role and at the level of the license sought, guided and evaluated by a professional licensed/certified library teacher and a Cambridge College supervisor. Practicum locations are subject to MA DESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair. The Practicum experience provides library teacher candidates the opportunity to gain insights into the profession and to master the current Professional Standards for Library Teachers. Students reflect on their own professional growth and examine theory through actual practice. Exit Performance Portfolio required for credit.

ELM 791 Practicum Seminar: Library Teacher - 2 credits

Library Teacher Practicum required concurrently. The seminar for classroom experience supports students' growth as they assume the library teacher's role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

ELM 795 Practicum: Library Teacher K-12 (300 hours) - 2 credits

Prerequisites: Pre-practicum, pass all initial licensure courses, pass all teacher tests required by Massachusetts for this license. 300 hours in a school library; divided into two 150 hour experiences at two of the three school levels (elementary, middle, high school). Practicum Seminar required concurrently.

The Practicum experience is in the role and at the level of the license sought, guided and evaluated by a professional licensed/certified library teacher and a Cambridge College supervisor. Practicum locations are subject to MA DESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair. The Practicum experience provides library teacher candidates the opportunity to gain insights into the profession and to master the current Professional Standards for Library Teachers. Students reflect on their own professional growth and examine theory through actual practice. Exit Performance Portfolio required for credit.

ELM 800 Independent Learning Project: Library Teacher - 3 credits

The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for library teachers and articulates the individual's educational and administrative philosophy. The project is research and action based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.

Mathematics (EME, MAT)

EME 692N Professional Seminar I: Mathematics Education - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional issues in teaching mathematics, national standards and student achievement in mathematics. Students explore what they are learning, brainstorm about applications, and reinforce each other's focus and enthusiasm as teachers. They integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and life-long learners.

EME 693N Professional Seminar I: Mathematics Education - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional issues in teaching mathematics, national standards and student achievement in mathematics. Students explore what they are learning, brainstorm about applications, and reinforce each other's focus and enthusiasm as teachers. They integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and life-long learners.

EME 800 Independent Learning Project: Mathematics Education - 3 credits

The Independent Learning Project is a culminating learning experience that helps mathematics teachers to integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for mathematics teachers and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the student, within the area and level of licensure. It engages educators in sustained research into educational practice and curriculum development in mathematics; parts of the project may be implemented during the practicum.

MAT 602 Differentiating Elementary Mathematics Instruction for Mixed Ability and English Language Learners - 1 credit

This course will focus on selected mathematics Common Core concepts and the skills that students tend to have problems with in learning; and will contain concrete teaching activities and methodology suggestions that can increase student achievement. It will offer ideas on introducing students to the language of mathematics so that they are able to understand higher order concepts. Mathematics content instruction will be integrated with special education and ESL strategies such as differentiated Instruction (DI), Response to Intervention (RTI), and Sheltered English Immersion (SEI) to model effective co-teaching and inclusion techniques that could be implemented in the classroom setting.

MAT 603 Arithmetic to Algebra: Developing Patterns and Ideas (K-8) - 3 credits

This course explores the relationship between the study of arithmetic and of algebra in grades K-8. Teachers explore selected mathematical concepts at an adult level and discuss how children develop an understanding of it. They explore ways to facilitate classroom learning, and effective activities and materials that enhance learning of algebraic concepts and skills. They learn how to use vertical acceleration to connect arithmetic to algebra.

Puerto Rico only**MAT 604 Teaching Mathematics for the Secondary Level**

Study of math curriculum content, methods, strategies and activities for teaching at the secondary level, according to Puerto Rico Department of Education current regulations. The course also includes the analysis of the new models based on the recent research in the teaching.

MAT 605 Technology in Mathematics Learning and Teaching (K-12) - 3 credits

Prerequisites: MAT607, 609, 611 & 613 or program chair's approval. This course provides teachers with a strong foundation in effectively using technology in mathematics classrooms, K-12. They develop and implement comprehensive lessons for teaching mathematical concepts and skills using calculators, graphing calculators, computer graphing, algebra and geometry software, and internet resources. This course makes educational technology an integral component of the teaching, learning, and assessment of mathematics instruction and learning. Pre-practicum hours of directed field-based training required.

MAT 607 College Algebra - 3 credits

This course focuses on the major components of a college level course in algebra: real, rational, and irrational numbers; linear, radical, and quadratic equations and inequalities; functions and graphs; polynomial, rational, exponential, and logarithmic functions; conic sections; systems of equations and inequalities; and sequences and series. Pre-practicum hours of directed field-based training required.

MAT 609 Euclidean Geometry - 3 credits

This course emphasizes the fundamental ideas of Euclidean geometry with a focus on logic, observations, predictions, and conclusions. Significant geometric properties and concepts are explored through the systematic presentation of the axioms, definitions, constructions, and theorems of classical geometry. Major topics include: the foundations of geometry, direct proofing techniques, triangles, parallel lines, and polygons, right triangles and the Pythagorean theorem, circles, and solid geometry. Pre-practicum hours of directed field-based training required.

MAT 611 Calculus I - 3 credits

This course focuses on trigonometric and calculus concepts by providing numerical, graphical, and algebraic approaches for a clear understanding and mastering of the material. Course activities are placed in a context of real-world problems which enable students to create mathematical models that will help them understand the world in which they live. Major topics include: continuity, limits' derivative of a function, anti-differentiation, definite integral, and the Fundamental Theorem of Calculus. Prerequisites: MAT 607 and MAT 609 or program chair's approval.

MAT 613 Discrete Mathematics - 3 credits

Prerequisites: MAT607 & MAT 609 or program chair's approval. This course is designed to cover the major components of discrete mathematics by studying the connections among mathematics topics and real-life events and situations, emphasizing problem solving, mathematical reasoning and communications. Major topics include: counting and number systems; combinatorics; codes; recurrence relations; graphs and networks; and matrix operations. Pre-practicum hours of directed field-based training required.

MAT 615 History of Mathematics - 3 credits

This course will show how the historical perspective accentuates many different approaches to problem solving thus allowing mathematics to take on an international, multicultural flavor. It will illustrate how mathematics history creates a bridge from the past to the future and how students can learn to value mathematics more by being exposed to its historical and cultural contexts. Major trends in mathematical thought are introduced, as well as the interplay of mathematical and technological innovations, and the contributions of great mathematicians. Prerequisites: MAT 607, MAT 609, and MAT 611 or program chair's approval.

MAT 618 Mathematics Essentials - 3 credits

This course focuses on the essential components of algebra, probability and statistics. Major topics include: algebraic, linear and non-linear models; functions and graphs; collecting, organizing and displaying data; using appropriate statistical methods based on data; and applying basic concepts of probability theory to everyday situations. Observations of lessons in which any of these topics are taught would meet pre-practicum observational requirements for this course.

MAT 621 Data Analysis - 3 credits

This course focuses on how data analysis can reveal a more complete picture of the world, by emphasizing concepts and applications of probability and statistics from a wide range of fields. Major topics include: collecting, organizing and displaying data; using appropriate statistical methods and prediction based on data; developing and evaluating inferences; and applying basic concepts of probability. Pre-practicum hours of directed field-based training required.

MAT 623 Common Core Math - 3 credits

Course will address all Massachusetts Common Core State Standards in Mathematics.

Puerto Rico only**MAT 623R Teaching Numeric and Geometric Structures 4-6**

This course covers the teaching pedagogy of the basic foundation of the mathematics grades 406 curriculum in terms of its numerical and geometric structures. Major topics include: number sense, numeration, estimation, mental math modeling operations using concrete objects, geometry, spatial sense and measurement. Aligned with Puerto Rico Department of Education standards.

MAT 625 Number Theory - 3 credits

This course focuses on integers and their application in a technology-rich world. Major topics include: prime numbers, Diophantine equations, congruences, quadratic-residues, order of a number mod p , Fermat's Little Theorem, Euler's Theorem, and Gauss's Lemma. Applications to check-digits and encryption covered as well. Prerequisite: MAT 611.

MAT 627 Abstract Algebra - 3 credits

This course focuses on why no formula solution to the quintic equation is possible by presenting all the concepts necessary for the construction of Galois Theory. This includes the study of finite groups, fields, and field extensions. Consideration is also given to various morphisms; as well a rings and integral domains. Some time is spent on classical algebra including exact solutions to the cubic and quartic polynomials. Prerequisite: MAT 607 or program chair's approval.

MAT 629 Non-Euclidean Geometry - 3 credits

Prerequisite: MAT 609. This course reviews a variety of approaches to the axiomatic developments of Euclidean plane geometry; followed by a treatment of non-Euclidean geometries, and the geometric properties of transformations, particularly isometries. Pre-practicum hours of directed field-based training required.

MAT 631 Calculus II - 3 credits

This course begins with a thorough review of the Calculus I. It then proceeds to cover integration techniques in some depth. This will include integration-by-parts, u-substitution, and trigonometric-substitution. Power series and their applications are covered as well. Prerequisite: MAT 611.

MAT 633 Probability and Statistics - 3 credits

Prerequisite: MAT 613. This course focuses on how probability and statistics can reveal a more complete picture of the world, by emphasizing concepts and applications from a wide range of fields. Major topics include: concept of sample space; descriptive measures; probability and sampling distributions; estimation and hypothesis testing; analysis of variance; correlational analysis; regression analysis; experimental design; modeling; and decision criteria. Pre-practicum hours of directed field-based training required.

MAT 635 Applied Mathematics - 3 credits

This course focuses on major areas of applied mathematics. This includes matrix theory, differential equations and Fourier analysis. Under matrix theory, linear transformations and diagonalization are covered in some depth, and the Cayley-Hamilton Theorem is proved. Under differential equations, linear versions are explored using an operator approach which motivates development and application of Laplace transforms. Finally we cover Fourier series after an advanced review of trigonometry. Prerequisites: MAT 611 and MAT631 or program chair's approval.

MAT 700 Inclusion in Math Class - 3 credits

Improving math instruction for students with disabilities: This course is designed to promote collaboration between mathematics and special educators to improve math instruction and outcomes for all students including students with disabilities. The course is intended to assist math instructors and special needs teachers by providing a structure for developing a shared vision, common language and foundational knowledge of mathematics instruction and the instructional needs of math students with disabilities. The course will focus on protocols developed as the result of a four-year collaboration between DESE Offices of Science, Technology, Engineering and Mathematics and the Special Education Planning and Policy at the Department of Elementary and Secondary Education, EDC and math and special educators from the districts participating in the Massachusetts Urban Math support Network. High quality core curriculum and instruction begins with the Mathematics Curriculum Frameworks. These protocols address the conceptual understandings and mathematical practices that are an essential part of rigorous math expectations for all students with disabilities when planning mathematics instruction, educators will be better able to address the needs of all learners.

MAT 708 Diagnosis & Remediation of Learning Problems in Mathematics (K-12) - 3 credits

This course examines the nature of mathematics learning, major types of mathematics learning problems, and their etiology. It discusses possible causes of these problems and suggests remediation strategies that teachers and parents can use to help children learn mathematics more effectively. Teachers focus on selected areas of mathematics at the K-8 levels that challenge children, and on how to remediate and facilitate mathematics learning in classroom and one-to-one settings.

MAT 791 Practicum Seminar: Mathematics - 2 credits

Practicum required concurrently: Exit Performance Portfolio required for credit. The seminar for classroom experience supports students' growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure.

MAT 794B Practicum: Mathematics Teaching (5-8) 300 Hours - 2 credits

Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all required mathematics courses and EME800; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students' growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 794C Practicum: Mathematics Teaching (8-12) 300 Hours - 2 credits

Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all required mathematics courses and EME800; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students' growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

School Nurse Education (ESN)

ESN 610 Principles of Health Promotion and Disease Prevention: Public Health Issues - 3 credits

School Nurses are key leaders in implementing national and state regulations that impact school wellness. In this course, students will explore the implementation of the Coordinated School Health Model to analyze policies and procedure in their schools that promote health issues and health practices to strengthen partnerships within the school community. Students will also investigate the relationship between public health and school settings in relation to meeting the needs of diverse student populations as well as investigating local and national funding opportunities available to support school wellness initiatives.

ESN 660 Principles, Process, and Practices of School Health Management - 3 credits

In this course, students will combine nursing theory and apply knowledge acquired in the practice setting. They will develop effective strategies using the nursing process to analyze the impact of significant medical, psychological, cultural and social problems on the population of school aged children. Consideration will be given to how the major cultural and societal issues affecting children impact the practice of nursing within the school practice setting. Students will engage in research from both a global and local perspective. Using the nursing process to define the issues, students will suggest effective short and long-term interventions, including public policy interventions to address these problems and devise an evaluation system that insures continued and progressive program improvement. In addition, students will become familiar with the eight major component categories of the Coordinated School Health Model and to recognize the importance of collaborating with professionals in other school service areas to provide effective and coordinated interventions aimed at individual children as well as the larger school population. The impact of school nursing services on student outcomes will be explored. Using the goals of "Healthy People 2020", students will analyze the relationship between specific data in relationship to the 2020 goals and design a health promotion/health education program to address the needs of a specific student population. Emphasis will be placed on the leadership role of nurses as they interact with other professionals and political leaders within their community and on the state and national level.

ESN 691 Professional Seminar I: School Nurse Education - 2 credit

Professional Seminar I (PSI) establishes a learning community that addresses the problems of isolation of school nurses, as well as, identification of the future mission of the profession. This seminar provides the context in which a cohort of students can interpret their experiences and transform them into knowledge, constructs, skills, attitudes and values. The seminar is a developmental process challenging students' existing philosophies and practices. The PSI is a model of support to students' personal and professional lives, where current personal and professional growth issues are raised and discussed. Learning is facilitated in a supportive, risk-free environment. With guidance of the seminar leader, students will define and clarify the final project design of the independent learning project (ILP) and develop an action plan to ensure satisfactory completion.

ESN 692 Professional Seminar II: School Nurse Education - 2 credits

Professional Seminar II (PS2) is conducted entirely online. It requires students to have and apply a consistently strong work ethic and a determined action plan for progressing according to the submission deadline schedule requirements established and provided to them during PS I. During PS2, students will be required to extend their ILP topic research to complete their literature review (minimum of 10 pages) to include a minimum of 10-12 scholarly sources, and to write their reference page. They will also be required to finalize and compose their methodology and design and create the body (stand-alone intervention or initiative) of their ILP during the PS2.

ESN 693 Professional Seminar III: School Nurse Education - 1 credit

Professional Seminar III (PS III), in addition to allowing students to complete the remaining portions of the ILP, including the statement of learning/summary and conclusions, appendices, abstract and table of contents, will allow students to develop an assessment plan to use in evaluating the effectiveness of their projects. The assessment plan will specify the goals of the ILP project and establish reasonable and measurable evaluative criteria based on those goals. Students will also design a timetable for implementing their projects, along with identifying key stakeholders, those individuals who would be expected to lend support to the project and a rationale behind their motivation for such support. Students will also identify any barriers/blocks in the form of policies, regulations, people, current cultural standards/practices and traditions; and fiscal, time and space constraints, that need to be anticipated to ensure their ILPs' success. Students will post their abstracts so that they can obtain feedback on their ILP projects from their nursing colleagues, allowing them to expand the impact of their projects beyond their own schools' communities.

ESN 710 Dealing with Grief & Loss: Role of Educators, Counselors, and Nurses - 3 credits

This course assists the professional school staff member in supporting students dealing with grief and loss. Course participants identify the issues that influence our society in dealing with grief and loss and recognize the physical, psychological, social and cultural manifestations of grief. Participants learn how our understanding of death and loss is influenced by developmental age, cultural and social factors. The course focuses on how issues of grief and loss are present in the school environment and explores approaches to help the students cope with loss in a variety of situations.

ESN 725 Legal Responsibilities & Ethical Issues for School Nurses - 3 credits

This course is an analysis of federal, state and municipal legal mandates which affect school health programs. It will include a review of professional standards and an examination of the ethics of care, advocacy, equity, confidentiality, responsibility, accountability, and other ethical issues, which affect the school health program, school children and their families, and the school nurse.

ESN 750 Evaluation of School Health Programs - 3 credits

Theory and practice of program evaluation with emphasis on how to focus an evaluation, design a program evaluation, use quantitative and qualitative methods in evaluation, assess program implementation, measure attitudes, measure performance and use tests, analyze data, and communicate evaluation findings. Special topics include needs assessment, cost-benefit analysis, and an introduction to grant and proposal development.

ESN 780 School Nurse Leadership in the School & Community - 3 credits

Overview of the professional roles of the school nurse. Introduction to leadership theory, process and outcomes with special emphasis on critical thinking, decision-making, and change. Examination of interdisciplinary initiatives within the school and community. Introduction to the National Association of School Nurses and state associations.

ESN 800 Independent Learning Project: School Nurse Education - 3 credits

The Independent Learning Project is a culminating learning experience that helps school nurse educators to integrate their personal and formal learning and their professional experiences into a meaningful whole. It articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the school nurse educator. It engages the student in sustained research into educational practice and curriculum development.

Science (ESE, SCI)

ESE 692 Professional Seminar II: General Science - 2 credits

Professional Seminar 2 will continue to be directed to best practices in inquiry-based science in the middle school setting, the design process, engineering standards engineering standards (the integration of life, earth and physical sciences to the art of problem solving / engineering). In addition new topics including mapping and navigation, the integration of the museum in the curriculum, science of the compass, use and fabrication of a clinometer, seismology and the appropriate use of current hands-on technology in the middle school classroom. Special attention will be directed to the pedagogy related to science teaching (the professional standards for teachers). Those standards as identified by the National Science Teaching Standards will be covered. ProSem 2 continues to guide the research and writing of the Independent Learning Project to completion.

ESE 800 Independent Learning Project: General Science - 3 credits

The Independent Learning Project is a culminating learning experience for students at Cambridge College. It helps students define, re-define, and address a problem in general science education at the grade (1-6) or (5-8) level. They develop a problem statement and proceed to use research skills: library resources, computer databases; planning and organization; consultation with experts in the field to solve the problem. The Professional Seminar provides a vehicle for the gradual development of thinking about prominent issues in the field that are of concern to students. Students, through reading and discussion, as well as practical experiences in the classroom and in the school, develop the theme of the ILP and questions which need to be answered. The ILP represents a tangible, symbolic culmination of the Cambridge College learning experiences. It demonstrates the ability to apply learning derived from course work, seminars and workshops to professional work in education. It is a marriage of theory and practice, original thought and focused research. The ILP requires students to create an original project which contributes to the body of knowledge on a topic and reflect on what they have learned from the entire experience. The project enables students to develop skills in time management, critical thinking and professional writing which they may not previously have had.

SCI 591 Introduction to Online Science Learning - 1 credit

This course introduces students to the principles of teaching and learning science as defined by the National Science Education Standards and the 2012 Framework for K-12 Science Education, and to the ways in which these principles can be implemented in an online environment. Students explore how online teaching and learning can capitalize on diverse learning styles and multiple intelligences. They assess their own experiences, abilities, learning styles and intelligences to evaluate the appropriateness of online learning in their own professional development. They analyze the standards which are used to guide instruction in their local districts and states, comparing them to the National Science Education Standards. Finally, they use the National Science Education Standards' vision of professional development to design their own plan for future professional growth including online learning where appropriate.

SCI 600 Cell Biology - 1 credit

This course examines the origin, evolution, fine structure and function of cells. Beginning with single celled organisms such as archaea and bacteria, the student looks at how cells conduct the processes necessary for life. Students examine the processes through which eukaryotic cells differentiate into tissues, organs and systems and review the basics of continuity and genetics. Enzyme function and physiology are linked to genes. Finally, students explore the future of cell biology.

SCI 601 Aquatic Ecology - 1 credit

Online course. This course leads teachers to investigate principles of ecology through examples from fresh water, marine, and other water environments. Content includes interactions among living organisms, energy flow within and among living communities, dynamics of adaptive evolution, and survival strategies. Week one focuses on the variety of water habitats from rain puddles to oceans. Week two examines adaptations of organisms for survival in water. Energy flow and interactive relationships among producers, consumers, and decomposers are featured in weeks three and four. The final course week considers the human impact on aquatic environments. Each course participant becomes an in-depth expert in at least one ecosystem.

SCI 603 Electricity and Magnetism - 1 credit

This course explores concepts in electricity and magnetism by addressing basic topics and fundamental misconceptions. Topics include electrostatic charging; charge separation and its role in electric pressure, current electricity, and the circuits through which it moves; Ohm's Law; schematic diagrams; and current that flows from wall outlets—all leading to exploration of the intimate relationship between magnetism and electricity.

SCI 605 Water Quality - 1 credit

The earth is covered with water, but the quantity available for use by earth's living inhabitants is limited. Natural and human impacts restrict our access to clean water. This course explores the factors that affect our water supply and solutions that may maintain it. Week one reviews the basic chemistry of water on earth, relating the effects of temperature, salinity, and climate to the availability of fresh water. Week two explores the sources of fresh water used by humans for their personal use, for industry, and for agriculture. In week three, the "water cycle" is examined, and human impacts are traced that can change the distribution and availability of water. Humans affect the quality of the water as well, and those effects are examined in week four. Week five investigates potential solutions that can preserve both the quantity and the quality of the fresh water on the planet for generations to come.

SCI 607 Structure of the Earth - 1 credit

Online course. This course examines the physical earth including its internal structure and the processes that make it an ever-changing place. Week one begins by looking at rock formation and its characteristics. The second week explores sedimentary, igneous and metamorphic processes and their contribution to the rock cycle. Week three takes a close-up look at constructive forces of earthquakes and volcanoes and at weathering, erosion, and other destructive forces that re-shape earth's surface. Finally, in week four, the learner digs deep into the inner depths of the planet to examine plate motion and plate tectonic theory and in week five a geological locale project pulls together greater understanding of the forces which help shape and drive our dynamic earth.

SCI 609 Transfer of Energy - 1 credit

Online course. This course focuses on the National Science Education Standards' approach to energy and its transformation between forms. Week one begins with common misconceptions in the types and characteristics of energy forms. Week two deals with the transformation of energy and applies this transfer to conservation of energy and fallacy of perpetual motion machines. Week three takes a close-up look at heat to explore the fundamentals of this energy form. Week four shifts focus to sound waves as pressure waves and light, both sun and man made, and a review of electromagnetic spectrum. Week five opens with Rube Goldberg machines, looking at energy transfer devices and energy usefulness and efficiency.

SCI 611 Ocean Science - 1 credit

The oceans dominate our planet, influencing every aspect of Earth's environment. This course reviews the physical science, geology, and biology of the oceans emphasizing a systemic approach. Week one reviews the basic geography and geology of the Earth's oceans and the forces that shape and propel ocean waters. Week two looks at the water in the ocean, its chemistry, and what is dissolved in it. The mysteries of the ocean depths are explored in week three, with investigations of how humans explore the world beneath the ocean surface. Week four examines the effect of Earth's oceans on climate and on the land. In week five, learners examine ocean life and investigate the effects of ocean environments on the living things within the water.

SCI 613 Earth's Place in the Universe - 1 credit

This course examines Earth from the perspective of its place in space, its movements and examines Earth's relationship to the sun and moon, its place in the solar system and beyond. The first week is an exploration of earth bound celestial observations and the origins of modern astronomy. The second week we examine the movement of the Earth within our solar system including a look at gravity and orbits. Week three features an in-depth look at the moon and its motion including eclipses, phases and tides. In week four we explore the sun and the reasons we have seasons on Earth. Our final week we look beyond our solar system to explore that Earth and its solar system are one of many in the Milky Way galaxy. The course is cross-disciplinary when appropriate and is especially designed for teachers who are currently teaching or who are preparing to teach courses in earth science.

SCI 615 Forces in Motion - 1 credit

Online course. Focusing on conceptual understanding, Week one introduces kinematics, the study of how things move on a straight path. Week two advances this understanding into accelerated motion and introduces inertia. During this week, gravity is introduced within a multi-disciplinary arena. Week three introduces dynamics, the study of forces and why things move, and looks at inertia, mass, and weight. Week four presents opportunities to measure forces and to examine their effects. Coverage includes Bernoulli's principles, friction, terminal velocity, and buoyancy. Week five explores the everyday world with its focus on mechanical advantage, work, and simple machines.

SCI 617 Earth's History - 1 credit

Online course. This course focuses on the basic geologic principles that have shaped the history of the earth, integrating thematic content in the life and earth sciences with a chronological approach. Week one sets the stage with a review of basic geological principles and field geology. Week two presents the earth's first billion years with the formation of the earth and moon. Reading the fossil record is covered in week three with evolution and extinction providing the major themes. The Proterozoic and Paleozoic eras are the focus of week four, and the Mesozoic and Cenozoic eras are covered in week five.

SCI 619 Teaching Project-Based Science - 1 credit

Online course. This course presents the advantages of project-based science, guidelines on how to succeed in using this instructional and assessment approach, and strategies for customizing for individual school settings. Week one presents comparisons between traditional and project-based science curriculum and includes management issues and requirements for student success. Week two deals with student projects that involve science, society and decision-making and connections to service learning. Assessment and evaluation of student projects are the focus of week three. In weeks four and five, teachers develop a unit of instruction for use with their own classes and to share with online colleagues.

SCI 627 Chemistry Through Inquiry - 1 credit

This course focuses on the national science education content standards for physical science and "science as inquiry". As teachers do hands-on science investigation, read science background, and participate in discussions, they will enhance their own science content knowledge and develop an inquiry-based approach to science learning.

SCI 629 Practical Meteorology - 1 credit

This course examines meteorology from a practical perspective. The course is cross-disciplinary when appropriate and is especially designed for educators who have degrees and backgrounds in sciences other than meteorology. The course combines technical explanations of weather and climate phenomena with practical guidelines for observing, evaluating and forecasting weather. The course content web pages are supplemented by images of weather phenomena, links to other web-based resources and self-directed reviews of literature on various weather and climate phenomena.

SCI 634 Computational Thinking: Data Structures and Algorithms - 3 credits

The content of this course focuses on basic and essential topics in data structures by covering the analysis and design of fundamental data structures. Activities engage students to use data structures as tools to algorithmically design efficient computer programs that will cope with the complexity of actual applications. Topics covered include array-based lists, linked lists, skip lists, hash tables, recursion, binary trees, scapegoat trees, red-black trees, heaps, sorting algorithms, and graphs.

SCI 635 Independent Learning Project: Digital Literacy and Computer Science - 1 credit

This optional Independent Learning Project is the culmination of the DLCS Program. The student chooses a very focused project that lends itself to the application of knowledge and skills learned throughout the DLCS Certificate Program. With the instructor's assistance and approval, the student develops a proposal plan that identifies and describes the project and establishes goals and outcomes. Example projects might include: creating digital literacy and computer science unit/lesson plans that incorporate MA DESE student standards, identifying a variety of digital tools and producing an online menu with instructions on how to use each tool, or developing a network security plan.

SCI 636 Computers, Software and Networks - 3 credits

This course covers the fundamentals of information systems: basic hardware components and system-oriented troubleshooting procedures, the structure or architecture of computers, operating systems, Internet, data communications, the software hierarchy from systems software to application programs, and information systems' development life cycle. The course also focuses on the use and application of typical software packages including word processing, spreadsheets, databases and presentation graphics.

SCI 637 Computer and Society - 3 credits

This course examines the role and impact of computers, information and assistive technology in our daily lives, business, education, entertainment and study. Topics include: the use of the Internet and WWW as a research and information-sharing resource, digital literacy standards and skills, and the digital tools, resources, and computing devices used to create an artifact, solve a problem, communicate, publish online or accomplish a real-world task. The personal, professional, and corporate ethical and legal issues that arise in a computing context are also considered.

SCI 638 Computer Programming - 3 credits

This course builds on the concepts introduced in previous courses and shows how to use various language constructs to develop code and solve problems using a hands-on approach. For each topic, students are expected to design, write, and analyze code corresponding to that topic and reflect on their programming efforts as a way to increase their problem solving and critical analysis skills.

SCI 640 Network Security and Safety - 3 credits

This course covers network vulnerabilities and safety issues such as peer pressure and cyber bullying as well as important concepts and technologies that address the risky computer and network environment. It details cryptographic tools and algorithms, authentication and access control schemes and protocols, systems that can be used to secure computers and networks, and the security of these systems. The course also deals with management issues around computer and network security, recovery strategies and using outsourcing services with respect to function and quality. Students learn to use a variety of tools and systems that can be used in security assessment, intrusion detection, information protection, digital forensics, and system recovery.

SCI 680 Attaining Science Literacy - 3 credits

This course addresses science literacy by (1) examining the development of the knowledge and skills needed to understand the natural world and to intelligently participate in decisions that affect it, (2) considering science as a way of knowing and as a basis for thinking and problem-solving, and (3) reviewing strategies for promoting science literacy in school programs. Course content includes practical and theoretical constructs with emphasis on connecting theory to practice, applying conceptual understandings to individual teaching settings, and developing skills for independent professional development and scholarship. Pre-practicum hours of directed field-based training required.

SCI 682 Methods and Materials for Teaching Life Science - 3 credits

Educators will develop competency in the skills and methods used in the teaching of natural science. Basic concepts in chemistry, biology, and ecology will be illustrated with applications suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experiences that help their students construct understandings in these areas. Pre-practicum hours of directed field-based training required.

SCI 684 Methods and Materials for Teaching Earth Science - 3 credits

Educators will develop competency in the skills and methods used in the teaching of earth science. Basic concepts in astronomy, geology, geography, and paleontology will be illustrated with applications suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experience that help their students construct understanding in these areas. Pre-practicum hours of directed field-based training required.

SCI 686 Methods and Materials for Teaching Physical Science - 3 credits

Educators will develop competency in the skills and methods used in the teaching of physical science. Basic concepts in matter and energy will be illustrated and supplemented with a rich assortment of activities suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experiences that best help their students construct understandings in these areas. Attention will be given to the construction and understanding of inquiry skills as they apply to traditional classroom experiments and activities. Pre-practicum hours of directed field-based training required.

SCI 688 Methods and Materials in Teaching Middle School Chemistry - 3 credits

Seated course: This course will focus on providing middle school science teachers with a clear understanding of scientific inquiry and basic chemistry concepts. Grade level appropriate activities will be highlighted with special consideration for the middle school classroom environment and safety issues. Fundamental chemistry concepts discussed and reinforced with experimentation will include: physical properties and physical change, states of matter, density, solutions, mixtures, compounds, chemical change and the applications of elements to technology. This will be a lab-centered course. Pre-practicum hours of directed field-based training required.

SCI 689 Teaching Elementary/Early Childhood Science and Technology with Integration of Mathematics, Special Needs and EL - 1 credit

This course provides the knowledge, tools and methods for making early childhood and elementary science an exciting, hands-on learning experience for children. The framework for this course is based on the Massachusetts Frameworks for Science Technology Standards (2013) for Elementary Classroom Educators. The integration of mathematics and science will receive special focus. Participants will learn how to utilize science and math tools of the trade in solving simple scientific problems. In addition to providing teachers with essential science content, suggestions for providing meaningful, science learning opportunities for students with moderate special needs and English Language Learners will be addressed.

SCI 690 Teaching Engineering and Technology – 2 credits

This course is designed to support the 2017 Massachusetts Science/Technology and Engineering Standards, specifically aligned to the Technology and Engineering Standards. Students will be instructed utilizing best practices in engineering design processes, material, tools and manufacturing and technological systems at the intermediate level of understanding. Special focus will be directed in the integration of life, earth and physical sciences as they are used to solve problems and challenges in the field of engineering.

SCI 692 Logistics of Teaching Science – 2 credits

This course is designed to provide the elementary science specialist (1-6) and the middle school science teacher (5-8) with the specialized skill set to meet the Massachusetts Professional Standards for Teachers, science safety standards, lab/classroom set-up and design, and management of science equipment. Students will also be guided in the opening of an electronic portfolio system (TaskStream) that will capture all of their academic and licensure requirements as highly qualified science teachers.

SCI 791 Practicum Seminar: General Science (1-6) (5-8) - 2 credits

The seminar for classroom experience supports students' growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks for Science/Engineering Technology, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. The Next Generation of Science Standards reflecting the national science initiatives is also referenced as a guide to best practices in science education. As evidence of the Practicum experience, each student will develop an Exit Portfolio as an integral part of the Practicum Seminar. The Exit Portfolio will be contained and uploaded to a web-based evaluation program called Task Stream. Each student will open their own Task Stream account and contribute the necessary academic artifacts and evidence that demonstrates their competency as they complete their fieldwork experience in the science classroom. The artifacts and evidence can be viewed in Task Stream.

SCI 794A Practicum General Science 1-6 - 2 credits

300 hours, levels 5-8. Prerequisites: complete pre-practicum with 75 or more hours of directed field-based training in conjunction with selected courses, pass all required courses, pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: ESE790. The practicum, required for all concentrations that lead to Massachusetts initial licensure, must be completed in a school that uses the Massachusetts Curriculum Frameworks and Next Generation of Science Standards (NGSS). Practicum hours must be in the role and at the level of the license sought under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers with an opportunity to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. This Practicum experience is geared primarily for those teachers seeking the position of middle school science/engineering technology instructor". The content delivery within this experience is aligned to the Next Generation of Science Standards at the 5-8 level of comprehension. Students work with the guidance and support of experienced science teachers and by observing their instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, align lesson plans with the Massachusetts Curriculum Frameworks/NGSS, appropriate curriculum materials for the science teacher, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences. The Exit Performance Portfolio and its artifacts will be uploaded to a web-based portfolio system/Task Stream. (3 formal assessment observations required by College supervisor)

SCI 794B Practicum General Science 5-8 - 2 credits

300 hours, levels 5-8. Prerequisites: complete pre-practicum with 75 or more hours of directed field-based training in conjunction with selected courses, pass all required courses, pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: ESE790. The practicum, required for all concentrations that lead to Massachusetts initial licensure, must be completed in a school that uses the Massachusetts Curriculum Frameworks and Next Generation of Science Standards (NGSS). Practicum hours must be in the role and at the level of the license sought under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers with an opportunity to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. This Practicum experience is geared primarily for those teachers seeking the position of middle school science/engineering technology instructor". The content delivery within this experience is aligned to the Next Generation of Science Standards at the 5-8 level of comprehension. Students work with the guidance and support of experienced science teachers and by observing their instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, align lesson plans with the Massachusetts Curriculum Frameworks/NGSS, appropriate curriculum materials for the science teacher, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences. The Exit Performance Portfolio and its artifacts will be uploaded to a web-based portfolio system/Task Stream. (3 formal assessment observations required by College supervisor)

SCI 608 National Science Teachers Association Convention Graduate Professional Development - 1 credit

This is a professional development course that provides the 2020 NSTA National Conference attendee the ability to gain one graduate credit for their in-depth participation in relevant science content conference sessions during the convention. Participants will be required to engage in a minimum of eight (8) hours of science professional development presentations.

Sheltered English Immersion (SEI)

SEI 605 SEI (Sheltered English Immersion) Content License Endorsement Course - 3 credits

This Sheltered English Immersion (SEI) Content License Endorsement Course is designed for educator licensure candidates in all core academic areas, to prepare them to address the needs, and build on the multilingual and multicultural assets, of a diverse and ever-changing student population in Massachusetts. The course is a key element of the Massachusetts RETELL initiative (Rethinking Equity and Teaching for English Language Learners). RETELL also includes statewide implementation of the WIDA ELD (English Language Development) standards, and the WIDA-ACCESS assessment tools.

Participants will be introduced to ELD standard and WIDA tools, and will practice applying research-based SEI instructional strategies as they teach their content to English Learners (ELs). They will also be introduced to a variety of professional growth opportunities to prepare them to extend their learning by making SEI the focus of professional practice within the new educator evaluation process.

SEI 705 Supervision of Sheltered English Immersion Instruction for Administrators - 2 credits

Participants in the Cambridge College Administrator License program will be prepared to effectively serve English language learner students (ELs). Participating students will be knowledgeable and able to administer, supervise and promote effective classroom strategies that maximize learning for ELs. Participants in the Cambridge College Administrator License program will evidence an understanding of major trends in the twenty-first century language teaching and recognize the domains of listening, speaking, reading, writing and form focused instruction (grammar) for ELs.

Special Education (ESP)

ESP 500 Advanced Applied Behavior Analysis Seminar- 1 credit

This course will provide students with supplemental learning material to accompany Advanced Applied Behavior Analysis (ESP 726). Reviews and expands upon course topics (e.g. functional assessment, procedures to decrease problem behavior and increase adaptive behavior, generalization of behavior) through brief behavior analytic readings, group discussion, question and answer sessions, and brief written assignments. The purpose of this course is to assist students in gaining further understanding and clarification of the key concepts in Applied Behavior analysis (ABA) presented in ESP 726.

ESP 510 Introduction to Applied Behavior Analysis (ABA) - 1 credit

This is a 1-credit overview of the discipline of Applied Behavior Analysis (ABA) as it applies to the treatment of autism and other developmental and intellectual challenges. The course will serve as an introduction to the ABA program for those new to the field. The focus of the course will be on establishing an understanding of basic terms and definitions that are critical concepts in the discipline and essential to successful participation in the program. This course must be taken prior to ESP 622.

ESP 512 Inclusion and Classroom Behavior Management - 3 credits

In this course students learn the basic components of an effective inclusionary program. They acquire knowledge of the etiology of learning problems and specific techniques to fully include special education students into the regular classroom. Course assignments connect theories to classroom practice. Emphasis is on learning behavior management skills that are effective with both regular and special education students. Pre-practicum hours of directed field-based training required.

ESP 592 Adapting Materials for Students W/Disabilities in Gen Ed Classrooms - 1 credit

In this course students adapt materials and modify curriculum to meet students' Individual Education Programs (IEP). Models of inclusion and teaching techniques for students with disabilities in general education classrooms are explored. Students examine academic interventions in mathematics, reading and writing and develop strategies to increase participation of their students in inclusive classrooms by acquiring teaching strategies to create a positive learning environment. They design reasonable classroom accommodations, identify realistic alternatives, propose classroom management techniques, routines and rituals to promote positive behavior, and adapt assessments to meet learners' diverse needs. Students demonstrate understanding through case study analysis and lesson presentation.

ESP 594 Collaboration and Consultation Techniques - 2 credits

The course explores the concept of school and community working together as partners to support each other in a strong coalition. A school district serves several smaller communities in one, and rarely does a community act as a single entity. To establish and sustain community and school linkage is critical to an effective partnership. The course explores the core mission of public schools and creates an environment that helps young people learn and achieve at high standards. The community school approach supports young people's academic, social, and interpersonal goals by creating an effective learning atmosphere. Schools are a microcosm of societal values and community philosophy that daily affects students' lives. The power structure of a community — its formal and informal networks and the people in them — that makes things happen is studied.

ESP 600 Treating Children with Language Delays - 2 credits

Key techniques to treat children with language delays will be presented along with instructional strategies that enhance communication skills. Approaches such as joint attention skills, turn taking, language stimulation, and play skills will be explored. Since families and care givers play a primary role in a child's language development, ways to involve and provide assistance to these important adults will be emphasized.

ESP 601 Typical Development of Language and Communication Skills - 2 credits

Theories of language development and the communication process will be explored. A focus on typical language growth and development in children birth to five years of age will correlate with techniques designed to facilitate acquisition of language skills. Milestones such as language form, language content and language use will be discovered and analyzed through observing and listening to young children.

Puerto Rico only**ESP 602 Teaching Numerical & Geometrical Structures for Special Education K-12 Students**

This course is designed to cover the basic foundation of the mathematics curriculum in terms of its numerical and geometrics structures for special education students in Puerto Rico. Major topics include: number sense, numeration, estimation, mental math, modeling operations using concrete objects, geometry, spatial sense and measurement.

ESP 607 Psycho-Educational Assessment for Teaching Exceptional Students - 3 credits

This course prepares candidates to assess various educational test instruments, understand outcome data, analyze various data sets and make hypotheses, and formulate academic goals and objectives. Candidates develop a conceptual framework to understand student's academic needs and develop appropriate interventions based upon testing outcome data. Test construction is introduced for evaluating various assessment instruments and the appropriateness of their use. Students utilize formal and informal assessments, standardized instrumentation, and screening instrumentation to gather data and formulate appropriate interventions and accommodations for various educational plans. Specific practices include formative assessment, academic feedback, and questioning. Pre-practicum hours of directed field-based training required.

ESP 610 Autism: History, Prevalence, Diagnosis and Characteristics - 3 credits

This course examines current research and theoretical models that focus on typical and atypical development of children. Emphasis is on understanding the child with autism in terms of psychological, intellectual, social, and physical development. The historical problem of biological versus psychological causation of autism will be examined along with trends in autism research that continue to this day. This course will focus on autism as a neurological developmental disorder characterized by an impairment in social interaction, communication skills, and in behavior. Autism is acknowledged as a "spectrum" disorder meaning that children with autism may range from extremely low cognitively to highly intelligent with little or no language to communicate to being highly verbal. The cause(s) of autism is not known at this time, with 9 out of 10, for whom the cause is idiopathic. Autism Spectrum Disorder is the fastest growing developmental disability with 1 in 150 children now being diagnosed with autism. It is more common than Cerebral Palsy, Down Syndrome, and Childhood cancers combined.

ESP 615 Assistive Technology: Modifying the Curriculum for Diverse Learners - 3 credits

How do we as educators implement the mandated requirements of the Individuals with Disabilities Education Act that calls for assistive technology to be considered in each Individualized Education Program (IEP)? Candidates examine assistive technologies and the federal laws impacting the education of students with disabilities and investigate assistive technologies addressing seating and positioning, access to the technology, augmentative and alternative communication (low-tech and high-tech). Candidates examine curriculum modifications using technology, and software that addresses these modifications and individual learning styles. The course provides a comprehensive understanding of the various augmentative and alternative communications (AAC) methodologies, including the appropriate use of aids and devices. Course assignments connect assistive technologies to classroom practice.

ESP 616 Communication Disorders - ASD - 3 credits

Communication-based disabilities are a diagnosing criteria of Autism spectrum disorders, diagnoses with similar characteristics, and are commonly seen in severe levels of developmental delay. Not only do communication difficulties greatly impact life-long educational, social, and vocational opportunities, they are closely associated with the presence of challenging behaviors such as aggression and self-injury. Following a review of typical and atypical language development, physiological, environmental, and psychological theories of language development will be presented. This course will examine criterion-based and peer-normed communication assessments, effective language-based teaching strategies for children with severe disabilities, and alternative communication forms such as picture exchange communication system, sign language, and other non-vocal communication systems. In addition, students will be introduced to the following: Provision of family-centered services; impact of culture on work with individuals with disabilities and their families; and recommended practices/framework for assessment and facilitation of communication for individuals with ASD.

ESP 621 Assessment and Appraisal Process -ASD - 3 credits

Effective instruction is difficult to implement in the absence of effective assessment and appraisal data. The goal of this course is to introduce candidates to several educational and functional assessments that are frequently used to establish skill strengths and deficits in children with autism spectrum disorders and diagnoses with similar characteristics. Such tools as the Psycho-educational Profile, 3rd edition (PEP-111), Assessment of Basic Language and Learning Skills Revised (ABLLS-R), and the Vineland Adaptive Behavior Scales, classroom edition, will be reviewed and interpreted. Along with an emphasis on these assessments, this course will stress considerations of student specific goals including variables such as, needs in the home setting, activities of daily living, vocational training, and an independent and self determined adult life.

ESP 625 Behavior Management - ASD - 3 credits

Individuals diagnosed with autism spectrum disorders and diagnoses with similar characteristics frequently manifest challenging behaviors that inhibit learning and access to many life long opportunities. This course will introduce students to the functional behavior assessment (FBA) process and intervention through the use of positive behavior intervention and support (PBIS). The dynamic intervention formats utilize the scientifically supported techniques of PBIS across a three tier level of need that includes school wide support, secondary support for at – risk students, and individual interventions. Individual interventions will be developed utilizing the principles of applied behavior analysis (ABA). The course will emphasize the use of least restrictive, non-aversive, researched supported techniques that take into account a whole child perspective, intervention for teaching functional equivalent skill deficits, increasing appropriate behavior, and decreasing challenging behaviors.

ESP 630 Social and Psychological Perspectives in Autism Spectrum Disorders - 3 credits

Social deficits are one of the defining characteristics of autism, including Asperger's syndrome, and most are almost always associated with other autism spectrum disorders and similar diagnoses. This course will introduce candidates to social skills intervention through a whole family approach focusing on both students with deficits associated with global delay as well as higher functioning students who demonstrate deficits primarily or exclusively in the area of social skills. This class will take into account the needs of not only the student, but also the siblings, parents, separated parents, extended family relationships, household economic needs, and culturally specific variables that make up the landscape of the dynamic American family.

ESP 635 Teaching and Curriculum Development/Students with Severe Disabilities - 3 credits

This course will emphasize diagnosis, assessment and best educational practices in teaching persons who are diagnosed with severe intellectual disabilities, multi handicaps and autism. A focus on legal provisions, regulations and program standards in unbiased assessment as well as work on specialized terminology used in assessment of this special population will be noted. A special focus on the Massachusetts Alternate Assessment preparation will be developed. Adaptive behavior scales will be discussed. Students will be apprised of the specialized policies regarding students with extensive disabilities concerning referral and placement procedures.

ESP 636 Teaching, Social Science, History and Multicultural Education in Grades 5-12 - 3 credits

This course prepares candidates to co-teach and consult with general educators in the area of social studies. Topics investigated are taken from the Massachusetts Curriculum Frameworks/Common Core in history and social studies. Candidates produce and implement well-structured lessons that center on core disciplinary ideas in the K-12 social studies curriculum, utilize primary source materials, and reflect knowledge of formative assessment, differentiated instruction, cooperative learning, and the role of academic feedback, and questioning to support higher-order thinking.

ESP 662 Principles of Language Development Bridging Differences and Disorders- 3 credits

Language acquisition is one of the most important domains within the sciences of the mind. Developments in cognitive neuroscience have made it evident that language has constant neural reorganization. Students develop an overview of the course of language development, biological foundations for language, the major linguistic systems individuals must acquire, and finally the methods of study for language development. Theories of first and second language acquisition and development are introduced. Candidates examine different theories of semantic development, phonological development, morphological development and syntax. Students come to understand the relationship between language acquisition, language impairment, and treatments of children with learning differences including dyslexia as well as other communicative disabilities are also discussed. Pre-practicum hours of directed field-based training required.

Puerto Rico only**ESP 662R Principles of Spanish Language Development Bridging Differences and Disorders- 3 credits**

Language acquisition is one of the most important domains within the sciences of the mind. Developments in cognitive neuroscience have made it evident that language has constant neural reorganization. Students develop an overview of the course of language development, biological foundations for language, the major linguistic systems individuals must acquire, and finally the methods of study for language development. Theories of first and second language acquisition and development are introduced. Candidates examine different theories of semantic development, phonological development, morphological development and syntax. Students come to understand the relationship between language acquisition, language impairment, and treatments of children with learning differences including dyslexia as well as other communicative disabilities are also discussed.

ESP 680 Pedagogy in Reading and English Language Arts - 3 credits

In this course students acquire knowledge of scientifically-based reading instruction. Topics include: oral language development, explicit systematic and sequential instruction in phonological processing and phonemic awareness, phonics instruction, spelling; fluency, comprehension; vocabulary instruction to include morphology, grammar/syntax. Candidates implement well-structured lessons that reflect knowledge of the essential elements of scientifically-based reading instruction, formative assessment, differentiated instruction, cooperative learning, and the role of academic feedback, and questioning to support higher-order thinking. Pre-practicum hours of directed field-based training required.

Puerto Rico only

ESP 681 Pedagogy in Reading & Spanish Language Arts - 3 credits

The course is designed to develop a thorough understanding of the Fundamental principles of Spanish/Language Arts, focusing on the interrelationship of reading, writing, speaking, and listening. The course focuses on the student as learner, and the processes involved in content reading and literacy. There is a direct correlation between the growing social and cultural diversity in today's classrooms and the tie to information on literacy. Since high levels of literacy are expected in today's contemporary society, children and families need to expand literacy activities to provide a range of options available to them in work and life. Diagnostic tools and classroom techniques for assessing, decoding, encoding, comprehension, literacy, and fluency skills are explored, along with related theories and research, and developmentally appropriate practices. The language arts are incomplete without making connections to all parts of the curriculum. Children require dynamic role models to emulate so that they are apprenticed into literate behavior. A variety of reading programs are discussed and researched, including philosophy, teaching techniques and materials. Information on how to plan and implement instruction in content area classrooms is included. Frameworks are provided for teaching and learning subject matter and planning lessons.

ESP 689 Theories of Typical and Atypical Human Development - 3 credits

This course examines current research and theoretical models that focus on typical and atypical development of children. Emphasis is on understanding children's psychological, intellectual, physical and socio-emotional development. Piaget's theory of cognitive development is examined along with recent investigations and adaptations. Theories of the role of context (physical, social and cultural impacts on development) are compared. The impact of developmental theories on the education of children with disabilities is examined. Formulation of a developmentally appropriate Individual Educational Plan is required. Pre-practicum hours required.

ESP 691S Professional Seminar I: ASD - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students' academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects. The first semester emphasizes the development of leadership and human relationships, and the impact for the special educator with an emphasis on understanding the most recent literature and findings on the autism spectrum. Students become aware of prevalent and current learning theories. There is an emphasis on the adult learner as a teacher. Discussion focuses on the growth and development of the professional, the functioning of organizations, the study of organizational behavior, and how special education, in particular, students with ASD "fit" within the organizational structure of the education system.

ESP 692 Professional Seminar II: Special Education - 2 credits

In this second professional seminar students continue their study of the areas of instructional performance to be demonstrated by all teacher candidates seeking license to teach in our public schools and the knowledge and skills requirements specific to the field and level of licensure. Research-based instructional practices that correlate with student learning gains across the content areas are examined. Instructional practices specific to their chosen discipline of study are also examined. An in-class lesson implementation is required. Students gather data related to the Independent Learning Project (ILP). A subscription to TaskStream is required.

ESP 692N Professional Seminar II: Special Education (Initial) - 2 credits

In this second professional seminar students continue their study of the areas of instructional performance to be demonstrated by all teacher candidates seeking license to teach in our public schools and the knowledge and skills requirements specific to the field and level of licensure. Research-based instructional practices that correlate with student learning gains across the content areas are examined. Instructional practices specific to their chosen discipline of study are also examined. An in-class lesson implementation is required. Students gather data related to the Independent Learning Project (ILP). A subscription to TaskStream is required.

ESP 692S Professional Seminar II: ASD - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students' academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects. The first semester emphasizes the development of leadership and human relationships, and the impact for the special educator with an emphasis on understanding the most recent literature and findings on the autism spectrum. Students become aware of prevalent and current learning theories. There is an emphasis on the adult learner as a teacher. Discussion focuses on the growth and development of the professional, the functioning of organizations, the study of organizational behavior, and how special education, in particular, students with ASD "fit" within the organizational structure of the education system.

ESP 693 Professional Seminar III: Special Education (Initial) - 2 credits

Additional term of professional seminar that may be required depending on student's experience and progress.

ESP 693N Professional Seminar III: Special Education (Initial) - 2 credits

Additional term of professional seminar that may be required depending on student's experience and progress.

ESP 693S Professional Seminar III: ASD - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students' academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects. The first semester emphasizes the development of leadership and human relationships, and the impact for the special educator with an emphasis on understanding the most recent literature and findings on the autism spectrum. Students become aware of prevalent and current learning theories. There is an emphasis on the adult learner as a teacher. Discussion focuses on the growth and development of the professional, the functioning of organizations, the study of organizational behavior, and how special education, in particular, students with ASD "fit" within the organizational structure of the education system.

ESP 695 Laws and Regulations Pertaining to Special Education - 3 credits

This course will review all special education laws (IDEIA, 2004, and specific regulations such as 34 C.F.R. 300; 603 CMR 28:00) regarding the pre-referral and referral of a student, and the development of an Individual Education Plan (IEP). Additionally, the course will discuss the relevance of Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA, 1990), the Family Education Rights and Privacy Act (FERPA), the Omnibus Autism Act of 2016, An Act Relative to Insurance Coverage for Autism (ARICA) of 2011 and the 2006 Autism IEP Act as well as the procedures for Special Education Appeals relating to public schools' obligations to provide Free and Appropriate Public Education (FAPE) for students with disabilities. An additional emphasis in this course will be on students with a diagnosis of Autism and developing IEPs for these students in the Least Restrictive Environment (LRE), using theories and strategies for including students in general education classrooms. Special attention shall be paid to legislation governing special education. Pre-practicum hours of directed field-based training required.

ESP 700 Systematic View of Supervision and Management in ABA - 3 credits

Fulfilling the need of BACB 5th Task List requirement, *Personnel Supervision and Management*, and partial *Behavior Assessments, Behavior-Change Procedures, and Selecting and Implementing Interventions* task items are as follows:

- F-2 Determine the need for behavior-analytic service.
- G-19 Use contingency contracting.
- H-9 Collaborate with others who support and/or provide services to clients.
- I-1 State the reasons for using behavior-analytic supervision and the potential risks of ineffective supervision (e.g., poor client outcomes, poor supervisee performance).
- I-2 Establish clear performance expectations for the supervisor and supervisee.
- I-3 Select supervision goals based on an assessment of the supervisee's skills.
- I-4 Train personnel to competently perform assessment and intervention procedures.
- I-5 use performance monitoring, feedback, and reinforcement systems.

- I-6 Use a functional assessment approach (e.g., performance diagnostics) to identify variables affecting personnel performance.
 - I-7 Use function-based strategies to improve personnel performance.
 - I-8 Evaluate the effects of supervision (e.g., on client outcomes, on supervisee repertoires).
- Prerequisites/Co-requisites: ESP622, ESP704, ESP722, ESP723, ESP724, ESP726.

ESP 701 Students with Disabilities and Visual Arts - 3 credits

This course is for teachers who work with students with special needs. It focuses on how they can use the visual arts as an innovative approach to facilitate their students' learning and understanding. Teachers explore how the visual arts can accommodate different learning styles by providing alternative entry points in which to learn and understand the required curricula. This approach incorporates the theory of multiple intelligences. Teachers develop an understanding of how the visual arts can help motivate students to learn, foster self-esteem and self-expression, develop motor coordination skills and enhance social skills. This is a hands-on class in which teachers become familiar with a variety of art materials, for example clay, paints, pastels, charcoal, and simple print-making techniques. They also gain a basic understanding of the principles of art history. They learn how to develop lessons and alternative assessment instruments that incorporate the visual arts. A visit to the Fogg Museum is included.

ESP 702 Applications of Applied Behavior Analysis in Multiple Settings - 3 credits

This course focuses on the application of applied behavior analysis in multiple settings. The applications of principles of applied behavior analysis in educational, clinical, and home-based settings will be examined and the unique issues presented in these contexts will be reviewed and discussed. These include functional behavior assessments, ethics of practice, and use of treatment methodologies, staff/parent training, and applied behavior analysis in the public school settings. Current developments in ABA, behavior change strategies and generalization are also addressed.

ESP 705 ABA Fluency Seminar - 1 credit

This one-credit course is designed to strengthen students' ability to demonstrate key core knowledge competencies in the field of applied behavior analysis. During the course of the semester students will engage in a number of fluency based instructional activities that will enable them to demonstrate knowledge in all of the BCBA task list content areas. Students will be required to practice these skills both during class sessions and via software specifically designed to support fluency training and competence demonstration. Students must demonstrate proficiency in each of the task list content areas in order to successfully pass this course.

ESP 706 Research Design in Applied Behavior Analysis - 3 credits

This course focuses on single-subject experimental designs and human behavior. The students will learn about the characteristics of science and the rationale for having behavior as a focus. The student will be exposed to different issues related to measurement, specific research designs, and important issues, such as variability, associated with the designs. How to accurately interpret research data from a variety of research experiments will also be discussed. The student will also learn about the ethical standards and guidelines that professionals in the field of applied behavior analysis must follow when working with humans. This course provides credit hours toward education qualifications required to sit for the behavior analysis certification exam.

ESP 710 Introduction to Applied Behavior Analysis - ABA I - 4 credits

The course introduces the science of behavior analysis, and the basic concepts and principles of behavior analysis (e.g., reinforcement, punishment). It includes the philosophical underpinnings of the science of behavior analysis including goals, philosophical assumptions, dimensions of applied behavior analysis, radical behaviorism, experimental analysis of behavior, and professional practice guided by applied behavior analysis. This course is a prerequisite for all other ABA courses in the sequence. The course will provide credit hours towards eligibility for the behavior analysis certification examination.

ESP 716 Behavior Assessment in ABA - 3 credits

This course focuses on assessment in Applied Behavior Analysis in a variety of settings. This course has a strong concentration on Functional Assessment (both informal and systemic manipulations - Functional Analyses) and the development of behavioral support plans based upon the results of assessment of function. Specific strategies for accelerating and decelerating behaviors as well as generalization will be reviewed. Discussion on preference assessments, assessments of relevant strengths and deficits, as well as determining the need for behavior analytic services will occur.

ESP 717 Advanced Applied Behavior Analysis - ABA II - 4 credits

This course reviews the basic concepts and principles of applied behavior analysis (ABA) and expands upon the knowledge learned in Introduction to Applied Behavior Analysis (ABA I). The course will focus on important concepts and principles in applied behavior analysis; including defining and describing principles. Applied examples from existing research will be reviewed and assignments will be completed in which the students must apply concepts and principles to hypothetical case studies, scenarios, or individuals the student is currently serving and provides examples of the principle or concept. The course provides credit hours towards eligibility for the behavior analysis certification examination.

ESP 718 Ethics and Professionalism in Applied Behavior Analysis

This course prepares students for the ethical and professional practice of Applied Behavior Analysis. Students will learn the importance of ethical conduct as it relates to the professional practice of tasks identified in the Fifth Edition Task List. Students will learn about the foundations of ethical and professional behavior to endure a high quality of practice in both behavior analysis and education in general. The Behavior Analyst Certification Board (BACB) Professional and Ethical Code for Behavior Analysts will be reviewed and discussed in detail. This course provides credit hours towards eligibility for the behavior analysis certification examination.

ESP 721 Using Multiple Intelligences and Accelerated Learning in Teaching English Language Arts, Math, History and Science - 3 credits

Special education teachers learn to apply multiple intelligence and accelerated learning instructional strategies in teaching to the content area standards. Teachers get an overview of Howard Gardner's multiple intelligence theory and its implications. They also experience Lozanov's accelerated learning structures and translation to brain-based teaching. Teachers learn to select, evaluate, and use teaching and assessment differentiation strategies to meet the needs of special education students in regular education classrooms. They design multiple intelligence and accelerated learning lessons to engage students in acquiring specific knowledge and skills.

Puerto Rico only

ESP 721R Teaching Spanish Language Arts, Math, History and Science for K-12 Special Education Students - 3 credits

Special education teachers learn to apply multiple intelligence and accelerated learning instructional strategies in teaching to the content area standards. Teachers get an overview of Howard Gardner's multiple intelligence theory and its implications. They also experience Lozanov's accelerated learning structures and translation to brain-based teaching. Teachers learn to select, evaluate, and use teaching and assessment differentiation strategies to meet the needs of special education students in regular education classrooms. They design multiple intelligence and accelerated learning lessons to engage students in acquiring specific knowledge and skills.

ESP 794A Practicum: Special Education (PreK-8) 300 hours - 2 credits

14-week supervised field experience of a minimum of 300 hours in which candidates demonstrate proficiency in meeting the Professional Standards for Teachers. The practicum must meet the hours and setting requirements for the license sought, under the guidance of a supervising practitioner with the appropriate license, with Cambridge College supervision. Assessment follows the Candidate Assessment of Performance (CAP) and assesses ability with respect to: well-structured lessons, high expectations, meeting diverse needs, adjustment to practice, safe learning environment, professional culture/reflective practice, as well as formative assessment, differentiation and providing academic feedback. Artifacts are uploaded into an Exit Portfolio. An Application to Practicum is required.

ESP 794B Practicum: Special Education (5-12) 300 hours - 2 credits

14-week supervised field experience of a minimum of 300 hours in which candidates demonstrate proficiency in meeting the Professional Standards for Teachers. The practicum must meet the hours and setting requirements for the license sought, under the guidance of a supervising practitioner with the appropriate license, with Cambridge College supervision. Assessment follows the Candidate Assessment of Performance (CAP) and assesses ability with respect to: well-structured lessons, high expectations, meeting diverse needs, adjustment to practice, safe learning environment, professional culture/reflective practice, as well as formative assessment, differentiation and providing academic feedback. Artifacts are uploaded into an Exit Portfolio. An Application to Practicum is required.

ESP 791 Practicum Seminar: Special Education - 2 credits

Practicum required concurrently. The seminar, based on the Professional Standards for Teachers in Massachusetts and those of the Council for Exceptional Children (CEC), provides opportunities for classroom experience and supports students' growth as they assume the teaching role. Candidates receive feedback on lesson plans, and develop instructional practice by analyzing case studies, engaging in role play and viewing of instructor-selected video tapes that depict examples of practice. Candidates upload required key assessments into an Exit Portfolio in TaskStream.

ESP 800 Independent Learning Project: Special Education - 3 credits

The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for teachers of students with moderate disabilities and articulates the individual's educational and administrative philosophy. The project is research and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.

ESP 800B Supervised Learning Project - 2 credits

The Supervised Learning Project is a culminating learning experience that helps educators/behavior analysts integrate their personal and formal learning, along with their extensive field work into a meaningful whole. Students will integrate their experiences into a field-based research document which reflects the area of study and of licensure. It is project-based and is combined with a poster demonstration.

Electives Offered in the School of Education (EDU, EED, ENG, EIT, etc.)

General Educational Studies

EDU 612 From Writing to Reading - 3 credits

This introductory course gives an overview of basic perspectives on writing instruction in 8-12 classrooms, emphasizing the use of writing as a bridge to reading. The focus is on technical features of language, movement between the particular and the global, making of sentences, and text structure.

EDU 622 Active Assessment for Active Reading - 3 credits

This course offers an overview of formative and summative reading assessments for middle and high school students. Educators are provided with practical information on developing, interpreting, and scoring alternatives to traditional tests to inform reading instruction. This course combines practical discussion with theoretical information on the rationale for active assessments. It enables educators to explore questions and gain ideas that they can immediately use in their classrooms.

EED 503 Teaching Children with Different Learning Styles - 3 credits

This course discusses various learning styles of children from infants to teenagers. The course reviews the internal and external environment responsible for the development of learning styles and how we can provide a positive environment to inculcate good habits and learning styles and how to recognize children's learning styles in order to facilitate learning. Current research and literature are reviewed.

EED 536 Moral Development in Children - 3 credits

What is "excellent" moral behavior? Is it natural biological inclination? Divine/"natural" gift? Culturally learned behavior? A combination? We build our discussions around these questions and refer to works by Coles, Dewey, Glasser, Kohlberg, Montessori, Piaget, Vigotsky, and others, especially in regard to children's moral development from birth through puberty, especially children in grades K-6. Students prepare a short case study from their own teaching, parenting or counseling, illustrating the adult's role in cultivating some aspect of moral development in a child. The class puts together an informal guide for colleagues that challenges our ingenuity — especially in our republic's strict separation of church and state and teachers having taken on, in many cases, the roles of parents and clergy.

EED 560 Models of Teaching - 3 credits

Course participants observe, analyze, and discuss a variety of teaching models including information processing, group investigation, social inquiry, inductive models, nondirective teaching models and problem-solving. Within each of these general categories, ways of using learning activities, materials and media are explored. Improving skills in presenting information, asking questions, soliciting and incorporating feedback into curriculum planning, as well as using students' interests and ideas in designing learning activities and developing ways of evaluating what has been learned are reviewed. This course is appropriate for teachers of any grade level and subject matter and anyone whose job involves the development of workshops, training seminars, lectures or other types of presentations.

EED 586 How to Teach and Reach All Students Using Multiple Intelligences - 3 credits

Revitalize your teaching with methods which will help all of your students to learn more easily in less time. Model units will be presented based on Howard Gardner's Multiple Intelligence Theory, which capitalizes on the student's natural learning style. Lessons in math, language arts, science and social studies will be demonstrated through active participation.

EED 623 Classroom Management Using Accelerated Learning - 3 credits

Accelerated Learning is used to explore strategies for creating an environment, which supports students and minimizes teacher stress. Traditional strategies including control of movement, time and space management, establishing effective rules, interpersonal relationships, small and large group dynamics, behavior modification, as well as relaxation, mood setting, win-win solutions and a range of alternative methods of intervention and curriculum strategies are explored through role play, group activities, multi-media and readings.

EED 642 Succeeding with the Resistant Student

Teachers are excellent because of how they teach, not what they teach. Students learn the "hows" to help the most resistant students love school, believe in their own ability to succeed, and always want to do their best. Many of these strategies are simple movements and activities that are easily used in grades PreK-12 and with adult learners. The course draws on the activities of Brain Gym, Neuro-Linguistic Programming, and the latest brain research to maximize learning. Teachers using these strategies report an average of 50% reduction in class disruptions, improved achievement, and special education students moving to regular education.

Instructional Technology

EIT 711 Advanced Technologies in Education - 3 credits

This course focuses on the impact of a worldwide information-intensive society on education policy and planning. Students study practical and theoretical issues pertaining to educational technologies. The course surveys practical applications for managing organizational information systems and databases. From a theoretical perspective, it focuses on using new technologies to serve various pedagogical philosophies and the impact of new technologies on instructional design, teaching, and school reform.

EIT 712 Using Educational Technology to Improve Teaching and Learning - 3 credits

Through discussion, use of the latest hardware and software, participants explore computer based multimedia and communications technologies that enhance classroom instruction. This course is geared for PreK-12 teachers to experiment with the tools of the classroom with emphasis on math, science and language arts. Software and Internet applications are explored, including best practice applications. Focus is on developing technology-based thematic units that integrate theory, practice and standards in the language arts, science, and math classroom. Recent developments in technology integration regarding math and language with the Every Student Succeeds Act are discussed.

Literacy

EDU 632 Understanding Reading K-5 - 3 credits

This course introduces theoretical and instructional issues in reading development. Participants will engage in reflective, critical considerations of students' diverse needs as readers. Strong emphasis will be given to the social nature of reading, thus children learn to read best within a rich and rigorous interactive community of learners in which teachers learn from their students. Topics include: a study of reader capacities that help explain variations in comprehension outcomes (e.g. short term memory, reading fluency, vocabulary, background knowledge, and motivational factors); text features that impact comprehension; the purposes of reading that define comprehension outcomes (e.g., reading to learn, applying knowledge, engagement); and the social context of reading.

EDU 635 Developing Writing Skills in the Early Childhood Years - 3 credits

In this course teachers and pre-service teachers are introduced to the writing components essential to a balanced literacy program. Topics include: interactive writing, writing workshop, conferring with student authors, content area writing, reading-writing connections, writing with special education and bilingual students, and assessing student writing. Students take part in a writing mini-workshop, keeping a writing notebook to gather seed ideas, developing one idea into a piece of writing, meeting in response groups, revising and publishing the piece in a group anthology. Throughout the semester, they draw from their experience to inform their teaching. Students are expected to complete readings, keep a reflection journal and a writers' notebook and design a unit of study for writing workshop.

CAGS Courses

School Administration (ECA)

ECA 701 School Management and the Law - 3 credits

This course focuses on the understanding of the local, state and federal laws which guide the successful administration and management of a comprehensive school system including fiscal responsibilities and collaborative structures. Attention is also paid to federal and state laws and issues associated with collective bargaining. Particular emphasis is given to Massachusetts laws relevant to education including the Education Reform Act of 1993, NCLB, its revisions and other such laws. Students will examine legal issues to develop understandings and skills needed to be an effective school administrator during these times of challenging change. Practicum hours of directed field-based training required.

ECA 703 Managing Financial Resources - 3 credits

This course focuses on fiscal management issues in schools and school systems. Specific topics include financial accounting, preparation and interpretation of financial statements, financial analysis and accounting, budgeting, cost containment, and strategic planning. Proposition 2 1/2 of Massachusetts, the Massachusetts foundation budget process and such financial support structures and funding formulas will also be examined. The financing of charter, choice and voucher programs will be studied as well as importance of and the methods for addressing issues of plant and equipment maintenance. Practicum hours of directed field-based training required.

ECA 704 Effective Schools - 3 credits - 3 credits

This course helps students acquire a basic knowledge and understanding of the concept of effective schools and related theories and ideas. Participants develop a definition of an effective school and identify the dimensions and factors that characterize effective schools. This is accomplished by examining the research findings and personal reflections of noted educators. Particular emphasis is placed on the pivotal role of teachers, parents, and students in the school administrator's conceptualization of an effective school. Students use a variety of stimulating and helpful case studies to examine how theory is translated into practice, as they develop and test their own convictions about the values that shape the life of an effective school. Practicum hours of directed field-based training required.

ECA 720 Advanced Systems Theory - 3 credits

It is essential that educational administrators in the central office understand systems theory and the dynamics of complex social entities such as schools and school systems. With knowledge of the system and subsystems that make up the total school organization, a school leader will be able to understand better the impact that decisions have on the entire school organization and therefore manage change more effectively. This course is required for all candidates for the Superintendent/Assistant Superintendent license. Practicum hours of directed field-based training required.

ECA 725 Instructional Leadership: Supervision & Admin. of Ed. Personnel - 3 credits

Educational leaders in all roles must see their purpose as improving student learning. This course focuses on practices that curriculum leaders can use to create a culture where all educators see their role as improving student learning. Best practices in formative and summative evaluation of staff are investigated. Students learn methods and laws connected with the selection, hiring, support and dismissal of staff. Particular attention is given to the role of professional development and its implementation, including mentoring for new teachers. Pre-practicum hours of directed field-based training required.

ECA 805 Practicum Seminar I: School Administration Non-Licensure - 3 credits

Students who are not seeking administrative licensure but who wish to complete a school administrative CAGS are required to complete a two-term, non-supervised practicum. This is the first course in the sequence. The student and research advisor will design an individualized plan for completing this practicum requirement, but the College will not provide an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECA 805A Practicum I: Supt/Asst Supt (All Levels) 300 of 500 hours - 3 credits

This is the first of two courses, a 300-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner. This practicum allows for the development of administrator competencies specific to the superintendent/assistant superintendent position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the superintendency. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805H Practicum I: Principal/Asst Principal (PreK-8) 300 of 500 hours) - 3 credits

This is the first of two courses, a 300-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner and a college supervisor. This practicum allows for the development of administrator competencies specific to the principal/assistant principal position at the PreK-8 of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805J Practicum I: Principal/Assistant Principal (5-12) 300 of 500 hours - 3 credits

This is the first of two courses, a 300-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner and a college supervisor. This practicum allows for the development of administrator competencies specific to the principal/assistant principal at the 5-12 level of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the 5-12 level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805E Practicum I: Supervisor/Director (All Levels) 150 of 300 hours- 3 credits

This is the first of two courses, a 150-hour (300 total) supervised practicum in a school setting under the guidance of a practitioner and a college supervisor. This practicum allows the development of administrator competencies specific to the supervisor/director position. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the supervisor/director position. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 806 Practicum Seminar II: School Administration Non-Licensure - 2 credits

Students who are not seeking administrative licensure but who wish to complete a school administration CAGS are required to complete a two term, non-supervised practicum. This is the second course in the sequence and should be completed in conjunction with the Action Research Project. The student and the research advisor will design an individualized plan, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECA 806A Practicum II: Superintendent/Asst Supt (All Levels) 200 of 500 hours - 2 credits

This is the second of two courses, a 200-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner. This practicum allows the development of administrator competencies specific to the superintendent/assistant superintendent position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the superintendency. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 806H Practicum II: Principal/Asst Principal (PreK-8) 200 of 500 hours - 2 credits

This is the second of two courses, a 200-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner and college supervisor. This practicum allows the development of administrator competencies specific to the principal/assistant principal position at all levels at the PreK-8 level. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experience. Evaluation is based on current standards for licensure.

ECA 806J Practicum II: Principal/Asst Principal (5-12) 200 of 500 hours - 2 credits

This is the second of two courses, a 200-hour (500 total) supervised practicum in a school setting under the guidance of a practitioner and college supervisor. This practicum allows the development of administrator competencies specific to the principal/assistant principal position at the 5-12 level of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the 5-12 level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the principalship.

ECA 806E Practicum II: Supervisor/Director (All Levels) 150 of 300 hours - 2 credits

This is the second of two courses, a 150-hour (300 total) supervised practicum in a school setting under the guidance of a practitioner. This practicum allows the development of administrator competencies specific to the supervisor/director position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites and specifically on issues of the supervisor/director.

ECA 807 Applied Action Research Project: School Administration - 1 credit

This course, taken in the student's last term, requires the student to complete the Action Research Project, a program implementation or curriculum development plan, and present the results in a public presentation to students.

Curriculum and Instruction

ECC 705 Curriculum Design and Renewal for the 21st Century - 3 credits

This course explores the issues and problems that curriculum leaders face when trying to develop, implement, and evaluate curriculum for elementary, middle, and high schools. Participants examine existing curriculum models and approaches to curriculum renewal and discuss current concerns faced by curriculum developers. Special focus is placed on building a knowledge of research on effective approaches to curriculum change; identifying and understanding key issues in curriculum development; developing leadership skills for K-12 school settings; and examining challenges of leadership in curriculum development. Practicum hours of directed field-based training required.

ECC 706 Critical Thinking and Problem Solving - 3 credits

This course explores critical thinking and problem solving as cornerstones of education reform movements and vital skills for students in the new millennium. It offers a unique opportunity for experienced teachers to consider their individual classroom instructional practices in the context of broader political and social change by exploring the work of theorists who emphasize transformative dimensions of reflective judgment in adult learners. A primary focus is the design of instructional formats and learning environments that foster these essential skills. This advanced course examines philosophies, epistemological constraints and methods of assessing higher order critical thinking skills.

ECC 707 Meeting the Challenge of School Restructuring - 3 credits

This course focuses on the practice of continual school renewal. Emphasis is placed on building the collaborative relationships necessary to bring about significant school change that leads to school improvement. Participants focus on building strong teams within the school community and on techniques for problem solving and negotiation leading to positive outcomes for all parties. Participants also explore methods for effectively communicating with various stakeholders who impact student learning. Practicum hours of directed field-based training required.

ECC 708 Learning Theories and Instructional Design - 3 credits

This course for experienced educators provides a forum to examine a wide range of learning theories. Students learn instructional designs using a model that is both robust and flexible, making them appropriate for use throughout K-12. Students explore behavioral, cognitive, and constructivist theories, and balance new discoveries with older theories that are still relevant. In addition, students examine developments in collaborative and cooperative learning as they relate to the design process. Using concepts from their own curriculum, students complete an instructional design project. Students then present their projects to the class, explaining their experience with the particular design process used and share the learning theories incorporated into the design. Practicum hours of directed field-based training required.

ECC 709 Alternative Assessment: Theory and Practice - 3 credits

This course explores alternative assessment. It answers the questions regarding what assessment is, what it does and what it measures. Assessment types and strategies are studied along with multiple assessment uses. Students gain a thorough understanding of portfolio techniques, open ended questions and the design, use, and evaluation of performance tasks. They explore assessment procedures such as exhibition, interview, journals, observation, peer assessment, and self-evaluation. Students are encouraged to use with confidence alternative assessment strategies in the classroom as an integral component of the curriculum-instruction-assessment link.

ECC 710 Assessment, Developing and Evaluating Curriculum - 3 credits

All educational leaders regardless of their position within a school system should have the ability to lead instruction. This course provides a better understanding and practices related to the real-world application of instructional leadership in regard to curriculum. The course strengthens the knowledge, skills, and dispositions of educators as instructional leaders, and provides practice in identifying and researching current and emerging curricular issues. Beginning with the premise that instructional leaders are essential in creating thoughtful learning communities of adults and students, this course focuses on the standards of leadership, models of curriculum designs that promote achievement for all students, data to inform decisions about instruction, and current issues that impact teaching and learning. Practicum hours of directed field-based training required.

ECC 805 Educational Leadership Practicum I: Curriculum & Instruction - 150 hours - 3 credits

Prerequisites: ECL800 and ECL801.

This is the first half of a 300-hour individually structured field experience in a school setting that emphasizes a commitment to continued learning. This practicum is completed in the third semester and provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in the design, implementation and assessment of curriculum development. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students' practicum sites. With a cooperating practitioner, students design learning opportunities consistent with their professional development goals for leadership in curriculum and instruction. The seminar advisor must approve the design. Students continue work on their Action Research Project, begun in ECL800 and 801, with a focus on conducting such research at the school site.

ECC 806 Educational Leadership Practicum II: Curriculum & Instruction - 150 hours - 2 credits

Prerequisite: ECC805 and completion of all concentration courses, or permission of the coordinator.

This course is a continuation of ECL805 and requires attendance at four seminar meetings. During this course, students work to complete the Action Research Project.

ECC 807 Applied Action Research Project: Curriculum & Instruction - 1 credit

This course, taken in the student's last term, requires the student to complete the Action Research Project, a program implementation or curriculum development plan, and present the results in a public presentation to students.

Educational Leadership

ECL 800 Foundations of Social Science Research - 3 credits

The information in this course supports the research design and analysis of data for completion of the Action Research Project. The emphasis is on familiarizing students with methods of research and data analysis. Examples of quantitative and qualitative methods are presented. Students explore techniques used in the identification of research problems, the formulation of hypotheses, the construction and use of data-gathering instruments, the design of research studies, and utilization of statistical procedures. Students will learn commonly used statistical procedures, including introductory computer applications for data analysis. Students design an Action Research Project which includes: identifying a topic relevant to their field, conducting a literature review, and writing an introduction, a purpose statement, method and procedure. School administrators write a school improvement plan. Special educators write a program implementation plan. Professionals in curriculum and instruction develop a curriculum development plan. Pre-practicum hours of directed field-based training required.

ECL 801 Advanced Graduate Research Seminar - 3 credits

Prerequisite ECL800.

Students begin implementing their research designs that were created and approved in ECL800. They systematically organize inquiries demonstrating connections between theory and professional practice in an organization or school setting. Students design and implement quantitative and/or qualitative research methodologies as they apply research theory to gathering, analyzing, and summarizing data that will inform policy and leadership decision-making in the workplace. Students receive ongoing support during research and have a learning environment that helps them develop their projects successfully. This seminar serves as a learning lab, allowing students to experience peer learning and support. Students discuss their research designs, share resources, questions, ideas, and concerns, and sense one another's progress. Students complete a culminating capstone learning project in the form of an Action Research Project or a program evaluation. Capstone projects are presented to the class for review.

ECL 802 Advanced Leadership - 3 credits

This advanced leadership issues course merges leadership theory with practice to examine leadership roles in educational settings. Using case studies and problem-solving techniques, students actively examine a wide variety of current leadership issues that impact the ability of educational institutions to fulfill their public trust. State and professional educational leadership standards are examined. Topics include practical considerations of collective bargaining, managing student and staff diversity, budgeting, legal issues, and implementing school reforms from the perspective of an educational leader. Practicum hours of directed field-based training required.

ECL 803 Advanced Technologies in Education - 3 credits

This course focuses on the impact of a worldwide information intensive society on education policy and planning. Students study practical and theoretical issues pertaining to educational technologies. The course surveys practical applications for managing organizational information systems and databases. From a theoretical perspective, it focuses on using new technologies to serve various pedagogical philosophies and the impact of new technologies on instructional design, teaching and school reform. Practicum hours of directed field-based training required.

ECL 804 Advanced Leadership in Policy and Practice - 3 credits

This course explores the educational policy making process at the federal, state and local level. Students examine the educational leader's role in policy design, advocacy and formulation. Simulations and scenarios from class members, practitioners and research are used to inform the creation of educational policy in complex situations involving competing constituencies. Leadership skills are challenged by the opposing perceptions of stakeholders vying for scarce resources and by the need to identify an appropriate theoretical context from which to work toward policy formation to solve problems. Students gain skills in identifying educational issues in the context of practical problems, and to strategize, implement, and assess policy outcomes that directly impact teaching and learning environments. Practicum hours of directed field-based training required.

ECL 807 Applied Action Research Project: Educational Leadership - 1 credit

This course, taken in the student's last term, requires the student to complete the Action Research Project, program implementation or curriculum development plan and present the results in a public presentation to students.

Special Education Administration

ECS 712 Advanced Psycho-Educational Assessment & Education Planning - 3 credits

Students learn to select, use, and interpret appropriate evaluation techniques, instruments, and technologies. A case study approach is used to administer and interpret formal and informal assessments. The results of various evaluative procedures are used to assess and improve the effectiveness of programs and personnel. Students learn to use developmentally appropriate formal and informal assessments for mild and moderate special needs children. Practicum hours of directed field-based training required.

ECS 713 Administration of Special Education Programs - 3 credits

This course uses various service delivery models as they relate to children and young adults with handicapping conditions in a school setting. This course emphasizes facilities and curriculum adjustments, staff roles, methods and content for in-service training, and the use of a team approach. Field trips to observe and evaluate programs may be required. Students become well versed in the requirements of federal and state laws and regulations related to special education. Practicum hours of directed field-based training required.

ECS 714 Collaboration and Consultation Techniques - 3 credits

This course introduces interpersonal communication skills for working with teachers, outside agencies, and families of students from diverse backgrounds. Students are exposed to political structures and regulations for improving a school and/or community. Students review research findings on public relations programs involving educational systems, businesses, industry, and governmental agencies. This course emphasizes the role of the administrator in developing a comprehensive program of school community relations for the administrative unit. Practicum hours of directed field-based training required.

ECS 716 Philosophical and Psycho-Social Foundations of Education - 3 credits

Participants study the basic assumptions underlying educational goals, content, and process. They explore the relationship between knowledge, learners, and metacognition. The functioning of educational institutions in their social and cultural milieu is examined from anthropological and sociological perspectives. A school is viewed as a social system. Students examine the influences upon the educational enterprise of the stratification system, youth cultures, race, religion, language, and values. Practicum hours of directed field-based training required.

ECS 805 Practicum/Seminar I: Special Education Admin. Non-Licensure - 3 credits

Students who are not seeking administrative licensure but who wish to complete a special education administration CAGS are required to complete a two-term, non-supervised practicum. This is the first course in sequence. The student and the research advisor will design an individualized plan for completing this practicum requirement, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECS 805S Practicum/Seminar I: Special Education Administration (300hrs) Licensure - 3 credits

150 hours. Prerequisite: Completion of all course work. Exit Performance Portfolio is required for credit. Students complete field experience in a school setting under the direction of a licensed administrator of special education. They perform a range of administrative activities under the direction of the on-site administrator. This course facilitates the application of theory to practice in a real life situation. Each student maintains a journal and generates an exit portfolio showing the implementation of requisite standards into practice. Students present their research action plans during Seminar II.

ECS 806 Practicum/Seminar II: Special Education Admin. Non-Licensure - 2 credits

Students who are not seeking administrative licensure but who wish to complete a special education administration CAGS are required to complete a two-term, non-supervised practicum. This is the second course in the sequence and should be completed in conjunction with the Action Research Project. The student and the research advisor will design an individualized plan for completing this practicum requirement, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECS 806S Practicum/Seminar II: Special Education Administration (Licensure) - 2 credits

150 hours. Prerequisite: Completion of all course work. Exit Performance Portfolio is required for credit. Students complete field experience in a school setting under the direction of a licensed administrator of special education. They perform a range of administrative activities under the direction of the on-site administrator. This course facilitates the application of theory to practice in a real life situation. Each student maintains a journal and generates an exit portfolio showing the implementation of requisite standards into practice. Students present their research action plans during Seminar II.

ECS 807 Applied Action Research Project: Special Education Administration - 1 credit

This course, taken in the student's last term, requires the student to complete the Action Research Project, program implementation or curriculum development plan and present the results in a public presentation to students.

School of Management

The **SCHOOL OF MANAGEMENT** offers graduate programs that prepare students for improved management performance, increased career advancement opportunities and more effective leadership in private, public and non-profit organizations. Students with professional or technical experience develop their managerial skills to position them for the next level of leadership. Those with more limited formal experience gain the knowledge and competencies to prepare them for jobs or careers of their choice.

Academic programs — The School of Management offers the Master of Business Administration (MBA), the MBA Healthcare, and Master of Management (MM) degrees, each with several specialization options.

Faculty and Learning Environment — The majority of faculty members are practicing professionals and bring to their courses practical as well as conceptual knowledge in their areas of expertise. Classes are small and highly interactive.

Experiential Learning — Many courses involve live case studies where students work on problems of real businesses and organizations. A student consulting company provides additional opportunities for students to work on solutions to real-world problems under the guidance of faculty or corporate mentors. Students with limited work experience are encouraged to take up internships or practica.

Student body — The student body is highly diverse by design, encompassing a multicultural and multi-generational range that provides an effective training ground for learning how to work in diverse teams.

Admission, Assessment and Orientation

Admission counselors give applicants an overview of the College's academic programs and assist with the application process. Applicants will participate in an admissions interview once they have submitted all required application materials. Once accepted, students must complete required assessments to help determine their individual program of study. An academic advisor is available to assist students throughout their program.

A writing assessment is conducted to ensure that entering students (degree candidates and certificate students) demonstrate graduate level English language communication and writing skills. **If assessment indicates need, additional coursework will be required. Tutoring services are also provided.**

Orientation — **New students are required to attend School of Management Orientation**, held just before each term begins.

Advising and Capstone

The **Academic Advisor** is responsible for advising the student on academic planning and graduation clearance. Students are expected to schedule periodic individual meetings with the Academic Advisor.

Graduate Management Capstone — The Graduate Management Capstone provides support for students' work on the Capstone project. The Capstone project is undertaken towards the end of the student's program, and after specific program core requirements have been met. The Capstone project enables students to demonstrate their learning from courses and seminars through a designed application-oriented experience.

Practicum/Internship

The School of Management offers an internship program for students who wish to receive academic credit and gain experience while completing their studies in the master's degree program. They can be rewarding and can lead to exciting careers. Students may take one 2-credit internship course and one additional 1-credit internship course as electives after they have completed two terms of study (two terms) in the program. To receive course credit for an internship, students must be enrolled in MMG600A. Students are responsible for identifying a job/position/project and must consult with and define the details of the position with the Internship Coordinator. Together they will develop a Learning Contract which must be approved by the Dean. International students who opt for internship courses must complete and submit a Curricular Practical Training (CPT) authorization form that can be obtained from the Internship Coordinator. They must meet all regulations for authorized CPT (see *International Students* on page 58).

The Internship Coordinator will notify the student of approval and the student will be registered in MMG600A Graduate Management Practicum.

Course Delivery and Scheduling

School of Management courses are delivered in a number of modes. Some courses meet weekly in the afternoons or evenings over the duration of the term. Others are available in a weekend intensive format, meeting intensively during specified weekends. Some courses are offered completely online with no class meetings, while others are available in a hybrid or blended learning format with a combination of classroom interaction and online work. Some courses are available in more than one mode, but not all courses are available in all modes.

Professional Development Certificate Option

Students desiring only coursework focused in a specific field of study may earn a certificate in one of several areas. Certificate courses, taken within three years of matriculation, may be accepted into a degree program if they meet current requirements. An earned bachelor's degree is required to transfer graduate credit into a degree program. (See also *Transfer of Credit* on page 48).

Sigma Beta Delta Honor Society

School of Management students with GPAs in the top 20% of their graduating class and who show evidence of leadership or community service are eligible for induction into Sigma Beta Delta, the national honor society for business and management students.

Management Education for Organizations

Academic programs and courses may be tailored to meet the needs of private and public organizations. An organization may select courses from the catalog to meet its needs for staff training and/or to serve its mission and clients. We can focus the course content and activities on the organization's particular situation, or more broadly, as needed.

Inactive Programs

We are no longer admitting new students into the following programs as of Fall 2020:

- Master of Management MM55
- Health Care Management Certificate
- Health Care Informatics Certificate
- Information Technology Management Certificate
- Non-Profit Management Certificate
- Organizational Leadership Certificate
- Business Certificate
- Small Business Certificate

If you are enrolled in a program that is no longer active, please confer with your academic advisor and continue to follow your program plan as outlined in the Academic Catalog published in the year you entered your program. All back issues of the Academic Catalog may be found at <https://www.cambridgecollege.edu/academic-catalogs-back-issues>.

Master of Business Administration

• CIP code 520201 • 36-48 credits • 4-5 terms full-time

Program Description — The Master of Business Administration prepares students with the practical skills and specialized knowledge that are essential for meaningful business and managerial careers. Working managers seeking advancement, emerging professionals, or those desiring to switch careers, gain the tools and competencies that will help them succeed in achieving their goals. A general management core provides broad-based business knowledge, a cohort-based seminar series develops teamwork and leadership skills, and specialization options allow students to gain job-ready competencies. The program offers opportunities to work on real-life business problems in student teams with faculty and business mentors. In the final capstone project, students develop a business idea and prepare a pitch-deck to present to an investor panel.

Learning Outcomes — Graduates of the program will possess a distinctive skill-set centered on enhanced critical thinking, analytical, technological and problem-solving skills to provide them with a competitive advantage in the marketplace. Demonstrable skills upon graduation include business strategy, analytics, finance, accounting, marketing and human resources management. Leadership attributes, cultural and emotional intelligence, along with comprehensive communication skills will be elevated to prepare stewards capable of effectively managing and leading change in complex and uncertain domestic and global workforces and markets.

Careers — Management and leadership positions in business, non-profit and government organizations. Jobs include: marketing analyst or manager, business analyst, project manager, human resources manager, general manager.

Admission requirements: Bachelor's degree and other School of Management requirements, and two years of work experience recommended.

Online courses: International students may take only one fully-online course in any term.

General Prerequisites

Graduate level English language communication and writing skills. Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

- MMG 501E Business Communication
- MMG 505 Graduate Writing

MBA Prerequisites 12 credits

These 4 courses are expected to be successfully completed prior to the entry into the graduate management program for MBA. Take in first term(s) or demonstrate competency through prior undergraduate courses with a grade of B or better, and within a certain time limit, from a regionally accredited institution. An assessment to demonstrate competency may be required.

- MMG 506 Quantitative Analysis for Managers
- MMG 511 Foundations of Management
- MMG 514 Accounting for Managers
- MMG 515 Economics for Managers

Core Curriculum 12 credits

The following core courses must be taken in a student's first term(s).

- MMG 512 Organizational Environment
- MMG 517 Research Methods for Managers
- MMG 525 Statistical Decision Techniques for Managers (preq. MMG 506)
- MMG 625 Foundations of Business Analytics

MBA Required Courses 15 credits

The following required courses must be taken after the completion of the core curriculum.

- MMG 710 Project Management
- MMG 712 Operations Management
- MMG 715 Management Information Technology
- MMG 725 Financial Management
- MMG 733 Marketing Management

Concentrations 6 credits

Students choose one of the following concentrations and complete the two required courses in the chosen track. See next page.

(All courses @ 3 credits except as noted.)

MBA

Continued

Master of Business Administration

MBA Concentrations 6 credits

Marketing

Market analysis and research, marketing planning, digital marketing, marketing strategy. Jobs include marketing analyst, marketing associate, social media specialist, marketing manager.

MMG 736 Digital Marketing (preq. MMG 733)

MMG 737 Marketing Strategy (preq. MMG 733 and 517; required last course in specialization)

Business Analytics

Foundational knowledge of applied data analytics, built on a combination of conceptual understanding of core statistical and computational approaches and techniques, and practical data management, manipulation, analysis and visualization competencies. Focused on translating raw data into decision-guiding knowledge by means of thoughtful and creative use of statistical machine learning and data visualization techniques and tools.

MMG 603 Data Exploration and Visualization (preq. MMG525 and working knowledge of MS Excel)

MMG 604 Data Driven Decision-Making (preq. MMG525, 625, and 603)

Project Quality Management

MMG 713 Total Quality and Operations Management

MMG 795 Advanced Project Management (preq: experience in a project team/as project manager or MMG 710/equivalent)

MBA Capstone 3 credits

MMG 739 Strategic Management

IF STUDENTS PREFER NOT TO SPECIALIZE, they choose two courses from available SOM electives in consultation with advisor.

Master of Business Administration/Health Care

• CIP code 510701 • 36-45 credits • 4-5 terms full-time

Program Description — The Master of Business Administration/Health Care prepares students for managerial careers in health care. It has been designed to meet the demands of healthcare employers with today's most in-demand management degree, and is delivered by faculty who are practicing managers and experts in the field. The analytic core of the MBA is combined with with a strong healthcare emphasis. Students gain problem-solving, data analysis, project management, financial and technological skills, as well as communication, self-management, teamwork and leadership skills, along with an in-depth knowledge of the issues, challenges and best practices in the healthcare industry. The program is designed for working professionals with experience and/or strong interest in healthcare. Students attend classes with other healthcare professionals, with whom they exchange insights. Students may specialize in health care management or healthcare informatics.

Learning Outcomes — Graduates of the program will be expected to be capable of leading themselves and others, demonstrate critical and problem-solving skills, be skilled in the analysis and strategic use of financial and other data and tools, operate strategically within the framework of markets, technology, regulation and resources, demonstrate cultural competence in diverse organizational settings, effectively manage change, complexity and uncertainty, and demonstrate professional integrity. They will understand health care systems and processes, ethical and public policy issues in health care and know how to manage quality, safety and cost-effectiveness in health care delivery.

Careers — Management and leadership positions in health care organizations such as hospitals, public and private health agencies, insurance companies and other health care businesses.

General Prerequisites

Graduate level English language communication and writing skills. Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

MMG 501E Business Communication

MMG 505 Graduate Writing

MBAHC Prerequisites9 credits

These 3 courses are expected to be successfully completed prior to the entry into the graduate management program for MBAHC. Take in first term(s) or demonstrate competency through prior undergraduate courses with a grade of B or better, and within a certain time limit, from a regionally accredited institution. An assessment to demonstrate competency may be required.

MMG 506 Quantitative Analysis for Managers

MMG 511 Foundations of Management

MMG 514 Accounting for Managers

(All courses @ 3 credits except as noted.)

Core Curriculum 12 credits

The following core courses must be taken in a student's first term(s).

MMG 512 Organizational Environment

MMG 517 Research Methods for Managers

MMG 525 Statistical Decision Techniques for Managers
(preq. MMG 506)

MMG 625 Foundations of Business Analytics

MBAHC Required Courses 15 credits

The following required courses must be taken after the completion of the core curriculum.

MHC 710 Risk Management in Health Care

MHC 712 Healthcare Operations Management

MHC 720 The U.S. Health Care System

MHC 725 Financial Management in Health Care (preq. MMG 514)

MHC 750 Health Care Policy & Ethics

Concentrations6 credits

Students choose one of the following concentrations and complete the two required courses in the chosen track.

Health Care Management

MHC 723 Unequal Treatment: Disparities in Healthcare

MHC 741 Emergency & All-Hazards Preparedness in Health Care

Health Care Informatics

Health/Medical information systems and software; IT project management; data and information management; use of data for analysis and decision-making. Jobs include IT and information systems management and analysis in health care organizations and facilities.

MHC 730 Health Care Information Systems

MHC 733 Data, Knowledge & Information Management in Health Care Informatics

MBAHC Capstone3 credits

MHC 740 Strategic Planning in Health Care

OR

MMG 694 Graduate Management Capstone

Admission requirements: Bachelor's degree and other School of Management requirements and two years of appropriate work experience recommended. Applicants for Health Care Informatics must be approved by the department chair.

Online courses: International students may take only one fully-online course in any term.

Master of Management

• CIP code 520201 • 30-36 credits • 3-4 terms full-time

Program Description — The Master of Management program provides leadership and management skills and introduces the best current practices in private, public and non-profit organizations.

The curriculum combines core management foundation coursework with concentration options and electives that allow students to specialize. The application of theory to management practice is emphasized. A required management seminar series focuses on the development of “people management” skills and the integration of knowledge acquired throughout the program.

Learning Outcomes — Graduates will:

- Develop strong communication, analytical, research and decision-making skills.
- Learn to manage themselves and their own professional development, and to manage and lead others.
- Have the ability to use and understand the role of technology in organizations.
- Learn to manage human, financial and informational resources.
- Understand how to foster change and innovation and value and promote diversity in organizations.
- Understand the global, social and environmental context of management and the importance of ethical and socially responsible decision-making.

Careers — Graduates are prepared for advancement into supervisory and management positions in business, non-profit and government organizations. Management career opportunities include jobs in human resources, retailing, marketing, financial services, information technology, health care, non-profit management, organizational development, consulting, and training and development.

Admission requirements

Bachelor's degree and other School of Management requirements, and three years of appropriate work experience recommended.

General Prerequisites

Graduate level English language communication and writing skills. Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

Master of Management (Puerto Rico)

- CIP code 520201 • 33 credits • 4 terms full-time
- Program approved by Puerto Rico Board of Postsecondary Institutions

Program Description — The Master of Management program provides leadership and management skills and introduces the best current practices in private, public and non-profit organizations.

The curriculum combines core management foundation coursework with concentration options that allow students to specialize. The application of theory to management practice is emphasized. A required management seminar series focuses on the development of “people management” skills and the integration of knowledge acquired throughout the program.

Learning Outcomes — Graduates will:

- Develop strong communication, analytical, research and decision-making skills.
- Learn to manage themselves and their own professional development, and to manage and lead others.
- Have the ability to use and understand the role of technology in organizations.
- Learn to manage human, financial and informational resources.
- Understand how to foster change and innovation and value and promote diversity in organizations.
- Understand the global, social and environmental context of management and the importance of ethical and socially responsible decision-making.
- Management Technology Concentration: Graduates will understand how to efficiently and effectively use technology to support organizations and business environments. They will be well able to manage IT projects and departments and functional areas within organizations.

Careers — Graduates are prepared for advancement into supervisory and management positions in business, non-profit and government organizations. Opportunities include jobs in human resources, retailing, marketing, financial services, information technology, non-profit management, consulting groups, government agencies/leaders.

Admission requirements

Bachelor's degree, other School of Management requirements, and three years of appropriate work experience recommended (see *Admission* on page 13).

(All courses @ 3 credits except as noted.)

In Puerto Rico, all classroom instruction and coursework are in Spanish

Seminar & Capstone6 credits

MMG 500 Graduate Management Orientation Seminar (0 credit)

MMG 691-692 Leadership Seminar I-II (2 terms @ 2 credits)
Must be taken in sequence with same seminar leader.

MMG 600 Graduate Management Practicum (2 credits)
(preqs: MMG 691-692, MMG 511, 512, 514; and no more than 10 credits remaining to finish program)

MM Core Courses 12 credits

- MMG 511 Foundations of Management
- MMG 512 Organizational Environment
- MMG 514 Accounting for Managers
- MMG 525 Statistical Decision Techniques for Managers

Concentration 15 credits

Choose one concentration (2 courses) and associated subspecialization (3 courses) to meet career and academic goals:

Business

- MMG 733 Marketing Management
- MMG 740 Human Resource Management

Business (private institutions):

- MMG 515 Economics for Managers
- MMG 561 Business Law
- MMG 710 Project Management Concepts & Practices

Non profit and public management:

- MMG 770 Grant Writing and Resource Development
- MMG 727 Budgeting and Finance for Non-Profit and Public Organizations
- MMG 760 Strategic Planning for Non-Profit Organizations

Management Technology

- MMG 522 Information Systems in the Organization
(required first course)
- MMG 714R Data Management in Cybersecurity

Health Care Informatics:

- MHC 730 Health Care Information Systems
- MHC 733 Data, Knowledge and Information Management for Health Care Informatics
- MHC 750 Health Care Policy & Ethics

Cybersecurity Management:

- MMG 729R Business Intelligence and Cybersecurity Analytics
- MMG 711R Cybersecurity Information Systems Policies, Ethics and Auditing

Maestría en Gerencia (Puerto Rico)

- CIP code 520201 • 33 créditos • 5 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundarias de Puerto Rico

Descripción del programa — El programa de Maestría en Gerencia provee desarrollo de destrezas liderazgo y gerencia e introduce las mejores prácticas en el área de empresas privadas, públicas y sin fines de lucro.

El currículo combina la gestión de la gerencia y cursos electivos que permiten a los estudiantes especializarse; enfatiza la aplicación de la teoría a la práctica de la gerencia e incluye una serie de seminarios requeridos de gerencia que se centran en el desarrollo de habilidades de “gestión de la gente” y la integración de los conocimientos adquiridos durante el programa.

Resultados del aprendizaje — el estudiante graduado:

- Desarrollará sólidas destrezas de comunicación, análisis, investigación y la capacidad de toma de decisiones.
- Aprenderá a conducirse a sí mismo incluyendo su desarrollo profesional, así como a administrar y guiar a otros.
- Tendrá la capacidad para utilizar y entender el rol de la tecnología en las organizaciones.
- Aprenderá a administrar recursos humanos, financieros e informativos.
- Entenderá cómo fomentar el cambio, la innovación, el valor y a promover la diversidad en las organizaciones.
- Entenderá el contexto global, social y ambiental de la gerencia y la importancia de la toma de decisiones éticas y socialmente responsables.
- Los graduados de la concentración de Gerencia de Tecnología podrán entender cómo utilizar eficiente y efectivamente la tecnología para apoyar los ambientes organizacionales y de negocio. Serán capaces de administrar proyectos de tecnología de la información y áreas operacionales de esas entidades.

Carreras — Los graduados estarán preparados para ser promovidos a puestos de supervisión y de gestión en las organizaciones empresariales, sin fines de lucro y gubernamentales. Las oportunidades de esta carrera incluyen la gerencia de puestos de trabajo en recursos humanos, el comercio detallista, mercadeo, servicios financieros, tecnología de la información, la gestión sin fines de lucro, consultoría y la formación o desarrollo profesional.

Requisitos de admisión:
Grado de bachillerato, otros requisitos de la Escuela de Gerencia, y tres años de experiencias de trabajo.

(Todos los cursos son de 3 créditos excepto aquellos marcados)

Todos los cursos se ofrecen en español

Seminarios y Capstone 6 créditos

MMG 500 Graduate Management Orientation Seminar (0 créditos)

MMG 691-692 Leadership Seminar I-II (2 terms @ 2 créditos)
Deben tomarse en orden con el mismo profesor.

MMG 600 Graduate Management Practicum (2 créditos)
(preqs: MMG 691-692, MMG 511, 512, 514; y no más de 10 créditos para terminar el grado.)

Cursos medulares 12 créditos

Informática de Atención a la Salud:

- MHC 730 Health Care Information Systems
- MHC 733 Data, Knowledge and Information Management for Health Care Informatics
- MHC 750 Health Care Policy & Ethics

Administración de la ciberseguridad:

- MMG 605R Cybersecurity Fundamentals
- MMG 729R Business Intelligence and Cybersecurity Analytics
- MMG 711R Cybersecurity Information Systems Policies, Ethics and Auditing

Management Course Descriptions

One-Credit Courses (DMG)

DMG 506 Essentials of Accounting - 1 credit

This course covers the fundamental principles of accounting. Key concepts are discussed along with use, setup and posting of balance sheets, income statements, cash flow statements, statements of retained earnings, and required SEC 10K filings. Students learn about dual entry-accrual accounting, and how to analyze key ratios derived from financial statements used in the management of organizations.

DMG 601 Forecasting and Planning - 1 credit

This course covers short and medium term forecasting techniques, and long term and strategic planning; quantitative and qualitative forecasting techniques are emphasized. Quantitative techniques using computer applications are presented and used for situations for which historical data is available. When no such data is available, e.g., to forecast demand or revenues for new products, qualitative techniques are used. For longer-term projections, strategic planning concepts will be utilized.

DMG 602 Introduction to Project Management - 1 credit

This course explores the major issues and techniques of project management. It has been designed to provide the students with the basic skills and knowledge necessary to plan and manage projects within their organizations.

DMG 603 Drafting Business Contracts - 1 credit

This course is designed for students who have completed at least one of the following courses: MMG746, MMG747, or MMG748, and/or those who are interested in developing a basic understanding of the mechanics of creating a formal contract. When one has completed a negotiation, whether using a hardball (distributive) or an interest-based (integrative) approach, the time comes when it is necessary to analyze (memorialize) the agreement by putting it into writing in the form of a legal and binding contract. Through this directed study students will develop the skills and resources to create such a document. The focus will be on the legal elements of a contract; the ramifications, legal and otherwise, of "loopholes" within contracts; and the basic law governing contracts in the United States.

DMG 604 Social Media Marketing - 1 credit

With the rise of social media and the abundance of devices that allow people to be connected 24/7, marketing is experiencing a dramatic shift from traditional print, radio, and broadcast to social media. Social media allows brands to communicate, listen, and respond faster than it was ever possible before. After this course, you will understand the elements of social media marketing; create and implement a strategy; and how to use tools to analyze the effectiveness of your social media strategy.

DMG 605 Grant Writing - 1 credit

This module for non-profit managers introduces the planning and proposal development phases of grant writing. It demystifies the process, from developing a fundable idea to identifying potential donors and structuring the technical components. Hands-on activities provide practice in the art and craft of grantsmanship.

DMG 614 Performance Management - 1 credit

This course helps managers learn a more holistic approach to performance management and communicate more effectively with their employees regarding performance. It helps them understand that performance management is not just a "once-a-year" phenomenon connected to compensation, but is an ongoing process that includes a clear understanding of work goals and expectations, development of skills, knowledge and abilities, and ongoing communication. The learning methodology includes a transfer of content and knowledge that includes a performance management system as well as the use of simulations, role-plays and case studies.

DMG 615 Developing a Business Plan - 1 credit

Developing a business plan is a hands-on course that provides students with the basics of how to develop a business plan. Students learn how to describe the business, how to use a structured coaching process to write the business plan, and how to use the business plan to anticipate key issues. The course covers (1) business plan basics including: who needs to write a business plan, when to write one, how long it should be, what a business plan can and cannot do, the risks of writing a business plan, (2) the elements of a business plan, (3) how to develop the plan and (4) ways to enhance a business plan.

DMG 621 Statistical Analysis Using Spreadsheets - 1 credit

Previous experience with Windows and spreadsheets preferred. This course helps students use spreadsheets to develop complete analysis and presentations. Using Microsoft Excel, this course reviews the fundamentals of spreadsheet design, creation and formatting. Students learn how to create graphs and charts, and how to perform a variety of time-series, financial and statistical calculations. They learn to perform "what if" analyses and use spreadsheets for simple descriptive statistics and regression analysis.

DMG 647 Negotiation in the Health Care System - 1 credit

This course helps professionals in the health care system to develop the skills of interest-based, win-win negotiation. Students learn theory and tactics for diagnosing a conflict, planning for negotiation, and implementing a cooperative strategy within a health care setting. Students are observed through simulation and role play; a final application paper is required. Texts are *Getting to Yes* by Roger Fisher and *Renegotiating Health Care* by Leonard Marcus.

DMG 753 Introduction to Organizational Coaching - 1 credit

This course gives students the opportunity to develop and improve skills in organizational coaching. The course emphasizes performance assessment and performance management. Learners practice conducting coaching sessions and acquire critical coaching skills in active listening; giving and receiving feedback; and developing and managing performance improvement action plans. Special attention is given to cross cultural coaching, motivation, and the assessment of personal coaching styles.

Health Care Management (MHC)

MHC 600 Practicum in Health Care Management - 1-2 credits

This course is an elective intended for students with limited work experience in the health care management field and is open to students who have completed at least two terms of work in the MM or MBA program. Students will undertake a supervised practicum or internship in an organization, working not more than 20 hours per week during the fall and spring terms (full time may be permitted in the summer) in a position related to the concentration. Students are responsible for obtaining the position. Students work with the practicum advisor to design the learning objectives and outcomes of the practicum and will be required to submit learning papers and reports. International students will need approval for curricular practical training from the International Students' Office.

MHC 700 Human Resources Management in Health Care - 3 credits

This course is designed to study the essential role of human resources management within healthcare organizations. To meet the challenges of the marketplace, organizations will need to improve the quality of the services provided; streamline clinical delivery and support systems and transform human resources management accordingly. The degree to which organizations manage the people issues may determine the success of health care institutions. This course serves as a comprehensive foundation for all aspects of human resources planning, development, and administration and is vital to both the human resources professional and the line manager. Through the text readings, journal articles, case analyses, and student presentations, we will explore key issues and concerns in the human resources field.

MHC 710 Risk Management in Health Care - 3 credits

This course deals with the discipline of dealing with the possibility that some future event will cause harm. It examines a variety of contemporary issues surrounding managerial and analytical problems involved in health care risk management. It includes a historical review of the role of risk management in health care and the evolution from a reactive to a pro-active focus and discusses the planning of a pro-active, patient outcome focused risk management program.

MHC 712 Healthcare Operations Management - 3 credits

Health care managers learn how to manage the outcomes of their organizations and departments more efficiently. Operations management involves planning the functioning of health care organizations for the most productive and efficient allocation of resources. Management functions such as planning, utilization of resources, control, and continuous quality management are addressed.

MHC 720 The U.S. Health Care System - 3 credits

The course will review the evolution of health care in the U. S., explore the structure of the current system, and consider the impact of emerging trends on the provision of health care in the future. Various components and stakeholders will be identified, with special attention on the diversity of care options and evolving roles of government as a funding source and regulator. Developments in national health care policy, the cost-quality-access conundrum, and the expansion of health care reimbursement options will be examined. The course also examines health care systems in other countries as a means to access alternative approaches to health care delivery issues.

MHC 721 Introduction to Health Care Disparities - Race, Ethnicity and Health - 1 credit

This course is designed to provide students with knowledge about racial and ethnic, disparities in health and health care. The course will examine the ways in which dyadic relationships and multiple forms of discrimination contribute to racial and ethnic disparities in health. Students will examine the ways in which neighborhood and community factors and inequalities in socioeconomic status influence health behaviors, access to health care services and health status outcomes. Individual characteristics such as acculturation, patient preferences, provider congruence and cultural competence will be explored in this course.

MHC 723 Unequal Treatment: Disparities in Health Care - 3 credits

This course will examine racial and ethnic disparities in health and human services and theories as to why those disparities exist. Students will consider policies that impact quality and equity of care. Specifically we will look at Title VI of the Civil Rights Act, which states that persons will not be treated differently on the basis of race, creed or color and how this important policy has been implemented and enforced over time. The course will use as its primary text the Institute of Medicine's (IOM) report issued in 2003; Unequal treatment: Confronting Racial and Ethnic Disparities in Health Care. While most of the research in this area has focused on health care, we will continually look at the relevance and application to social and human services. Students will critically review current efforts to address disparities in care and will focus on cultural competence.

MHC 725 Financial Management in Health Care - 3 credits

Prerequisite: MMG514 or equivalent. This course prepares health care managers to participate effectively in financial decision making within health care organizations. It focuses on how to use financial and program data to effectively analyze costs of programs and departments. Financial accounting, managerial accounting, and contemporary financial concepts are introduced. Special attention is given to Medicare, Medicaid, insurance, managed care, and government funding.

MHC 730 Health Care Information Systems - 3 credits

This course includes an overview of the health care information technology system as well as clinical information systems devoted to the direct management of the patient. It provides guidance for implementing, managing, and accessing clinical information systems in various health care settings. Discusses medical records, resource management and security, the importance of disaster planning, standards and regulatory issues as related to informatics. Also examines the current state and future of health care informatics, including tele-medicine and emerging technologies, and explores the new technology creation and adoption processes and the impact of rapidly evolving technologies in the health care arena.

MHC 732 Life Cycle of Information Systems in Health Care Informatics - 3 credits

Prerequisite: MHC 730. This course helps health care professionals understand the life-cycle of an information system and view it as a continuous process while maintaining the underlying support for the system. The course provides the tools needed to select a health information system based upon identified criteria in an individual health care agency and includes strategic planning, analysis, design and implementation, as well as testing and evaluation of the system.

MHC 733 Data, Knowledge and Information Management in Health Care Informatics - 3 credits

The purpose of the course is to help health care professionals transform data into useful information for decision-making. This information is then utilized to support administrative and clinical decision-making. Course content will include the process of decision-making, securing the right information, human factors that affect the use of information, information classifications, and the human-computer interaction in health care organizations.

MHC 735 Health Care Informatics: Fieldwork - 1 credit

Prerequisite: all concentration courses. The field work requirement provides the student with hands-on experience in a health care informatics setting. Students will be expected to complete an informatics project at a health care agency involving a total of 40 - 50 hours over a term with an agency preceptor and under the guidance of a faculty advisor.

MHC 740 Strategic Planning in Health Care - 3 credits

This course focuses on developing an organizational vision, mission and goals, and integrating all components of the health care organization to achieve those goals. Strategic analysis, plan development and implementation strategies are included, as well as monitoring and evaluation.

MHC 741 Emergency and All-Hazards Preparedness in a Health Care Setting - 3 credits

This course is intended for health care managers who are responsible for the preparedness of their organization in a disaster situation. It focuses on planning and preparedness for all types of hazards. It covers such topics such as the legal and ethical issues surrounding disaster planning and preparedness, obtaining assistance from government and other agencies, interagency cooperation, integrating civil and military response and meeting the needs of special populations.

MHC 749 Special Issues in Health Care - 3 credits

A special topic in health care is addressed from a health systems perspective. Financial implications, policy and ethical issues are considered. Racial, ethnic and economic dimensions of the issues are explored.

MHC 750 Health Care Policy and Ethics - 3 credits

This course gives an overview of policy development at the organizational, local and national levels. Students assess the influence of influence of actors, arenas, and socio-historical trends on health care policy. They explore ethical principles and how they are infused into all aspects of health care and health care management.

MHC 761 Health Care Services for the Elderly - 3 credits

This course outlines the interface of gerontology - the study of human aging - and elder care services, the caring for this population. It will review care provided to seniors within a variety of institutional settings, as well as outpatient and home care services. The course provides a comprehensive overview of programs, policies, and services and examines the issues, challenges and dilemmas confronting the provision of health care services to the elderly.

MHC 762 Nursing Home Administration - 3 credits

This course is an introduction to long term care nursing home administration. It introduces the student to the industry, to facility management, to senior populations and the variety of issues confronting the industry today. These include nursing, resident-centered care and quality of life, facility management, fiscal management and human resources, leadership, and regulatory requirements and accreditation. The content will prepare the student to take the NHA-LTC test.

Management (MMG)

MMG 500 Graduate Management Orientation Seminar - 0 credit

Provides incoming students with an orientation to the graduate management programs, including an overview of their philosophy and curriculum, and the benefits and rationale of the academic model. Introduces students to the resources of the College such as the learning management system, the online library and academic support services. Students meet with their academic advisor and develop their academic plans.

MMG 501E Business Communication - 3 credits

This course is focused on the communication, analysis, and presentation skills necessary for success in the U.S. and global business environment. Using a variety of materials including articles from newspapers, videos and podcasts of business topics and cases, students will develop their reading listening, critical thinking and oral and written communication skills. Students will be exposed to issues facing managers in today's environment and gain a better understanding of the cultural assumptions and communication styles of the U.S. business workplace. They will learn the appropriate style of communication for different types of business situations - participating in meetings, interviewing, writing memos or reports and making oral presentations. They will learn to develop clear and persuasive arguments both orally and in writing. Students may be required to take this course based on results of their initial writing assessment. It does not count as an elective in the Master of Management program.

MMG 504 Computer Applications for Business - 3 credits

This course familiarizes learners with the personal computer, Windows, word processing (Microsoft Word), spreadsheet (EXCEL), presentations (PowerPoint), E-mail and the Internet. Students get hands-on experience with these applications and an overview of personal and professional uses. Students progress from a beginning level through an intermediate level. This course is a requirement for students in the MM55 program. It may not be taken as an elective.

MMG 505 Graduate Writing - 3 credits

This course concentrates on strategies and techniques for building an academic essay. Challenging readings are used to promote the kind of critical thinking and analysis that best support graduate work. Students move from initial ideas, to first drafts, to strategies for revising their papers to achieve a polished product. Through a sequence of three to four progressively longer essays, students come to understand their own writing styles, strengths and difficulties, and become competent evaluators of their own work. By giving attention to the writing process itself and its different phases, students gain awareness of how to achieve their best work. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 506 Quantitative Analysis for Managers - 3 credits

Students learn to think about and express business problems in quantitative terms. They examine basics of number theory, arithmetic operations including ratios and proportions, percentages, graphing, and algebraic operations. Students get an introduction to probability theory and statistical analysis. Topics include descriptive statistics, probability distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation. Students learn to apply quantitative tools to solve a variety of business problems and create and use quantitative models for real-world problems. Charts and graphs are created using spreadsheet software. This course is a pre-requisite to MMG525 Statistical Decision Techniques for Managers.

MMG 507 Analysis and Communication for Managers - 3 credits

This course addresses the analytical and communication skills necessary for success in business environments. Students develop their critical thinking skills and enhance their ability to evaluate claims, evidence and assumptions and develop persuasive arguments through analysis of management case studies. The course also covers different forms of business communications including memos, reports, and oral presentations. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 508 Information Research and Technology - 3 credits

Prerequisite: MMG504 or equivalent. Students gain the knowledge, skills and abilities to apply principles of information research to their academic, work and professional lives. They gain ability to analyze problems, research and select relevant information from industry and professional publications, corporate and non-profit financial statements, print and electronic sources. They will become able to create an effective presentation and publish it in print or electronic form. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 509 Political, Social and Economic Aspects of Business - 3 credits

This course provides a broad liberal arts foundation to management theory and concepts. It draws upon the disciplines of economics and political science, the study of society and culture, and the tools of ethical analysis. It helps students gain a basic understanding of economic concepts and institutions, the role of government in business and the impact of political institutions and processes. Issues of interrelatedness in the global economy and polity are considered. The societal implications of business decisions, issues of multiculturalism and diversity and the use of ethical analysis to guide business decisions are addressed. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 511 Foundations of Management - 3 credits

This course provides an overview of the field of management and establishes a foundation and common vocabulary for future course work. It emphasizes the functions of planning, organizing, directing and controlling. The course assumes students have limited academic knowledge of management theory, and some experience in real world management situations to bring into the classroom. In each session the class explores some aspects of management in theoretical terms and then focuses on application of the theory to the practical problems facing managers.

MMG 512 Organizational Environment - 3 credits

This course provides an overview of the external and internal environment of organizations. It helps students understand the resource, market, technological, economic, and socio-political context of the organization, and the impact of multiple stakeholders on its goals and decision-making processes. It examines organizational architecture and dynamics from the structural, human resource, political and symbolic perspectives. The course draws on theories and research on organizations, including topics such as motivation, leadership, and organizational change and development. The intent of the course is to provide students with the theoretical base to better understand organizational behavior, and to equip them with tools to analyze and improve upon their own managerial practice.

MMG 514 Accounting for Managers - 3 credits

This course provides a broad view of accounting, from the point of view of those who prepare and use financial information. It combines elements of financial and management accounting in order to provide a background for managers to understand how financial analysis can impact their decision making. Students will become familiar with the four major financial statements: the balance sheet, income statement, statement of retained earnings and the statement of cash flows. They will also be given an overview of the firm's operating, financing, and investing activities; and an introduction to product costing, operating budgets, and capital investment decisions.

MMG 515 Economics for Managers - 3 credits

The main objective of this course is to provide students with the basic concepts and analytical tools of economics and to apply them so as to understand the workings of a market economy and to increase their effectiveness as managers. After an introduction to the basic economic tools of supply and demand, and the treatment of profit maximization, we will cover the basic concepts of microeconomics for use in business decision making. Throughout the course, we will use economic theory and real world examples to analyze and understand the main issues of microeconomics and macroeconomics as they apply to the business world.

MMG 517 Research Methods for Managers - 3 credits

This course helps students understand the role of research in the management decision making process and in the development of business plans and strategies. It helps students become familiar with the research process and with a variety of business research tools and techniques. Students learn how to define a problem and write good research questions, determine what tools and techniques are appropriate for different kinds of problems, find information sources and assess their reliability, and critically analyze information. They also learn how to present the results of research in appropriate output formats. This course helps students with their independent learning projects.

MMG 519 IT Security Management Planning Procedure and Policy - 3 credits

Security management includes identification of an organization's information assets and the development, documentation, and implementation of policies, standards, procedures, and guidelines. Students learn from a management perspective the tools required to rate system vulnerabilities. Students also define an information security strategy while prioritizing threats to information assets.

MMG 520 Financial Accounting - 3 credits

Prerequisite: MMG514 or equivalent. Financial Accounting covers the four basic financial statements and the way they are used by decision makers. Fundamentals and principles of accounting are discussed along with key concepts underlying accounting systems. Students learn the framework of debits and credits used in posting. The course has a focus on interpretation, analysis and communication of financial data. It covers balance sheets, income statements, cash flow statements, statements of retained earnings, and required SEC 10K filings. Students learn dual entry - accrual accounting with a focus on analysis of key ratios derived from financial statements for internal management. Special attention is given to accounting for assets, liabilities and owner's equity. Additional topics include generally accepted accounting principles (GAP), the Sarbanes-Oxley regulations, and ethics in accounting.

MMG 521 Managerial Accounting - 3 credits

Prerequisite: MMG520. This course examines the application of accounting principles and procedures to the planning and control functions of management. The emphasis is on costs, cost-profit relationships, measures of performance, and uses of accounting in long-range planning. Topics will include cost accounting techniques, overhead allocations, standard cost, profit planning and responsibility accounting.

MMG 522 Information Systems in the Organization - 3 credits

The course provides an overview of computer information systems. Students will be presented with the core information systems principles, offered an overview of the information systems discipline, and will learn about the changing role of the information systems professional. This course will enable students, regardless of their field, to understand and use fundamental information systems principles so that they can function more efficiently and effectively as workers, managers, decision makers and organizational leaders.

MMG 524 Marketing in Non-Profit Organizations - 3 credits

In this course students will master the principles of marketing for a nonprofit agency. It will introduce students to marketing techniques used by nonprofit organizations to build a brand and develop mission-driven outreach to reach their core audience and to support the organization's future. This course will help those who want to play a more rounded role in shaping and implementing the direction of the marketing function in their nonprofit organization.

MMG 525 Statistical Decision Techniques for Managers - 3 credits

Prerequisite: MMG506 Quantitative Analysis for Managers or equivalent. This course provides students with the knowledge and appropriate use of descriptive and inferential statistical techniques used in management decision making and develops their ability to characterize management problems that can be solved by such techniques. Topics include descriptive statistics, probability distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation, chi square testing, analysis of variance, and decision theory. Spreadsheet and statistical computer programs are used in the class.

MMG 535 Communication Strategies for Organizational Effectiveness - 3 credits

Organizational effectiveness is a process, not an event. This course will look at the assessment, analysis and evaluation of present organizational strategies and provide opportunities to design and implement more effective communication within the organization by measuring the functions of (1) purpose, (2) strategy, (3) feedback, (4) processes and procedures, and (5) leadership/membership.

MMG 560 Managing a Diverse Workforce - 3 credits

Current business conditions are surveyed, and participants are introduced to the link between the business agenda and human capital. Since the workforce is critical to the success of the American business agenda, much of this course is dedicated to the development of competencies necessary to manage a diverse workforce. This course is for professionals dealing with issues of differences and diversity in contemporary organizations.

MMG 561 Business Law - 3 credits

The course provides an overview of the legal aspects and responsibilities/liabilities of managing an organization. Areas covered include the legal system, basic contract law and agency, and how these apply in an international context. It also examines legal issues relating to various organizational structures and the choice of a business organization (corporation, the agency relationship, partnership, sole proprietorship, not for profit and LLC).

MMG 600A Graduate Management Practicum - 1-2 credits**MMG 600A Practicum in Business - 1-2 credits****MMG 600C Practicum in Small Business Development - 1-2 credits****MMG 600D Practicum in Organizational Leadership - 1-2 credits****MMG 600E Practicum in Nonprofit and Public Management - 1-3 credits****MMG 600F Practicum in Information Technology Management - 1-2 credits**

This course is an elective intended for students with limited working experience in their chosen field and is open to students who have completed at least two terms of work in the MM or MBA program. Students will undertake a supervised practicum or internship in an organization, working not more than 20 hours per week during the fall and spring terms (full time may be permitted in the summer) in a position related to the concentration. Students are responsible for obtaining the position. Students work with the practicum advisor to design the learning objectives and outcomes of the practicum and will be required to submit learning papers and reports. International students will need approval for curricular practical training from the International Students' Office.

Puerto Rico only**MMG 605R Cybersecurity Fundamentals - 3 credits**

Prerequisites: MMG511, MMG522. With the contemporary consistent rise of the integration of internet and virtual reality in the business environment and their vulnerability, the manager needs to know fundamental matters about cybersecurity. The custody and protection of cloud and web delivered and stored data is becoming a more needed field of knowledge. The course will include, but not be limited to, expert coverage of essential topics required for entry-level cybersecurity certifications. The student will learn about security and surveillance fundamentals, securing and protecting remote access and devices, and how to understand network topologies, protocols, and strategies to identify threats and mount an effective defense.

MMG 603 Data Exploration and Visualization - 3 credits

Prerequisites: MMG525 and working knowledge of MS Excel. This course offers an introduction into applied, basic analyses of data, and visual presentation of data analytic results. Students are introduced to foundational concepts and practices of statistical estimation, sample-based inference, and data/result visualization. The course combines the development of conceptual understanding of core statistical and data management notions, and experiential know-how aimed at acquiring basic data manipulation, analysis and result interpretation skills.

MMG 604 Data-Driven Decision Making - 3 credits

Prerequisites: MMG525, MMG625, MMG603, and working knowledge of MS Excel. This course offers students an introduction into the emerging domain of evidence-based practice, with a particular emphasis on the use of data analyses derived insights as a basis of decision-making. Students will explore the basic principles of evidence-based practice in the context of the scope of evidence, and will be introduced to the Empirical & Experiential Evidence Framework.

MMG 625 Foundations of Business Analytics - 3 credits

Prerequisites: working knowledge of MS Excel. This course offers an overview of the modern organizational landscape built around data and data analytics. Rooted in the notion of evidence-based management, the course aims to enhance students' understanding of how successful, data-driven business organizations extract insights to enhance their competitive advantage. Three broad topical areas will be covered: 1. making sense of data, 2. estimation and statistical inference, and 3. learning with data.

MMG 691 Leadership Seminar I: Self-Diagnosis and Goal Setting - 2 credits

The Leadership Seminar serves as a learning laboratory for students to develop, integrate and demonstrate competencies in personal, professional and academic development. It provides an opportunity for students to test and apply learning in a practical and experiential context and to integrate experience and theory. In the first term students self-diagnose their academic and managerial skills and develop academic and professional goals and plans. They also develop skills at being effective members of a learning community.

MMG 692 Leadership Seminar II: The Manager as Team Developer and Leader - 2 credits

This seminar focuses on the manager as a leader and developer of people and teams. Students develop important cognitive and affective skills: developing people, peer relationships, working with others, and resolving conflict. The seminar also helps the student learn how to leverage the diversity in teams and how utilize team resources effectively.

MMG 693 Leadership Seminar III: The Manager as Strategic Leader - 2 credits

Strategic leadership provides the scope and direction to help drive success for the organization. This seminar explores the skills and tools necessary for strategy formulation and execution and the ability to effectively manage change. Managing in an environment of change and uncertainty requires strategic leaders to craft and communicate organizational vision and consistently maintain a sense of direction, while simultaneously building ownership of goals and objectives for action within the units they are responsible for leading. Participants explore how strategic leaders make decisions based on values, invest in innovation, human capital, and create and maintain an effective culture to ensure long-term viability.

MMG 694 Graduate Management Capstone Seminar 3 credits

The Graduate Management Capstone Seminar is designed to support students in designing, implementing and presenting their capstone project. The capstone provides a culminating opportunity for students to apply and demonstrate the knowledge, skills and behaviors developed during their program through a designed action-learning experience, using the stated program outcomes and competencies as an assessment reference. Students will develop a business report / case analysis that demonstrates and documents their learning.

Prerequisites: Student must have completed at least 75% of their total program credits, seminars MMG691-693, as well as specific program core courses detailed in the program charts.

MMG 699 Graduate Management Capstone Continuation - 3 credits

Additional terms as needed to complete the Graduate Management Capstone project.

MMG 700 IT Service Management - 3 credits

In an age of cloud computing, on-demand services, virtualization, mobile devices, outsourcing and rapidly changing business delivery strategies, the role of IT is moving toward a focus on service integration. This course provides an introduction to the concepts, tools and techniques of IT service management. Students will learn how to define and build a comprehensive IT service management solution that incorporates process, technology, organization and governance and become familiar with standard frameworks that provide industry best practices for aligning IT with business needs.

MMG 709 Innovation and New Product Design - 3 credits

This course will focus on how companies' top managers handle the complexity of managing growth through innovation and new product development. In today's economy, competitive advantage goes to firms that are able to out-innovate the competition. The course will help students (1) to increase their understanding of what it takes to make an organization and its employees embrace innovation, (2) to understand the approaches companies are taking to foster new product development globally, and (3) to understand the capabilities organizations need in order to handle the complexities associated with the implementation of a global new product development strategy.

MMG 710 Project Management Concepts and Practices - 3 credits

In this course, students will learn how to use the concepts, tools and techniques of project management in order to successfully manage system development projects. System development project failures are generally failures of management, not failures of technology. Good management, along with an understanding of the appropriate use of technology, is therefore essential. Students will learn, in particular, how to apply the concepts, tools and techniques of project management in today's dynamic, digital business environment, where projects must be brought to completion under increasingly compressed time frames and where decisions must be made under conditions of uncertainty.

Puerto Rico only**MMG 711R Cybersecurity Information Systems Policies, Ethics and Auditing - 3 credits**

Prerequisites: MMG 511, MMG 522, MMG 605R. The cybersecurity manager must know about policies, ethics and procedures for auditing web delivered and storage data. This course prepares future managers how to manage ethically and legally risky situations assertively, and how to deal with incidents. The student will learn how to create security protocols, risk assessment instruments, and business impact analysis, among other related topics. This course also includes topics in cryptography, digital signatures and certificates, public key infrastructure, authentication, cloud security protocols, and vulnerability impact regulations.

MMG 712 Operations Management - 3 credits

Operations refers to the process by which an organization converts inputs (facilities, equipment, labor, etc.) into outputs (services and goods). This process involves management functions such as planning, the acquisition and utilization of resources, control, evaluation, and appropriate change. This course also develops an appreciation of the distinctions and relationships between the operations function and other functions of the organization including finance and marketing.

MMG 713 Total Quality and Operations Management - 3 credits

Operations Management is the process by which an organization converts inputs (facilities, equipment, labor, etc.) into outputs (services and goods). This conversion process involves management functions including planning, acquisition and utilization of resources, control and evaluation. Total Quality Management (TQM) is a way for businesses and organizations to improve the quality of business processes and performance. This course develops an appreciation of the TQM concept as well as the distinctions and relationships between the operations function and other functions of the organization.

MMG 714 Data Management - 3 credits

Prerequisite: working knowledge of MS Excel. Today most enterprises rely heavily on data and technology to make strategic decisions to keep their organizations competitive, profitable and innovative. The technological revolution has ushered in the era of big data and as a result, the field of data management has grown exponentially. This course offers the student the fundamentals of data management and helps prepare the interested student for future certification and professional development in the field.

Puerto Rico only**MMG 714R Data Management in Cybersecurity - 3 credits**

Prerequisite: MMG 522. Today most enterprises rely heavily on data and technology to make strategic decisions to keep their organizations competitive, profitable and innovative. The technological revolution has ushered in the era of big data and as a result, the field of cybersecurity data management has grown exponentially. This course offers the student the fundamentals of cybersecurity data management and helps prepare the interested student for future certification and professional development in the field.

MMG 715 Management of Information Technology - 3 credits

This course provides an understanding of how information technology may be efficiently and effectively used in the business environment. Students get an overview of hardware, software, file/database concepts, systems analysis and design methodologies. The complex integration of hardware, software, data, procedures and personnel that is required for managing information systems is addressed. The impact of constantly changing information technology upon the organization and the management of the firm is discussed.

MMG 717 Systems Analysis & Design - 3 credits

Systems analysis and design is a critical competency for information technology. This course focuses on techniques for designing information systems more effectively and efficiently, by linking the information system, business mission and purpose and technology. Students learn the core skills required by systems analysts: from gathering requirements and modeling business needs, to creating blueprints for how the system should be built and implemented in a particular organization. The course provides a concise, yet informative theory of the systems development life cycle, and touches on project management, infrastructure management, system development and system implementation with examples from a variety of industries.

MMG 725 Financial Management - 3 credits

The major goal of the financial manager is to maximize the value of the firm. Accordingly, this course focuses on analysis and interpretation of financial data from the income statement, balance sheet and the statement of cash flows, for decision making. Powerful planning and control tools such as pro forma budgeting and break-even analysis are introduced, as well as the concepts of operational and financial leverage. Students learn how to estimate the amount of cash an organization will need in its operations. One key focus of the course is on capital budgeting, based on the concepts of the time value of money. This includes calculations of future value (FV), present value (PV), net present value (NPV), internal rate of return (IRR) and payback period.

MMG 727 Budgeting and Finance for Non-Profit and Public Organizations - 3 credit

Prerequisite: MMG 514 or equivalent. This course provides an introduction to the basic financial accounting systems used in nonprofit and public organizations. It also focuses on how to use the financial and program data to effectively analyze the costs associated with programs and services provided by the organization. The final area to be covered will be budget preparation and monitoring. The politics of the budgeting process will be examined. By the conclusion of the course, students will be able to effectively participate in the financial decision-making within their organization.

MMG 729 Business Intelligence and Analytics - 3 credits

Introduces students to business intelligence and data analytics, technology-driven processes for analyzing data for decision-making. Provides a theoretical background in storing and handling big data and practical skills in using tools to analyze data and build dashboards. Includes an overview of dashboarding, data warehousing, analytics, handling structured and unstructured data, and extracting, transforming, and loading data (ETL). Students gain hands-on experience with creating data visualizations and with SQL, the language used for querying structured data.

Puerto Rico only**MMG 729R Business Intelligence and Cybersecurity Analytics - 3 credits**

Introduces students to business intelligence and cybersecurity analytics, technology-driven processes for analyzing cyber data for decision-making. Provides a theoretical background in storing and handling big data and practical skills in using tools to analyze cyber data and build dashboards. Includes an overview of dashboarding, data warehousing, analytics, handling structured and unstructured data, and extracting, transforming, and loading data (ETL). Students gain hands-on experience with creating cyber data visualizations and with SQL, the language used for querying structured data.

MMG 732 Global Business - 3 credits

Prerequisite: MMG 511, MMG 515 or equivalent. The purpose of this course is to introduce students to the dominant themes and theories of global business. The course consists of a fundamental study of the nature of business and its environment. In the course of our study we will examine managerial functions and processes in a global context.

MMG 733 Marketing Management - 3 credits

Prerequisite: MMG 511 recommended. This course provides a basic overview of the marketing management process, oriented primarily to the non-marketing specialist. It examines the role of marketing in a variety of organizations - product/service, public/private. It introduces students to the analysis of an organization's market environment, and the development of marketing programs designed to achieve organizational goals. Topics covered include the analysis of markets, buyers and competition; the identification and selection of target markets; the design of product, pricing, distribution and communication programs appropriate to selected markets; and the planning, implementation and control of the marketing effort. The course emphasizes the practical utility of marketing tools and concepts through the use of case studies and application to the students' own work environment. The course also attempts to create a heightened awareness of the global interrelationships affecting marketing, and the societal implications of marketing decisions.

MMG 734 Business Planning - 3 credits

This course allows students to learn about business development, new product/service planning, feasibility analysis and trends in innovation. During this course, students will learn how to test new products, forecast financial needs, and analyze market requirements. The basis of competition for new products/services, major traits of successful new ventures, market situation analysis, opportunities for professional challenge, common pitfalls and ways to avoid them will be addressed.

MMG 735 Entrepreneurship and Small Business Management - 3 credits

Prerequisite: MMG511, MMG520 or equivalent. This course examines the major characteristics of a self-employment venture and the issues facing the person starting or managing a small business. The focus is on the opportunities, risks, issues and problems facing the entrepreneur. Techniques learned in other management courses are integrated and applied to small businesses. Students prepare a business plan for a small business that defines the business concept and provides an integrated strategy for starting up or expanding a business.

MMG 736 Digital Marketing - 3 credits

Prerequisite: MMG 733. For a business to succeed in today's digital world, it is important to have a strong digital footprint. The course will assist the students to identify and understand the elements of digital marketing and how to create, implement and evaluate a digital marketing strategy. Students acquire the knowledge to build and actively manage digital marketing campaigns across social media, website and mobile platforms and track results of digital advertising through analytic tools.

MMG 737 Marketing Strategy - 3 credits

Prerequisites: MMG 733 and MMG 517. This course focuses on business level marketing strategy and uses the marketing planning process as the framework for understanding the integration and coordination of marketing decisions. Students will apply strategic marketing concepts to a real-life business case study. They will work in teams, under faculty supervision, on a marketing strategy consulting project. They will analyze the company issues and/or opportunity, gather information, and develop recommendations for action.

MMG 739 Strategic Management - 3 credits

Prerequisites: MMG 511, MMG 512, MMG 514, MMG 725, MMG 733. Strategic management is concerned with managerial decisions and actions taken in order to ensure the success and sustainability of the entire organization in an environment of competition, change and uncertainty. The objectives of the course are to build an understanding of the key concepts in strategic management and the competitive business environment that organizations face, and to develop skills in applying the concepts to analyze real world situations. The course integrates prior learning in courses such as organizational environment, accounting, finance and marketing.

MMG 740 Human Resource Management - 3 credits

Changes in the social and legal environment, and the workforce, make it increasingly difficult for organizations to manage relations with employees. The human resources manager needs to be able to formulate organization-wide human resource policies which result in competitive strategy, efficiency and effectiveness, and which are consistent with the organization's culture and environment. The interests of many stakeholders have to be reflected in such policies — employees, unions, communities and government. The course helps students identify and understand Human Resources Management issues, develop skills in diagnosing situations, discuss effective approaches to problems and assess the comparative effects of immediate action and long-term policies.

MMG 743 Models of Leadership - 3 credits

An essential component of a successful career is an effective personal leadership style that fits appropriately within one's professional setting. Students explore the elements of individual style with the goal of increasing effectiveness. The course also examines the content of the professional setting and looks at the different strategies for achieving the most congruent fit possible. This course will be experiential, and there will be guest speakers.

MMG 744 Management Training and Development - 3 credits

This course will explore many of the tools and techniques that are available to organizations for the use of upgrading staff. Some of those tools and techniques will include needs assessment, alternative methodologies for presenting material and evaluation techniques. Students will develop a total system for training and development within their organization or sub-unit. The course is aimed at corporate training staffs and human resource managers. The focus will be on actual situations and case analyses.

MMG 746 The Manager as Negotiator - 3 credits

Effective managers must be able to deal successfully with limited resources, divergent interests of people, and organizational conflict. This course improves skills in negotiation and joint decision-making that students can apply immediately. Emphasis is on integrative bargaining and problem solving. Students learn the theory and tactics for understanding and diagnosing a conflict, planning for negotiations, and implementing an effective conflict resolution strategy.

MMG 747 Negotiation Theories, Strategies and Tactics - 3 credits

This course explores and compares the different theories of bargaining and competitive negotiation styles, and evaluates the impact of different styles on negotiation outcomes including ethical issues. The course also examines planning, perception, cognitive biases, and the use of power/ influence in negotiations. Both one on one as well as multiple party negotiations will be studied. Emphasis is on the integration of negotiation theory, practice and behavior.

MMG 749 Global Negotiation - 3 credits

This course is designed for students who work in multi-cultural teams or negotiate in a multi-cultural setting. Students will learn how culture affects negotiating strategies, conflict management techniques and team effectiveness. Students will learn and apply a framework to help manage cultural differences whenever they impact business deals, disputes or team work.

MMG 750 Business, Government and Ethics - 3 credits

Prerequisite: MMG511, MMG512. This course explores the ethical environment of business and the ongoing relationship between business, government and society. Topics include the development of government regulations and the impact of regulations and likely future developments with an emphasis on ethical considerations.

MMG 755 Organization Development and Change Management - 3 credits

Prerequisite: MMG512. The theory and practice of organization development are introduced. Skills are developed in identifying how organizational systems operate together, including organization culture, leadership, structure, human resources, rewards, and technology. Students learn how to make effective change through dealing with an organization as a whole. Strategies are developed to help organizations adapt to new technologies, markets, and challenges, including the rate of change itself. Case studies and simulations are used throughout the class work.

MMG 757 Consulting Skills for Managers - 3 credits

This course explores the essentials of the consulting relationship and the skills critical to the consulting process. Managers develop ability to apply consulting skills and processes in a variety of situations from working with international personnel to getting the most from cross-functional teams to dealing with external clients and vendors. Tools for assessment, analysis and implementation will be reviewed. Topics include negotiating scope, influencing expectations, overcoming resistance and giving clients feedback.

MMG760 Strategic Planning for Non-Profit Organizations - 3 credits

This course is structured as a live case study. Students will learn through lectures the skills necessary to collect, analyze, and develop recommendations to support a nonprofit organization's strategic plan. Working in cross-functional teams, students will work with a real-life client and be responsible to prepare their strategic plan over the term. Topics include: aligning mission, vision and values, performing an environmental scan, analyzing financial statements, building an organizational capacity plan, and improving leadership throughout the organization.

MMG 770 Grant Writing and Resource Development - 3 credits

This course covers the preparation of proposals to state, federal, and local agencies, corporations and private foundations. Students will learn how to prepare successful, competitive grant proposals and realistic, effective project-based budgets. The course will take students step-by-step through each stage of the proposal presentation process from research techniques to polishing the finished product. Best practices in funding research, planning and presentation will be covered. By the end of the course, students will have a prototype suitable for submission to a funder.

MMG 795A Advanced Project Management - 3 credits

The objective of this class is two-fold: 1) first, to build on the basic project management of MMG710 with advanced concepts such as earned value, agile, vendor management, etc. b) second, to prepare students for the CAPM and/or PMP exams. Each week, students will study one chapter of the MPBOK® Guide and complete CertWise online material for the chapter before class. By the end of the course, students will have written a project charter, created an MS project plan, and written selected sections of a project management plan, in addition to study and exercises for the CAPM/PMP exam. Prerequisite: Completion of MMG710 Project Management Concepts & Practices or equivalent or 1+ years experience managing projects. Please note: Although this class will help students prepare for the CAPM or PMP exam, it does not guarantee that students will pass the test.

MMG 800 Independent Learning Project: Management - 3 credits

This comprehensive final project is focused on a topic in a student's concentration. The Management Seminar and the Seminar Leader provide direction and support for the project. The project demonstrates ability to define a problem, use appropriate resources, collect and analyze data, draw conclusions, and organize the written report.

School of Psychology & Counseling

The School of Psychology and Counseling (SOPC) provides graduate programs for new practitioners in the fields of counseling and human services. The School welcomes adult learners, serving a diverse demographic of graduate students who arrive with a wide range of non-traditional experience in counseling and related fields.

Diverse Populations and Perspectives

Our students and faculty are highly diverse in experience, cultural background and values. Our interactive classrooms and collaborative learning bring cross-cultural perspectives to the counseling process. Counseling students serve diverse client groups typically characterized by broad differences in access to appropriate services across lines of race and social class in agencies with varied philosophies.

Our faculty members are licensed professionals in their respective fields.

Academic Programs, Licensure, and Professional Credentials

Most academic programs prepare students for licensure or other professional credentials which are increasingly necessary for many counseling careers. Other concentrations support related careers that do not require licensure.

States and professional associations govern the requirements for professional credentials in counseling and related fields. The Cambridge College School of Psychology and Counseling strives to cover the academic requirements and to include in its programs appropriate supervised clinical practice hours through field experience placements. There may be additional post-graduate requirements such as exams and further clinical experience.

External requirements and regulations may change at any time. Cambridge College reserves the right to alter programs accordingly. Program chairs are available to advise students.

Current, detailed information about the academic program, field experience, and professional credentials is available from program chairs. At Cambridge College regional locations that offer SOPC programs, information is available from the SOPC coordinator or site director.

All students are responsible for:

- Monitoring and understanding all applicable requirements and regulations for licensure.
- Knowing the detailed requirements of their academic program.

Students pursuing licensure in states other than Massachusetts are responsible for checking with the appropriate credentialing agency in their state to determine whether their SOPC program of study:

- Meets all requirements for licensure/certification, and
- Is accepted for licensure.

Legal status as a U.S. citizen or lawfully admitted resident is required for a professional license from any state agency, under Title 8, U.S. Code Section 1621.

Academic Advising

Admission counselors give applicants an overview of the College's academic programs and assist with the application process. Applicants may be referred to program chairs to discuss programs and for academic advising.

Orientation — All new students are required to attend Orientation.

The **SOPC assistant dean of academic advising** will provide program-specific academic advising for all students, including those in Springfield and Lawrence. Every new and continuing student meets with the local SOPC coordinator or with the academic advisor.

The **SOPC assistant dean of field experience** provides advising specific to licensure and field placement.

Writing Assessment and Support

A writing assessment is conducted during Orientation. Results are communicated to the academic advisor, who may refer students to writing courses and writing and academic support.

Concentrations

Students wishing to pursue a concentration must declare their concentration with the assistant dean of academic advising and the respective program chair prior to completion of 18 credits. Students who do not declare will not be guaranteed courses for their intended concentration for the earliest graduation date possible; students will have to adhere to each concentration course offering sequence as outlined in the academic catalog.

Field Experience (Practicum/Internship) – See your Program Handbook

Field experience sites and supervisor qualifications are subject to state regulations.

The **acceptability of a field experience or clinical site** is determined by the program chair, instructor, or assistant dean of field experience, depending on the program, in accordance with current criteria. Students are responsible to seek this person's advice prior to enrollment in the field experience course, to determine what sites and supervision are appropriate for the credentials sought.

Readiness for Field Experience

In addition to coursework, field experience is an integral part of a student's clinical training. The pre-requisite for CCP 520 Field Experience I is CCP 550 Basic Counseling Skills, Rogerian Therapy. A Student Readiness for Field Experience I Assessment is completed if needed. Students determined to "need improvement" will be re-evaluated during the next term in CCP 650, Group Dynamics. This assessment does not impact a student's grade but is an assessment of a student's readiness for field experience.

Field Experience

The field experience includes a practicum and internship under a qualified supervisor, conforming to Massachusetts regulations 262 CMR.

Addiction Counseling: Must include 300 hours in an approved substance abuse treatment program with appropriate supervision in the 12 core functions.

The **on-site component** must be successfully completed to receive credit for a field experience course. The minimum on-site component must be completed while the course is in progress. The instructor and the site supervisor verify successful completion; the decision to award or withhold credit is made by the instructor.

Students may not register for a subsequent field experience course with an Incomplete grade in the prior term(s).

Field experience fee — A one-time fee is charged to students in programs that include a practicum/internship component to cover administrative costs (see *Tuition and Fees Rates* on page 17).

State requirements prior to field experience — Students seeking placement in school, mental health, or public health facilities and programs are responsible for complying with all policies and procedures of the state and facility where they seek a field placement, including but not limited to:

- Fingerprinting
- Criminal Offender Record Information (CORI) check
- Insurance
- Immunizations

Cambridge College strives to cover academic requirements for the following credentials, for which graduates may apply:

- Licensed Mental Health Counselor (LMHC) licensure by the Massachusetts Board of Allied Mental Health and Human Services Professionals. Candidates must also pass an exam and complete two years of post-master's supervised clinical practice.
- Certified Alcohol & Drug Abuse Counselor (CADAC) certification by MBSACC and Licensed Alcohol & Drug Counselor (LADC) licensing by the Mass. Dept. of Public Health.
- Certified Rehabilitation Counselor (CRC) by the Commission on Rehabilitation Counselor Certification and Licensed Rehabilitation Counselor by the Mass. Board of Allied Mental Health and Human Services. Candidates must also pass an exam and have had a minimum of one year of acceptable employment under the direct supervision of a qualified CRC professional.
- School Adjustment Counselor initial licensure by the Massachusetts Department of Elementary and Secondary Education.
- School Counselor initial licensure by the Massachusetts Department of Elementary and Secondary Education.

Regulations may change at any time. Cambridge College reserves the right to alter the program accordingly. The academic advisor and program chairs are available to advise students.

Students are responsible for monitoring and understanding state requirements and regulations, and for ensuring that their program of study complies with all requirements for licensure/certification.

Exit Portfolio

Most programs require students to assemble an educational portfolio over the course of their studies. It highlights the students' professional knowledge, skills and abilities, and documents quality graduate level work. The specific requirements of each program's exit portfolio vary. See the program chart and program handbook, and ask the program chair and/or academic advisor for information.

School Counseling and School Adjustment:

Counseling programs for Massachusetts DESE licensure

Programs leading to certification are aligned with national and state standards, accrediting agencies, and policies for licensure required by the Massachusetts Department of Elementary and Secondary Education (DESE); all programs are state-approved by state regulatory agencies. As such, program requirements are subject to change during a course of study and students are asked to consider this possibility and plan accordingly once enrolled in one of the licensure programs offered.

Seek advice from the program chair before registering for a licensure program.

All students seeking licensure in school counselor education programs must:

- Complete the Massachusetts-specific admission and program requirements.
- Complete all field experiences including pre-practicum **within the Commonwealth of Massachusetts**.

Requirements for Program Entry

Entry into a Cambridge College program for DESE licensure requires:

- Massachusetts Educator Personnel ID (MEPID) number,
- Evidence of successful completion of the Communication and Literacy Massachusetts Test for Educator Licensure (MTEL), and
- A minimum Grade Point Average (GPA) of 3.0 in the most recent degree program.

Those entering the College **having successfully met** the Communication and Literacy MTEL and the GPA requirement may register for the licensure program of choice provided that evidence is submitted at admission verifying that the requirements are met. Evidence of the Communication and Literacy MTEL requirement includes a copy of the official document noting the “pass score” or verification page from the Educator Licensure and Recruitment (ELAR) system maintained by the Massachusetts Department of Education and Secondary Education. Evidence of the GPA upon College entry includes the official transcript of a prior undergraduate or graduate degree with a 3.0 GPA or better.

Those entering the College **without having met** the Communication and Literacy MTEL and/or the GPA requirement **must register for the corresponding non-licensure program**:

- School Counseling (48 credits):
Register for School Counseling/non-licensure.
- Mental Health & School Counseling (66 credits):
GPA \geq 3.0: Register for Mental Health Counseling.
GPA $<$ 3.0: Register for Psychological Studies.
- School Adjustment/Mental Health Counseling (60 credits):
GPA \geq 3.0: Register for Mental Health Counseling.
GPA $<$ 3.0: Register for Psychological Studies.

Students who graduate from the non-licensure program

cannot be endorsed by Cambridge College for DESE licensure in School Counseling. They may apply to DESE after graduation and ask for a panel review to obtain such licensure.

Once the Communication and Literacy MTEL test is successfully passed and a 3.0 received (i.e., Grade “B” or better in at least two courses taken at Cambridge College), then a Change of Program Form can be completed with approval from the program chair in the field selected and dean, then submitted to the Registrar’s Office.

Students entering without having met the requirements for DESE licensure programs are advised to take the Communication and Literacy MTEL within the first term of enrollment at Cambridge College.

Once enrolled, candidates for licensure must maintain an overall GPA of 3.0 or better for the remainder of the program. Should the GPA drop below 3.0 prior to the Field Experience I, the candidate must return to the non-licensure degree option.

No candidate can complete or graduate from the approved program for licensure selected without maintaining a GPA of 3.0 or better at Cambridge College.

Review of Progress and Practice

Due to the impact graduates will have on clients throughout their careers, the School of Psychology and Counseling considers the training and credentialing of master’s level counselors a matter of great sensitivity and importance. Consequently, faculty review and discuss students’ behavior within the graduate academic program and the field work site.

Students are expected to follow the American Counseling Association (ACA) Code of Ethics.

The Committee on Professional Conduct has developed guidelines for students’ professional behavior with which all graduate counseling students are expected to comply. The counselor in training behavioral contract is reviewed and signed at orientation and a copy is provided.

The School reserves the right to require additional courses, field work, supervision, personal counseling and/or a leave of absence. A student may be suspended or disenrolled for violation of ethical standards or lack of academic progress. The School may also recommend a change to a non-clinical major or require a student to leave the School of Psychology and Counseling.

Guidelines for Students' Professional Behavior

Students in the School of Psychology and Counseling (SOPC) should be aware that SOPC deems it of the utmost importance that students are cognizant of, and attentive to, SOPC standards and expectations for personal and professional behavior.

There are five significant areas of counselor training that specifically relate to the growth and management of the self of the counselor-in-training. Together they form the basis for counseling licensure standards, and therefore students pursuing licensure in SOPC programs will be held to all of these standards:

1. Maintaining professional conduct and appropriate behavior both on campus and at the clinical field experience site
2. Managing appropriate interpersonal boundaries
3. Respecting privacy and appropriate self-disclosure
4. Committing to developing your ability to hear, understand, and use effectively, the feedback you get from faculty, peers, and supervisors
5. Expanding self-awareness and self-reflection

Counselors are potent agents of change. To be effective catalysts of change, students need to increase their capacity for **self-awareness and self-reflection**. Without this, the counselor can become reactive, judgmental, punitive, and even harmful in the counseling setting. We want you to engage in serious, thoughtful, and reflective work in your academic and training settings, where you will be called to begin a process of self-exploration, which at times will become challenging and demanding. We recommend students consider participating in counseling as an adjunctive growth experience while in training.

As you reflect on your internal experience and your history, you will also be expected to develop a larger repertoire of interpersonal skills, and to comport yourself with seriousness, decorum, appropriateness, and **professionalism**. The norms of basic civility and manners remain an expectation. Expressions and behaviors of disruption, belligerence, aggression, intimidation, defiance, confrontation, and violation of boundaries and norms of professional conduct will lead to academic sanctions. The **management of appropriate interpersonal boundaries** can sometimes be demanding when, for instance, you find yourself feeling unsettled in the process of academic discourse, disagreement, discussion and challenge. As you progress through the program, you will undoubtedly experience both internal and external stressors, and, at times, you will be presented with beliefs, ideas, values and perspectives that differ from your own. This is a normative aspect of the academic process, which can be especially amplified in counselor training programs. We expect you to convey your perspective in a facilitative manner that contributes to, and enhances, the academic process, rather than disrupts or derails your own learning or the learning of your peers.

Your growing self-awareness may lead to **self-disclosure**, which is a crucial aspect of your training. Sharing of the self in the process of self-discovery will help your development as a counselor. You will be expected to balance self-disclosure with sensitivity to boundaries and a regard for your privacy and the privacy of your peers and faculty. Inappropriate self-disclosure can create discomfort and uneasiness and disrupt the learning process. Sharing your personal experience and learning from the experience of others is part of the process of counselor training. At the same time, learning when and how to self-disclose is a crucial component of your professional development as a counselor.

Guided by **feedback** from your teachers and supervisors, and by your own questioning and self-examination about the intention of your personal sharing, the manner in which you disclose your insights about yourself will grow and develop as you advance in your training. Flowing from a deepening knowledge of the self, it is at the heart of the development of counseling skills. The support and feedback you receive from faculty members should not be confused with a professional clinical relationship. As you choose what you share about yourself, it should not be with an expectation that you will be given personal clinical advice. Disclosure should be guided by this question: does this enhance my growth as a student counselor or am I trying to use my instructor as a personal counselor? SOPC faculty members are mindful of this distinction when providing support and feedback to you.

As an SOPC student, you are expected to grow and develop personally and professionally. Your openness to new knowledge will be transformative and life-enhancing. This education will amplify your understanding of yourself and others and will lay the foundation for your becoming an effective counselor.

On-going training

Following licensure, continuing education is required to maintain the professional license. Cambridge College courses may be used to fulfill this requirement. Licensed professionals may take these courses as "special students" and alumni receive an alumni discount.

Graduate Post-Baccalaureate Certificate or Undergraduate Pre-Baccalaureate Certificate

Alcohol & Drug Counseling

• CIP code 511501 • 18 credits • Certified Alcohol & Drug Abuse Counselor (CADAC) • Licensed Alcohol & Drug Counselor (LADC)

Program Description — Alcohol & Drug Counseling is for students seeking professional training in substance abuse/addictions treatment, education and prevention, leading to certification or licensure.

Learning Outcomes — Students become familiar with addictions counseling, its professional ethics, and its role in society. They learn the 12 core functions of an addictions counselor: screening, intake orientation, assessment, treatment planning, referrals, reports and record keeping, and consultation with other professionals. They know and apply current theory and research in their field, and gain sufficient knowledge for competent interdisciplinary counseling practice. They exhibit socially-conscious behaviors, critical thinking, and effective communication skills in their work with individuals, caregivers, families, staff, and other professionals.

Careers — Addictions counseling professionals help people through public health agencies, youth services, residential treatment programs, hospitals, outpatient substance abuse programs, and homeless shelters.

Courses

ADC 505	Alcohol & Drugs in Society	3
ADC 611	Family Treatment of Substance Abuse.	3
ADC 601	Role of the Professional in Alcohol & Drug Treatment. . .	3
ADC 625	Psychopharmacology in Addictions Treatment	3
ADC 642	Addiction Counseling	3

Practicum

Includes 300 hours of supervised practical experience in an approved substance abuse treatment program with appropriate supervision in the 12 core functions. The experience and supervisor qualifications must meet 262 CMR criteria to be accepted into an M.Ed.

ADC 521	Practicum Seminar in Alcohol & Drug Counseling	3
---------	--	---

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 18 credits.

Admission requirements: High school diploma/GED, bachelor's, or higher degree and other School of Psychology & Counseling requirements.(see Admissions) Including:

- Interview with and approval of the SOPC Admissions Committee.
- Interview with program chair.
- Current résumé.
- Two professional recommendations.

These courses may be accepted into a Cambridge College bachelor's or master's degree. Courses must meet current program requirements at time of matriculation.

Program chair: Paul White, M.Ed., LMHC

- Paul.White@cambridgecollege.edu

(All courses @ 3 credits.)

Master of Education With Elective Concentrations

Mental Health Counseling

• CIP code 511508 • 60 credits • 5-6 terms full time

Program Description — Mental Health Counseling provides graduate level professional training for mental health counseling licensure, with a strong commitment to an evolving multicultural society. Students are prepared to meet the licensing standards of the Massachusetts Board of Allied Mental Health and Human Services Professionals.

Learning Outcomes — Students learn and apply the principles and best practices of counseling, including various psychotherapeutic techniques for work with individuals, couples, families and groups; group counseling, and consultation to organizations and communities. They study human development, dysfunctional behavior and mental illness. They learn to assess, diagnose and treat within the scope of the counselor’s practice, and become able to utilize community resources for referrals. They learn and apply strategies for prevention and treatment of substance abuse, domestic violence, the spectrum of mental illnesses; and learn to use psychoeducational techniques aimed to prevent such disorders. They study research design and methodology. They become familiar with state regulations applicable to mental health practice and licensure.

Academic Requirements

Mental health core courses, practicum and field experience.	42
SOPC electives and concentrations.	18
Exit Portfolio	non-credit
Total	60

Elective Concentrations

The core program provides the academic preparation for mental health counseling licensure. Students may choose one or two concentrations to earn additional credentials and knowledge, but also have the option to take a blend of elective courses without completing a concentration. The entire program of study may not exceed 60 credits.

- *Addictions Counseling* — CADAC, LADC
- *Rehabilitation Counseling* — CRC, LRC (Due to the length of this concentration, no second concentration may be added.)
- *Trauma Studies*

Admission requirements: Bachelor’s degree and other School of Psychology & Counseling requirements.

Program chair: Hugh Ferguson, Ph.D.
Hugh.Ferguson@cambridgecollege.edu

Courses — the sequence below is highly recommended. Field experience courses **must** be taken in sequence. Take 2-4 courses/term.

Term 1

- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
- CCP 540 Personality & Counseling Theory
- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 630 Human Development Across the Lifespan

Term 2

- CCP 615 Psychopathology
- CCP 650 Group Dynamics/Group Counseling & Human Systems
- CCP 518 Research Design & Evaluation
- CCP 639 Career Development

Term 3

- CCP 520 Field Experience I (req. CCP550), **OR BOTH:**
CCP522 Pre-Internship Clinical Skills
CCP524 Pre-Internship Supervision Laboratory
 - CCP 636 Psychological Testing
 - CCP 754 Perspectives in Cross-Cultural Counseling
- One elective or concentration course

Term 4

- CCP 641 Field Experience II
- Two or three electives or concentration courses

Term 5

- CCP 700 Field Experience III
- Two or three elective or concentration courses

Term 6

- CCP 701 Field Experience IV or one elective (if approved substitution has been granted by program chair)
- One elective or concentration course

Field Experience

The field experience includes practicum and internship under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. May be individually designed to support licensure requirements. Further requirements are briefly outlined under each concentration. See also program handbook.

(All courses @ 3 credits.)

Elective Concentrations

for: Mental Health Counseling • School Adjustment

Addictions Counseling

• 9 credits • CADAC, LADC

Addictions Counseling — CADAC, LADC..... 9 credits

Professional training in substance abuse/addiction treatment, education and prevention, leading to certification or licensure.

- CCP 640 Addiction Disorders
- CCP 606 Family Treatment of Substance Abuse
- CCP 720 Psychopharmacology in Addictions & Mental Health Counseling

Field Experience: Must include 300 hours in an approved substance abuse treatment program with appropriate supervision in the 12 core functions. See also program handbook.

Rehabilitation Counseling

• 18 credits • CRC, LRC

Program Description — Rehabilitation Counseling is an elective, clinical concentration for students who wish to pursue national certification as a rehabilitation counselor (CRC) and state licensure as a rehabilitation counselor (LRC). Coupled with the M.Ed. in Mental Health Counseling, students simultaneously complete the academic requirements for Mental Health Counseling licensure.

Program Outcomes — A focus on rehabilitation counseling helps practitioners to more comprehensively serve the mental health and vocational needs of individuals with cognitive, developmental, psychological, medical, intellectual and physical challenges seek employment, maintain employment or return to work. These individuals include veterans who face mental health and rehabilitation complications, and a host of other issues related to the interface of disabilities and mental health.

Careers — Graduates will be qualified to pursue national certification and state licensure as rehabilitation counselors, and for the more general licensure in mental health counseling, allowing for significant career flexibility.

Certified Rehabilitation Counselor (CRC) by the Commission on Rehabilitation Counselor Certification and Licensed Rehabilitation Counselor by the Mass. Board of Allied Mental Health and Human Services. Candidates must also pass an exam and have had a minimum of one year of acceptable employment under the direct supervision of a qualified CRC professional.

Rehabilitation counselors typically work in settings such as mental health agencies, the Veterans Administration, state vocational rehabilitation agencies, insurance companies dealing with disability, non-profit agencies, employee assistance programs, disability management firms and consulting agencies, among others.

Courses

- CCP 655 Vocational and Affective Counseling Fall
- CCP 643 Medical & Psychological Aspects of Disabilities Fall
- CCP 656 Vocational Assessment & Evaluation Spring
- CCP 654 Rehabilitation Plan Development Spring
- CCP 639 Career Development every term

Not applicable to SAC students:

- CCP 727 Clinical Interventions for Combat Stress & Trauma
- or CCP 729 Trauma Intervention in Schools

Additional Field Experience: Not required during academic training. However, a minimum of 12 months of acceptable employment experience including 12 months of direct supervision by a qualified CRC professional will be required after completion of academic requirements for CRC eligibility. See program chair for any questions.

Program chair: Linda Kuramoto, M.S., CAGS, CRC, LMHC
Linda.Kuramoto@cambridgecollege.edu

(All courses @ 3 credits.)

Trauma Studies

• 9 credits

Trauma Studies..... 9 credits

Professional training in crisis intervention and trauma treatment, education, prevention, and trauma-informed care.

- CCP 724 Post Traumatic Stress Reactions
- CCP 727 Clinical Interventions for Combat Stress & Trauma Fall
- or CCP 729 Trauma Intervention in Schools Spring
- CCP 728 Trauma-Specific Interventions

Program based upon recommendations made by the Board of Allied Mental Health and Human Services Professionals, effective Spring 2018.

The School Counseling Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Master of Education

Mental Health & School Counseling

• CIP code 511508 • 66 credits • 6 terms full time Program approved by the Massachusetts Dept. of Elementary & Secondary Education for the preparation of school counselors (PreK-8 or 5-12).

Program Description — School and Mental Health Counseling trains professional counselors to work within the school culture and in clinical settings, serving the guidance and mental health needs of PreK-12 students and their families. The program emphasizes the role of the school counselor in reducing barriers in the multicultural 21st century: a group worker skilled in developmental guidance, a broker of educational and community resources, an interpreter of assessment tools, and a consultant to students, parents, and staff. Students are prepared to meet the licensing standards of the Massachusetts Board of Allied Mental Health and Human Services Professionals, and of the Department of Elementary and Secondary Education.

MTEL Required — The Mass. Communication and Literacy Test (MTEL) must be passed before a student may enter the School Counseling program. All new students must register for Mental Health Counseling until they pass.

Learning Outcomes— Students learn about normal and abnormal intellectual, social, and emotional development, dysfunctional behavior and mental illnesses. They learn and apply the principles and best practices of counseling and collaboration within schools and community counseling practice, including:

- Resources and skills for enhancing children's and adolescents' educational and vocational experiences and facilitating their ability to make good use of opportunities.
- Assessment, diagnosis and treatment of learning and behavior disorders and mental illnesses.
- Psychoeducational techniques for prevention and strategies for treatment of substance abuse, physical and sexual abuse, mental illnesses, and violence in PreK-12 students and throughout the lifespan.
- Psychotherapeutic techniques for work with individuals, couples, families and groups.
- Group counseling, leadership and consulting techniques; and school and community resources for referral.

Students gain and apply knowledge of:

- Psychology of learning, curriculum frameworks, student testing.
- Research design and methodology.
- Relevant federal, state, and municipal laws and regulations.

Courses should be taken in sequence. Please note: school-based field work is NOT available during the summer term. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1

- CCP 540 Personality & Counseling Theory
- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
- CCP 630 Human Development Across the Lifespan

Term 2

- CCP 518 Research Design & Evaluation
- CCP 615 Psychopathology
- CCP 650 Group Dynamics/Group Counseling & Human Systems
- CCP 520 Field Experience I (req. CCP 550), **OR BOTH:**
 - CCP 522 Pre-Internship Clinical Skills
 - CCP 524 Pre-Internship Supervision Laboratory

Term 3

- CCP 636 Psychological Testing
- CSG 616 Counseling in the Schools
- CCP 638 Group Work with Children & Adolescents
- CCP 641 Field Experience II

Term 4

- CSG 695 Counseling & Consulting Techniques Lab
- CCP 754 Perspectives in Cross-Cultural Counseling
- CCP 672 Counseling Adolescents Transitioning to Adulthood
- CCP 700 Field Experience III

School Counseling Internship Prerequisites

- *School Counseling Internship approval form signed* by program chair.
- Pass all teacher tests required by the state for this license. Massachusetts: Communication & Literacy Test (MTEL)

Continued

(All courses @ 3 credits.)

Continued

Mental Health & School Counseling

Term 5

CCP 639 Career Development

CCP 730 Practice of Mental Health Counseling

School Counseling Internship Fieldwork & Seminar I **Fall only**

for **PreK-8:** register for CSG 792E

for **5-12:** register for CSG 792S

Term 6

Two electives

School Counseling Internship Fieldwork & Seminar II . . . **Spring only**

for **PreK-8:** register for CSG 793E

for **5-12:** register for CSG 793S

Suggested electives:

CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities

CCP 715 Multicultural Counseling: Children, Adolescents in Context

CCP 729 Trauma Intervention in Schools

CCP 640 Addiction Disorders

CCP 606 Family Treatment of Substance Abuse

CCP 637 Neurobiology: Basics & Beyond

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements.

Required to enter program for DESE licensure:

- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.

Program sequence may be modified to suit the needs of the cohort.

Program and schedule subject to change.

Program chair: Brian Sasso, M.A., LMHC
brian.sasso@cambridgecollege.edu

Field Experiences

Mental Health Field Experiences I, II, III: CCP 520, 641, 700

Includes field experience under a qualified supervisor conforming to Massachusetts regulations 262 CMR. May be individually designed to support licensure requirements. See also program handbook.

In the term **PRIOR** to enrolling in the school counseling field experience students students are responsible for:

- Discussing options for internship with the program chair or regional site director. All school counseling field experience sites **must** be within the state of Massachusetts.
- Submitting School Counseling Field Experience Approval form to program chair, with copy of MTEL passing score.

School Counseling Internship Fieldwork & Seminar: CSG 792-793

Fieldwork is guided and evaluated in the classroom by a school counselor licensed in Massachusetts, who meets all state standards; and by a licensed Cambridge College site visiting supervisor. See program handbook.

- 2 sequential terms @ 225 hours, plus 75 hours of pre-practicum for 525 hours total in one school setting.
- Internship locations are subject to state regulations and must be approved by the program chair or designee.
- Completed Exit Portfolio required for graduation and endorsement.

School Adjustment & Mental Health Counseling

- CIP code 131101 • 60 credits • 5-6 terms full time
- Program approved by the Massachusetts Dept. of Elementary & Secondary Education for the preparation of school adjustment counselors (all levels).

Program Description — School Adjustment and Mental Health Counseling trains mental health professionals to work within the school culture and in clinical settings, serving the mental health needs of PreK-12 students and their families. The use of evidence-based counseling strategies when working with children and adolescents in school settings is emphasized. Students are prepared to meet the licensing standards of the Massachusetts Board of Allied Mental Health and Human Services Professionals and the Massachusetts Department of Elementary and Secondary Education.

MTEL Required — The Mass. Communication and Literacy Test (MTEL) must be passed before a student may enter the School Adjustment Counseling program. All new students must register for Mental Health Counseling until they pass.

Learning Outcomes — Students learn and apply the principles of therapeutic relationships; knowledge of normal and abnormal intellectual, social, and emotional development; learning disorders and emotional issues affecting student achievement. They develop working knowledge of treatments; state-of-the-art diagnostic instruments, procedures for testing, and interpreting results; medical conditions and medication related to physical disabilities and learning disorders. They learn to work with families, schools and community personnel. They learn and apply prevention and treatment strategies for substance abuse, physical and sexual abuse, and violence in preK-12 students. They develop a working knowledge of the criminal justice system with particular reference to juvenile justice. They learn and apply laws and regulations addressing the legal rights of students and families.

Elective Concentrations

Students electing a concentration take only one school adjustment elective. Students have the option to take a blend of elective courses without completing a concentration. The entire program of study may not exceed 60 credits.

- Addictions Counseling — CADAC, LADC
- Rehabilitation Counseling
- Trauma Studies

(All courses @ 3 credits.)

Courses — Please note: school-based field work is NOT available during the summer term. The sequence below is highly recommended. Take 2-4 courses/term.

Term 1

- CCP 540 Personality & Counseling Theory
- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 630 Human Development Across the Lifespan
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners

Term 2

- CCP 518 Research Design & Evaluation
- CCP 615 Psychopathology
- CCP 650 Group Dynamics/Group Counseling & Human Systems
- CCP 639 Career Development

Term 3

- CCP 520 Field Experience I (req. CCP 550), **OR BOTH:**
- CCP 522 Pre-Internship Clinical Skills
- CCP 524 Pre-Internship Supervision Laboratory
- CCP 617 School Adjustment Counseling/School Social Work
- CCP 636 Psychological Testing
- CCP 638 Group Work with Children & Adolescents (for Rehabilitation Counseling concentration, take a concentration course **instead** of this course.)

Term 4

- CCP 792A School Adjustment/Mental Health Internship* Seminar A (req. CCP520) **Fall only**
- CCP 754 Perspectives in Cross-Cultural Counseling
- CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities Fall/Spring only
- or** CCP 715 Multicultural Counseling: Children, Adolescents in Context

Term 5

- CCP 793B School Adjustment/Mental Health Internship* Seminar B (req. CCP 792A) **Spring only**
- Two electives or concentration courses

Term 6

- CCP 701 Field Experience IV*
- One elective or concentration course
- CCP 708 School Adjustment Counseling Exit Portfolio (TaskStream)

* See next page: Internship courses and sequence options.

Continued

School Adjustment & Mental Health Counseling

Field Experience

The field experience includes practicum and internship under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Requirements for the SAC/LMHC practicum/internship are briefly outlined below. Further requirements are briefly outlined under each concentration. See also program handbook.

Prerequisite Course(s)

- CCP 520 Field Experience I, **OR BOTH:**
 - CCP 522 Pre-Internship Clinical Skills
 - CCP 524 Pre-Internship Supervision Laboratory)

Internship Courses

- CCP 792A School Adjustment/Mental Health Internship Seminar A — in a school. **Fall only**
- CCP 793B School Adjustment/Mental Health Internship Seminar B — in a school **Spring only**
- CCP 641* Field Experience II. every term
or CCP 701* Field Experience IV

*CCP 641 and 701 will provide students with additional field experience, but may not be necessary if requirements have already been met through CCP 520 (or CCP 522/524), 792A and 793B.

Internship sequence options (after prerequisites)

Spring. . . CCP 641	Summer . CCP 641	Fall CCP 792A
Fall CCP 792A	Fall CCP 792A	Spring. . . CCP 793B
Spring. . . CCP 793B	Spring. . . CCP 793B	Summer . CCP 701

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements, including requirements for DESE licensure programs:

- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.

Non-licensure option: Mental Health Counseling, which is not an DESE licensure area.

Program and schedule subject to change.

Program chair: Brian Sasso, M.A., LMHC
brian.sasso@cambridgecollege.edu

School Adjustment Field Experience Prerequisites

- Pass all first-year requirements.
- SAC Pre-Practicum — 75 hours of directed field-based training in a school site (non-credit)
- Pass all teacher tests required by the state for this license. Massachusetts MTEs: Communication & Literacy test.
- Site approval form signed by SAC chair.

In the term **PRIOR** to enrolling in the SAC internships students are responsible for:

- Discussing options for licensure with the program chair or regional site director prior to enrollment and field experiences. All school adjustment sites in schools **must** be within the state of Massachusetts.
- Submitting SAC Field Experience Approval form to SAC chair or designee the term **prior** to field experience, with a copy of MTEL passing scores.

School Adjustment/Mental Health Internships (A and B)

Requires a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Internship must be supervised by a dually licensed qualified supervisor (262 CMR and SAC by ESE) who is in an SAC role and meets all state standards. See program handbook.

- 900 hours total (minimum), to be completed in three or four terms in school and mental health settings.
- Field Experience I (CCP 520) recommended in third term.
- SAC field experience after CCP 520 is completed.
 - ▶ School placement must be approved by the SAC chair.
 - ▶ 450 hours (minimum), completed in two sequential terms for SAC placement (fall/spring).
 - ▶ In one school setting approved by the SAC chair according to DESE standards.
 - ▶ Supervisor must work in SAC role with children, adolescents and families.

The SAC field experience is guided and evaluated by a licensed/certified clinical counselor in the school setting and by a licensed/certified Cambridge College site visiting supervisor. Field experience locations are subject to state regulations and must be approved by the program chair. Students are responsible for discussing options for field experience with the program chair, in the previous term.

- **Addictions option (LADC/CADC):** Must include 300 hours in an approved substance abuse treatment program with appropriate supervision in the 12 core functions.

(All courses @ 3 credits.)

Post-master's Certificate

School Adjustment Counseling for Mental Health Counselors

• CIP code 131101 • 15 credits • 2 terms • School Social Worker/School Adjustment Counselor (DESE)

Academic Requirements

Three School Adjustment core courses	9
Two Internship/SAC Field Experience courses	6
School Adjustment Counseling Exit Portfolio	0
Total	15

Courses should be taken in sequence. For example, all term 1 courses must be completed before term 2 courses. Select no more than 4 courses each term for a maximum course load of 12 credits.

Term 1

- CCP 617 School Adjustment Counseling/School Social Work
- CCP 729 Trauma Intervention in Schools
- CCP 792A - School Adjustment/Mental Health Internship Seminar A **Fall only**

Term 2

- CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities
- or** CCP 715 Multicultural Counseling: Children, Adolescents in Context
- CCP 793B - School Adjustment/Mental Health Internship Seminar B **Spring only**

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 15 credits.

Admission/ESE licensure requirements:

- Completion of current Cambridge College 60-credit M.Ed. in mental health counseling or equivalent program. (Students who took an earlier version of this program, or who earned their M.Ed. at another college, may need to take additional course work to meet SAC academic requirements.)
- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.
- Other School of Psychology & Counseling requirements.

School Adjustment Field Experience Prerequisites

- SAC Pre-Practicum — 75 hours of directed field-based training in a school site (0 credit)
- Site approval form signed by SAC chair.

(Note: All other prerequisites are required for admission; see above.)

School Adjustment Field Experience

Includes field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Internship must be supervised by a dually licensed qualified supervisor (262 CMR and SAC by ESE) who is in an SAC role and meets all state standards. See program handbook.

Completed Verification form required by SOPC office before registering.

- ▶ School placement must be approved by the SAC chair, and must be within Massachusetts.
- ▶ 450 hours (minimum) completed in two sequential terms.
- ▶ Supervisor must work in SAC role with children, adolescents and families.

Program chair: Brian Sasso, M.A., LMHC

- Brian.Sasso@cambridgecollege.edu

(All courses @ 3 credits.)

Master of Education

School Counseling

- CIP code 131101 • 48 credits, 4 terms full-time
- Program approved by the Massachusetts Dept. of Elementary & Secondary Education for the preparation of school counselors (PreK-8 or 5-12).

The School Counseling Program at Cambridge College is awarded **TEAC accreditation** by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019, extended until June 2021. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — School Counseling is treated as professional counseling which enhances child and adolescent students' access to high quality educational and vocational experiences and facilitates their ability to make good use of opportunities. The program emphasizes the role of the school counselor as a facilitator of educational reform, reducing barriers in the multicultural 21st century: a group worker skilled in developmental guidance, a practitioner helping students find their academic niche and aiding their academic achievement, a broker of educational and community resources, an interpreter of assessment tools, and a consultant to students, parents, and staff.

Learning Outcomes— Students develop their professional philosophy, principles and practices for their work with students and parents, teachers and administrators. They gain and apply knowledge of research in school counseling; the psychology of learning; curriculum frameworks and student testing; normal and abnormal intellectual, social, and emotional development; diagnosis and treatment of learning and behavior disorders. They learn strategies for prevention and treatment of substance abuse, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students. They gain resources and skills to effectively help students plan for post-secondary education and careers. They become familiar with relevant federal, state, and municipal laws and regulations; group counseling, leadership and consulting techniques; and school and community resources for referral.

Careers and Further Study — Licensed school counselors in public schools.

Courses should be taken in sequence. Please note: school-based field work is NOT available during the summer term. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1

- CCP 518 Research Design & Evaluation
- CCP 540 Personality & Counseling Theory
- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 638 Group Work with Children & Adolescents

Term 2

- CSG 616 Counseling in the Schools
- CCP 630 Human Development Across the Lifespan
- CCP 650 Group Dynamics/Group Counseling & Human Systems
- CSG 695 Counseling & Consulting Techniques Lab

School Counseling Internship Prerequisites

- *School Counseling Internship approval form signed* by program chair.
- Pass all teacher tests required by the state for this license. Massachusetts: Communication & Literacy Test (MTEL)
- Complete and pass all term 1 & 2 courses.

Term 3

- CCP 636 Psychological Testing
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
- CCP 639 Career Development
- CSG 792 School Counseling Internship Fieldwork & Seminar I **Fall only**
for **PreK-8:** register for CSG 792E
for **5-12:** register for CSG 792S

Term 4

- CCP 672 Counseling Adolescents Transitioning to Adulthood (for 5-12) **or** elective (for PreK-8)
- CCP 754 Perspectives in Cross-Cultural Counseling
- CCP 615 Psychopathology
- CSG 793 School Counseling Internship Fieldwork & Seminar II **Spring only**
for **PreK-8:** register for CSG 793E
for **5-12:** register for CSG 793S

Suggested electives:

- CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities
- CCP 715 Multicultural Counseling: Children, Adolescents in Context
- CCP 729 Trauma Intervention in Schools
- CCP 640 Addiction Disorders
- CCP 606 Family Treatment of Substance Abuse
- CCP 637 Neurobiology: Basics & Beyond

(All courses @ 3 credits.)

Continued

School Counseling

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements.

Required to enter program for licensure:

- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.

In the term *PRIOR* to enrolling in the School Counseling field experience students are responsible for:

- Discussing options for internship with the program chair or regional site director. All school counseling field experience sites *must* be within the state of Massachusetts.
- Submitting School Counseling Field Experience Approval form to program chair or designee, with copy of MTEL passing score.

School Counseling Internship Fieldwork & Seminar: CSG 792-793

Fieldwork is guided and evaluated in the classroom by a school counselor licensed in Massachusetts, who meets all state standards; and by a licensed Cambridge College site visiting supervisor. See program handbook.

- 2 sequential terms @ 225 hours, plus 75 hours of pre-practicum for 525 hours total in one school setting.
- Internship locations are subject to state regulations and must be approved by the program chair.
- Completed Exit Portfolio required for program completion and endorsement.

Non-licensure option: All program components are required except the Communication & Literacy Test (MTEL). Non-licensure students must complete the pre-practicum and internship.

Students who graduate from the non-licensure program will not be endorsed by Cambridge College for initial licensure as a school counselor to the Dept. of Elementary and Secondary Education.

Program sequence may be modified to suit the needs of the cohort.

Program and schedule subject to change.

Program chair: Brian Sasso, M.A., LMHC

Master of Education

Psychological Studies

• CIP code 422803 • 36 credits • 3 terms full time • non-licensure

Program Description — Psychological Studies is a non-licensure graduate program that introduces students to a broad range of psychological perspectives, with a strong commitment to an evolving multicultural society.

Learning Outcomes — Students are exposed to the principles of counseling. They learn about assessment, resources, cultural and racial dynamics, roles on interdisciplinary teams, ethics and relevant laws. They learn about small group dynamics and processes and how leadership styles influence group process. Students have flexibility to choose courses to support their particular interests in the field.

Careers and Further Study — Graduates may be eligible for advancement in human service careers that do not require licensure. They will NOT be eligible to return to study towards mental health licensure at the CAGS level.

Academic Requirements

Psychological studies core courses	15
Psychological Studies elective courses	21
Total	36

Psychological Studies Electives — choose seven*

- CCP 600 Biopsychosocial Dimensions of Aging Fall
- CCP 672 Counseling Adolescents transitioning to Adulthood
- CCP 631 The Counselor in the Forensic Environment . . . Summer
- CCP 634 Death & Dying Spring
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
- CCP 606 Family Treatment of Substance Abuse
- CCP 681 Mind, Body, & Emotion: a Holistic Perspective
- CCP 615 Psychopathology
- CCP 518 Research Design & Evaluation
- CCP 657 Terror, Trauma & the Sacred: Psychological & Spiritual Perspectives Summer

*Students may select other elective courses with approval of the program chair.

Core courses below should be taken in sequence.

For example, all term 1 courses must be completed before term 2 courses. Select no more than 4 courses each term for a maximum course load of 12 credits.

Term 1

- CCP 540 Personality & Counseling Theory
- CCP 630 Human Development across the Lifespan
- Two elective courses.

Term 2

- CCP 640 Addiction Disorders
- Three elective courses.

Term 3

- CCP 639 Career Development
- CCP 754 Perspectives in Cross-Cultural Counseling
- Two elective courses.

Subsequent terms as needed to complete your program of study

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements.

Program chair: Hugh Ferguson, Ph.D.
Hugh.Ferguson@cambridgecollege.edu

(All courses @ 3 credits.)

Post-master's certificate

Rehabilitation Counseling Certificate

• CIP code 512310 • 18 credits • CRC, LRC

Program Description — The Rehabilitation Counseling Certificate is for the individual seeking to add to their credential by pursuing a national certification as a rehabilitation counselor (CRC) and/or Mass. state licensure as a rehabilitation counselor (LRC).

Program Outcomes — A focus on rehabilitation counseling helps practitioners to more comprehensively serve the mental health and vocational needs of individuals with cognitive, developmental, psychological, medical, intellectual and physical challenges seek employment, maintain employment or return to work. These individuals include veterans who face mental health and rehabilitation complications, and a host of other issues related to the interface of disabilities and mental health.

Careers — Graduates will be qualified to pursue national certification and state licensure as rehabilitation counselors: .

Certified Rehabilitation Counselor (CRC) by the Commission on Rehabilitation Counselor Certification and Licensed Rehabilitation Counselor by the Mass. Board of Allied Mental Health and Human Services. Candidates must also pass an exam and have had 36 months of acceptable employment.

Rehabilitation counselors typically work in settings such as mental health agencies, the Veterans Administration, state vocational rehabilitation agencies, insurance companies dealing with disability, non-profit agencies, employee assistance programs, disability management firms and consulting agencies, among others.

Courses

- CCP 655 Vocational and Affective Counseling Fall
- CCP 643 Medical & Psychological Aspects of Disabilities Fall
- CCP 656 Vocational Assessment & Evaluation Spring
- CCP 654 Rehabilitation Plan Development Spring
- CCP 639 Career Development every term

And one of the following:

- CCP 727 Clinical Interventions for Combat Stress & Trauma Fall
- or** CCP 729 Trauma Intervention in Schools Spring

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 18 credits.

Admission requirements:

- 60-credit master's or higher degree in mental health counseling, marriage & family therapy, social work, or psychology.
- Other School of Psychology & Counseling requirements.

Additional Field Experience: Not required during academic training. However, a minimum of 12 months of acceptable employment experience including 12 months of direct supervision by a qualified CRC professional will be required after completion of academic requirements for CRC eligibility. See program chair for any questions.

Program chair: Linda Kuramoto, M.S., CAGS, CRC, LMHC
Linda.Kuramoto@cambridgecollege.edu

Graduate Certificate

Trauma Studies Certificate

• CIP code 511508 • 15 credits • 2-3 terms

Program Description — Trauma Studies provides professional training in crisis intervention and trauma treatment, education and prevention, leading to certification. The program has a strong commitment to educating compassionate, ethical and effective trauma specialists. The program emphasizes the role of trauma specialists in implementing trauma-informed care across disciplines and utilizing community resources.

Learning Outcomes — Students will gain knowledge of crisis, trauma, post-traumatic stress reactions, trauma-specific interventions and disaster mental health in multi-cultural settings. They can apply the learned skills in trauma assessment, counseling and treatment to effectively respond to immediate and long-term needs of survivors, including war veterans, survivors of child abuse, first responders, immigrants and refugees, as well as victims of crime, disasters, domestic violence, sex trafficking and torture.

Careers — Prepares students to work in crisis response teams, provide trauma-informed care in community mental health, addiction treatment and rehabilitation programs in school settings and provide support for veterans, survivors of gender-based violence and refugees.

Select no more than 4 courses each term for a maximum course load of 12 credits (all courses @ 3 credits).

Counseling

- CCP 615 Psychopathology
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners

Trauma

- CCP 724 Post Traumatic Stress Reactions (preq for CCP 728)
- CCP 728 Trauma-specific Interventions
- CCP 727 Clinical Interventions for Combat Stress & Trauma Fall
- or** CCP 729 Trauma Intervention in Schools Spring

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 15 credits.

Course schedule: All courses are offered in Cambridge every term, subject to sufficient enrollment, except as noted above.

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements.

Transfer credit — These courses may be taken alone as a certificate of completion or evaluated for transfer into a Cambridge College master's degree program; courses must meet current program requirements and credit limits at time of matriculation.

Program chair: Hugh Ferguson, Ph.D.
Hugh.Ferguson@cambridgecollege.edu

(All courses @ 3 credits.)

Master of Education

Marriage & Family Therapy (California)

• 60 credits • 5-6 terms full time

Program Description — The Marriage and Family Therapy program provides graduate level professional training for licensure with a strong commitment to an evolving multicultural society. Students are prepared to meet the licensing standards of the California Board of Behavioral Sciences.

Learning Outcomes — Students learn and apply the principles and best practices of counseling, including various psychotherapeutic techniques for work with individuals, couples, families and groups; group counseling, and consultation to organizations and communities. They study human development, dysfunctional behavior and mental illness. They learn to assess, diagnose and treat within the scope of the Marriage and Family Therapists practice, and become able to utilize community resources for referrals. They learn and apply strategies for prevention and treatment of substance abuse, domestic violence, the spectrum of mental illnesses; and learn to use psychoeducational techniques aimed to prevent such disorders. They study research design and methodology and become familiar with state regulations applicable to marriage and Family therapy practice.

Academic Requirements

Mental health core courses, practicum	60
Exit Portfolio	non-credit
Total	60

The core program provides the academic preparation for California licensure as a marriage and family therapist. The program of study may not exceed 60 credits.

Courses should be taken in sequence. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses may be taken each term.

Term 1

- CCP 518 Research Design & Evaluation
- CCP 540 Personality & Counseling Theory
- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 630 Human Development Across the Lifespan

One SOPC elective course.

Term 6

CCP 700 Field Experience III

Two SOPC elective courses.

Term 7

CCP 701 Field Experience IV (If field experience requirements are already completed, CCP 701 may be substituted with program chair approval.)

Two SOPC elective courses.

(All courses @ 3 credits.)

Maestría en Educación con especialización en

Consejería en Salud Mental (Puerto Rico)

- CIP code 511508 • 60 créditos • 6 términos a tiempo completo
- Programa aprobado por la Junta de Instituciones Postsecundaria de Puerto Rico

Descripción del Programa — El programa de Consejería en Salud Mental facilita adiestramiento para futuros profesionales licenciados en Consejería Profesional con un alto compromiso social y sentido de la multiculturalidad.

Puerto Rico — La Escuela de Psicología y Consejería (SOPC) monitorea los estándares de licenciamiento en Massachusetts y en Puerto Rico para el beneficio de los estudiantes de Consejería en Salud Mental. El currículo académico cumple con los cursos, la experiencia de campo necesarios para revalidar con la Junta de Consejeros Profesionales en Puerto Rico.

Objetivos del Programa — Los estudiantes desarrollan conocimientos en conceptos teóricos y prácticos de la consejería profesional, incluyendo técnicas psicoterapéuticas que pueden aplicarse en la consejería individual, grupal, familiar y en consultas que estén relacionadas con organizaciones o comunidades. Dentro del programa de estudio se toman cursos de desarrollo humano, comportamiento disfuncional y enfermedades de salud mental, además de procesos de avalúo, diagnóstico y tratamiento. Asimismo, se destacan conocimientos en los procesos de prevención y tratamientos en abuso de substancias, violencia doméstica y enfermedades de salud mental, además de investigación y diseño de investigación relacionados a la consejería profesional.

Requisitos Académicos

Cursos de Salud Mental y experiencias de campo.	42
Electivas de Consejería	18
CCP592 Portfolio de Salda	Cero Crédito
Total	60

El programa de Consejería en Salud Mental provee la preparación académica para licenciarse como consejero profesional en Puerto Rico. El programa no puede exceder de 60 créditos.

Experiencia en el campo

La experiencia en el campo incluye práctica y internado supervisada bajo un mentor cualificado con licencia, conforme a las regulaciones y la Ley 147 de 2002 para Consejeros Profesionales.

Requisitos de admisión: Grado de bachillerato, otros requisitos de la Escuela de Psicología y Consejería.

Director del Programa: Hugh Ferguson, Ph.D.
Hugh.Ferguson@cambridgecollege.edu

Los cursos se deben tomar en secuencia. Los cursos del primer término deben aprobarse antes de los del segundo término. Un máximo de 4 cursos está permitido por término.

Término 1

- CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills (includes assessment of readiness for field experience)
- CCP 630 Human Development Across the Lifespan

Término 2

- CCP 540 Personality & Counseling Theory
- CCP 518 Research Design & Evaluation
- CCP 615 Psychopathology

Término 3

- CCP 650 Group Dynamics/Group Counseling & Human Systems
- CCP 622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
- CCP 639 Career Development

Término 4

- CCP 520 Field Experience I
- CCP 617 School Adjustment Counseling/School Social Work
- CCP 636 Psychological Testing
- CCP 638 Group Work with Children & Adolescents (for Rehabilitation Counseling concentration, take a concentration course **instead** of this course.)

CCP 636 Psychological Testing
Un curso electivo de la SOPC

Término 5

- CCP 641 Field Experience II
 - CCP 754 Perspectives in Cross-Cultural Counseling
- Un curso electivo de la SOPC

Término 6

- CCP 700 Field Experience III
- Un curso electivo de la SOPC

Término 7

- CCP 701 Field Experience IV (Si se han logrado los requisitos de experiencia de campo, el curso CCP 701 puede ser reemplazado, con la autorización del encargado del programa.)
- Dos cursos electivos de la SOPC

Psychology and Counseling Course Descriptions

Alcohol & Drug Counseling (ADC)

ADC 505 Alcohol and Drugs in Society - 3 credits

This course provides an overview of alcohol and other drugs of abuse in our society today. The common drugs of abuse will be named and their actions based on substance, setting and individual psychological set will be described and examined. We will explore the consequences of abuse and dependence to the individual, the family, and society at large. Historical approaches to this issue including understanding etiological factors, as well as scientific methods of treatment, rehabilitation and prevention will be covered. Bio-psycho-social assessment and related interventions will be identified, including medications, counseling, 12 Step support and other psychological methods.

ADC 510 Ethics and Boundaries for Substance Abuse Professionals - 1 credit

This course allows students to review ethical standards and raise awareness and standards. The course also addresses and educates participants in some of the common mistakes made by counselors in the substance abuse treatment field. Students studying to be substance abuse counselors are advised of certification requirements related to ethics.

ADC 521 Practicum Seminar in Alcohol and Drug Counseling - 3 credits

Enrollment limited to 10. This course is for students beginning their alcohol and drug counseling program fieldwork. Counselor trainees become familiar with the following: basic professional counseling skills and behaviors; working with agencies/systems; the use of supervision; beginning diagnostic skills; and DSM-5 TR. The 300 hour practical supervised experience takes place in a facility or agency licensed to provide counseling services. An opportunity to provide 10 hours in each of the "12 core functions" will be part of this experiential placement. Participants complete case presentations, case scripts, process notes and take an active part in the didactic and demonstration parts of the class. Readings and active discussion are required. The Commonwealth of Massachusetts specifies that this practicum be supervised by an "approved supervisor" as described in (CMR) 262, in order for students to meet requirements for licensure as an LMHC. Requirements for those not seeking a mental health license will be provided by the program director or your advisor.

ADC 601 Role of the Professional in Alcohol and Drug Treatment - 3 credits

This course introduces students to the role of the professional in alcohol and drug treatment. The historical development of treatment services and the various professionals associated with the field. The development of treatment modalities, the influence of the federal government and private facilities in developing standards and credentials for counselors and other professionals as well as certification, licensing standards, the institution of organizations and agencies designed to promote appropriate and evidence based treatment for alcohol and drug abuse/dependency will all be explored. The language and descriptors of treatment, The patient placement criteria of the American Society of Addiction Medicine and other instruments will be demonstrated. The "12 core functions" for substance abuse counselors, five domains and 46 global criteria of the international Certification Consortium will be presented and demonstrated. Levels of care and various settings of treatment programs will be explored.

ADC 611 Family Treatment of Substance Abuse - 3 credits

This course bridges the gap between substance abuse counseling and family therapy. It examines the specific interactional patterns that help to maintain addictive behavior within the family. Case examples illustrate how to intervene in addictive families. The following topics are covered: a systemic perspective on addictive behavior; assessing substance abuse and setting treatment goals; the over responsibility/under responsibility dynamic in families; the family intervention model; treatment needs of young children and adult children of addictive families; and facilitating family adjustment to sobriety. Course requirements include class attendance, reading, participation in experiential exercises and role play.

ADC 625 Psychopharmacology in Addictions Treatment - 3 credits

The use of medications in the treatment of alcohol and drug dependence has often been controversial. Recent times have seen the advent of more and different types of medications to address addiction directly. Agonist and antagonist drugs are designed to have a direct impact on the neurochemistry of addiction. The use of other psychotropic drugs can be contra-indicated in persons with addictive disorders. Because psycho-pharmacology treatment depends on diagnosis, this course will review the medical model's analytical mode, differential diagnosis. A brief review of relevant neuroanatomy and neurophysiology will then set the stage for an examination of the major psychotropic medications: anti-psychotics, anti-depressants, mood stabilizers and anti-anxiety agents. The course will be grounded throughout in clinical material, and case histories will be discussed during each class. Requirements will include one topical presentation. We will also share responsibility for presenting cases.

ADC 642 Addiction Counseling - 3 credits

Designed for counselors with some knowledge in treating and educating substance abusers and their families, this course offers an in-depth examination of special populations and specific issues related to substance abuse treatment. Topics include: working with dual diagnosis clients; adolescent substance abuse; women treatment issues; working with diverse client populations including HIV positive clients; cultural competency; infectious diseases; tobacco cessation; relapse prevention; the use of strategic and paradoxical interventions; and certification of substance abuse counselors. Evidence based treatment from psychodynamic to motivational enhancement as well as modern approaches to relapse prevention will be explored.

Psychology & Counseling (CCP)

CCP 512 The Cognitive Therapies - 3 credits

Therapeutic applications of the cognitive theorists will be explored. Among the theorists are Insoo Kim Bergh (brief solution focused therapy), Aaron Beck (cognitive therapy), Richard Glasser (choice therapy), Albert Ellis (rational-emotive behavioral therapy), Arnold Lazarus (multi-modal therapy) and select others. Using didactic, video and experiential exercises, the course will address mental health issues in children and adolescents, addiction and substance abuse, bereavement, and family structure. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 513 California Clinical Experience: Practicum I - 3 credits

Supervised clinical counseling of individuals, couples, groups, families, and children. At least one hour of individual supervision per week or two hours of group supervision. Four hours of case presentations. Continuous registration for this portion of the clinical training until completion of at least 100 clock hours.

CCP 518 Research Design & Evaluation - 3 credits

This course provides students with a foundation in research and evaluation methodologies and strategies, program evaluation and needs assessment. Students will gain an understanding of different types of research and research design, procedures for data collection and analysis, analysis of both hard and soft data, and ethical and legal considerations associated with research. Students will leave the course prepared to conduct and be discriminating consumers of research. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: k. Knowledge of statistics, research design, and research in guidance counseling

CCP 520 Field Experience I - 3 credits

Enrollment limited to 10. This initial field experience course must be taken concurrent with a field placement. Documentation of practicum requirements in accordance with 262 CMR 2.00 must be completed between the 8th week of class and the end of the term and before any internship hours begin. Prerequisite: CCP550 Basic Counseling Skills: Rogerian Therapy. This course is a prerequisite for CCP792A School Adjustment/Mental Health Internship Seminar A.

CCP 540 Personality and Counseling Theory - 3 credits

This course explores personality and counseling theories, identifying strengths and weaknesses in each theory. Cultural elements are stressed. Theories are approached from an eclectic standpoint, including normal and abnormal, social, intellectual, and emotional development. Students are encouraged to identify an approach or approaches which are compatible with their history, current philosophy, clients and counseling settings. We also explore modern notions of cultural and family identity, increasing our ability to adapt counseling theory to the strengths and needs of individuals in our contemporary, diverse client population. The on-line library is employed in this course to gather evidence and support project development and presentations. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: b: Theories of normal and abnormal intellectual, social, and emotional development.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: e. Theories of normal and abnormal intellectual, social, and emotional development.

CCP 550 Rogerian Person-Centered Therapy: Basic Counseling Skills - 3 credits

Successful completion required for mental health **field experience I**, CCP520. The basis of therapeutic relationships is seen in Carl Rogers' theory of personality with its stress of self-actualization, development of the self, phenomenological field, validation, and conditions of worth is the basis for the techniques that are taught, practiced and modeled in this course. These techniques are empathic understanding, unconditional positive regard, and congruence. These techniques are central to any effective relationship from any theoretical perspective. The student will become practiced at these and related aspects of person-centered theory. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: Standard a: Principles of therapeutic relationships.

CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities - 3 credits

It is strongly recommended that students participate in a practicum/ internship while enrolled in this course. This course is for those beginning work with "multi-problem" families, and for those with some experience who wish to adopt a systemic, strengths-focused model of counseling. Techniques for communicating and working with families in school and community settings are emphasized. Instructor and student generated case studies are supported by role-playing and outside readings. Students go step-by-step through assessment, contracting, and counseling processes. They learn how to evaluate resources and needs, how to identify and collaborate with outside helpers and agencies, and how to deal with conflicts between the needs of family members. Issues relating to family violence, substance abuse and the use of home visiting are also discussed. In addition to class participation and readings, two papers analyzing families and the counseling process are required. This course emphasizes approaches which honor the socioeconomic, linguistic and cultural differences which may affect families and relationship between the family and therapist. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. This course addresses the following Massachusetts State Standard for School Adjustment Counselor/ School Social Worker: f: Techniques for communicating and working with families and school and community personnel.

CCP 522 Pre-internship Clinical Skills - 3 credits

Enrollment limited to 9. This pre-internship clinical skills course must be taken concurrently with CCP 524, the in-vivo lab and clinical supervision course. Students follow two individual clients from initial assessment to case closing in a guided role play narrative over the course of the term. Students become familiar with the principles of therapeutic relationships and basic professional counseling skills; developing techniques for communicating and working with families, agencies/systems, and school and community personnel; the use of supervision; beginning diagnostic skills; and DSM-5. Students take an active part in role plays, complete case presentations, process notes, and treatment planning. This course will stress philosophy and principles of counseling. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. Prerequisite: CCP 550 Basic Counseling Skills: Rogerian Therapy and CCP 650 Group Dynamics. This course is a prerequisite for CCP 792A School Adjustment/Mental Health Internship Seminar A and CCP 641 Field Experience II.

CCP 524 Pre-internship Supervision Laboratory - 3 credits

Enrollment limited to 6. This companion course to CCP 522 provides students the opportunity to consult with their clinical supervisor for case consultation and supervision for their two ongoing cases in CCP 522. Students are responsible for audio, video and / or verbatim transcribing of several sessions over the period of the course. Students will meet weekly with the instructor / supervisor to review their case progress. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 592 SOPC Exit Portfolio - 0 credit

An educational portfolio assembled by the student over the course of their studies. It highlights the student's professional knowledge, skills and abilities, and documents quality graduate level work.

CCP 600 Biopsychosocial Dimensions of Aging - 3 credits

Students explore the biology, psychology and sociology of aging, with an emphasis on how these issues manifest in clinical settings. Students will explore the biology of aging, including "normal aging," common physical changes, medical conditions, and related functional impairment. Psychosocial issues will also be addressed, including multigenerational family dynamics, aspects of adult development (e.g. generativity, successful aging), and common late-life stressors (e.g. financial strain, bereavement, housing changes). This course will also explore sociocultural trends in aging such as cohort differences between generations, multicultural concerns, ageism and discrimination. Students will also obtain an overview of public health policy, advocacy and case management, as they relate to counseling work with older adults. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 606 Family Treatment of Substance Abuse - 3 credits

This course bridges the gap between substance abuse counseling and family therapy. It examines the specific interactional patterns that help to maintain addictive behavior within the family. Case examples illustrate how to intervene in addictive families. The following topics are covered: a systemic perspective on addictive behavior; assessing substance abuse and setting treatment goals; the over-responsibility/under-responsibility dynamic in families; the Family Intervention Model; treatment needs of young children and adult children of addictive families; and facilitating family adjustment to sobriety. Course requirements include class attendance, reading, participation in experiential exercises and role play. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

CCP 615 Psychopathology - 3 credits

This course deals with the nature of neurotic behavior, abnormal behavior and the psychoses, as well as the nature of normal and abnormal intellectual, social, and emotional development and learning in childhood and adolescence. Particular attention is given to ego-defensive, adaptive and sociocultural aspects of behavior, health and wellness, and ways in which adaptive behavior becomes symptomatic. This course organizes disorders according to the organization of the DSM-5. Historical contexts in which psychopathology has been diagnosed and viewed from early medical concepts through the currently used Diagnostic Criteria in the DSM-5 are presented. Learning disorders, including emotional issues affecting student achievement and their treatments are investigated. Attention is focused on differential diagnosis, treatment planning and best practices in applied settings. Discussions focus on psychopharmacology, knowledge of medical conditions and medication related to physical disabilities and learning disorders, prevalent psychotherapies, and theories of abnormal behavior and development. Case studies provide experience in classifying, diagnosing and categorizing various mental disorders from childhood throughout the lifespan.

Discussions of treatment of mental illness include psychopharmacology, prevalent psychotherapies used in individual, family, couple and group psychotherapy and current research findings related to treatment. Discussions also focus on health and wellness, multicultural issues, plus variables related to resiliency and student learning. Additionally, the effects of abuse, violence, theories

of normal and abnormal behavior and development are examined. Current research that can assist the school counselor in developing a plan of action for referral and treatment that relates to personal, social and academic functioning of students will be procured through the online library. This course utilizes films, tapes, case studies, class presentations, lectures, and group discussions. It includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. This course also includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: h: Knowledge of medical conditions and medication related to physical disabilities and learning disorders. c. Learning disorders, including emotional issues affecting student achievement, and their treatment

This course addresses the following Massachusetts State Standards for School Guidance Counseling: c. Psychology of learning. d. Understanding of the diagnosis and treatment of learning and behavior disorders. e. Theories of normal and abnormal intellectual, social, and emotional development.

CCP 617 School Adjustment Counseling/School Social Work - 3 credits

This course explores the roles and functions of school adjustment counselors with students identified as having emotional, behavioral, and social problems. This course operates on the assumption that such students are best served using personal, systems, family and group counseling approaches, with strong emphasis on identifying, assessing and utilizing community and family resources. Techniques for working with families, school and community personnel are emphasized. Clinical school counseling and systems issues are explored as well as: consultation, harm prevention and reduction, and the evaluation and utilization of community resources. Assessments such as genograms, biopsychosocial assessments, functional behavior assessments and behavior intervention plans, will be taught as well as treatment planning and goal writing.

The understanding of the diagnosis and treatment of learning, emotional and behavioral disorders, when to recommend an IEP, when a 504 is most appropriate, and when students do not qualify for services is emphasized. Knowledge of IEP/special education time lines is conveyed. The referral process for students and their families to obtain services and supports in the community is a focus of discussion, as well as advocating and facilitating relationships with community and government agencies. The course addresses a working knowledge of the juvenile justice system with regard to criminal justice, child protection, CRA laws and regulations, as well as federal and state regulations addressing the legal rights of students and their families. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: c: Learning disorders, including emotional issues affecting student achievement, and their treatment. e: Knowledge of state –of –the-art diagnostic instruments; procedures for testing and interpreting results. f :Techniques for communicating and working with families and school and community personnel. g: Knowledge of the criminal justice system with particular reference to the juvenile justice system and organizations. i: Federal and state regulations addressing the legal rights of students and families.

CCP 622 Ethics and Professional Issues for School Counselors and Mental Health Practitioners - 3 credits

This course explores several models of school counseling and mental health counseling and the relationship to relevant ethics, federal, state, municipal, state laws, and standards and regulations. The course emphasizes best practices and strategies for dealing with ethical and legal dilemmas, including the ability to apply and practice ethical and legal standards in school counseling. School counseling and systems models are examined along with consultation, harm prevention and reduction, and the evaluation and utilization of community resources. Focal areas include professional roles and functions, ethical standards including accountability, responsibility, client/student welfare, emotional health, laws and regulations, institutional policies including crisis/disaster preparedness and response, cross cultural, cross social class practices and their impact on mental health and school counseling. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: i: Federal and state laws and regulations addressing the legal rights of students and families. This course addresses the following Massachusetts State Standard for School Guidance Counseling: h. Federal, state, municipal, and school laws and regulations.

CCP 625 Foundations of Couples Counseling - 3 credits

Designed for beginning counselors working with couples, this course will cover the basic approaches to couples counseling. Presentations and discussions of key topics will be accompanied by videotapes and experiential exercises. Therapy techniques such as family sculpture, doubling, and psychodrama will be presented. Special topics in couples counseling such as divorce, violence, and alcoholism will be discussed. The goals of the course are to help students learn how to: (1) assess the couples' presenting problem; (2) develop appropriate counseling plans; and (3) evaluate counseling as it proceeds. Course requirements include class attendance, readings, active participation, and two five-page papers. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 629 Geriatric Counseling - 3 credits

There are many unique issues that arise in providing counseling services to older adults. After discussing the "paradox of aging" — that older adults generally have increased cognitive and physical problems yet also report higher well-being — this course will explore the differential prevalence and symptomology of various mental disorders in older adulthood. Students will also learn about the major types of dementia and related treatment issues (e.g. behavioral interventions, working with family caregivers). Students will be taught about evidence-based clinical interventions for older adults, such as cognitive-behavioral therapy, problem-solving therapy, and

reminiscence/life review. Students will also learn about the unique professional issues that arise in providing mental health counseling to older adults in the variety of settings in which treatment often occurs (e.g. long-term care, outpatient mental health, hospitals, social service agencies, and home-based treatment.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 630 Human Development Across the Lifespan - 3 credits

This course will address the psychological and biological aspects of human development from conception through childhood, adolescence, early adulthood, mid-life and aging. Familial, environmental and cultural factors will be explored as they impact the development of people across the continuum of life. Theory will combine with application related to physical, emotional, intellectual, learning, social, normal and abnormal development; plus cognitive, moral, and vocational adjustment. The processes of physical and psychological development including ethnic and gender differences will be studied. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: b: Theories of normal and abnormal intellectual, social, and emotional development.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: c. psychology of learning, and e. theories of normal and abnormal, intellectual, social, and emotional development.

CCP 631 The Counselor in the Forensic Environment - 3 credits

This course explores forensic settings, the counselor's roles within these settings, and appropriate counseling and systems skills. It introduces concepts of addiction, relapse prevention, and stages of personal change, as they relate to forensic counseling. Students are introduced to the continuum of forensic settings including court clinics, juvenile detention and rehabilitation facilities, houses of correction, jails, prisons, pre-release and post-release centers. Students explore the stages of the judicial process, legal and procedural issues during incarceration, the offender's transition to release and community life, and the dynamic tension between the goals of rehabilitation and punishment. Students then survey counseling and systems skills appropriate to such settings and engage in realistic role-plays in order to develop or improve their skills. The course then surveys approaches to addiction, relapse prevention, and stages of personal change, with an overview of appropriate counseling techniques. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 634 Death and Dying - 3 credits

In this course, students will explore an overview of common end-of-life issues that arise when counseling dying clients and their family, e.g. discussion of goals of care (e.g. DNR/DNI), psychological treatments for pain, multicultural factors, familial conflict, anticipatory grief, bereavement, and death anxiety. Students will also learn about palliative care, hospice care, and the complex bioethical issues that can arise in this work. Lastly, students will explore what it means personally to work with this population, with discussion of compassion fatigue and burnout prevention. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 636 Psychological Testing - 3 credits

This course provides an overview of psychological testing including a review of projective testing and techniques for individual and group administration for understanding personality development and pathology, basic administration, scoring and diagnostic skill development. This course reviews instruments including TAT, MMPI and Rorschach as well as language and alternative non-language-based intelligence tests, achievement tests including the WISC-IV, the Woodcock-Johnson III, tests of nonverbal intelligence, and other state-of-the-art diagnostic tools. Emphasis is on clinical integration of the testing materials, useful intervention strategies and recommendations for the counselor, treatment team and/or referral agent. Test reliability, validity, standard deviations, scaled scores, percentiles and interpretation of significant differences are taught. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: c. Learning disorders, including emotional issues affecting student achievement, and their treatment.

This course addresses the following Massachusetts State Standard for School Counseling: b. Understanding and interpretation of Massachusetts Comprehensive Assessment System (MCAS) and other academic test results to students, teachers, and peers.

CCP 637 Neurobiology: Basics and Beyond - 3 credits

In this three credit course, we will explore neurobiology as it relates to emotional, behavioral and cognitive development and expression. The last decade, with the benefits of technology and research, has witnessed a renewed convergence of psychiatry and neurology. Emotional factors are often expressed via neurological symptoms and neurological deficits often resulting in psychological symptoms. This course will identify key areas in the brain, nervous system, and the interrelationship with internal and external factors that shape who we are and what we do. Through presentations, discussion and experiential practice, students taking this course will leave with a greater understanding of the brain/body connection as it relates to stress, trauma and the myriad of neurological and emotional pathologies. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 638 Group Work with Children and Adolescents - 3 credits

This course is designed to prepare students in the Mental Health, School Adjustment, and School Counseling programs to lead psychoeducational and/or counseling groups for children and adolescents. Class lectures and experiential activities will provide a theoretical and practical framework for organizing and leading theme-oriented counseling groups in school and community mental health settings. Readings will provide students with different theoretical perspectives on working with groups as well as the practical tasks in managing and working with school age youngsters in a group setting. Designing curriculum for the prevention and treatment of substance abuse, physical and sexual abuse, and violence as well as numerous other topics will be reviewed. The course explores counseling issues and provides specific techniques and strategies that are developmentally appropriate and applicable to the school/community settings. Application of ethical standards and legal requirements unique to counseling children and adolescents is included.

This course addresses the following Massachusetts state standards for school adjustment counseling: a. principles of therapeutic relationships. b. theories of normal and abnormal intellectual, social and emotional development. d. Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

This course addresses the following Massachusetts state standards for school counseling: f. knowledge of strategies used for the prevention and treatment of substance abuse, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students. e. theories of normal and abnormal intellectual, social and emotional development. l. group counseling and group leadership.

CCP 639 Career Development - 3 credits

This course provides an experiential approach to career development for mental health, school and rehabilitation counselors to support clients with and without disabilities across the lifespan in both individual and group settings. Orientation to key assessment instruments, online resources, labor market information, transferable skills analysis, job placement strategies and work-related supports will be made to support the career guidance process and to develop comprehensive plans of action for clients.

This course addresses the following Massachusetts State Standard for School Counseling: i. Career counseling

CCP 640 Addiction Disorders - 3 credits

Designed for beginning and intermediate clinicians, this course provides a thorough foundation in substance abuse treatment. The prevention and treatment of substance abuse in people of all ages will be explored, as well as the relationship between substance use, violence, and physical and sexual abuse. Topics include: theories of etiology of addiction; pharmacology of psycho-active drugs; cultural factors that influence substance use; assessment and intervention with substance abusers and their families. Emphasis is put on diagnosis, treatment planning and referral to appropriate resources including self-help groups. Students will have the opportunity to participate in simulated interviews and experiential exercises. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: c: Learning disorders, including emotional issues affecting student achievement, and their treatment. f: Techniques for communicating and working with families and school and community personnel. g: Knowledge of the criminal justice system with particular reference to the juvenile justice system and organizations. i: Federal and state regulations addressing the legal rights of students and families.

This course addresses the following Massachusetts State Standard for School Counseling: f: Knowledge of strategies used for the prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

CCP 641 Field Experience II - 3 credits

Prerequisite: CCP520. Enrollment limited to 10. This is the first in a sequence of distinctly defined, post-practicum, supervised co-curricular experience and runs concurrent with field placement. Continuous registration for this portion of the clinical training is required until completion of 200 hours per term or 600 total hours. Documentation of internship requirements in accordance with 262 CMR 2.00 will continue.

CCP 642 Fundamentals of Pastoral Counseling - 3 credits

This introductory course will provide an integrative study of psychological, spiritual, and faith-based frameworks. The course will explore the role of spirituality in clinical practice, and train students on how to effectively integrate a client's spirituality into various phases of counseling, including clinical assessments and intervention. We will study several theories and models for spiritually-informed psychotherapy from diverse perspectives. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 643 Medical and Psychological Aspects of Disabilities - 3 credits

The course offers students with little or no exposure to advanced medical sciences the opportunity to examine the physiological and anatomical basis for many chronic illnesses, medical and psychiatric disabilities they will encounter in the rehabilitation counseling setting. Students examine the etiology, progress, and correlations between mental health and other disabling conditions as well as the psychosocial implications associated with these circumstances. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 644 California Clinical Experience: Practicum II - 3 credits

Supervised clinical counseling of individuals, couples, groups, families, and children. At least one hour of individual supervision per week or two hours of group supervision. Four hours of case presentations. Continuous registration for this portion of the clinical training until completion of at least 100 clock hours.

CCP 650 Group Dynamics/Group Counseling and Human Systems - 3 credits

This course involves the study of the dynamics common to all small groups, through examining their structural and interactional properties and learning the bases for understanding groups as therapeutic, organizational, social, psychological, and collective phenomena. The class will be divided into two groups. All students will participate in an experiential, interactional group for one half of the term and observe another interactional group for one half of the term. Each experiential phase of a group will be followed by a didactic analysis of the process. The instructor will demonstrate various techniques as leader of all experiential sessions. Leadership styles will be examined as they influence group process. Students are required to write journal analyses of group sessions, complete assigned readings, and attend every session. Students are taught to develop self-awareness, sensitivity to others, and skills needed to relate to individuals and groups from diverse backgrounds. (No one will be admitted to the course in the event of failure to attend the first session.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: a: Principles of therapeutic relationships.

This course addresses the following Massachusetts State Standard for School Guidance Counseling: i. group counseling and group leadership.

CCP 652 Holistic Approaches to Psychotherapy - 3 credits

Through exploring a range of integrative approaches to counseling and psychotherapy this course aims to elucidate holistic assumptions behind counseling people in psychological distress. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 653 Religious Coping from a Sociocultural Perspective - 3 credits

This course will examine the stress experience of marginalized groups and explore the ways in which religion, spirituality and/or faith is used to help individuals cope. We will study traditional stress and coping theory, and religious coping theory to examine the applicability of these models for oppressed and marginalized populations. The course will explore the ways in which certain theories and models for mental health practice have historically pathologized the faith experience of some groups. The course will contrast this study with a look at liberation theologies for its role in helping to empower individuals and communities dealing with systemic stressors and oppression. Students will develop skill in integrating these frameworks and understandings into effective clinical practice. Diverse populations and faith traditions will be explored. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 654 Rehabilitation Plan Development - 3 credits

This course acquaints students with case and caseload management, delivery systems for public, private and nonprofit settings for individuals with cognitive, intellectual, medical, physical and psychiatric disabilities. This course will address laws and ethical standards that impact rehabilitation counseling and the range of community resources available to the counselor whose goal is the effective and comprehensive mental health recovery of individuals, including achieving maximum independence and employment. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 655 Vocational and Affective Counseling - 3 credits

This course acquaints students with the process, history and philosophy of rehabilitation counseling. Class discussions will focus on the organizational structure of the rehabilitation system, the professional identity of the rehabilitation counselor, and legal and ethical issues in the practice of rehabilitation counseling and how it complements the area of mental health delivery of services. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 656 Vocational Assessment & Evaluation - 3 credits

This course provides an orientation to individual appraisal, standardized testing, and test and measurement principles found in psychological testing for mental health assessments, but expands and provides increased focus on vocational and career interest testing. It includes standard test areas such as achievement, aptitude, interest, personality, situational testing, behavioral observation, work samples and functional evaluations. This course will also address career alternatives for the rehabilitation counselor. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 657 Terror, Trauma and the Sacred: Psychological and Spiritual Perspectives - 3 credits

This course will examine the ways in which spirituality and faith impacts a person's response to crisis. We will examine case examples of individuals and communities dealing with issues of grief and loss; death and dying; natural disasters; and trauma and victimization. The course will explore a wide-variety of spiritual and faith-based frameworks for the perspectives they provide on suffering, hope and healing. Students will develop skills and techniques for crisis management and counseling from a faith-based perspective. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 671 East & West: Self, Suffering, & Healing - 3 credits

This course considers theories of mind and behavior in Eastern philosophy and Western psychology. The aim of the course is to elucidate different perspectives on the nature of self and human suffering, and to understand suggested pathways to the alleviation of suffering. We will examine Western theories ranging from psychoanalysis to transpersonal psychology, as well as Eastern traditions ranging from Taoism and Buddhism to the perspectives of figures like Jiddu Krishnamurti. A central question of the course is: To what extent do Eastern ways of understanding human experience complement Western theories - or are their differences difficult to reconcile? This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 672 Counseling Adolescents Transitioning to Adulthood - 3 credits

In this course students will develop strategies to effectively counsel adolescents. This course will address the stages of development in the adolescents' transition into adulthood, with a focus on the tasks of differentiation, autonomy, relationships, family, work, post-secondary education, military service, and other developmental challenges. Collaboration and consultation with parents/guardians, community collaterals, school support staff, and employers, as well as access to resources will be addressed. For those adolescents considering entry to higher education, the college/post-secondary training program and its funding will also be discussed. Special emphasis will be placed on ways to help those who traditionally face substantial barriers to success, including low-income students, minority and EL students, and students with disabilities. The fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction are emphasized throughout the course.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: m. Development of skills for consultation with parents, teachers and administrators. n. College counseling and use of college and other post-secondary resource materials (grades 5-12).

CCP 673 Play, Activity and Expressive Counseling Techniques - 3 credits

This course explores ways of using play, activity, and arts-based approaches in counseling with children, adolescents, and adults. These active modalities are used in various ways to enact, accelerate, and enhance the counseling process. Teaching and learning methods include guided exploration of a variety of materials and techniques, lectures, discussion, role-plays, media presentations, case studies, individual and group projects, critical reading, and written assignments.

CCP 680 Human Sexuality - 3 credits

Sensitization to sexual issues and exploration of how therapists' perceptions of such issues affect their work with clients is explored in this course. Introduction to the theory and practice of sex therapy, including information about sexual function and dysfunction and appropriate intervention methods is presented. Emphasis is on the relationship system and the dynamics of sexual functioning within that system. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 681 Mind, Body, & Emotion: a Holistic Perspective - 3 credits

This course reviews literature in animal and human behavior to provide a basic biological and behavioral framework for considering the relationship between the mind, body, and emotions. The historical view of emotion as an instinctual force that should be controlled is contrasted with an emerging understanding of emotion as an adaptive intelligence that deeply informs our relationship to the world. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 698 Pre-Practicum Readiness Seminar for School Adjustment and School Counseling - 0 credits

The Pre-Practicum Readiness Seminar is designed to expose identified SOPC school-based students to the various aspects and requirements of a school-based internship. The seminar is designed to outline professional, ethical standards, and appropriate interactions while interning in a school setting. The class will also offer an overview of all school-based graduation paperwork requirements.

CCP 700 Field Experience III - 3 credits

Prerequisite: CCP 641. Enrollment limited to 10. This is the second in a sequence of distinctly defined, post-practicum, supervised co-curricular experience and runs concurrent with field placement. Continuous registration for this portion of the clinical training is required until completion of 200 hours per term or 600 total hours. Documentation of internship requirements in accordance with 262 CMR 2.00 will continue.

CCP 701 Field Experience IV - 3 credits

Enrollment limited to 10. This the third in a sequence of distinctly defined, post-practicum, supervised co-curricular experience and runs concurrent with field placement. Documentation of internship requirements in accordance with 262 CMR 2.00 will be completed until 600 total hours. An elective may be substituted for this course if all field experience requirements are met by the completion of CCP700 and granted by program chair.

CCP 710 Marriage and Family Therapy: Basic Counseling Skills - 3 credits

This course will cover the theories behind marital and family therapy and provide a practical integration of interests and skills. The course is designed to meet the needs of both beginning and experienced therapists. Beginning students will have the opportunity to build a sound theoretical foundation for marital and family therapy while more advanced students can refine technique and explore emerging treatment approaches. Written assignments will be similarly tailored. One basic counseling skills course is required in each counseling program. The course stresses development of counseling skills which are essential to a particular area of training and practice. One or more active teaching methods, such as role-play, live or videotaped demonstration, or other experiential exercises form a significant part of the course experience. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 715 Multicultural Counseling: Children and Adolescents in Context: Basic Counseling Skills - 3 credits

This course explores the counseling process with children and adolescents from two perspectives: first from the experiential world of the child or adolescent, and secondly, from an ecological/systems perspective, with strong emphasis on cultural strengths and concerns. Topics include: the world of the child in a multicultural society; exceptionality, techniques for communicating and working with diverse families, school and community personnel; play/activity techniques, multicultural group work. Also: assessment; diagnosis; gathering and communicating information; sensitivity to others; self awareness; culturally congruent educational programs; stereotyping; economic, social and political issues surrounding diversity; relevant state, municipal and school laws and regulations relating to ethnic, linguistic, racial, gender and religious diversity; interviewing; dealing with research; resources and referrals within schools and community; hazards and problems of normal and abnormal development; enhancing a positive school climate in a multicultural school setting. The course also addresses issues impacting learning, achievement, and diversity with a final presentation utilizing the online library and other online researched based sites. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: f: Techniques for communicating and working with families and school and community personnel. i: Federal and state laws and regulations addressing the legal rights of students and families.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: h. Federal, state, municipal, and school laws and regulations. j. Resources within the school system or the community for referral. m. Development of skills for consultation with parents, teachers, and administrators.

CCP 720 Psychopharmacology in Addictions and Mental Health Counseling - 3 credits

The use of medications in the treatment of alcohol and drug dependence and their co-occurring disorders has historically been controversial. Newer medications with less potential for addiction are increasingly being used, including agonist and antagonist drugs designed to have a direct impact on the neurochemistry of addiction. Finding the balance between treating dependence and co-occurring depression, anxiety, trauma and other disorders poses a special challenge, and it appears that addressing these issues concurrently shows the most success. This course will review current clinical

models of intervention and differential diagnosis. A brief review of relevant neuroanatomy and neurophysiology will set the stage for an examination of major psychotropic medications, including antipsychotics, antidepressants, mood stabilizers and anti-anxiety medications, as well as newer medications for addictions treatment. This course will be grounded in clinical material and frequent presentation of case material. Requirements will minimally include one topical presentation. Responsibility will be shared for presenting material throughout the class. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 722 The Life of the Family in Context - 3 credits

This course examines the evolution of the family in the context of the social environment in which it exists. Traditional family values and structures are examined as well as more modern and nontraditional situations that may include: the divorced family, the gay/lesbian family, families of war, immigrant families, religious families, foster/alternative family environments, families of abuse, grandparent/grandchild families, culturally blended families, addicted families, and families experiencing mental illness. An exploration of personal and professional experiences and the lenses through which we view families as well as challenges to traditional family concepts will be considered. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 723 Narrative and Collaborative Approaches to Therapy - 3 credits

Postmodern therapy is a radical shift in both the stance of the therapist and in how therapy is conducted. For example: the therapist is the participant/manager of the conversation, not the 'expert.' Language, rather than interactional pattern, is the system; meaning and understanding are achievable through continued efforts; difficulties are constructed in the language system and can be 'dissolved' through language; and change occurs through development of new language. In this course, students will have their assumptions challenged and play an active role in co-creating a postmodern experience of meaning-making in the classroom. Ideas will be practiced both in and out of class, so students are strongly encouraged take this course concurrently with their internship. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 724 Post Traumatic Stress Reactions - 3 credits

This course focuses on theory, research and practice of trauma by addressing systemic and cultural aspects of diagnosis, assessment, dynamics, and trauma treatment. This includes acute stress disorder, post traumatic stress disorder and complex PTSD, as well as dual diagnoses. Immediate and long-term effects of trauma on various populations will be explored: trauma in adults, children, and families, sexual and physical abuse survivors; victims of crimes, large scale disaster, war; workplace violence and complicated grief. Other topics include trauma resilience, natural courses of coping; transgenerational aspects of traumatization and life span perspectives on trauma.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 727 Clinical Interventions for Combat Stress and Trauma - 3 credits

This course is taught in the fall only. The content and design of this course is to familiarize students with the history, diagnosis and treatment of combat stress and trauma (CST) in the lives of primarily military people, but also the effects of CST on civilian populations exposed to war operations. The course will further provide information concerning the effects of CST on veterans' families. Through lecture, class discussion, directed readings and case studies, students will become acquainted with causes and effective treatments of CST. Emphasis will be placed on diagnosis, treatment, referral resources and the support systems. Students will gain knowledge of: 1) the prevalence and complexity of combat stress and trauma; 2) counseling and treatment methods for returning veterans and their families; and 3) referral resources for veterans. Students will demonstrate proficiency in understanding the nature and complexity of combat stress and trauma. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 728 Trauma Specific Interventions - 3 credits

Students will learn about assumptions, principles and concepts of trauma-specific treatment approaches and trauma-informed care. Students will gain knowledge of theory and practice of psychological first aid, its application in disaster mental health, crisis intervention and crisis counseling. They will become familiar with major approaches in trauma treatment: individual and group trauma counseling, cognitive, behavioral, psychodynamic, and exposure therapies, psychopharmacological treatments, and newly emerging approaches. The acquired knowledge and skills can be applied in providing individual and group crisis intervention, brief trauma counseling and treatment of survivors of sexual abuse, war trauma, torture, disasters and workplace violence and other. The ethics of trauma work will be thoroughly covered. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 729 Trauma Intervention in Schools - 3 credits

This course is taught in the spring term only. Trauma, chronic fear and stress impact children's neurobiological development which affects critical brain functions (memory, language, problem-solving, higher order thinking, and executive function skills). The support a child/adolescent receives from those around them and the communities they inhabit heavily influences the trauma response and forward growth. Schools are children's communities. This course will explore the impact of trauma on the child/adolescent's neurobiological development, relationships, behavior, learning and academic performance. Trauma sensitive approaches in schools are described, including prevention and treatment of physical, sexual and substance abuse, as well as clinical interventions related to stabilization and the development of coping and social skills. School and system-wide crisis prevention, intervention and postvention planning and implementation will also be reviewed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: f. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students

CCP 730 The Practice of Mental Health Counseling - 3 credits

This course looks at issues in the practice of mental health counseling, including: history and trends; specialized roles related to young people and schools (school social worker/school adjustment counselor, guardian ad litem, juvenile court clinician); roles, settings and special populations in mental health counseling practice; specialized treatment planning, assessment, and documentation of managed care. (The course does not focus on basic clinical skills.) Particular emphasis is given to professional identity and ethics, mental health consultation, the roles of members of an interdisciplinary team, developing a process for professional self assessment and continuing education planning, using appropriate language for managed care assessment and treatment, and developing a disclosure statement to introduce clients to the counseling relationship. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP731 California Clinical Experience: Practicum III - 3 credits

Supervised clinical counseling of individuals, couples, groups, families, and children. At least one hour of individual supervision per week or two hours of group supervision. Four hours of case presentations. Continuous registration for this portion of the clinical training until completion of at least 100 clock hours.

CCP 754 Perspectives in Cross-Cultural Counseling - 3 credits

This course focuses on the role of culture in the development of psychological health and in psychopathology. Variations among diverse cultures in defining mental health and deviant behavior are discussed. The importance of understanding the cultural context is emphasized, both in the prevention and in the resolution of psychological problems. Students become aware of their own cultural beliefs regarding mental health issues, and the impact of their perspective in working with culturally different people. Techniques for working with families and schools are also discussed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: Standard f: Techniques for communicating and working with families and school and community personnel.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: m. Development of skills for consultation with parents, teachers, and administrators

CCP 758 Clinical Practice in California - 3 credits

This course is only available at California locations and may not be offered at other locations. This course explores the intersection of the diversity of California culture and the practice of mental health counseling. Topics include: gender, gender identity and sexual expression; diversity in family organization and living arrangement; cultural and religious beliefs specific to California and the understanding necessary to provide effective therapy; family and community violence, crisis and emergency response, and treatment of trauma; local and regional supports and resources available to

individuals and families; and socioeconomic factors specific to the diverse cultures found in California. Topics include child and intimate partner abuse, elder abuse and reporting requirements. (7 clock hours). this course include the fundamental occupational tasks of assessment, case presentation and collaboration, team membership and client interaction.

CCP 792A School Adjustment/Mental Health Internship Seminar A - 3 credits

Prerequisites: CCP520, passing scores on MTEL Communication and Literacy Exams. (enrollment limited to 10.) This course is for students in the School Adjustment/Mental Health program who are in their first term of an approved ESE/SAC School Internship. This course focuses on students' mental health counseling practice which is conducted in an approved school setting. A minimum of 225 hours of experience are required under the supervision of a qualified supervisor (Massachusetts Regulations 262 CMR) and must also have DESE licensure as a School Adjustment Counselor. Goal(s) for each student will be established with their College internship instructor and site supervisor at the beginning of the experience. Casework, note taking, diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students' clinical skills in these areas. Use of Functional Behavior Assessments will be discussed as well as the formation of groups in the school setting. Additionally, a review of the principles of therapeutic relationships, developing techniques for communicating and working with families, agencies/systems, and school and community personnel; and the use of supervision will be discussed. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an FBA, an IEP or a 504 will also be discussed. SAC interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. The progress on the completion of a portfolio demonstrating the student's advancement through their program of study is required in this course. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, licensed psychologist, or psychiatrist is required.

The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. 4: A passing score on the Communication and Literacy Skills test.

Standard a: Principles of therapeutic relationships. b. Theories of normal and abnormal intellectual, social, and emotional development c: Learning disorders, including emotional issues affecting student achievement, and their treatment. d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. e. Knowledge of state-of-the-art diagnostic instruments; procedures for testing and interpreting results. f Techniques for communicating and working with families and school personnel. g. Knowledge of the criminal justice system with particular reference to the juvenile justice system and organizations. h. Knowledge of medical conditions and medication related to physical disabilities and learning disorders. i. Federal and state laws and regulations addressing the legal rights of students and families.

CCP 793B School Adjustment/Mental Health Internship Seminar B - 3 credits

Prerequisites: CCP520, CCP792A, passing scores on MTEL Communication and Literacy Exams. (enrollment limited to 10.) This course is for students in the School Adjustment/Mental Health program who are in the second term of an approved ESE/SAC School Internship. This course focuses on students' mental health counseling practice which is conducted in an approved school setting. A minimum of 225 hours of internship experience are required under the supervision of a qualified supervisor (Massachusetts Regulations 262 CMR) and must also have DESE licensure as a School Adjustment Counselor. Goal(s) for each student will be established with their College internship instructor and site supervisor at the beginning of the experience. Casework, note taking, diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students' clinical skills in these areas. Development of Behavior Intervention Plans based on Functional Assessments will be discussed as well as establishing groups in the school setting and evaluating their impact. Additionally, a review of the principles of therapeutic relationships, developing techniques for communicating and working with families, agencies/systems, and school and community personnel; and the use of supervision will be discussed. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an FBA, an IEP or a 504 will also be discussed. SAC interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. The completion of a portfolio demonstrating the student's advancement through their program of study is required in this course. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, licensed psychologist, or psychiatrist is required.

The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. 4: A passing score on the Communication and Literacy Skills test.

Standard a: Principles of therapeutic relationships. b. Theories of normal and abnormal intellectual, social, and emotional development c: Learning disorders, including emotional issues affecting student achievement, and their treatment. d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. e. Knowledge of state-of-the-art diagnostic instruments; procedures for testing and interpreting results. f Techniques for communicating and working with families and school personnel. g. Knowledge of the criminal justice system with particular reference to the juvenile justice system and organizations. h. Knowledge of medical conditions and medication related to physical disabilities and learning disorders. i. Federal and state laws and regulations addressing the legal rights of students and families

School Counseling (CSG)

CSG 616 Counseling in the Schools - 3 credits

Pre Practicum: 15 hours of directed field-based training required for DESE licensure. This course explores history, philosophy and trends in school counseling. Topics include professional roles and practices, student counseling, multicultural issues, stereotyping, impact of socioeconomic status, gender and sexual identity, group work, assessment issues, behavioral observation, and a variety of traditional and developmental/ preventive classroom guidance approaches. The course is presented in a manner which includes individual and group counseling, and consultative perspectives. There is a strong emphasis on developing skills which allow interns to learn differentiated strategies to confront the achievement gap. Students learn to develop a professional identity as a person in the role as change agent, and to help students deal with crisis, emergencies, and disasters through intervening with important figures and organizations in their lives. A significant part of the course will deal with crisis intervention, learning to recognize symptoms of substance abuse in students and home-life where substance abuse occurs; consultation to teachers, parents and administrators with respect to promoting student well-being. Students will be taught to identify opportunities, especially from the community at large, than can enhance or impede growth and advancement academically and socially. Another focus will explore liaison opportunities with important individuals from the non-school community, and the roles of the peer group in the lives of children and adolescents. Students will also be taught to advocate for students and the policies in school and the community that are equitable for multicultural student populations. Through this course students will employ web searches to gather supporting data for presentations. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: a. Familiarity with the Curriculum Frameworks and their use in the advising responsibilities of the guidance counselor. b. Understanding and interpretation of Massachusetts Comprehensive Assessment System (MCAS) and other academic test results to students, teachers, and parents. f. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students. g. philosophy, principles and practices in school guidance counseling. j. resources within the school system or the community for referral. m. Development of skills for consultation with parents, teachers, and administrators.

CSG 695 Counseling and Consulting Techniques Laboratory - 3 credits

Counseling skills such as interviewing, reflection, use of empathy, summarization, concreteness, genuineness, magic questioning, and building relationships will be covered in this course. The course will also teach techniques for identifying and focusing on problem behaviors (substance abuse, physical abuse, suicide risk), body language, and underlying influences of problematic behavior. In addition, Solution Focused School Counseling, and other models of counseling will be explored. Students are taught to understand and develop multicultural awareness and competencies, and how to be an effective leader. The course will also address wellness programs for students, and methods of consulting to promote student academic, career and personal/social development in ways to help parents solve problems. Students will be introduced to principles of peer mediation, peer mentoring, and peer tutoring and engage in supervising peer interventions to solve problems. The course employs technology for student presentations, role taking, lecture, video, audio, presentations, readings and demonstrations, and fieldwork.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: m. development of skills for consultation with parents, teachers, and administrators.

CSG 792E School Counseling Internship Fieldwork and Seminar I (PreK-8) 600 clock hours - 3 credits

CSG 792S School Counseling Internship Fieldwork and Seminar I (5-12) 600 clock hours - 3 credits

Class preparation and assignments reflect levels preK-8 or 5-12 depending on fieldwork level and license level sought.

Onsite training supervised by a state-approved licensed/certified school guidance counselor at the level sought is required; currently, 600 contact hours minimum, 240 of which must be in direct service with students, and 360 hours of indirect service (per CACREP National Standards). Entry requires approval from school guidance counseling chair. Students must pass required parts of MTEL (Massachusetts) or other state tests before entry.

This is the first of a two term capstone experience where interns engage in the role of school counselor and attend a seminar that runs concurrent with fieldwork. Interns work with children and adolescents under supervision of a licensed school guidance counselor. They participate in individual and group counseling; utilize technology in the counseling process; apply counseling principles to career, social, personal, and academic development of students, and students with normal and abnormal behavior. Students are taught to use measurable outcomes for school counseling programs and activities. They utilize behavioral observation and program evaluation in planning successful interventions for students. They work with special education teams in understanding diagnosis of learning and behavior disorders. Interns are introduced to resources within the school district and community for referral. They develop plans for the prevention, treatment and referral of students engaged in legal or illegal substance abuse, personal, physical, and sexual abuse, school violence, school crises and other trauma causing situations. Students engage in ethical and legal practices of school counseling; campaign for an identity as a school counselor; work in support service teams to identify opportunities that enhance or impede academic, personal/social and career development. They work with

task and peer counseling groups; deploy multicultural strategies in relation to diversity, equity, and opportunity in student learning; involve parents to promote academic, personal/social, and career development. Students are taught to use data to make decisions regarding accountability; learn and practice concepts, principles, and strategies to help close the achievement gap and school drop-out; employ suicide risk procedures; and are involved with designing curriculum and instructional strategies to teach a developmental guidance curriculum. Students also apply consultation strategies with parents, staff, administration and community resources; plan and implement developmental classroom guidance programs; learn the special education referral processes; and are taught to recognize and discuss personal limitations in supervision. Students are expected to utilize leadership strategies in the planning and implementation of parent education programs, and advisor/advisee programs. And lastly, students become familiar with the state achievement tests and the state curriculum frameworks. One contact hour of weekly supervision with a licensed supervisor and attendance at a seminar that runs concurrent with fieldwork is required.

The fieldwork experiences in this course address all of the Massachusetts State Standards for School Guidance Counseling (except standard k).

CSG 793E School Counseling Internship Fieldwork and Seminar II (PreK-8) 600 clock hours - 3 credits

CSG 793S School Counseling Internship Fieldwork and Seminar II (5-12) 600 clock hours - 3 credits

Class preparation and assignments reflect levels preK-8 or 5-12 depending on fieldwork level and license level sought.

Onsite training supervised by a state-approved licensed/certified school guidance counselor at the level sought is required; currently, 600 contact hours minimum, 240 of which must be in direct service with students, and 360 hours of indirect service (per CACREP National Standards). Entry requires approval from school guidance counseling chair. Students must pass required parts of MTEL (Massachusetts) or other state tests before entry.

This is the second of a two term capstone experience where interns engage in the role of school counselor and attend a seminar that runs concurrent with fieldwork. Interns work with children and adolescents under supervision of a licensed school guidance counselor. They participate in individual and group counseling; utilize technology in the counseling process; apply counseling principles to career, social, personal, and academic development of students, and students with normal and abnormal behavior. Students are taught to use measurable outcomes for school counseling programs and activities. They utilize behavioral observation and program evaluation in planning successful interventions for students. They work with special education teams in understanding diagnosis of learning and behavior disorders. Interns are introduced to resources within the school district and community for referral. They develop plans for the prevention, treatment and referral of students engaged in legal or illegal substance abuse, personal, physical, and sexual abuse, school violence, school crises and other trauma causing situations. Students engage in ethical and legal practices of school counseling; campaign for an identity as a school counselor; work in support service teams to identify opportunities that enhance or impede academic, personal/social and career development. They work with

task and peer counseling groups; deploy multicultural strategies in relation to diversity, equity, and opportunity in student learning; involve parents to promote academic, personal/social, and career development. Students are taught to use data to make decisions regarding accountability; learn and practice concepts, principles, and strategies to help close the achievement gap and school drop-out; employ suicide risk procedures; and are involved with designing curriculum and instructional strategies to teach a developmental guidance curriculum. Students also apply consultation strategies with parents, staff, administration and community resources; plan and implement developmental classroom guidance programs; learn the special education referral processes; and are taught to recognize and discuss personal limitations in supervision. Students are expected to utilize leadership strategies in the planning and implementation of parent education programs, and advisor/advisee programs. And lastly, students become familiar with the state achievement tests and the state curriculum frameworks. One contact hour of weekly supervision with a licensed supervisor and attendance at a seminar that runs concurrent with fieldwork is required.

The fieldwork experiences in this course address all of the Massachusetts State Standards for School Guidance Counseling (except standard k).

CCP 798 Clinical Supervision and Consultation Skills - 3 credits

Prerequisites: Successful completion of at least two (2) terms of fieldwork at Cambridge College - CCP 520, CCP 641, CCP 792A. Masters-level clinicians and Licensed Professional Counselors can expect to serve as supervisors or consultants in their post-graduate employment. This course will address the complex roles of clinical supervisors and consultants and will cover the legal and ethical responsibilities of supervision, the options for styles of supervision in various settings, methods of assessment of needs, documentation and other skills necessary to provide quality supervision and consultation.

New England Institute of Business at Cambridge College

Mission

The mission of New England Institute of Business is to provide high-quality, affordable, and accessible undergraduate and graduate degree programs, as well as professional training, for students interested in careers in business, public administration, information technology, and healthcare.

Vision

- NEIB will advance its leadership position in higher education by investing in state-of-the-art instructional technology and by diversifying its academic programs to serve students interested in careers in a broader range of industries.
- NEIB will preserve and expand upon its more than a century-old heritage of working closely with organizational partners. Through the provision of differentiated and specialized academic programs, NEIB will assist such partners in meeting their workforce requirements.
- NEIB will continue to steadily increase its student body, evolving toward an institution with several thousand students. This evolution will serve to establish a critical mass of students to sustain NEIB's distinctive educational model of high-quality programs at a highly affordable tuition.
- NEIB will become a model in higher education.

Values

- We are an institution committed to innovation and to act nimbly to meet business, industry, and public educational needs.
- We are inspired by our heritage and our longstanding commitment to providing our learners affordable, high-quality programs and excellent services.
- We believe in broadening college access for more diverse learners and to support them to degree completion.
- We value integrity and fairness, and we respect the communities we serve.
- We empower others and ourselves to have a positive impact on society, promote open communication, collaboration, and the free exchange of ideas.

History of New England Institute of Business

New England Institute of Business (formerly New England College of Business and Finance), founded in 1909, is a unique academic institution in that it has historically served the highly specialized educational needs of the banking and financial services industries. Since 1909, NEIB has provided relevant and current curricula to address the skills, training, and knowledge requirements of entry-level employees and middle managers in these industries. To further enhance the highly focused educational needs of banking and financial services, the college operated as a membership organization

where its curricula were directly guided by its industry members. NEIB has evolved into a student-centered graduate degree granting college with an excellent reputation for delivering high-quality, online programs in a variety of disciplines. Many of NEIB's esteemed faculty are industry experts who have taught at NEIB for over two decades. All of NEIB's degree programs are offered in a robust and interactive online format.

On March 13, 2020, Cambridge College acquired the assets of the New England Institute of Business following the unanimous votes of each institution's boards of trustees. This momentous decision brings together two institutions with a combined 150 years serving adult learners pursuing meaningful careers.

Executive Director: Howard Horton

Dean of Academic & Student Affairs: Dr. Donna Viens

Admissions

Continuing Education - Non-Degree Seeking Students

Some students prefer to take courses without formally matriculating into a degree program. Continuing Education students who are undecided about matriculating into a degree program should speak with an Enrollment Specialist to ensure the courses they take are eligible for transfer into a degree program at NEIB.

A maximum of two master's level courses may be taken prior to matriculating into a master's program.

Please see *New England Institute of Business at Cambridge College: Tuition & Fees* on page 20 for the per-course tuition. Students interested in Continuing Education should contact the Financial Planning Department at NEIB for additional information.

Undergraduate Programs

Candidates for admission are encouraged to apply as soon as possible in order to be accepted to a specific program and start date. Applicants interested in matriculating into any undergraduate degree or certificate program must complete the admission process detailed below.

Candidates for admission must have earned a high school diploma or a GED prior to matriculation to NEIB. High school seniors may apply for admission but acceptance before high school graduation is contingent upon the receipt of notification of satisfactory completion of high school requirements or GED.

Undergraduate Admission Requirements

For complete undergraduate admission requirements, please see *Admission Requirements and Information New England Institute of Business at Cambridge College* on page 22

Transfer of Credit

Official transcripts from originating institutions must arrive in order for students to be awarded transfer credits. If official transcripts are not presented, students must satisfy the course requirements in order to complete their programs. Official college transcripts must be received by NEIB by or on the last day of the first session in order to receive transfer credit. If the student's official college transcript is not received by this deadline, they will not be eligible for transfer credit.

Foreign credentials, with limited exceptions, must be evaluated for US equivalency by a third-party evaluation agency. Please see *Transfer of Credit* on page 48 for more information.

Required Placement Assessment or Fundamentals Courses

All undergraduate applicants must take English and Mathematics placement assessments unless they have been approved by NEIB to transfer in college level Math and English courses or their equivalents from a regionally accredited school.

Students who score under 55% on either of these assessments will not be admitted to the College. Students who score between 55% and 74% on either of these assessments will be provisionally accepted and invited to take a fundamentals course, which must be completed with a grade of "C" or higher in order to matriculate into an undergraduate degree program. In the event that a student scores between 70% and 74% on the English placement assessment, the Undergraduate Dean has the discretion to waive the requirement to take the English fundamentals course based on a review of the student's writing sample.

As an alternative to taking placement assessments, students may elect to enroll on a provisionally accepted basis and take fundamental courses, which must be completed with a grade of "C" or higher in order to matriculate into an undergraduate degree program.

In the event a student does not pass the fundamentals course(s), there will be no tuition charged for the fundamentals course. In the event a student passes a fundamentals course, the student will be charged for the course and any materials associated with the course and will be allowed to matriculate into an undergraduate degree program.

If a student needs to take both the English and math fundamentals courses, they need to be taken sequentially. If a student needs to take both fundamentals courses and does not pass the first one, the student will not be allowed to matriculate into an undergraduate degree program. Students must pass both fundamentals courses to matriculate into an undergraduate degree program.

Students are allowed to re-apply for admission in one year and retake the required placement assessment and if required the Fundamental English and/or math courses.

Graduate Programs

Candidates for admission are encouraged to apply as soon as possible in order to be accepted to a specific program and start date. Applicants interested in matriculating into a graduate program must complete the admission process outlined below.

New students registering in a single course must also complete this one-time application process. No more than two master's level courses can be taken through Continuing Education before matriculating into the master's program. If required, students are conditionally accepted into the master's programs until all prerequisite courses are completed.

Graduate Admission Requirements

For complete graduate admission requirements, please see *Admission Requirements and Information New England Institute of Business at Cambridge College* on page 22.

Transfer of Credit

Official college transcripts indicating students' Bachelor's degrees conferrals must be submitted to the college from the originating institutions. In the case of students receiving graduate transfer credits, official college transcripts from the originating institutions must be received by or on the last day of the first session in order to receive transfer credit. If the student's official college transcript is not received by this deadline, they will not be eligible for transfer credit.

Please see *Transfer of Credit* on page 48 for more information.

Financial Options: Paying for College

Tuition and Fees

Please see *New England Institute of Business at Cambridge College: Tuition & Fees* on page 20.

Financing your Education

See *Paying for Your Education* on page 13

Course Registration

See *Course Registration* on page 40.

A Course Drop Request Form will be electronically sent to you if you submit your notification of withdrawal via email. This form must be completed and returned to the Registrar's Office by the end of the add/drop period for your withdrawal to take effect. The form may also be found through the Student Services link and should be accessed and completed via this portal for all other forms of withdrawal notification.

Administrative Withdrawal from the College

Undergraduate Courses

An undergraduate student will also be dismissed from the College under the following conditions:

- Fails either ENG 099 or MAT 099 as the first course in the undergraduate program*
- Fails all courses in first two sessions **

Prior to administratively withdrawing a student, the College will attempt to contact that student in writing and/or by telephone to verify the student's status. The student is fully responsible for tuition, fees, or loans outstanding at the time of administrative withdrawal from the College.

*If required to enroll in these developmental courses, successful completion of ENG 099 with a grade of "C" or higher is required in order to move forward in the undergraduate program. A student who has been academically dismissed after either failing ENG 099 or MAT 099 as their first course will have the option of reapplying to the College after one full year of absence from the College. It is strongly recommended that the student continue studying at another institution to demonstrate academic success prior to the reapplication process. For further information on readmission after a one year absence from the College, please see the 'Reinstatement' policy in the NEIB College Catalog.

**Continuing education students not matriculated into College per admission policy.

Graduate Courses

A grade of "WD" will be assigned when written drop requests are received after the course started, after the add/drop deadline. A "WD" will not be counted toward your cumulative GPA.

Planned Break in Enrollment

Policy

A student not taking a course in an undergraduate term or graduate session may be placed by the NEIB Registrar's Office on a planned break in enrollment status for one (1) session unless the student specifies otherwise. If a student submits an intent to return to the NEIB Registrar's Office or their student advisor for longer than one (1) session, the period of the planned break will be adjusted accordingly for the duration of up to and no greater than one (1) year from the date on which the student is placed in the status. After one (1) year, if the student has not returned by the date that the student specified, and the student provides no additional notification or communication to the Registrar's Office about returning, the student will be administratively withdrawn from NEIB and should abide by our admissions policies if electing to re-enroll at NEIB at a later time.

Procedures

After the end of the drop add/period of a session, the Registrar's Office will identify a list of active students who are not taking a course in a session and place them in a planned break in enrollment status. During the session, student advisors will reach out to these students to notify them of their status and adjust their status in accordance with the student's request.

Petition for Change of Program

A student may transfer into a different concentration or program version under the following conditions:

- Student has discussed the transfer with his/her academic advisor or Program Chair.
- Student has submitted Petition for Change of Program a minimum of two weeks prior to the start of the next session and has received notification of approval prior to registering for courses under the new concentration.
- Student has reviewed the curriculum worksheet for the new concentration and understands which courses from his/her current program of study will transfer into the new program or concentration.
- Student is in good academic standing with a CGPA of 2.0 or higher at the undergraduate level and a CGPA of 3.0 or higher at the graduate level.
- Student is in good financial standing with NEIB.
- Students who wish to change programs should contact their Student Advisor.

Petition for Grade Change

Grading criteria for all course work at NEIB is clearly defined on the syllabus and throughout all assignment instructions and rubrics. If a student believes that a grade has been issued in error, or wishes to better understand the rationale for a grade, the student is directed to speak with the faculty member of the course within one week of final grades being posted. If the student is still unclear and wishes to take the appeal further, the student will complete a "Petition for a Grade

Change” that will be forwarded to the Program Chair or the Dean who oversees the course. After consideration of the appeal, the Program Chair or Dean will set up a meeting with the student and provide notification of a decision. Should the student wish to make a further appeal, the student will submit a formal, written appeal to the Dean of Academic Affairs describing the reason for the appeal and measures that have been taken to date to appeal the grade. The decision rendered by the Dean of Academic Affairs will serve as the final decision on the appeal. All records of grade appeals and decisions will be maintained in the student’s academic record.

Petition for Incomplete

See *Incompletes (INC)* on page 45.

Course Cancellation

NEIB reserves the right to cancel courses in which enrollment is below an acceptable minimum. If a course is canceled, every effort will be made to contact students about the cancellation and possible course substitutions. If a student utilizing a direct billing option through their employer opts to substitute a different course for a canceled course, he/she must notify their appropriate company representative of this change. The new course is held to the same withdrawal policies as the original course(s). If no substitution can be made, the student/company will not be held responsible for tuition. In most cases, textbooks for canceled courses may be returned, if in perfect condition, for a full refund. Contact the Bookstore for more information.

Residency Requirements

Students matriculated in an NEIB degree program must complete a minimum of 25% of the program credits at NEIB. Students must complete at least 15 credits (5 courses) of NEIB’s 61 credit Associate in Science in Business Administration program; 30 credits (10 courses) of NEIB’s 120 credit Bachelor degree programs; 24 credits (8 courses) of NEIB’s Master of Science in Finance, Master of Science in Business Ethics and Compliance, Master of Science in Healthcare Management, Master of Human Resource Management, or Master of Science in Quality Systems Management programs and 30 credits (10 courses) of NEIB’s Master of Business Administration program; and 48 credits (14 courses) of NEIB’s Doctoral of Business Administration program.

Student Engagement and the Granting of Academic Credit

Students at NEIB are expected to manage their time in a way that permits them to complete assignments and to meet the learning outcomes specific to each course and those designated for their program of study. Courses at NEIB are designed with both quantitative rigor and qualitative rigor appropriate to the level of a course and the expected competencies a student should be achieving as a result of its successful completion.

With respect to the quantitative aspects of course expectations, these will have some variation dependent upon a student’s abilities and whether a more minimal or maximal commitment is made to assignments and other forms of exploration of the course subject matter. Successful completion of courses at NEIB are expected, however, to involve time commitments for student engagement and student work such that the competencies gained are equivalent to that which is customary for similar courses found at peer institutions.

Aside from this customary commitment, NEIB has also determined that courses can require an average of 135 hours of student engagement in course material before award of credit can be granted for a 3-credit class. The degree of engagement includes participation on the learning management system (i.e., discussion board participation, tests, etc.) and through the preparation of work outside of the learning management system (i.e., reading, conducting research, writing, etc.) If students have questions on the time expectations associated with specific assignments or courses, they should address these with the faculty member teaching the course or the Program Chair.

Independent Study Courses

There are some instances where selected courses at NEIB may be run as “Independent Study” courses. Independent study courses may adopt a schedule that is different from other courses, but all requirements and outcomes remain the same.

Off Site Academic Credit Bearing Courses

NEIB may offer off-site academic credit bearing courses on the premises of some partner institutions. Courses are typically run in cohorts and attended by employees of the member institution. A cohort is typically a minimum of seven students.

Residency Requirements

Students transferring into the BSBA program may transfer up to 90 credits. A minimum of 25% of the program curriculum must be taken at NEIB.

Students matriculating in to a master’s degree program or doctoral program may transfer credit up to two masters’ or doctoral level courses (six credits), respectively, as long as the student received a grade of B (3.0) or better and course content and rigor is deemed comparable by the Program Chair. The respective graduate Program Chair evaluates transcripts and approves transfer of credit. Students may be required to provide course descriptions and/or course syllabi to facilitate the evaluation of credit transfer.

Evaluation of Corporate Training

Both undergraduate and graduate students who have submitted an application for admission as a degree-seeking student may request an evaluation of non-college prior learning. Non-college learning includes things like training provided by organizations other than a college or university, including industry-sponsored training and industry-recognized certifications and work experience. Credit for such educational experiences may be granted in accordance with the recommendations of the American Council on Education (ACE) when applicable to the student’s program of study. The Office of Admissions should be contacted for further information.

Credit by Examination / Proficiency Credit

Students may transfer credit awarded by examination, provided the examination does not duplicate previously earned academic credit. Credit is granted for successful completion of examinations given by the College Level Examination Program (CLEP) of the College Entrance Examination Board. CLEP is designed to help students translate non-traditional learning experience, such as on-the-job training or independent study, into college credit.

Grading System

See *Grades and Grading* on page 45 or visit www.cambridgecollege.edu/academic-policies-procedures/grades-and-grading-policy

Length of Programs

Bachelor Degree Program

The Bachelor Degree program requires 120 credits and is designed so that it can be completed in four (4) years or twenty four (24) sessions. Given that NEIB students are primarily working adults, the normal program completion is five (5) years or 30 eight week sessions. To meet the 150% rule, the program must be completed within 180 attempted credits, approximately six (6) academic years or thirty-six (36) sessions.

Master's and Doctoral Degree Programs

Master's Degree programs require 30, 36, 39, or 45 credits, depending on the specific program. The Doctor of Business Administration program requires 60 credits. It is recommended that programs be completed within 200% of the required credits in each program. Correspondingly, that would amount to 60, 72, 78, 90, or 120 attempted credits. Also, it is recommended that the completion time period be within the same 200% time frame. For example, the 10-course MBE and MSF programs should be completed within 20 consecutive sessions, and the 12-course MBA program should be completed within 24 consecutive sessions. It is recommended that you discuss your enrollment and academic plans with your Enrollment Specialist and Academic Advisor.

Academic Credits Earned by Academic Year

Please see *Satisfactory Academic Progress* on page 43.

Academic Honesty and Code of Conduct

Academic Honesty and Integrity Policy

At New England Institute of Business, academic integrity is defined as the commitment to honesty, fairness, and respect. As such, academic dishonesty is the failure to maintain these attributes and includes, but is not limited to, the following:

- Use of a proxy in the submission of assignments and examinations
- Making or receiving payments for the production of assignments and taking of examinations
- Submitting the work of another as one's own
- Fabrication and/or invention of academic references
- Plagiarism, whether intentional or unintentional
- Self-plagiarism (i.e., recycling of previously submitted work without the express written consent of the course professor)

The consequences for academic dishonesty (intentional or otherwise) include, but are not limited to:

- Receiving a grade of zero on a graded item
- Receiving a failing grade for the course
- Placement on Academic Probation
- Placement on Academic Suspension
- Dismissal from the College

The College utilizes Turnitin.com in its courses to assess any and all discussion postings, assignments, research projects, research papers, group projects, etc. for the purpose of plagiarism detection.

In each online class, students must electronically sign the Academic Honesty and Integrity Agreement. Failure to do so does not exempt the student from responsibility. Contact the class Professor or the Program Chair with questions regarding potential violations of this policy.

Penalties for Violations of the Academic Honesty and Integrity Policy

Please review the Cambridge College Student Code of Conduct at <https://www.cambridgecollege.edu/student-rights-complaints-grievances/student-code-conduct>.

NEIB Copyright Infringement Policy

Copyright infringement is the outcome of downloading or uploading copyrighted materials without express permission from the copyright holder. Copyrights are protected under section 106 of the Copyright Act (Title 17 of the United States Code). No NEIB staff member, faculty or student can share files by downloading or uploading them without express written permission from the copyright holder. Doing so may constitute an infringement of copyright law and may constitute a federal crime in accordance with the Federal Copyright Act. The penalties for violation of copyright can be found at: <http://www.copyright.gov/title17/92chap5.html#506>

Netiquette Policy (Online Etiquette)

A common concern often expressed about the online learning environment is interpreting the intended tone of voice between correspondents. Certain limitations exist in all communication media. While online communication does lack the expression and emotion present in face-to-face communication, it also provides you with the luxury of time to collect and compose your thoughts prior to communicating information.

An online learning environment needs structure for effective communication to occur. Below is a list of guidelines for effective online communication:

- Consider your language. Written text can very easily be misinterpreted by others in the online environment. Students are expected to be respectful of the teaching and learning environment and not post any comment or statement that uses language that is potentially inappropriate or that can be misinterpreted. A student who posts a text in the NEIB online learning platform whether in a Discussion, a Q & A or an e-mail that has been deemed inappropriate by the instructor or the College will be asked to remove the text or it will be removed by the College.

- Stay engaged and on task with relevant messages. Your insights and experiences are welcomed and encouraged. Remember that you want to stay focused on relevant topics of discussion to enhance your learning experience.
- Reference your messages. When appropriate, you need to reference your course material or other sources to support your assertions or comments. Facts and statistics communicated in your message require a supporting reference.
- Communicate using a respectful professional tone. Your colleagues bring different experiences and belief systems to the classroom, and each of your opinions is equally valid. At times, you may disagree with a colleague but do so in a respectful, professional manner. You are not competing with your colleagues; you are participating in a collaborative learning environment. Using sarcasm to belittle a colleague's ideas, or ranting against a colleague in a post, is not the way to encourage diverse opinions. Also, as always, derogatory comments regarding race, gender, religion, age, or sexual orientation will not be tolerated.
- Uphold the standards of academic integrity set forth by the College. Work submitted in the discussions and your assignments should be your own. Materials utilized from an outside source must be properly cited in APA Style and formatting.
- Submit substantive responses to the Discussion. To receive credit in the Discussion, you must do more than agree or disagree with your colleagues. The Discussion Rubric and Guidelines govern all aspects of Discussion original responses and subsequent posts.
- Do not type in all caps. Typing in all caps in the online environment is considered shouting and should be rarely used and then only for strong emphasis. If you wish to place emphasis on an important passage, try using bold text instead of all caps, underlining, italics or single quotation marks.
- Recognize that you are participating in an online dialogue. You still want to ensure correct spelling and grammar in all forms of your writing (discussions, e-mails, assignments, etc.).
- Use written communication to your advantage. Prior to sending a message, check it a final time to ensure that you are not only stating what you wish to state in a concise manner, but that you are doing it in the tone you wish to convey. Think of how your words will be received.
- Multiple infractions of this Policy could result in disciplinary actions up to and including dismissal from NEIB.

If you have a question about this policy, or any part of the policy, please, contact your instructor or Program Chair at NEIB.

Software Code of Ethics

Unauthorized duplication of copyrighted computer software violates the law and is contrary to New England Institute of Business's standards of conduct. We disapprove of such copying and recognize the following principles as a basis for preventing its occurrence:

- We will neither engage in nor tolerate the making or using of unauthorized software copies under any circumstances.
- We will only use legally acquired software on our computers.
- We will comply with all license or purchase terms regulating the use of any software we acquire or use.
- We will enforce strong internal controls to prevent the making or using of unauthorized software copies, including effective measures to verify compliance with these standards and appropriate disciplinary measures for violation of these standards.

Attendance and Active Status Policy

To benefit fully from a NEIB program, a student is expected to engage in their NEIB courses on a consistent basis. Excessive, consecutive or cumulative disengagement may result in automatic withdrawal from the course(s) in which the disengagement occurs.

Class Attendance and Participation

NEIB seeks to comply with the US Department of Education Program Integrity Regulations and the Carnegie Foundation's 135 hours of classroom instruction in its courses that can be assessed and measured through substantive student performance standards. Class attendance is mandatory in all classes at NEIB. Online students are expected to be present and to participate throughout the weeks as outlined in the course syllabus. Students must arrange to make-up missed work with the course instructor. In some instances, it may not be possible to make up assignments; however, this will be determined between the instructor and the student.

A student is marked present in a course in a given week under the following conditions:

- Student has posted a minimum of one gradable discussion board posting in a given week; or,
- Student has submitted a gradable course assignment(s) within a given week; or,
- Student has worked one-on-one with a faculty member on a course assignment by 6am (EST) on Monday.
- Course instructor verifies that student has met attendance requirements.

Please note that simply logging into a course and accessing the course materials and/or posting an introduction is not considered attendance within a course.

A student is marked absent in a course in a given week under the following conditions:

- Student has not posted a minimum of one discussion board posting; or,
- Student has not turned in required assignments, nor has he/she attempted to contact the instructor to make specific arrangements.

If a student is absent from a course for 14 consecutive days at any point during a session (absent is defined as not participating in the Discussion Board or not completing any assignment; provided that a student will not be counted as absent if the student is working one-on-one with a faculty member on a course assignment) the student will be automatically withdrawn from that course and held liable for all tuition costs. The student will also receive a grade of WF, which means the course will need to be retaken and a failing grade will factor into the students' cumulative GPA.

Make-up Policy

Students are required to make up all assignments and classwork missed as a result of absence before the end of the session. Make-up work is approved and accepted at the discretion of the instructor. Arrangements to take any test missed because of an absence must be made with the instructor and in accordance with the instructor's make-up policy.

Pregnancy Policy

In accordance with Title IX of the Education Amendments of 1972 and the Office of Civil Rights of the U. S. Department of Education requirements, NEIB provides protection to pregnant women. Because the Institution does not maintain a leave policy for its students, the Institution will treat pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery therefrom as a justification for a leave of absence for so long a period of time as is deemed medically necessary by the student's physician, at the conclusion of which the student shall be reinstated to the status which she held when the leave began.

Students seeking reasonable accommodations due to pregnancy should submit an accommodation request to NEIB in accordance with NEIB's Reasonable Accommodations Policy. NEIB cannot require a pregnant student to obtain the certification of a physician that she is physically and emotionally able to continue participation in the enrolled program unless such a certification is required of all students for other physical or emotional conditions requiring the attention of a physician.

Information Technology Resources Policy

NEIB provides information technology resources to a number of faculty, staff, and students. As members of NEIB community and in accordance with the Acceptable Use of Information Technology Resources Policy, all users have the responsibility to use information technology resources in an effective, efficient, ethical, and legal manner. Ethical and legal standards that apply to information technology resources derive directly from standards of common sense and common courtesy that apply to the use of any shared resource.

NEIB's information technology resources are intended to support NEIB educational programs. All members of the NEIB community who use information technology (i.e., computing and network) resources are responsible for the integrity of those resources. NEIB information technology resources are to be used in a manner that is consistent with the instructional, research, and administrative objectives of NEIB, including use for study, instruction, research, the discharge of official NEIB business, and other NEIB sanctioned activities. Any use of NEIB information technology resources that is inconsistent with these purposes is considered inappropriate use and may jeopardize further authorization for use and may result in termination of access, disciplinary review, expulsion, or other disciplinary action. Use of information technology resources is limited to members of the NEIB community. Users of these resources are expected to act responsibly to maintain the integrity of the College information technology resources.

In no event shall NEIB be liable for any damages, whether direct, indirect, special or consequential, arising out of the use of information technology resources (i.e., the Internet, campus servers, etc.), accuracy or correctness of databases or information contained therein or related, directly or indirectly, to any failure or delay of access to information technology resources. Use of any information obtained via the Internet is at the users' own risk. NEIB reserves the right to remove user access to information technology resources to prevent further unauthorized activity as specified in this document.

Student Preparedness – Course Technology

To ensure student success in the online environment at NEIB, it is required that you have reliable access to a personal computer for your use throughout your academic career and that it is compatible with NEIB online technology requirements. The average student is engaged with and/or accessing course materials approximately 17 hours per week at the undergraduate level and 27 hours per week at the graduate level.

To participate in an online course, students must have access to a fully-functional laptop or desktop computer that can play audio and video. While students may be able to use a portable device (cell phones, tablets or "books") to complete some of their coursework, other courses will require the use of downloaded software or web-based tools that are not compatible with portable devices. Access to Microsoft Office (Word, PowerPoint) and a broadband Internet connection is required to participate in discussions, assignments, access readings, transfer course work, and receive feedback from faculty.

A workplace or library computer may not be a reliable computer solution due to the interactive and multimedia elements of NEIB courses. It is also highly recommended that you have administrative rights on the computer used for coursework. Required functions, such as updating Internet browsers and installing plug-ins, may be prohibited when using a computer in which you do not have administrative rights. Check with your workplace IT department to ensure that your computer and company's network meet NEIB requirements.

Students can access technical support for the Canvas Learning Management System 24 hours/day, 365 days/year. By clicking on the "Help" icon in the Canvas navigational panel, students can open a live chat with a technical rep, submit a ticket to generate an email response or locate the phone number to speak with someone live. They can also search the Canvas Guides, ask a question, or suggest a feature. Students can access technical support for the NEIB Student Portal, by completing an online ticketing form on the Student Portal log on page. The Student Portal Help Desk representatives respond to students via email or phone calls. For technical help with the NEIB eLibrary, students can search the eLibrary Knowledge Base, submit a help desk ticket to the NEIB eLibrary Technical Librarian, or contact NEIB's 24/7 reference service.

Student Preparedness – Tools for Online Research

The NEIB Student Resource Center, located in the Canvas learning management system, is available to all students upon being enrolled at the College. The resources cover a wide-range of topics, which include, but are not limited to:

- Canvas navigation guides
- Techniques for being successful in online courses
- Time management
- Technology troubleshooting
- eLibrary access and navigation
- Research help
- APA style guides
- Plagiarism and TurnItIn
- Software support and discounts
- Webinar recordings

These resources are designed to help support students' success throughout their entire academic careers at NEIB. It is recommended that newly enrolled students' access and familiarize themselves with the resources available in the Student Resource Center.

Student Grievance Policy

- A student who has a grievance must submit his or her grievance in writing to the appropriate faculty or staff member with whom the complaint lies within 15 days of the grievance.
- If a viable solution is not reached between the student and faculty or staff member, the student may seek the aid of the Program Chair, the Dean of Undergraduate Studies or the Dean of Academic Affairs.
- The student has 10 days from the time the complaint was originally made to the faculty or staff member to file a written complaint with the Dean of Academic Affairs if prior communication of the complaint has not been resolved to the student's satisfaction.
- A special meeting of an ad hoc student grievance committee will be called within 15 days of the filing of the student complaint to the Dean of Academic Affairs. The group will reach a consensus after the grievance has been heard. The decision rendered by the committee will be final. The student will receive a resolution to the complaint within 10 days of the special meeting.

Maryland Residents

If the complaint has not been resolved to the satisfaction of the student, and the student is a Maryland resident, the student may contact the Office of the Attorney General of the Maryland Higher Education Commission, Website: https://mhec.maryland.gov/institutions_training/Documents/acadaff/Student%20Complaint%20Process%20-%20MJK%20Revisions.pdf

Wisconsin Residents

If the complaint has not been resolved to the satisfaction of the student, and the student is a Wisconsin resident, the student may contact the Educational Approval Board, 30 West Mifflin Street, 9th Floor, Madison, Wisconsin 53703; Telephone 608-266-1996.

Georgia Residents

If the complaint has not been resolved to the satisfaction of the student and the student is a Georgia resident, the student may contact the Nonpublic Postsecondary Education Commission, 2082 East Exchange Place, Suite 220, Tucker, Georgia 30084-5305, Telephone 770-414-3300, Website: www.gnpec.georgia.gov.

Florida Residents

If the complaint has not been resolved to the satisfaction of the student and the student is a Florida resident, the student may contact the Florida Department of Education's Commission for Independent Education, 325 W. Gaines Street, Suite 1414, Tallahassee, FL 32399-0400, 850-245-3200, www.fldoe.org/cie.

Any student who is terminated from his or her program of study at NEIB for violating this Student Code of Conduct may petition the Dean of Undergraduate Studies at the undergraduate level or the Dean of Academic Affairs at the graduate level for readmission into a program of study after waiting one full year from the Session in which official disciplinary action was taken. The petition must be in the form of a formal letter and not in the form of an e-mail. The determination of whether to readmit the student will be based on the student's written petition and will be made by New England Institute of Business. The decision will be final and binding on the student.

Course Code and Numbering System

NEIB courses are identified by a three letter, three-digit code for both undergraduate and graduate courses and a four letter, four-digit code for graduate prerequisite courses. The letters represent the subject code indicating the area of study. The digits represent the course number. Courses numbered below one hundred (099) are fundamental courses and carry institutional credit only. Courses numbered 100 and above carry college-level credit that may be eligible for transfer into other institutions.

One hundred (100) level courses are typically for first year students and sophomores and do not generally require a college-level prerequisite for enrollment. Two hundred (200) level courses are for first year students and sophomores and sometimes require a 100-level prerequisite. Three (300) and four hundred (400) level courses are generally considered junior and senior courses, and prerequisites may be required. Five hundred (500) and six hundred (600) level courses are master's-level courses and require a bachelor's degree as a prerequisite. Eight hundred (800) and nine hundred (900) level courses are doctoral level courses and require a master's degree as a prerequisite.

Undergraduate Program Courses Three Letter Course Code

- Master of Human Resource Management HRM
- Master of Science in Quality Systems Management EDU, QSM
- Master of Science in Risk Management and Insurance RMI

Graduation Requirements

See *Graduation* on page 46.

Academic Awards

Each year, a special recognition award goes to one outstanding student for academic excellence and one faculty member for teaching excellence:

1. NEIB Academic Excellence Award

This award is presented annually to the undergraduate graduate who maintained the highest grade point average among all degree recipients.

2. The New England Institute of Business eLibrary Award for Research

The eLibrary Award for Research was created by the New England Institute of Business eLibrary to encourage more and better use of its resources and collections, to advance Information Literacy at NEIB, and to promote academic excellence at the College.

Purpose:

The purpose of the NEIB eLibrary Award for Research is to recognize and honor outstanding projects/assignments by undergraduate and graduate students or teams that are supported by credible, relevant, and recent research.

Eligibility:

- To be eligible, applicants must have completed their research project at NEIB during any term from June 1st following Commencement through March 31st of the following year.
- The competition is open to students enrolled in undergraduate and graduate degree programs who, at Commencement, will have completed half of their degree credits. Up to three awards will be given. These can be to individuals who are undergraduate or graduate students or teams of no more than four students nominated for a group project.
- Entries will be accepted at any time during the eligibility period.

Application Procedure:

NEIB faculty nominate students by emailing the NEIB librarian, Jeff Cronin, at Jeff.Cronin@cambridgecollege.edu. With the name of the student, the course, and the title of the paper. We will contact the student to determine as to whether they wish to participate in the competition.

Selection:

- A panel composed of the NEIB librarian, faculty, and other academic staff will judge entries.
- Winning entries will show evidence of originality, depth, breadth, and sophistication in the use of either library or web resources. There are no restrictions on the topic of the paper.
- The selection team will consider the range and quality of the sources in the bibliography, as well as the synthesis and integration of research material into the paper or project.
- Up to three awards may be granted. The award winners are not required to attend Commencement.

General Information

Hours of Operation

The administration office at the College is open Monday through Friday from 9:00 a.m. to 5:00 p.m. Eastern Standard Time.

Bookstore/Textbooks

Course learning materials take the form of traditional textbooks, eBooks, iChapters, Case Studies, and resources available online through NEIB's library services. For those courses that require traditional textbooks, students can order their books through NEIB's virtual bookstore where print copies and eBooks are available for purchase. NEIB's virtual bookstore is accessible by phone, mail, and the Internet:

Phone: (800) 325-3252

Mail: MBS Direct, 2711 West Ash Street, Columbia, MO 65203

The purchase of course materials is the responsibility of the student.

eLibrary

NEIB offers students a robust online library with over 70 databases such as ProQuest Central and EBSCO Business Source Complete providing more than 20,000 full-text journals and 150,000 ebooks. The eLibrary also contains numerous business databases such as IBISWorld, Plunkett Research, and Mergent Online containing company/industry data and analysis, and market research data.

The Online Library also provides students with 24/7 reference service, numerous live webinars taught monthly by the NEIB Librarian on various research topics, APA resources such as EasyBib, and a federated search feature that gives students the ability to search over all the eLibrary databases with one search.

Students can easily access this library from within their online course by clicking on the eLibrary Module located in the left hand navigation bar in Canvas.

Undergraduate students are required to take an Information Literacy for College Success skills course. Through this course, they are exposed to the College's library services. Library usage is not a passive but rather a proactive protocol and therefore research assignments are integrated into the majority of courses at both the undergraduate and graduate level.

Maintenance of Records

NEIB maintains student academic and financial aid records in compliance with state and federal regulations. In addition, placement data on students who complete the program, indicating the employer, date of hire, job title, and starting salary attested to by the student or verified by the employer is kept on file. Academic transcripts are maintained permanently.

FERPA — Student Records Access and Confidentiality

In compliance with the Family Educational Rights and Privacy Act (FERPA), the complete Cambridge College student records access and confidentiality policy can be found at <https://www.cambridgecollege.edu/academic-policies-procedures/student-records>

Any information about New England Institute of Business at Cambridge College that is not included in this catalog can be found by visiting www.necb.edu, emailing info@cambridgecollege.edu, or calling 617-951-2350. For specific inquiries, please see the directory for the *New England Institute of Business at Cambridge College* on page 365.

Inactive Programs

We are not admitting new students into the following programs as of Fall 2020:

- All Associate Degrees
- Bachelor of Science in International Business
- Master of Science in Risk Management and Insurance
- Doctor of Business Administration in Quality Systems Management

If you are enrolled in a program that is no longer active, please confer with your academic advisor and continue to follow your program plan as outlined in the NECB catalog dated January 2020. Tuition for programs in teach-out status will continue to follow the last NECB catalog and can be found on the former NECB website, www.necb.edu.

Bachelor of science

Bachelor of Science in Accounting (BSA)

• CIP 52031 • 120 credits

Program Description

The Bachelor of Science in Accounting (BSA) is a 120-credit program that is designed to provide students with a strong foundation of academic study in accounting achieved within a reasonable period of time. In addition to the skills and knowledge gained in Accounting, students will acquire a solid background across a wide range of functional business areas including finance, management, ethics, marketing, and law.

Students enrolled in the BS in Accounting will be exposed to key theoretical constructs and immersed in hands-on application of those theories in practice. In this program, a particular emphasis is placed on the acquisition of highly-targeted skills required by accounting professionals, in support of career goals ranging from entering the public accounting world, to sitting for the requisite exams to earn highly-regarded professional designations such as the Certified Public Accountant (CPA) or Certified Management Accountant (CMA), to focusing on financial management and the exam. The BSA offers a dynamic approach to understanding the depth and breadth of all areas of the accounting profession.

Concentrations: The degree has been designed with two 3-course concentrations aligned with the skills conducive to preparing students for the CPA and CMA exams.

- The Public Accounting Concentration offers students' knowledge in Not-For-Profit, Advanced Auditing, including Internal Auditing, and Governmental Auditing, and advanced topics in Management Accounting found on the CPA Exam®.
- The Management Accounting Concentration offers students' advanced knowledge in Strategic Management, Compensation and Benefits, and Advanced Cost Accounting, all of which are found on the CMA Exam®.

Each of these concentrations enables students to obtain an understanding of exam-specific content while simultaneously offering valuable knowledge which can be used regardless of the area or the industry in which the student enters.

Program Outcomes

- Apply advanced principles and rules to financial statement data to produce a complete set of company financial statements.
- Conduct a mock audit using Generally Accepted Auditing Standards (GAAS) and prepare an independent auditor's report.
- Use decision-support tools to evaluate, process, and solve organizational problems
- Analyze global business transactions and apply appropriate accounting theory.

Instructional Delivery

The BSA is an online program. Courses are eight weeks in length, and there are six sessions per year. The BSA is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive learning format.

Given that NEIB students are primarily working adults, the average program completion is five (5) years or thirty (30) eight-week sessions.

Bachelor of Science

Bachelor of Science in Business Administration (BSBA)

• CIP 5202 • 120 credits

Program Description

The Bachelor of Science in Business Administration (BSBA) is a 120-credit program that is designed to provide students with a strong foundation of academic study in business achieved within a reasonable period of time. Those students who enter the BSBA program should be well-prepared with the fundamentals in General Education and core 100 and 200 level business courses.

Concentrations: The BSBA offers the following concentrations: Accounting, Banking/ Finance, Healthcare Reimbursement, Human Resources, Management, Marketing, Medical Office Administration, and Digital Marketing. Curriculum for the core program and each concentration is provided below. Courses in the concentration are typically taken in the sequence in which they are presented in the Catalog for skills building purposes and academic success.

Program Outcomes

- Analyze the effectiveness of business and strategic plans in the context of global, political, social and technological environments.
- Examine key ethical and legal concepts, policies, and principles in diverse, changing work environments.
- Apply quantitative and qualitative research to critically evaluate major business issues.
- Analyze the operational and theoretical principles of business, particularly in the industry-specific disciplines of accounting, finance, marketing, and management.
- Communicate and present data, ideas, and concepts in business administration in a clear and effective fashion.

Instructional Delivery

The BSBA is an online program. Courses are eight weeks in length, and there are six sessions per year. The BSBA is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive learning format.

Given that NEIB students are primarily working adults, the average program completion is five (5) years or thirty (30) eight-week sessions.

Bachelor of Science

Bachelor of Science in Digital Marketing (BSDM)

• CIP 5215 • 120 credits

Program Description

The Bachelor of Science in Digital Marketing (BSDM) is uniquely designed for students interested in learning the emerging trends in digital media and how to leverage the power of mobile devices, social networks, graphic design, and the interactive Web to meet (and exceed) business objectives. This program will teach students how to embrace the evolving digital world and to create innovative marketing strategies using new technologies that engage online audiences, cultivate digital opportunities and achieve a competitive advantage.

The BSDM program is consistent with NEIB's mission of providing a high quality curriculum with a focus on educating competent and skilled business professionals. While the BSDM program curriculum includes several business core courses offered through NEIB's BSBA program, the BSDM program curriculum offers in-depth course work in the niche areas of digital marketing, public relations and advertising that are intended to provide learners with a unique skill set applicable to current industry needs, as noted in the curriculum map below.

Program Outcomes

The Program Learning Outcomes for the BSDM program are:

- Develop an understanding of how digital marketing principles and strategies are used to achieve marketing, management, and business objectives.
- Identify ways in which marketing practices evolve within a digital framework and integrate digital components into a comprehensive marketing plan.
- Conduct research on contemporary issues in digital marketing and apply statistical reasoning toward forming research findings.
- Predict and convey to various audiences emerging technology trends and manage their impact on marketing strategies.
- Identify and assess the legal and ethical aspects of the digital medium and form approaches for navigating these components.
- Devise targeted marketing strategies in a digital framework and determine the measurements and metrics to be used for continual analysis.
- Develop, analyze and design basic web sites geared toward the goals of effective marketing, advertising, public relations, and ecommerce.
- Analyze companies' search engine performance strategies and identify optimal solutions to maximize return on investment.
- Formulate digital marketing communications to promote customer relationships, enhance brand image, and expand market reach.

Instructional Delivery

The BSDM is an online program. Courses are eight weeks in length, and there are six sessions each year. The BSDM is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive online learning format.

Given that NEIB students are primarily working adults, the average program completion is five (5) years or thirty (30) eight week terms.

Bachelor of Science

Bachelor of Science in Healthcare Administration (BSHCA)

• CIP 5107 • 120 credits

Program Description

The Bachelor of Science in Healthcare Administration (BSHCA) is a 120-credit program that is designed to provide students with a strong foundation of academic study in leadership and management in the healthcare industry. In this program, students will develop an understanding of the essential aspects of healthcare management through courses in healthcare finance, healthcare management, and the healthcare industry. Those students who enter the BSHCA program should be well-prepared with the fundamentals in General Education and core 100 and 200 level healthcare and business courses.

Program Outcomes

- Explain and compare the organizational elements, structure, performance, terminology, and delivery modalities for the U.S. and global healthcare systems.
- Analyze the structure and interdependence of healthcare system elements and issues using critical thinking to formulate innovative system designs that improve healthcare delivery.
- Create policy and processes and execute decisions in compliance with the legal, regulatory, and ethical considerations inherent in managing healthcare systems and organizations.
- Integrate concepts of ethics, privacy, law, and regulation to achieve optimal organizational effectiveness while adhering to the professional values and standards of the healthcare industry.
- Communicate and present data, ideas, and concepts in healthcare administration in a clear and effective fashion.

Instructional Delivery

The BSHCA is an online program. Courses are eight weeks in length, and there are six sessions per year. The BSHCA is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive learning format.

Given that NEIB students are primarily working adults, the average program completion is five (5) years or thirty (30) eight week sessions.

Bachelor of Science in Quality Systems & Improvement Management (BSQSM)

• CIP 5202 • 120 credits

Program Description

The BSQSM teaches theory that is critical to the discipline while also emphasizing the direct application of what students learn. The BSQSM program emphasizes performance-based education where students acquire the critical knowledge and skills to analyze business practices; create comprehensive plans focused on tangible return on investment, and measure the effectiveness and efficiency of these plans. Since the vast majority of BSQSM students are working in their field, they are then able to apply what they learn to their workplaces, both immediately and over the lifespan of their careers in ways highly akin to other NEIB academic programs.

The skills taught in the BSQSM program can be applied to improve the efficiency and effectiveness of the operation in a range of organizations and industries, including but not limited to healthcare, finance, manufacturing, military, and government. The BSQSM provides strong, metrics- and outcomes-based education for entry-level professionals that resonates well with careers in government and military as well as a wide range of business fields.

A Business Project is incorporated in the Capstone courses. Students will demonstrate tangible learning outcomes predicated on improvements in the effectiveness of systems and efficiency of operations. The Capstone project will work through Lean Six Sigma processes and follow the DMAIC (Define, Measure, Analyze, Improve, Control) process. The Capstone projects are based on the Lean Six Sigma Green Belt (LSSGB) Body of Knowledge (BOK) as defined by the American Society for Quality (ASQ). The Capstone project offers a high-impact, experiential learning opportunity for the students.

Program Outcomes

The Program Learning Outcomes for the BSQSM program are:

- Communicate effectively and engage all participants in key projects.
- Operate effectively and contribute to process improvement within team dynamics.
- Define process-based problems and identify opportunities for improvement.
- Identify and collect baseline data with respect to current process performance.
- Analyze current process performance data and determine best practices.
- Recommend appropriate options for improvement and support the development of pilot solutions and implementation plans.
- Determine performance measures and reviews necessary to monitor/control the improved process.

Program chair: John Beirne, MSQSM

- John.Beirne@cambridgecollege.edu

Instructional Delivery

The BSQSM is an online program. Courses are eight weeks in length, and there are six sessions each year. The BSQSM is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive online learning format.

Given that NEIB students are primarily working adults, the average program completion is five (5) years or thirty (30) eight week terms.

Undergraduate Professional Development Certificate

Digital Marketing Certificate

• CIP 5215 • 21 credits

Program Description

The field of Digital Marketing has emerged and exploded as everyone and everything goes online. It is a very exciting, yet challenging, time for business professionals as they struggle to embrace innovative marketing strategies and new digital technologies in order to engage online audiences, cultivate digital opportunities and achieve a competitive advantage. Those individuals who understand the emerging trends and can leverage the power of mobile devices, social networks, graphic design, and the interactive Web are in high demand in the marketplace.

A certificate in Digital Marketing combines hands-on technical application, business theory, and best practices. The Certificate in Digital Marketing is uniquely designed for career professionals interested in understanding the role of digital media in business. Students will take one foundation course which will introduce current trends in social media, web analytics, mobile, content, email marketing, online automated tools, search engine optimization, digital advertising, and viral marketing. Students then have the opportunity to customize their curriculum by choosing six electives from NEIB's course listing. This allows students to select courses based on their specific professional interests and goals.

Prerequisite: Pass English diagnostic exam or Fundamentals of English.

Program Outcomes

- Develop an understanding of how digital marketing principles and strategies are used to achieve marketing, management, and business objectives.
- Identify ways in which marketing practices evolve within a digital framework and integrate digital components into a comprehensive marketing plan.
- Conduct research on contemporary issues in digital marketing and apply statistical reasoning toward forming research findings.
- Devise targeted marketing strategies in a digital framework and determine the measurements and metrics to be used for continual analysis.
- Develop, analyze and design basic web sites geared toward the goals of effective marketing, advertising, public relations, and e-commerce.
- Analyze companies' search engine performance strategies and identify optimal solutions to maximize return on investment.
- Formulate digital marketing communications to promote customer relationships, enhance brand image, and expand market reach.

Digital Marketing Curriculum21 credits

This seven-course certificate includes one required course and six electives.

Required course3

Undergraduate Professional Development Certificate

Basic Accounting Certificate

• CIP 5203 • 21 credits

Program Description

This Undergraduate Certificate is designed to prepare learners with accounting basics. Students will take seven introductory courses in this program to earn a certificate while simultaneously completing the prerequisites requirements.

The Certificate in Accounting - Basic was designed for individuals with entry-level industry experience and little or no undergraduate level course work in accounting. This certificate will appeal to those who are just entering the field as well as those who want to shift their career path into accounting.

Prerequisite: Pass Math and English diagnostic exam or Fundamentals of English and Fundamentals of Math.

Program Outcomes

Successful completion of this certificate program is designed to prepare the student to:

- Compare and contrast banking and finance from both a historical and a contemporary perspective.
- Apply basic management and mathematic concepts to solve problems and inform decisions
- Use accounting terminology to explain the process by which transactions are analyzed and transformed into financial statements.
- Examine and apply laws and regulations relating to business and accounting issues.
- Prepare budgets to assist management in decision-making.
- Analyze financial statements, including balance sheet, income statement, cash flow, and reconciliation of retained earnings statements.
- Determine whether a company's current performance trends are indicative of its future financial viability.

Basic Accounting Curriculum21 credits

This seven-course certificate includes the following three-credit courses:

- ACC 201 Accounting I
- ACC 202 Accounting II
- ACC 203 Financial Statements for Managers
- ACC 205 Managerial/Cost Accounting.
- FIN 201 Principle of Financial Services

Choose two courses from ACC, BNK, FIN, MGM or INB

Undergraduate Professional Development Certificate

Intermediate Accounting Certificate

• CIP 5203 • 21 credits

Program Description

This certificate is designed to provide students with the knowledge, skills, and abilities needed to identify industry trends and evaluate the impact of those trends at a corporate and industry level. It is also intended to enhance accounting proficiencies and provide students with the ability to develop corporate level financial documents, as well as the ability to critically analyze and synthesize information found in complex accounting and financial reports. Ethical decision-making, as it relates to financial reporting, is an integral theme of this program.

The Intermediate Accounting certificate was designed for individuals with 3-5 years of experience and/or undergraduate level course work in accounting and finance. Students will have met course prerequisites (Accounting I and Accounting II and College Algebra) prior to enrolling in this certificate. This certificate will appeal to those who want to shift their career path into accounting and finance within the financial services industry as well as those who are currently employed in the industry and require advanced skills to move into higher level management positions.

Program Outcomes

Successful completion of this certificate program is designed to prepare the student to:

- Research, analyze, and prepare corporate level reports and financial statements according to GAAP.
- Apply accounting and finance concepts and principles to the corporate financial structure.
- Prepare reports pertaining to long-term investments, tangible and intangible assets.
- Evaluate accounting procedures from the perspective of a financial accountant, a trust administrator, and a manager.
- Identify the expanded product line offered via financial service markets.
- Identify and apply regulatory and compliance regulations

Intermediate Accounting Curriculum21 credits

This seven-course certificate includes the following three-credit courses:

- ACC 301 Intermediate Accounting 1 (Prerequisite: ACC 202)
- ACC 302 Intermediate Accounting 2 (Prerequisite: ACC 301)
- ACC 303 Federal Income Tax
- ACC 206 Accounting Information Systems
- ACC 401 Advanced Accounting & Reporting
- FIN 305 Corporate Finance
- FIN 401 Investment Management

(All courses @ 3 credits except as noted.)

Undergraduate Course Descriptions

New England Institute of Business
at Cambridge College

General Education

ART 301 Art History and Appreciation - 3 credits

Prerequisite: ENG201. This course examines the meaning, purpose, function, and classification of art and architecture. The course assesses visual elements and principles of design necessary for creating art and the materials and techniques employed in making two- and three-dimensional artworks. The course covers art-specific vocabulary, methods of interpretation of art and major artistic and architectural achievements in the history of Western culture. Students will examine well-known works of art and architecture through the study of content, technique, form, and purpose as they relate to art and architecture. Students will learn to apply critical thinking in assessing, evaluating, and debating the artistic techniques and skills utilized to produce enduring works of art and architecture.

CAEL 100 Prior Learning Assessment Theory and Practice - 3 credits

Prior learning assessment (PLA) is the process of earning college credit for learning that was acquired from non-classroom experiences like work, professional training, military careers, volunteering, and personal life. CAEL100 will help students identify areas of learning they may want to have evaluated for college-level equivalency. The course will also guide students through the preparation and compilation of all components required for the evaluation of a portfolio or prior learning through LearningCounts.org. Students will use critical reflection skills to rethink the value of their learning and its implications for future learning. Adult learning theory, models, and concepts will be discussed and applied to case studies. CAEL 100 is facilitated by an instructor who provides guidance for the student in preparing his or her portfolio-based request for credit.

COM 201 Business Writing and Communication - 3 credits

Business Writing and Communication is designed to help students understand the communication process in both personal and workplace settings. Content is organized to aid in the development of clear, concise, practical, and ethical business and real-world communication pieces. Students walk through a case study to practice applying the skills of business writing and in the process utilize and select appropriate channels for communication, including email, memo, letters, reports, PowerPoint, websites, press releases, and social media channels.

COM 301 Interpersonal & Organizational Communication - 3 credits

The purpose of this course is to examine how we perceive ourselves and others, how we use the information we gather about self and others to guide our interactions and the essential role of communication in the development and maintenance of human relationships. The goal of this course is to provide students with a better understanding of some of the factors affecting communication in relationships and to appreciate the impact of communication on our relational lives. In this course, students will gain a theoretical and practical understanding of human communication processes and learn strategies to improve interpersonal communication skills.

COM 401 Intercultural Communications - 3 Credits

In a globalized world where different cultures continuously intersect, understanding intercultural communication has become vital for both everyday life and business interactions. This course will explore the dynamics of cross-cultural communication and the meaning of cultural identity and its undercurrents. The course will demonstrate how to be inclusive of others through encouraging cultural sensitization and will show how to creatively address miscommunication obstacles. We will discuss the challenges that face multi-national corporations when working in and with different cultures. We will be watching videos and reading stories and discussing scenarios of different cultures, thinking of our own prejudices and pre-determined misconceptions. By the end of the course we will be able to recognize cultural differences in body language and other cultural tell-tales that could help students engage in cross-cultural communication.

ECO 101 Economics and Society - 3 credits

This course emphasizes how events and developments in the economy can affect the market and financial decisions of business. The course provides students with an overview of the fundamental concepts and theories related to economic development from the Middle Ages to the Twenty-First Century. Students will learn a balanced perspective on how the economy has developed and how that economy influences society and how society influences the economy. The course explores and analyzes the role of past economic trends and dynamics and employment and income inequalities that continue to challenge global society, market economies, and governments, especially our own. Students will also learn key terminology and how to illustrate economic principles and elements of business from an economic viewpoint.

ECO 201 Macroeconomics - 3 credits

This is a three-credit course that will develop a working knowledge of the principle concepts and theories in macroeconomics. In this day of rapid and dynamic change, economic issues underlie much of the political, social, cultural, and military turmoil throughout the world. In this course, economic theory and analysis are related to the world reality. Thus, the student can apply what is being learned to assist in making prudent judgments regarding various current economic issues, even though they may have social and political overtones.

ECO 202 Microeconomics - 3 credits

The purpose of this course is to develop a working knowledge of the principle concepts and theories in microeconomics. This part of economics is concerned with the interrelationships of the individual business firms, industries, consumers, laborers, and other factors of production that make up a modern economy. This course involves three main elements:

- How the private interests of the countless individuals who constitute a modern economy are related to the economic interests of society as a whole.
- The theory of pure competition from the point of view of its overall structure questioning interdependence and efficiency.
- The applicability of theoretical structure to modern industrial realities.

ENG 099 Fundamentals of English - 3 credits

Prerequisite: Entrance/Placement Exam. Successful completion of this course with a grade of “C” or better is required in order to move forward in the undergraduate program. The purpose of this course is to provide students with a solid foundation in grammar, writing, and essay techniques. Students will identify parts of speech and learn to write compelling and grammatically correct sentences and paragraphs. Students will learn and apply the steps of the writing process through the use of various materials including exercises from www.mywritinglab.com. Students will learn about proper writing style, pattern types, as well as strategies and guidelines for writing an effective essay. Please note: This is a pre-college-level course and does not award credit that can count toward graduation requirements.

ENG 101 English Composition I - 3 credits

Prerequisite: Placement Exam; Pass Fundamentals of English with a “C” or higher; or Permission of the College. The purpose of this course is to provide students with a solid foundation in writing and research techniques. Students will learn and apply the steps of the writing process. They will identify essay components and learn to write compelling and grammatically correct paragraphs. Writing style, pattern types, as well as strategies and guidelines for writing an effective research paper will be evaluated. Students will write an effective and grammatically correct research paper as a final project in this course.

ENG 201 English Composition II - 3 credits

Prerequisite: ENG101 English Composition I. The purpose of this course is to build upon writing and research skills learned in English Composition I. Students will apply research strategies and methods for finding information and implement the steps of the writing process and appropriate research and citation methods to write research essays and papers. Students will learn to further utilize the APA Style in writing research essays and papers.

ENG 305 American Literature - 3 credits

Prerequisite: ENG201 English Composition II. This course examines the evolution of American literature from the early 1800s to our present era. It covers a variety of literary genres and the use of Literary Criticism to articulate aspects of those genres. Students will read a variety of literary works in American literature from the 19th Century to the 21st Century and will demonstrate abilities to read and analyze works as well as their own performances in the various aspects of the course. Students will read works of American authors such as Poe, Irving, Whitman, Wharton, O’Neill, Hughes, Fitzgerald, Williams, Lowell, Plath, and Sexton as well as culturally diverse American writers like Morrison and Anzaldúa. Students will be engaged on a variety of levels and will learn to analyze and critically evaluate a wide range of ideas and points of view found in the literature that will be studied. Students will be expected to participate in the various aspects of the course such as reading assignments, online discussions, written assignments, a research paper, and quizzes.

ENG 405 British Literature - 3 credits

Prerequisite: ENG201 English Composition II. This course examines British Literature along with its cultural and historical contexts from its Anglo-Saxon beginnings through the Twentieth Century. The course includes the reading and study of literary works such as poetry, dramas, short stories, and novels written by prominent English authors. The course is designed to actively engage students by deepening their appreciation of style, structure, and themes in literature while examining the creative process and use of figurative language in crafting selected literary works in British English Literature.

HIS 201 US History Since 1900 - 3 credits

Prerequisites: ENG201 English Composition II. This U.S. history course is centered upon the belief that historical events have social, economic and political consequences. The emphasis of the course relates to the relationship among historical events rather than simply a chronological study of isolated events or people. The scope and sequence of the course are designed to highlight themes, processes, and causal relationships between events in order to communicate that history is a process of continuity as well as change. Utilizing this approach will result in an increased ability to recognize and analyze the connection between historical events and present circumstances and conditions. The National Council of the Social Studies (NCSS) validates the thematic approach through its own ten thematic strands of social studies and the goal of “adopting common and multiple perspectives” on historical events.

INF 101 Information Literacy for College Success - 3 credits

Required as First Course in All Undergraduate Programs. The purpose of this introductory course is to prepare students to be an online learner and an information literate individual in a technological world. The course provides an understanding of NEIB’s learning technologies, support services, and necessary skills for online student success. The primary function of this course is to provide students with the necessary skills of Information Literacy which prepare students to recognize what information is needed, when it is needed and how to locate, evaluate and use it effectively. Extensive practice in using the eLibrary databases is integral in learning to be an information literate student at NEIB. The course content aligns with the national standards as established by the American Library Association and the Association of College & Research Libraries.

MAT 099 Fundamentals of Math - 3 credits

Prerequisite: Entrance/Placement Exam. Successful completion of this course with a grade of “C” or better is required in order to move forward in the undergraduate program. This course focuses on concepts and applications of arithmetic, including whole numbers, fractions, ratios, proportions, the decimal system, and percentages. Brief introductions to algebra, formulas, algebraic expressions and linear equations are also included. Special emphasis is placed on the application of basic math skills to common workplace problems and real-life situations. Students may be required to take MAT 099 based on the Math placement test and prior to registering for MAT 103 Business Mathematics and/or MAT 105 College Algebra. Students must pass Fundamentals of Math with a “C” or higher before enrolling in college level math courses. Please note: This is a pre-college-level course and does not award credit that can count toward graduation requirements.

MAT 103 Business Mathematics - 3 credits

Prerequisite: . . Placement Exam; Pass Fundamentals of Mathematics with a “C” or Higher, or Permission of the College. This course applies math fundamentals to business applications. Topics include a basic math review, business statistics, profit calculations, payroll, banking, interest calculations, insurance, taxes, and other business topics.

MAT 205 College Algebra - 3 credits

Prerequisite: None; Business Math Strongly Recommended. This course focuses on algebraic concepts essential for success in the workplace and other courses. Using real-world examples and applications, students practice fundamental operations with number systems, formulas, algebraic expressions, and linear equations. This course also explores problems involving factoring, inequalities, exponents, radicals, linear equations, functions, quadratic equations, and graphs.

MAT 305 Statistics - 3 credits

Prerequisite: MAT205 College Algebra or equivalent. This course covers basic statistical concepts and theories, as well as the application of statistical methods. The topics include the collection, organization, summary, and description of data, basic probability theories, normal distribution, sampling distributions, confidence interval estimation, hypothesis testing techniques, and regression-correlation analysis.

PHI 101 Critical Thinking - 3 credits

Prerequisite: ENG201 English Composition II. The purpose of this course is to provide a basic knowledge of the art and discipline of critical thinking. Students will learn the various critical thinking standards and concepts including effective critical thinking, problem solving, logical reasoning, comparative reasoning, issue analysis and the application of critical thinking standards and strategies to determine and solve practical and theoretical problems. Students will explore the application of critical thinking concepts to real world situations in an effort to understand the critical thinking process. They will develop an ability to critically analyze the formulation and posing of questions to promote well-reasoned arguments on a variety of important topics.

POL 250 Political Science - 3 credits

Prerequisite: ENG201 English Composition II. This course is designed to give students a basic introduction to the academic discipline known as political science. This course presents students with a broad overview of key components of political science. Many subfields of political science exist, and this course will not go into them but instead focus on how political science shapes political, economic, and social relationships in the United States. Students are encouraged to critically examine how these relationships develop. The weekly discussions allow for students to engage with people from a variety of viewpoints and help each other identify the principles that underpin different political viewpoints in the United States.

PSY 250 Psychology - 3 credits

Prerequisite: ENG201 English Composition II. The purpose of this course is to introduce human behavior. It includes the study of the theories and concepts of psychology including the scope of psychology, biological foundations and the brain, sensation, perception, motivation, personality, learning/memory, emotion, states of consciousness, personality theories, cognition, life-span development, and applied psychology.

SCI 280 Environmental Science and Lab - 4 credits

The objective of this course is to develop an understanding of how the natural world works, how it affects us as humans and how we influence it. Through this study, students will increase their understanding of the major environmental issues impacting the world today and our future generations.

SCI 281 Environmental Science - 3 credits

The objective of this course is to develop an understanding of how the natural world works, how it affects us as humans and how we influence it. Through this study, students will increase their understanding of the major environmental issues impacting the world today and our future generations.

SCI 301 Anatomy and Physiology - 3 credits

This course provides the student with a comprehensive examination of the human body. Emphasis is on how the body is organized, its support and maintenance system, control, and continuity. The course is a survey of the structure and function of the human organ systems.

SOC 250 Sociology - 3 credits

Prerequisite: ENG201 English Composition II. This course is designed to give students a basic introduction to the academic discipline of sociology. This course presents students with a broad overview of key components of sociological theory in selected subfields. This course focuses on how social structures create norms and values that are shaped by an individual's historical and biographical narrative. As you are well aware, a variety of social perspectives inform how we participate in social structures. You are encouraged to critically examine how norms and values shape this participation. The weekly discussions allow students to engage with people from a variety of viewpoints and help each other identify the principles that underpin different sociological theories. The weekly assignments allow students to engage in each week's topic with more detail and receive feedback on how well the material is integrated in the answer to the assignment question.

Core Courses

ACC 201 Accounting I - 3 credits

Prerequisite: MAT103 Business Mathematics Strongly Recommended. The purpose of this course is to enable students to develop a basic understanding of fundamental accounting concepts and practices. The course focuses on basic accounting concepts and techniques needed to interpret and use financial information in managing and analyzing business operations.

ACC 202 Accounting II - 3 credits

Prerequisite: ACC 201 Accounting I. Students will continue to develop a basic understanding of fundamental accounting concepts and practices. Students will also be introduced to fundamental managerial accounting concepts and practices and will learn to interpret and use internal financial information in the management and analysis of business operations.

ACC 203 Financial Statements for Managers - 3 credits

Prerequisites: MAT103 Business Math. This course will enable the student to understand and apply the fundamental tools necessary to effectively analyze a business' financial condition. The financial analysis process is approached from an analyst's point of view. You will learn how to determine the composition and quality of financial statement information; how to analyze the balance sheet, income statement, cash flow statement, and reconciliation and retained earnings statement; how to spread statements to ensure efficient and consistent financial statement analysis; how to calculate and apply commonly used ratios, including industry comparable, to assess a business' financial condition and determine its capacity to repay debt.

ACC 205 Managerial/Cost Accounting I - 3 credits

Prerequisites: ACC201 Accounting I; ACC202 Accounting II Strongly Recommended. Managerial Accounting will focus on providing information to managers, those inside an organization who direct and control a company's operations. In contrast, financial accounting [Accounting I and II and Intermediate Accounting] is concerned with providing information to stockholders, creditors, and others who are outside an organization. Managerial Accounting provides the essentials that are needed to run organizations. We will reinforce previously learned concepts and consider the same concepts in practical applications. Subjects will include some familiar topics and some unfamiliar topics. The course objective is to look at accounting from the manager's perspective rather than the practicing accountant perspective and to focus on cost, cost analysis and costing systems, including budgeting and to enable managers to manage more effectively.

ACC 206 Accounting Information Systems - 3 credits

Prerequisites: ACC202 Accounting II or Permission of the College. The Accounting Information Systems course is designed to help the student understand and identify key concepts and components to an accounting information system, including information data flow, information system architecture, business continuity, and roles of accountants within the information system. Additionally, accounting software systems will be examined.

ACC 301 Intermediate Accounting I - 3 credits

Prerequisites: ACC202 Accounting II or Permission of the College. Intermediate accounting introduces students to a more in-depth examination of accounting theory. The major areas covered in this course include the role of accounting as an information system and economic resources. Finally, the key differences between U.S. GAAP and International Financial Reporting Standards (IFRS) are covered.

ACC 302 Intermediate Accounting II - 3 credits

Prerequisites: ACC301 Intermediate Accounting I. Intermediate accounting II continues the exploration of advanced topics in accounting theory. The major areas covered in this course include the accounting for property, plant and equipment, investments, current liabilities, and shareholders' equity. Preparing the advanced cash flow statement is also explored in this course.

ACC 303 Fundamentals of Taxation - 3 credits

Prerequisites: ACC201 Accounting I. This course examines the federal tax structure with an overview of personal and corporate tax requirements. Topics covered in the course include the analysis and preparation of individual tax forms including the 1040 and the most common supporting schedules. In addition, this course utilizes the Internal Revenue Code to illustrate the most common corporate tax forms.

ACC 305 Managerial/Cost Accounting II - 3 credits

Prerequisites: ACC205 Managerial/Cost Accounting I. Managerial Accounting will focus on providing information to managers, those inside an organization who direct and control a company's operations. In contrast, financial accounting [Accounting I and II and Intermediate Accounting] is concerned with providing information to stockholders, creditors, and others who are outside an organization. Managerial Accounting provides the essentials that are needed to run organizations. We will reinforce previously learned concepts and consider the same concepts in practical applications. Subjects will include some familiar topics and some unfamiliar topics. The course objective is to look at accounting from the managers' perspective rather than the practicing accountant perspective and to focus on cost, cost analysis, and costing.

ACC 310 Computer Accounting with QuickBooks - 3 credits

Prerequisite: ACC201 Accounting I & ACC202 Accounting II. The Computer Accounting with QuickBooks is designed to help the student understand the QuickBooks program offered by Intuit. Students will learn to manage payroll, inventory, sales, and other needs that are required in a small business organization. The purpose of this course is to teach the student to successfully navigate and use QuickBooks online. Students will be qualified at the completion of this course to take the QuickBooks Pro certification through Intuit.

ACC 401 Advanced Accounting & Reporting - 3 credits

Prerequisite: ACC302 Intermediate Accounting II. Advanced Accounting & Reporting presents an in-depth analysis of advanced accounting topics. The course discusses the accounting theory and practice regarding partnerships, non-profit and governmental entities, business combinations and consolidated financial statements, effects of foreign currencies, reporting requirements of business segments, and international accounting standards.

ACC 402 Auditing I - 3 credits

Prerequisite: ACC302 Intermediate Accounting II. This course introduces students to the principles, standards, and procedures of a financial statement audit. Topics discussed include professional ethics and legal responsibilities of auditors, the development of a risk-based audit program, accumulating audit evidence, and reporting in accordance with generally accepted auditing standards.

ACC 403 Auditing II - 3 credits

Prerequisite: ACC402 Auditing I. This course furthers the students knowledge on the application of auditing principles, standards and procedures. Topics explore the internal audit process and the follow up requirements by an organization after an audit has been complete.

ACC 410 Government and Nonprofit Accounting - 3 credits

Prerequisite: ACC302 Intermediate Accounting II. This course introduces the students to the principles, standards, and procedures of financial statements for governmental and nonprofit organization. Yellow book, A-133 audits, and the IRS 990 are some of the topics which are covered in this course.

ACC 450 BSA Senior Capstone - 3 credits

Prerequisite: Completion of 111 Credits in the BSA Program and Required for Graduation. This Senior Capstone course is designed to challenge and further develop a student's synthetic knowledge of accounting. A seminar in approach employing high level critical thinking skills, the course will emphasize discussions, mentoring and research in specific problematic areas of accounting. The student will be guided to complete a final research project with phased project assignments in a cumulative document due at designated times during the course.

BNK 201 Principles of Banking - 3 credits

This course provides students with an overview of the history, purpose, and functions of banking. The course focuses on how banks serve the financial needs of individuals, businesses, and government in today's competitive environment. Students will compare financial services offered through traditional banking institutions with other financial intermediaries. Topics will include: Introduction & Evolution of Banking, The Federal Reserve as the Central Bank of the U.S., Deposits, Negotiable Instruments/Payments, Customer Service & Sales, Non-Traditional Bank Products & Services, Lending, Bank Investments & Profitability Management, and Safeguarding Customer Assets.

BNK 301 Consumer Credit - 3 credits

Prerequisite: BNK201 Principles of Banking. The purpose of this course is to present consumer-lending basics including regulations, credit policy, operations, loan closings and loan servicing, product knowledge, and the decision-making process. The focus is on how to make an appropriate consumer loan by using a decision-making process which includes interviewing, investigating and knowing various loan products. Includes lecture material and related case studies for students to develop fundamental credit skills and sound lending judgment.

BNK 405 Contemporary Regulatory Issues - 3 credits

Prerequisite: BNK201 Principles of Banking. This course is designed to provide a broad understanding of the philosophy, history and context or regulations and regulatory agencies within various industries, including, but not limited to financial services. Students will evaluate and assess the external role of the compliance process, including federal, state, and local regulatory agencies. Students will study the complex regulatory environment that has recently grown in an effort to safeguard the public's personal information and prevent abuse within various industries.

DMK 205 Digital Marketing - 3 credits

The field of Digital Marketing has emerged and exploded as everyone and everything goes online. It is a very exciting time for businesses and marketers as they struggle to embrace innovative marketing strategies and new digital technologies in order to engage online customers and audiences. This course is designed to introduce students to emerging trends and demonstrate how businesses may leverage the power of marketing via mobile devices, social networks, graphic design, and the Web. It examines the evolution of marketing from traditional-based platforms to the integration of digital media and platforms. Students are introduced to digital marketing tools, techniques, and strategies used by businesses to reach online audiences and engage followers. Students will also become familiar with the common vernacular and critical considerations needed to apply digital marketing approaches and manage a digital presence.

DMK 210 Viral Marketing and Digital Presence - 3 credits

This course investigates the potential impact of viral marketing to expand brand awareness and engender community involvement in defining the service/brand among communities and beyond. A key focus will be on the evolution of viral marketing from grassroots to digitally pervasive tactics. Students will explore the diverse and evolving ways in which social networking sites lend themselves to innovative and influential marketing techniques. Also under examination will be the ethical considerations to identify and examine when planning a viral marketing/advertising campaign.

DMK 230 Data Analysis, Metrics and Measurement of Digital Marketing - 3 credits

In this course, students will examine techniques used to measure the impact and effectiveness of digital marketing and advertising practices and strategies. A key focus will be on the type of metrics commonly focused upon in the analysis of marketing approaches. Students will study ways in which online and digital platforms have changed the assessment of marketing strategy. Under investigation will be measurements, such as return on investment, cost-benefit analyses, media reach and response rates, and consumer satisfaction. These measurements will be considered in tandem with a survey of targeted marketing/advertising strategies that are possible with new and emerging social media frameworks.

DMK 301 Laws, Ethics and Social Responsibility in a Digital Age - 3 credits

As the digital environment separates marketers from consumers, the necessity to engender trust in this complex environment increases. This course will examine the unique challenges businesses face in an online marketing platform ranging from disclosure to privacy rights. A major focus of this course will be how to consider brand reputation and consumer trust through ethical decision-making. Students will consider the impact of technology, access, and social factors in digital marketing. This course will also examine the laws that govern usage of digital media from both an end- consumer and from a business perspective.

DMK 305 Digital Advertising - 3 credits

Prerequisite: MKT 210 Principals of Marketing. The nature of advertising is dramatically changing in the evolving digital business framework. In this course, students will gain an overall understanding of the role played by advertising within the marketing strategy. The primary focus of this course will be to study the impact of digitally-based advertising practices on areas, such as: creative strategy; content development; ad placement and frequency; cost analysis; and media partnerships. Students will study what makes an ad campaign effective and how to leverage the Internet and social media to enhance impact and reach.

DMK 315 Online Content Marketing and Consumer Behavior - 3 credits

With the transition of marketing to a dynamic, interactive digital environment, content marketing has replaced traditional marketing campaigns as a means to attract and retain customers by consistently creating and curating relevant and valuable content with the intention of changing or enhancing consumer behavior. Students will examine how content and context influence the motivations and buying behavior of consumers. Under consideration will be how the increasingly interactive environment changes the relationship between the consumer and marketer. A key focus of this course will be on how create content and deliver it in a context that can leverage opportunities to influence consumer behavior.

DMK 330 Targeted Marketing and Social Optimization - 3 credits

Targeted Marketing and Social Optimization is designed to teach students how they can navigate the complex world of social communications using highly targeted techniques to generate business and gain attention from their audiences.

DMK 340 Search Engine Optimization - 3 credits

This course explores how search engine optimization (SEO) is employed as an integral component of digital marketing and advertising strategies. Under investigation will be how these web-searching tools are used to increase web traffic, enhance product/service visibility and leverage a competitive advantage. The class will demonstrate ways to analyze and devise key search strategies and integrate these assets into an overall marketing plan. A key focus will be on how web writing and content development are key factors in devising an effective search engine optimization strategy. Please note: it is recommended that students planning to focus on optimization in their Capstone also take DMK 460, Social Media Optimization, as an elective choice.

DMK 401 Fundamentals of Web Design - 3 credits

This course is designed to instruct students on modern website construction and design. The course will survey techniques and tools for using images and layout to present clean, clear and efficient pages to meet business objectives. Students will review existing literature and websites with an eye towards finding out what works, and what does not. The course will provide a foundation of traditional principles of visual design, digital tools, and techniques compatible with designing sites for online, tablet and mobile platforms. Students will learn basic HTML/CSS/JQuery coding and will be introduced to popular web design and graphics programs including the content management system (Wordpress, Joomla) and Paint.net.

DMK 405 Emerging Trends in Digital Marketing - 3 credits

This course is designed to instruct students on the most current and relevant digital marketing trends.

DMK 410 Global Strategies in Digital Marketing - 3 credits

In this course, students will consider the principals of marketing when transitioning from a domestic to an international framework. Students will learn how to assess a global market and international consumers. Under consideration will be cross-cultural communication, global legal considerations, and diverse communication strategies when applied to global markets. This course will also factor in the ways in which social media and digitally based marketing practices intersect with cross-border marketing strategies. Under review will be the types of opportunities and vulnerabilities encountered in global marketing, especially when this dynamic is taken to the pervasive format of digitally based forums.

DMK 420 Mobile Marketing - 3 credits

Prerequisite: MKT 210 Principles of Marketing. This course will introduce mobile advertising through emerging mobile platforms. It will explore examples and case studies of how mobile platforms are already being exploited and discuss the potential applications for organizations and the key strategic planning issues. The course will combine topics of B2B and B2C marketing, mobile site design, mobile apps and widgets, and how to apply mobile as a tool to leverage technology and meet business objectives. It will examine trends in Mobile Social Media (Geo-location and Geo-tagging, Mobile Commerce, Mobile Payments and Billing, Social Media Rewards, etc.) and usage trends of platforms and handsets (Apple, Blackberry, Nokia, Google Android, Microsoft Windows Mobile Applications, etc.). In this course students will explore mobile marketing through examining key concepts, case studies and successful applications of mobile campaigns.

DMK 428 Digital Marketing, Big Data and Web Analytics - 3 credits

As Big Data moves into the mainstream, marketers are seeing the opportunity to make the profession more scientific and numbers-driven than ever before. In addition, with measurement at the center of every marketing campaign, marketers have the opportunity to prove the ROI of their programs with unprecedented accuracy. Indeed, we have entered the age of the “data-driven marketer.” Yet, this wealth of data can be overwhelming. Every channel has its own metrics, every demographic group’s behavior can be mined for targeting information. What are the numbers that matter? And what are they really telling us? How can we best leverage Big Data and marketing analytics to optimize results? This course explores the growing role of data in marketing. Taking a two-fold approach, the course will look in-depth at the two primary kinds of data available to marketers: internal (marketing analytics), and external (Big Data). Using real-world examples and practical exercises, the course will allow students to understand the interactions between both kinds of data, and how best to use both to improve marketing outcomes, demonstrate ROI to the C-suite, and create increasingly effective marketing campaigns.

DMK450 Digital Marketing Capstone - 3 credits

Prerequisite: Successful completion of 109 credits in the BSDM program. This Senior Capstone course is designed to challenge and further develop a student’s synthetic knowledge of business and advance and apply that knowledge within the selected BSDM concentration. A seminar in approach employing high level critical thinking skills, the course will emphasize discussions, mentoring, and research in specific problematic areas of business concerns. The student will be guided to complete a final research project with phased project assignments in a cumulative document due at designated times during the course. The final research project will become part of the student’s ePortfolio. Each student will create

a website to showcase one’s resume, a video introduction, quality projects completed during the BSDM program, the final capstone project and other materials the student might wish to utilize in a job application process or business position advancement.

FIN 201 Principles of Financial Services - 3 credits

Principles of Financial Services is a beginner course providing focus on the history, regulatory environment, competitive pressures and developing trends affecting the industry. This course creates a general understanding of the sub-sector industry players individually (banking, insurance and investment/mutual funds) and evolves to a study of components affecting the industry as a whole today.

FIN 210 Principles of Investments - 3 credits

Prerequisites: FIN201 Principles of Financial Services Strongly Recommended. This course provides an overview of financial investing. You will become acquainted with the basics of stocks, bonds, and exchange traded funds, investment theory, the relationship between risk and return and investment decision making. The goal of the course is to provide you with an understanding of the basics of investment planning and portfolio construction.

FIN 305 Corporate Finance - 3 credits

Prerequisites: FIN201 Principles of Financial Services Strongly Recommended. The primary objective of Corporate Finance is to provide a framework, concepts, and tools for analyzing financial decisions based on fundamental principles of modern financial theory. The approach is rigorous and analytical. Topics covered include discounted cash flow techniques; corporate capital budgeting and valuation; investment decisions under uncertainty; capital asset pricing; options and market efficiency. The course will analyze corporate financial policy, including capital structure, cost of capital, dividend policy, and related issues. The course also covers the operating and financial leverage, sustainable growth, and financial health of a firm.

FIN 401 Investment Management - 3 credits

Prerequisites: FIN201 Principles of Financial Services Strongly Recommended. This course provides an overview of financial investing. The student will become acquainted with the basics of stocks, bonds, and exchange traded funds, investment theory, the relationship between risk and return and investment decision making. The goal of the course is to provide an understanding of the basics of investment planning and trading as well as portfolio construction.

FLS 101 Financial Literacy - 3 credits

This course presents key aspects of financial literacy necessary for lifelong success. A practical approach is followed. Topics covered include: the impact of credit on personal finances and employment opportunities, identifying and avoiding financial fraud, the importance of financial decision making, the impact of income taxes, the use of insurance as a risk management tool, retirement planning, and determining whether or not to file personal bankruptcy.

HCA 101 Medical Terminology - 3 credits

This course offers students engagement and interaction with the dynamic language of Healthcare. Though comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in Healthcare including healthcare industry terminology, healthcare delivery systems terminology and body systems – clinical terminology.

HCA 102 Medical Personability - 3 credits

Medical Personability builds essential soft skills needed by the medical certificate or degree-seeking student. These non-cognitive skills are critical to the success of working in healthcare as a result of the demand for increased focus on patient satisfaction, the movement to coordinated care models, as well as the number of patient touches the front-line caregiver expresses. By leading the student through a unique classroom process that allows for demonstration of knowledge through interactive engagement, learning and assessment are observed and evaluated through virtual simulation.

HCA 150 Essentials of Healthcare in the US - 3 credits

Prerequisite: HCA101. This course will give students an overview of the current US healthcare delivery system and its associated costs. It will enable students to accurately define insurance terms and abbreviations and introduces students to the functions and procedures of health insurance programs. The course will familiarize students with requirements, rules, regulations, and laws pertaining to various insurance programs.

HCA 210 Medical Law & Ethics - 3 credits

Prerequisite: HCA101. This course includes an overview of medical law and ethics including types of licenses, medical education, and professional conduct. It also includes orientation of the requirements regarding the Health Insurance Portability and Accountability Act (HIPAA) and the guidelines of OSHA (Occupational Safety and Health Administration) which are mandatory in the medical field.

HCA 300 Foundations of Healthcare Law - 3 credits

Prerequisite: HCA210. This course examines state and federal laws related to the U.S. healthcare system. Topics include an overview of the legal system, tort law, criminal and fraud issues, contracts and antitrust, medical staff legal implications, information management, and reporting and patient's rights.

HCA 305 Organization and Management in Healthcare - 3 credits

Prerequisite: HCA101. This course focuses on acquainting the student with the concepts of behavioral sciences within health services organizations including managing organizational behavior for quality and results, diversity, organizational communication, behavior modification, leadership, occupational stress, structure, and learning organizations.

HCA 310 Introduction to Public and Community Health - 3 credits

Prerequisite: HCA101. This course offers an introduction into the public health's historical contributions, ethical bases, system organization and the social, behavioral, environmental, and biological factors that contribute to individual and community health problems.

HCA 315 Fundamentals of Electronic Health Records - 3 credits

Prerequisite: MED200. This course will introduce the Integrated Electronic Health Records and allow students to apply their knowledge through simulations.

HCA 320 Marketing for Healthcare - 3 credits

Prerequisite: HCA101. This course explores key marketing concepts that the healthcare leader needs to understand to plan and implement an effective marketing strategy. The concepts explored include the marketing process, needs assessment, developing marketing campaigns and evaluating the efficacy of marketing efforts.

HCA 400 Financial Management for Healthcare - 3 credits

Prerequisite: ACC202. This course provides an overview of the two main areas of Healthcare Finance, accounting, and financial management. Topics explored include the healthcare financial environment, financial accounting principles, managerial accounting principles, financial management, long-term financing, and capital investments.

HCA 405 Introduction to Long-Term Care - 3 credits

Prerequisite: HCA101. This course explores the various long-term care services available in the U.S. Topics include access, financing, combinations of housing and services for disabled adults, and the challenges of providing a range of quality long-term options.

HCA 410 Organization and Management in Healthcare - 3 credits

Prerequisite: HCA101. This course examines the complex and intricate nature of the U.S. healthcare system and its implications for healthcare organizations and the populations served. Topics include the organization of healthcare, access to care and disparities, quality of care, funding, healthcare reform and impact for strategic planning for healthcare organizations.

HCA 450 Healthcare Administration Capstone - 3 credits

Prerequisite: Successful completion of all HCA/MED courses in the program. The capstone course is the culminating experience for the Bachelor of Science in Healthcare Administration. The capstone course provides students with the opportunity to integrate and synthesize the knowledge, skills, and attitudes acquired throughout their course work in an original comprehensive project, and to assess their level of mastery of the stated program outcomes of their degree program in Healthcare Administration.

HRM 210 Introduction to Recruitment & Selection - 3 credits

In this course, students explore the recruitment and selection function of human resources management. This exploration includes an overview of the strategic staffing process and as well as the methods, technologies, and systems used to identify, attract, select, and onboard employees.

HRM 220 Introduction to Employee Relations - 3 credits

In this course, students explore the varied topics that fall under the broad term "employee relations." Topics include the nature of the employment relationship, employee assessment and performance management, labor relations, organizational communication, employee retention, and engagement.

HRM 230 Introduction to Comp and Benefits - 3 credits

In this course, students receive a broad overview of the two key components to total rewards - health and welfare benefits and compensation practices. As a final deliverable, students will design a comprehensive compensation system and benefits plan for an organization.

HRM 250 Effective Workplace Training and Development - 3 credits

In this course, students explore the entire training and development function. This exploration includes the common training process and design models as well as the tools, technologies, and resources used in a variety of training methods. Students participate in discussions and complete projects and activities that support each phase of the training and development process. Students also examine potential organizational issues that may arise at different phases in the training and development process.

INB 301 International Business Law and Ethics - 3 credits

This course offers an in-depth discussion of international business organizations and transactions in the global political, social, and legal environment. There will be a study of the various relationships among the legal systems and ethical values of different countries and the individuals and business organizations of those countries. Topics include the policies and procedures of multinational corporations, international contracts, regulation of exports and imports, cross-border intellectual property issues, regional transactions, product liability issues, and enforcement-related issues.

INB 305 International Business and Trade - 3 credits

This course provides a thorough examination of the patterns, terms and causes of trade; the sources of gains from trade and commercial policy; and the domestic and international distribution of those gains. This course also discusses the political, economic, and social causes of trade policies and the theories behind trade and growth. Students will explore the instruments and consequences of trade policies, namely, tariffs and quantitative restrictions, and their modern manifestation in the form of anti-dumping and safeguard measures.

INB 310 Global Marketing - 3 credits

This course explores the impact of economic, cultural, political, legal, and other environmental influences on international marketing. Within this context, we will discuss how to identify and analyze global marketing opportunities and examine product, pricing, distribution, and promotion strategies. This marketing course is structured to provide ample opportunity for interaction among students and between students and the instructor with respect to discussing key issues in global marketing.

INB 320 International Supply Chain and Logistics Management - 3 credits

This course provides a comprehensive overview of the transportation, logistics, operations, and strategy associated with international trade and commerce. The course focuses on the following; supply chain management, infrastructure analysis, network design, warehousing operations, inventory management, foreign market entry modes, international trade contracts, payments, insurance, multi-modal transportation, packaging, customs, and most importantly security.

INB 401 International Negotiations and Culture - 3 credits

This course acknowledges the critical nature of culture in the negotiations process by describing the theories; processes, and actions associated with global communication and negotiations. The course incorporates cultural norms, values, and idiosyncrasies that impact the negotiations process. Students gain a global perspective of negotiations and develop strategies to effectively lead a negotiation team or project.

INB 405 International Finance - 3 credits

Prerequisite: FIN 305 Corporate Finance. International Finance will introduce students to global financial markets and operations of multinational firms. Topics to be discussed will include foreign exchange markets, international financial markets, international banking, international trade tariff and quotas, Euromarkets, and investment decisions in the global marketplace.

INB 410 International Economics - 3 credits

Prerequisite: ECO 205 Survey of Economics. This course explores the basics of international economics, including the effects of international economic policies on global welfare and the fundamentals of global trade and finance. This course discusses modern international economic theories and practices, comparative advantage, free trade, protectionism, and international finance. Organizations whose roles and responsibilities are covered in this course include the World Trade Organization (WTO), the International Monetary Fund (IMF) and the World Bank. There is also discussion of international trade agreements, including the North American Free Trade Agreement (NAFTA) and other agreements. Students will learn the various ways in which theories, organizations, and agreements affect long and short-term business decision-making policies and practices.

INB 420 Global Politics and Organizations - 3 credits

Prerequisite: INB 305 International Business and Trade. Political and economic integration provides the laws, policies, and frameworks for international alliances, conventions, and trade. This course provides an overview of the history, theories, and structures of international politics and the global organizations that aid governments in working together to build social responsibility, sustainability, and economics prosperity while increasing human rights and environmental viability.

INB 450 Global Strategic Management - 3 credits

Prerequisite: Successful completion of 109 credits in the BSIB program. The course is designed to integrate coursework, knowledge, critical thinking skills, and applications of learning to enable the student to demonstrate a broad mastery of learning across the BSIB curriculum. The course is designed to synthesize the student's area of concentration within the BSIB program. A seminar in approach, the course places emphasis on discussions, mentoring, and substantive research methodologies. Students will be guided to the completion of a major research project and a comprehensive e-Portfolio within their concentration with assignments incrementally completed throughout the course.

MED 150 Introduction to Medical Coding - 3 credits

Prerequisite: HCA 101 Medical Terminology. This course introduces the concepts and methods of medical coding which provide the foundation for medical billing and reimbursement and the revenue cycle, in the United States healthcare system. Definition, correct use, and application of the International Classification of Diseases Clinical Modification (ICD-10-CM), Current Procedural Terminology (CPT), and Healthcare Common Procedure Coding System (HCPCS) will be identified and practiced. The relationship between coding and the Electronic Health Record as well as the protection of a patients' Protected Health Information (PHI) will be identified. Active involvement through readings, lectures, discussion, multimedia, learning activities/assignments is required of each student.

MED 155 Diagnosis Coding: ICD-10-CM - 3 credits

Prerequisite: MED150 Introduction to Medical Coding. This course covers the principles and guidelines for using the ICD-10 CM code set and the concept of clinical vocabularies and classifications systems of diagnosis coding. Focused instruction for interpretation of health record documentation for proper assignment of diagnosis codes will be emphasized and put into practice as well as the understanding of ICD-10 CM diagnosis in relation to inpatient and outpatient settings.

MED 160 Medical Office Procedures - 3 credits

Prerequisite: HCA 101 Medical Terminology. Medical Office Procedures will provide those interested in setting up a medical office or who want to learn how to manage a medical office more efficiently with the basics and specialized concerns that face medical offices today. Students will also experience some of the principles of leadership and the importance of team building in a healthcare environment.

MED 165 Procedure Coding: ICD-10-CM - 3 credits

Prerequisite: MED 155 Diagnosis Coding. This course covers the principles and guidelines for using the ICD-10-PCS code set and the concept of clinical vocabularies and classifications systems of procedure coding. Focused instruction for interpretation of health record documentation for proper assignment of procedure codes will be emphasized and put into practice as well as the understanding of ICD-10-PCS procedure in relation to inpatient and outpatient settings.

MED 175 CPT Ambulatory Procedures Coding - 3 credits

Prerequisite: MED 165 Procedure Coding. This course covers the principles and guidelines for using the ICD-10 CM code set and the concept of clinical vocabularies and classifications systems of procedure coding. Focused instruction for interpretation of health record documentation for proper assignment of ambulatory procedure codes will be emphasized and put into practice as well as the understanding of ICD-10 CM procedure in relation to inpatient and outpatient settings.

MED 180 Medical Billing and Reimbursement - 3 credits

Prerequisite: MED 160 Medical Office Procedures. This course advances students into the world of billing and collections, as well as reimbursement processes such as audits and claims appeals. Emphasis is placed on understanding the varying payor sources that patients utilize, proper billing techniques, general claims management, and overall reimbursement life cycle. This course is designed for the Medical Office Administration Student.

MED 184 Medical Insurance Procedures - 3 credits

Originally intended to protect against large financial losses, health insurance in the United States has expanded over the last 80 years to take on a more profound social role. This course will give students an introduction to the concept and history of health insurance in the United States. It will explain basic health insurance principles and terminology, and discuss various systems of public and private insurance. A full range of health insurance issues will be discussed, including what is covered and how health insurance works for all segments of the population. The course concludes with a broad discussion on health insurance from the perspective of the consumers and healthcare providers, as well as comparisons with healthcare funding in other countries.

MED 200 Electronic Health Information Systems - 3 credits

Prerequisite: HCA 101 Medical Terminology. This course provides an overview of information management and information technology for healthcare administrators. Attention is paid to the content and function of the electronic health record (EHR).

MED 215 Practical Medical Billing and Reimbursement Procedures - 3 credits

Prerequisite: MED 175 CPT Ambulatory Procedure Coding. This course provides students with a practical application of the steps following medical coding. It is designed for the student who has completed the three medical coding classes.

MGM 201 Principles of Management - 3 credits

This course investigates the way that managers perform their duties in an organization relying on the dynamic processes of strategic planning, business development, budgeting, and operations to move their organizations forward and achieve results. The concepts and skills needed to manage effectively under constantly changing conditions are identified. The course will review a manager's skill at influencing the direction and functioning of an organization and will develop students' appreciation of these management activities and their links to employee performance. Active involvement through lectures, discussion, videos, case studies, and group exercises is required of each student.

MGM 210 Quality Customer Service - 3 credits

Prerequisite: MGM201 Principles of Management. This course introduces the student to the theory, concepts, and methodologies that contribute to quality customer service. Emphasis is on behavioral, technological and management of service criteria to deliver quality, inter-industry service in the global business environment.

MGM 215 Leadership and Management - 3 credits

Prerequisite: MGM201 Principles of Management. This course is designed for students to compare and contrast management and leadership; examine five fundamental practices of exemplary leadership and discover a natural approach to leadership that works for them. Students will develop a personal action plan based on their strengths and explore techniques to develop leadership skills in others. Benefit from an enriching combination of lectures, learning assessment exercises, small-group interaction, and case studies.

MGM 225 Human Resources - 3 credits

Prerequisites: MGM201 Principles of Management. This is an introductory course intended to provide the student with a comprehensive overview of the major Human Resources functions that are typically found in organizational settings. Topics covered include Strategic HR Planning, Benefits & Compensation, Recruitment & Selection, Employee & Labor Relations, and Training & Development. The course draws upon both current Human Resource practices and relevant research.

MGM 250 Business Ethics - 3 credits

Prerequisite: MGM201 Principles of Management. The purpose of this course is to develop critical thinking and reasoning about moral issues of business. In addition to a study of public issues such as mergers, management versus stockholders' interests, the changing nature of stockholders, you will explore typical ethical dilemmas that confront investors, managers, analysts, brokers, and others involved in the business marketplace. This course emphasizes the ethical dimensions of employees who work within organizations. Case analysis, research and group discussion of current events will be used.

MGM 255 Business Law - 3 credits

Prerequisite: MGM201 Principles of Management. This course covers various key facets of business law. Through readings, lectures, discussion board assignments, and written assignments, students will explore different aspects of laws affecting businesses today. Students will develop a basic understanding of the importance of such diverse areas of business law as different types of business entities, the roles of directors and officers, the rights of shareholders, mergers and acquisitions and the dissolution and liquidation of a business. In addition, students will develop the skills of identifying potential legal issues with businesses that may arise during the course of the business day.

MGM 301 Research Methods - 3 credits

Prerequisite: MGM201 Principles of Management. This course presents the student with a broad overview of research with a focus on collecting, analyzing and presenting research findings. Further, the student will gain an appreciation of being able to recognize valid data in a business or social setting. Students prepare a proposal for a research project in a group setting.

MGM 305 Organizational Behavior - 3 credits

Prerequisite: MGM201 Principles of Management. This course introduces the student to the contemporary principles of organizational behavior. Emphasis is on the importance of human dynamics in modern organizations. The course covers individual behavior, group processes, and organizational dynamics from both the management and employee perspectives.

MGM 401 Operations Management - 3 credits

Prerequisite: MGM201 Principles of Management. This course presents an overview of operations management from the service and manufacturing industry perspectives. The origins of this function as well as the methodologies used by an operations manager will be discussed. The student will be introduced to factors such as planning, quality, supply chains, recall issues, process improvements, and sustainability. The function of project management will also be applied to case studies as it relates to operations.

MGM 410 Strategic Management & Decision Making - 3 credits

Prerequisite: MGM201 Principles of Management. This course looks at management decisions and actions that determine long term performance for the corporation. The study of business strategy examines a variety of analysis and decision-making applications including environmental scanning (internal and external), strategy formulation, implementation, and evaluation. The course also looks at the strengths and weaknesses that effect strategy development.

MGM 415 International Business Management - 3 credits

Prerequisite: MGM201 Principles of Management. Conducting business outside the United States involves a unique set of challenges. Diverse cultures, laws, languages, and currencies add to the complexities of putting together and managing international business ventures. This course will help you prepare for these types of activities by exploring a number of questions that focus on various aspects of international business.

MGM 450 BSBA Senior Capstone - 3 credits

Prerequisite: MGM201 Principles of Management; Completion of 109 Credits in the BSBA Program and Required for Graduation. This Senior Capstone course is designed to challenge and further develop a student's synthetic knowledge of business and advance and apply that knowledge within the selected BSBA concentration. A seminar in approach employing high level critical thinking skills, the course will emphasize discussions, mentoring and research in specific problematic areas of business concerns. The student will be guided to complete a final research project with phased project assignments in a cumulative document due at designated times during the course. The final research project will become part of the student's ePortfolio. Each student will create a website to showcase one's resume, a video introduction, quality projects completed during the BSBA program, the final capstone project and other materials the student might wish to utilize in a job application process or business position advancement.

MIS 205 Management Information Systems - 3 credits

Prerequisite: MGM201 Principles of Management. This course introduces various information and communications technologies and explains how information systems are used to solve problems and make better business decisions.

MKT 210 Principles of Marketing - 3 credits

This course focuses on how to collect, analyze, and use primary and secondary data in order to make more effective marketing decisions. Traditional marketing resources are introduced as well as up-to-date techniques for collecting primary data. Students will analyze information and make recommendations pertinent to the marketing plan.

MKT 215 Customer Relationship Marketing - 3 credits

Prerequisite: MKT210 Principles of Marketing Strongly Recommended. Successful marketing does not stop with the first sale. This course stresses the importance of turning customers into repeat buyers and users. Customer Relations Marketing is a mixture of brand marketing, creative communication, technology, and research. The course involves the student in methods of how to build relationships with customers and maintain them over a period of time. It is an essential part of the marketing plan and must be viewed in the context of integrated marketing communications. How to develop and implement the process will be the foundation of the course.

MKT 230 Principles of Public Relations - 3 credits

Prerequisite: None; MKT210 Principles of Marketing Strongly Recommended. This class is designed to provide a basic overview of how to plan and carry out a multi-faceted public relations program. It offers practical experience in identifying publics and messages; developing and producing a broad variety of PR tools; understanding and working with the news media; and working with other professionals in graphics, photography, video, and printing. Students work as teams with organization of their choice throughout the semester, researching its policies, practices, needs, and using them as the basis of a series of team assignments.

MKT 301 Marketing Research - 3 credits

Prerequisite: MKT210 Principles of Marketing Strongly Recommended. This course focuses on how to collect, analyze, and use primary and secondary data in order to make more effective marketing decisions. Traditional marketing research resources are introduced as well as up-to-date techniques for collecting primary data. Students will analyze information and make recommendations pertinent to the marketing plan. This course follows up on a lot of the areas covered in Research Methods but focuses entirely on marketing situations.

MKT 305 Consumer Behavior - 3 credits

Prerequisite: MKT210 Principles of Marketing Strongly Recommended. In this course, students will develop an understanding of consumer behavior in order to develop strategies by analyzing buying behavior data through the use of psychology, economic and other social science theories to segment customers. Emphasis is on the impact of the influences on buying behavior through; need recognition, information search, evaluation of alternatives, purchasing decision and post purchase behavior. Students prepare advertising and marketing strategies for a new product launch.

PJM 210 Introduction to Project Management - 3 credits

Prerequisite: MKT210 Principles of Marketing Strongly Recommended. This course explores both the theory and the practice necessary to successfully understand and manage projects. Students will learn the terminology, processes, and key concepts that are essential to effective project management. They will explore the five stages of a project's life cycle, and examine important project elements—such as integration management, scheduling, costing, quality, control, risk management, procurement, and stakeholder engagement—that must be monitored, evaluated, and executed throughout a project.

QSM 210 Quality Systems Management - 3 credits

This course provides a chronological journey of the concepts, tools, quality improvement, and quality management systems that have emerged over time. It introduces Six Sigma DMAIC (Define, Measure, Analyze, Improve, and Control) process and the associated quality tools that are used to assess and improve business processes.

QSM 325 Introduction to Quality Strategic Planning - 3 credits

Strategic planning sets the direction of the organization for long-term survival and prosperity. QSM325 emphasizes the Hoshin method of strategic planning, a technique that treats strategic planning as a "system" that involves the development of plans with linkage to the organization's mission. Students learn how first level and lower level strategies are developed and deployed. A key emphasis of QSM325 is the use of Hoshin tools in strategy development, review, and feedback. Students will utilize tools to analyze the present state and voice of the customer and ensure the alignment of projects with organizational goals and objectives.

QSM 345 Performance Based Management and Benchmarking - 3 credits

This course focuses on Performance Based Management, Leadership of Change, and the initiation of the MEASURE phase of the Six Sigma DMAIC process. This course provides instruction on designing a measurement plan for the Bachelor's Business Project (BBP), collecting baseline measures, and defining a robust set of internal and external performance metrics in order to facilitate continuous process improvement. This course also introduces Benchmarking and its role in the Six Sigma DMAIC process. The process of benchmarking is examined in relation to business process improvements and promoting performance. The distinction between primary and secondary benchmarking strategies is stressed.

QSM 370 Introduction to Research and Data Analysis - 3 credits

QSM370 explores business research concepts. Students will be provided with a fundamental explanation of business-related research and the variety of methods available to researchers. Basic research, as well as applied (problem focused) research is explained. This course also marks the beginning of the ANALYZE Phase of the DMAIC process. Students will learn how to conduct data and process analysis for the purpose of discovering the root causes of problems.

QSM 408 Special Topics in Quality Management - 3 credits

This course emphasizes the skills needed to identify and select processes for improvement, apply lean thinking techniques, map value streams, lead a Kaizen event, and understand the keys to successful change. Diverse case studies are used for the purposes of class review and online discussion. The course encourages students to apply the principles to their work environment and to consider how organizational processes may be improved using the techniques described in this course and throughout the program.

QSM 475 Introduction to Financial Systems Management - 3 credits

This course presents students with an introduction to finance by covering the basic principles of finance and the role of finance in supporting business goals. Students will gain insight into the importance of a company's balance sheet and income statement, how to measure a company's cash flow, working capital, and how to perform activity based costing. This course includes consideration of the Cost of Quality and the calculation of a return on investment (ROI) for business process improvement so that tangible financial results can be illustrated.

QSM 480 Quality Management Capstone 1 - 4 credits

The Bachelor's Business Capstone Project (BBP) allows students to apply what they learned to a real-world process improvement opportunity. Students initiate a work-related project that will demonstrate measurable and significant process improvement. This course sets the stage for a successful project by integrating Quality Systems principles and best practices. Students select a process improvement project, choose a Project Champion and agree on performance measures for the project. Students create their BBP Storyboard and submit a phase by phase description of their project. With faculty supervision, students navigate through the Six Sigma DMAIC five-phase process including Define, Measure, Analyze, Improve, and Control using tools and techniques learned throughout the program.

QSM 485 Quality Management Capstone 2 - 3 credits

QSM 460 is offered as either a continuation of the Bachelor's Business Project (BBP) work that began in QSM450, or an opportunity to pursue professional development. Students will collaborate with faculty to assess overall progress in the program and discuss professional goals and research opportunities. After this individual assessment, students will work with faculty to set and achieve these goals.

SEM 205 Social Enterprise Management - 3 credits

This course will explore the "Social Enterprise" which is a business whose primary purpose is the common good. Social Enterprises use strategies, methods, and disciplines of business and the power of the free marketplace to advance their social, environmental and human justice agendas. Their mission statement addresses a social need and common good either through the sale of products/services or by employing a disadvantaged workforce. Through readings, lectures, discussions, and case study students will be introduced the social enterprise and learn the similarities and differences between a social enterprise and other forms of business. This course will demonstrate to students how many existing social enterprises have succeeded in applying business strategies to build, manage and sustain social enterprise. Students will be encouraged to develop their own Social Enterprise business idea.

SEM 210 Entrepreneurship and Small Business Management - 3 credits

This course examines the characteristics and nature of entrepreneurship and the nuances of growing a small business. Topic covered include: personal analysis of entrepreneurs, the generation of entrepreneurial ideas, market identification, the development of a business plan, accounting methods, nonprofit and social business sustainability. Also discussed are the legal and tax implications of ownership forms together with personnel and staffing requirements. Capital requirements, financial management, marketing plans, and internal management control systems are considered in relation to the strategic focus of the enterprise.

SEM 360 Grant Writing and Fundraising - 3 Credit

This course focuses on the development of private foundations and corporate entities as sources of funding for the social enterprise. Specific means of communicating with and approaching these institutions is integral to the student experience. Emphasis is also placed on what causes are central to different corporate and foundational entities as well as developing a data base of high potential sources.

SEM 450 SEM Capstone - 3 Credit

Prerequisite: Successful completion of 109 credits in the BSSEM program. The course is designed to integrate coursework, knowledge, critical thinking skills and applications of learning to enable the student to demonstrate a broad mastery of learning across the BSSEM curriculum. The course is designed to synthesize the student's area of concentration within the BSSEM program. A seminar in approach, the course places emphasis on discussions, mentoring, and substantive research methodologies. Students will be guided to the completion of a major research project and a comprehensive e-Portfolio within their concentration with assignments incrementally completed throughout the course.

GFI 305 Corporate Finance - 3 Credits

Prerequisite: Conditional Acceptance into a graduate program. The primary objective of Corporate Finance is to provide a framework, concepts, and tools for analyzing financial decisions based on fundamental principles of modern financial theory. The approach is rigorous and analytical. Topics covered include discounted cash flow techniques; corporate capital budgeting and valuation; investment decisions under uncertainty; capital asset pricing; options and market efficiency. The course will analyze corporate financial policy, including capital structure, cost of capital, dividend policy, and related issues. The course also covers the operating and financial leverage, sustainable growth, and financial health of a firm.

GMA 305 Statistics - 3 Credits

Prerequisite: Conditional Acceptance into a graduate program. To provide a basic knowledge of statistics methodology: concerned with data collection, analysis, and interpretation. This course introduces fundamental concepts of statistical measures and distributions and regression-correlation analysis.

Graduate Prerequisite Courses

GMG 201 Principles of Management - 3 Credits

Prerequisite: Conditional Acceptance into a graduate program. This course investigates the way that managers get things done in an organization relying on the dynamic processes of strategic planning, business development, budgeting, and operations to move their organizations forward and achieve results. The concepts and skills needed to manage effectively under constantly changing conditions are identified. The course will review a manager's skill at influencing the direction and functioning of an organization and will develop students' appreciation of these management activities and their links to employee performance. Active involvement through lectures, discussion, videos, case studies, and group exercises is required of each student.

GAC 201 Financial Accounting - 3 Credits

Prerequisite: Conditional Acceptance into a graduate program. This course enables students to develop a basic understanding of fundamental accounting concepts and practices. The course focuses on basic accounting concepts and techniques needed to interpret and use financial information in managing and analyzing business operations.

GEC 205 Survey of Economics - 3 Credits

Prerequisite: Conditional Acceptance into a graduate program. This course emphasizes fundamentals in understanding both micro and macroeconomics. This survey course provides students with a general overview of the fundamental concepts and theories related to economics. Students will learn a balanced perspective on microeconomics and macroeconomics. The course explores and analyzes the role of households, firms, and government, especially our own, in relation to economic theory. Students will learn to apply theoretical concepts from an economic viewpoint against issues and challenges of today relating to economic principles and elements of business decision making from an economic viewpoint.

MBA

Master of Business Administration

• CIP 5202 • 36 credits

Program Description

The Master of Business Administration (MBA) is a 12 course, 36 credit program that is designed to provide students with a strong foundation of academic study achieved within an accelerated period of time.

The intent of the MBA program is to meet the needs of middle and senior level managers who want to improve their professional skills via a high quality, affordable, online MBA with a specific focus on strategic thinking and management. The MBA program may also be of interest to consultants and professionals looking to advance into upper-level administrative positions in a variety of fields.

Program Outcomes

- Form and implement effective strategic plans in the context of global, political, social and technological environments.
- Collaboratively lead diverse teams in changing work environments.
- Effectively use research and analyze data to solve unstructured business problems.
- Integrate theoretical perspectives and apply a conceptual understanding of relevant business disciplines to new, existing, and unforeseen situations.
- Use technology to effectively communicate and present data, ideas, and concepts.

Instructional Delivery

The MBA is a fully online program. With the exception of the Capstone course, delivered in a seminar format, all MBA courses are five weeks in length, and there are eight sessions each year. The Capstone course is six weeks in length. The MBA can be completed in approximately 18 months. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester.

Program chair: Dr. Carla Patalano, DBA, MBA, SPHR, SHRM-SCP

- Carla.Patalano@cambridgecollege.edu

General Prerequisites 12 credits

Students are conditionally accepted into the Master of Business Administration program until the following four undergraduate business courses are completed:

- GAC 201 Financial Accounting
- GEC 205 Survey of Economics
- GMG 201 Principles of Management
- GMA 305 Statistics

These prerequisite courses may be waived based on undergraduate coursework. A grade of C (2.0) must be obtained in each prerequisite course.

Each prerequisite course may be repeated once in the event the student does not complete it with the minimum grade the first time.

Core Curriculum 24 credits

- MBA 501 Strategic Leadership & Management
- MBA 502 Applied Quantitative Methods for Business
- MBA 505 Managerial Accounting
- MBA 515 Technology & Analytics for Managers:
A Strategic Approach
- MBA 520 Strategic Marketing Management
- MBA 525 Managerial Economics
- MBA 535 Operations Management
- MSF 505 Managerial Finance

MBA Capstone 3 credits

- MBA 545 Capstone: Strategic Planning
& Decision Making

Concentrations 9 credits

Select three courses from one area of study.

Choose three:

- QSM 525 Quality Systems and Strategic Planning*
- QSM 543 Business Process Analysis
- QSM 545 Supply Chain Management
- QSM 565 Performance Based Management & Benchmarking

*Indicates the first course is required in the concentration. Students must take this course prior to selecting the additional two courses.

(All courses @ 3 credits except as noted.)

Master of Science

Master of Science in Accounting

• CIP 52031 • 30 credits

Program Description

The Master of Science in Accounting (MACC) is a 10 course, 30-credit program that is designed to provide students with a robust foundation of academic study in accounting with an accelerated period of time.

The MACC program is a professional master's degree designed to provide a mature understanding of accepted practices in the field of accounting. By providing students with advanced industry-specific credits coupled with the appropriate undergraduate course work results in knowledgeable accountants. The MACC is structured to maximize a student's success on accounting certification exams through accounting theory and coverage of advanced accounting topics.

Program Outcomes

- Utilize advanced accounting concepts in financial statement preparation and conduct analysis of financial statement data.
- Interpret financial statements and disclosure notes using GAAP and GAAS and make strategic and integrative decisions.
- Demonstrate ethical decision making and professional responsibility when faced with business problems.
- Critique global business transactions and employ appropriate accounting theory.

Instructional Delivery

The MACC is an online program. Courses are five weeks in length, and there are eight sessions per year. The MACC is offered in a 100% asynchronous online format, and there is a strong focus on engaging students in a dynamic and interactive learning format. The program is designed for students to take one course per five-week session.

Prerequisites

The Master of Science in Accounting is designed for students who already have a Bachelor's degree in Accounting from a regionally accredited school. Students with a Bachelor's in Business will be required to take prerequisites in the undergraduate program to prepare themselves for the intense theory, skills, and application-based curriculum.

CPA Exam

Students wishing to become eligible to take the Uniform Certified Public Accounting Exam should understand the requirements of the State Board of Accountancy in their respective state or jurisdiction. NEIB has offered courses in this program based on the overarching requirements of the United States. However, it is the responsibility of the student to verify actual course needs in the state they wish to be certified.

CMA Exam

Students wishing to take the Certified Management Accountants exam should refer to the requirements of the Institute of Management Accountants. Students who enter the program with the CMA credential may be eligible for a course waiver.

MACC Prerequisites 6 credits

These prerequisite courses may be waived based on undergraduate coursework. A grade of C (2.0) must be obtained in each prerequisite course.

- ACC 401 Advanced Accounting & Reporting
- ACC 402 Auditing

Core Curriculum 21 credits

- MBA 501 Strategic Leadership & Management
- MBA 505 Managerial Accounting*
- MBA 530 Legal & Ethical Dimensions of Strategic Management
- ACC 550 Federal Taxation for Corporations & Partnership
- ACC 555 Advanced Accounting Topics
- ACC 560 Advanced Financial Statement Analysis
- MSF 505 Managerial Finance

*MBA 505 can be waived if undergraduate ACC 205 & ACC 305 are completed with a C or better OR if the student provides documentation of their CMA credential.

Elective Courses 6 credits

Choose two:

- ACC 501 Forensic Accounting
- ACC 520 Forensic Data Analysis
- MBA 515 Technology & Analytics for Managers: A Strategic Approach
- MSF 545 Financial Modeling
- MSF 570 Financial Ethics & Compliance
- MBE 510 Governance, Ethics & Compliance
- MBE 581 Corporate Stakeholder Relations & Communication

MACC Capstone 3 credits

- ACC 590 Accounting Capstone

Program chair: Dr. Donna Viens, PhD, CPA, CMA, CGMA
• Donna.Viens@cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Master of Science in Business Ethics & Compliance (MBEC)

• CIP 5203 • 30 credits

Program Description

The Master of Science in Business Ethics and Compliance (MBEC) explores the nature of the relationship between business and society and prepares students for careers in regulatory compliance, business ethics, stakeholder management, corporate communication, corporate responsibility, and related fields. Students are exposed to both the theory and the application of ethics in the business arena and will practice applying these theories in different contexts to better manage relations with regulatory bodies, community groups, and external suppliers and partners.

To tailor the studies to the student's career aspirations, the program offers three specialized degree tracks:

- **Compliance:** This track provides students with the subject area knowledge required to be an effective leader and coach to others in compliance. A distinct legal orientation and an emphasis on learning about the role of government regulation of business are hallmarks of the compliance track.
- **Corporate Social Responsibility:** This track prepares students to pursue positions engaged in launching, managing, and monitoring strategic initiatives involving community engagement and stakeholder relations. Students will learn how to engage with stakeholders of all types: consumer activists, shareholders, community groups, non-governmental organizations, and suppliers.
- **Forensic Accounting:** This track is designed to prepare students to take an active role in the prevention and detection of unethical or illegal activities within the firm and/or to coach others on these processes. Students who follow the Forensic Accounting track should already have some familiarity with performance reporting, accounting, and auditing in a firm.

Ideally, students complete the six core courses (MBA501, MBA530, MBE501, MBE510, MBE550 and MBE560) at the beginning of their program. Once students have completed the core courses, they may enroll in one of three required courses in their chosen track. All students must successfully complete MBE600-Capstone at the end of their program. In sessions where a core course that the student has already completed is offered, students may take another course provided they have met the pre-requisite requirement for the course. Yet, in any given session, students must always enroll in a core course that they have not completed before enrolling in any other course in the program. Below is a curriculum sheet describing the course requirement for the completion of the MBEC degree.

Program chair: Dr. Deborah Sementa, EdD, MBA, CRCM

- Deborah.Sementa@cambridgecollege.edu

Program Outcomes

It is our expectation that graduates of the NEIB Master of Science in Business Ethics and Compliance program will have developed the ability to:

- Identify and assess the strategic, operational, and social risks faced by corporations.
- Analyze the relevance of current and emerging regulations, laws and governance standards and effectively applying these to an organization.
- Appreciate the respective roles and contributions to the firm of the functions of compliance, corporate social responsibility, ethics, auditing, and managerial reporting and control.
- Clearly present problems and solutions related to ethics and corporate governance to management and the Board.
- As a final deliverable, all MBEC students will develop and execute a 'real-world' project, generally in collaboration with a corporate partner, that demonstrates his/her ability to apply the concepts learned in the program to a practical business question.

Instructional Delivery

The MBEC is an online program. Courses are five weeks in length and there are eight sessions each year. The MBEC degree can be completed in approximately 16-20 months. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester.

Prerequisites

Upon completion of the admission requirements, students are conditionally accepted into the MBEC program until the undergraduate course MGM 201 Principles of Management is completed. Students may transfer in the equivalent of this course in accordance with its Transfer of Credit policy. Students may also test out of the required prerequisite courses by successfully completing a CLEP examination if one is available in the subject area. Other conditions for acceptance may be stipulated for applicants in some instances. Students that are conditionally admitted into the program will be informed of the conditions to be met for full admission status and the deadlines for meeting each condition.

Master of Science in Finance (MSF)

• CIP 5203 • 30 credits

Program Description

The Master of Science in Finance program at New England Institute of Business is designed to meet the academic and skill needs of those who desire a career in modern finance. The program is academically rigorous and has proven to be most useful to those pursuing careers within the following areas of finance: asset management, debt, equity and commodities trading, investment banking, mutual funds, hedge funds, and insurance. Using both theoretical and applied methods, the MSF program prepares students to enter the field of finance or advance in their current positions.

Program Outcomes

MSF students will be able to make sound managerial financial decisions by:

- Analyzing financial data and market research information to conduct analyses for sound investment decisions and portfolio management.
- Utilizing financial concepts and analytical tools to make financial decisions in managerial finance and investment management.
- Devising effective financial plans and risk management strategies.
- Applying theoretical constructs and quantitative tools to devise financial models to address corporate finance challenges.
- Evaluating issues in financial ethics and compliance to support ethical practices.
- Strategizing and proposing comprehensive financial plans and investment policies to maximize shareholders' value in the current global environment.

As a final deliverable, all MSF students will construct a comprehensive financial analysis and investment analysis report on par with those found in the financial press.

Instructional Delivery

The MSF program is an online program. Courses are five weeks in length and there are eight sessions each year. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester. The program can be completed in 16 months of continuous enrollment.

Prerequisites

Students are conditionally accepted into the MSF program until the following undergraduate business courses are completed: Statistics and Corporate Finance. Students have a maximum of 12 consecutive months to complete any required prerequisite course(s), with a minimum grade of C (2.0). Students may transfer in the equivalent of these courses in accordance with its Transfer of Credit policy or enroll in these courses prior to full acceptance into the MSF at NEIB. Students may also test out of the required prerequisite courses by successfully completing a CLEP examination if one is available in the subject area. To receive admission to the MSF Program, candidates must hold an undergraduate degree and have a final undergraduate cumulative GPA of 2.7 (B-). Also required is completed coursework in finance, statistics, calculus, economics, or accounting either at the undergraduate or graduate level. These candidates who have not may be granted conditional admission and be required to complete additional undergraduate courses.

Once students successfully complete any required prerequisite courses, they will be automatically moved to a fully accepted status. Students may complete the required courses at NEIB or from another institution in accordance with its Transfer of Credit policy. Other conditions for acceptance may be stipulated for applicants in some instances. Students that are conditionally admitted into the program will be informed of the conditions to be met for full admission status and the deadlines for meeting each condition.

Master's Degree

Master of Healthcare Management (MHM)

• CIP 5107 • 30 credits

Program Description

Today's healthcare system has undergone tremendous change with the implementation of new legislation and policy on the state and national level that has created tremendous implications for healthcare organizations, as well as individual healthcare professionals. The Master of Healthcare Management (MHM) curriculum was created at the nexus between policy implementation and business management – designed to provide participants with the knowledge, skills, and abilities needed to evaluate the implications of policy on organizational structure, finance, and strategy.

The MHM program is designed for individuals who are interested in advancing to healthcare management positions in critical business disciplines within organizations, as well as students who are interested in exploring entrepreneurial opportunities within healthcare. Graduates will be prepared to seek careers in the for-profit and nonprofit healthcare industries across sectors such as healthcare delivery, pharmaceutical, biotechnology, medical devices, healthcare delivery services, and insurance.

Program Outcomes

After completing this program, the student will be able to:

- Understand the unique policy, regulatory, and legal issues facing U.S. healthcare industry participants and address these complexities in planning and decision making.
- Analyze financial statements and statistical data to understand the financial health of the organization, opportunities for growth, or cost containment and use this detailed and high-level data to inform decision making, plan, and manage risk.
- Construct and apply analytical and performance improvement tools including information technology, that help healthcare executives and managers solve complex operations problems and make efficient and effective healthcare operations decisions.
- Compose effective strategies in the management of contemporary healthcare operations issues such as process improvement, patient flow, and quality improvement.
- Design interprofessional teams to create a strategic planning process to address quality improvement initiatives in a healthcare setting.

Instructional Delivery

The MHM is an online program. Courses are five weeks in length, and there are eight sessions each year. The MHM can be completed in approximately 16 months. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester.

Program chair: Lydia Cavieux, M.P.A., R.H.I.T.

- Lydia.Cavieux@cambridgecollege.edu

Prerequisites

Students are conditionally accepted into the MHM program until GMA 305, Statistics is completed. Students may transfer in the equivalent of this course in accordance with its Transfer of Credit policy or enroll in this course prior to full acceptance into the MHM at NEIB. Students may also test out of the required prerequisite courses by successfully completing a CLEP examination if one is available in the subject area. Other conditions for acceptance may be stipulated for applicants in some instances. Students that are conditionally admitted into the program will be informed of the conditions to be met for full admission status and the deadlines for meeting each condition.

MHM Prerequisite 3 credits

These prerequisite courses may be waived based on undergraduate coursework. A grade of C (2.0) must be obtained in each prerequisite course.

GMA 305 Statistics

Core Curriculum 21 credits

- MBA 501 Strategic Leadership & Management
- MBA 502 Applied Quantitative Methods for Business
- MHM 501 Evolving Healthcare Systems
- MHM 505 Healthcare Law & Policy
- MHM 525 Healthcare Finance & Reimbursement
- MHM 550 Healthcare Operations Management & Quality Assurance
- MHM 570 Long-Term Care in Organizations

Elective Courses 6 credits

Choose two:

- MHM 510 Healthcare Information Systems
- HRM 501 Strategic Human Resources Management
- MBA 505 Managerial Accounting
- MBE 501 Regulations & Regulators
- MBE 515 Enterprise Risk Management

MHM Capstone 3 credits

- MHM 600 Capstone: Strategic Planning in Healthcare

(All courses @ 3 credits except as noted.)

Master's Degree

Master of Human Resources Management (MHRM)

• CIP 5211 • 30 credits

Program Description

This business-based and practitioner-oriented program is designed to provide participants with the knowledge, skills, and abilities needed to lead the human resources management (HRM) function in a wide variety of industries. By offering a thorough education in core HRM disciplines with a focus on HRM as a strategic business partner, it is intended to enhance existing HRM proficiencies and provide students with the ability to develop corporate-level HRM strategies.

Program content maps to the Society for Human Resources Management (SHRM)® HRM competency model, which is universally recognized as the highest professional standard for the practice of human resources. Participants completing this program will have the added benefits of being better prepared for the HR-generalist certification exams (SHRM-SCP/SHRM-CP and SPHR/PHR).

Program Outcomes

Successful completion of this program is designed to prepare the student to:

- Analyze contemporary business problems and from an HR perspective, apply theoretical perspectives to develop economically efficient solutions.
- Identify appropriate metrics and evaluation methods to conduct meaningful quantitative and qualitative analyses to interpret, analyze, evaluate, and report data.
- Integrate theoretical perspectives and research findings to develop and defend a compelling strategic HR plan.
- Evaluate HRM practices from the perspective of a change agent, business partner, and executive-level manager.
- Partner with business units to create and implement HRM strategies that lead to competitive advantages and organizational effectiveness.
- Evaluate the HR implications of corporate-level and business-unit-level strategy formulation and implementation.
- Demonstrate competencies in functional aspects of HRM operations.
- Examine and apply the sophisticated HRM management tools necessary for businesses to survive in the Knowledge Age.
- Lead virtual teams consisting of diverse groups in changing work environments.

Instructional Delivery

The MHRM is an online program. Courses are five weeks in length, and there are eight sessions each year. The MHRM can be completed in 16 months of continuous enrollment. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester

Program chair:

Dr. Carla Patalano, DBA, MBA, SPHR, SHRM-SCP
• Carla.Patalano@cambridgecollege.edu

Prerequisites

Students entering the program with an undergraduate degree in a non-business-related field or insufficient course work in business are conditionally accepted into the MHRM program until an undergraduate or graduate course in Principles of Management is completed. Students with insufficient work experience, at the discretion of the Program Chair, will be required to take GSP 499 Graduate Studies Practicum as a prerequisite. Students may transfer in the equivalent of these courses in accordance with NEIB's Transfer of Credit policy or enroll in these courses prior to full acceptance into the MHRM at NEIB. Students may also test out of the required prerequisite courses by successfully completing a CLEP examination if one is available in the subject area. Students have a maximum of 12 consecutive months to complete any required prerequisite course(s), with a minimum grade of C (2.7). Other conditions for acceptance may be stipulated for applicants in some instances. Students that are conditionally admitted into the program will be informed of the conditions to be met for full admission status and the deadlines for meeting each condition.

MHRM Prerequisites 3 credits

These prerequisite courses may be waived based on undergraduate coursework. A grade of C (2.0) must be obtained in each prerequisite course.

GMG 201 Principles of Management

Core Curriculum 21 credits

- MBA 501 Strategic Leadership and Management
- HRM 501 Strategic Human Resources Management
- HRM 520 Recruitment & Selection for Organizational Excellence
- HRM 530 Total Rewards Approach to Compensation and Benefits
- HRM 540 Talent Management & Development
- HRM 550 Employee & Labor Relations
- HRM 560 Human Resources Metrics & Measurement

Elective Courses 6 credits

Choose two:

- HRM 510 Organizational Change & Stewardship
- HRM 570 Global Human Resources Management
- MBA 505 Managerial Accounting
- MBA 530 Legal & Ethical Dimensions of Strategic Management

MHRM Capstone 3 credits

HRM 600 HRM Capstone

(All courses @ 3 credits except as noted.)

Master of Science

Master of Science in Quality Systems Management (MSQSM)

• CIP 5202 • 30 credits

Program Description

The MSQSM teaches theory that is germane to the discipline while also emphasizing the direct application of what students learn. The MSQSM program emphasizes performance-based education where students acquire the critical knowledge and skills to analyze business practices; create comprehensive plans focused on tangible return on investment, and measure the effectiveness and efficiency of these plans. Since the vast majority of MSQSM students are working in their field, they are then able to apply what they learn to their workplaces, both immediately and over the lifespan of their careers in ways highly akin to other NEIB academic programs.

The skills taught in the MSQSM program can be applied to improve the efficiency and effectiveness of the operation in a range of organizations and industries, including but not limited to healthcare, finance, manufacturing, military, and government. The MSQSM provides strong, metrics- and outcomes-based education for advancing professionals that resonates well with careers in government and the military as well as a wide range of business fields.

Students will have the opportunity to choose one of two options in their final Capstone course. The first option is for students to choose a real-world Lean Six Sigma project with approval from their workplace. A second option is for students to choose an exam preparation track for those that wish to achieve certification for a Six Sigma Black Belt (CSSBB) or a Lean Six Sigma Black Belt certification (CLSSBB). The project and exam tracks are based on the American Society of Quality's (ASQ) Six Sigma Body of Knowledge.

Program Outcomes

After completing this program, the student will be able to:

- Analyze customers' wants and needs within the identified environment and translate those into the customer's requirements.
- Design and implement a data collection plan.
- Analyze the performance of specific processes to include: creating appropriate metrics and collecting data.
- Select and apply the appropriate quality and project management tools and concepts in managing process improvement.
- Analyze the performance of a specific process in order to meet customer and business requirements.
- Identify, evaluate and implement solutions for process improvement.
- Analyze how the internal and external environment impact process improvement.
- Assess how organizational systems impact process improvement.
- Determine practices conducive to sustaining continuous process improvement.
- Identify new opportunities to leverage new systems and technologies.

Instructional Delivery

The MSQSM program is an online program. Courses are five weeks in length and there are eight sessions each year. The program is designed for students to take one course per five-week session, which is equivalent to three courses in a traditional 15-week semester. The program can be completed in 16 months of continuous enrollment.

Core Curriculum 21 credits

- MBA 501 Strategic Leadership & Management
- MBA 535 Operations Management
- MBA 530 Legal & Ethical Dimensions of Strategic Management
- PJM 505 Project Management I
- QSM 525 Quality Systems & Strategic Planning
- QSM 545 Supply Chain Management
- QSM 565 Performance Based Management & Benchmarking

Elective Courses 6 credits

Choose two:

- MBA 505 Managerial Accounting
- MBA 515 Technology & Analytics for Managers: A Strategic Approach
- MBE515 Enterprise Risk Management
- PJM 510 Advanced Project Management
- QSM 543 Business Process Analysis
- QSM 572 Financial Systems & Lean Accounting

MSQSM Capstone 3 credits

- QSM 600 Business Project Capstone

Program chair: John Beirne, MSQSM

- John.Beirne@cambridgecollege.edu

(All courses @ 3 credits except as noted.)

Graduate Course Descriptions

New England Institute of Business
at Cambridge College

ACC 501 Forensic Accounting - 3 credits

Prerequisites: MBE 503. This course offers a thorough examination of the current methods and legal concerns for detection and prosecution of economic crimes. The course walks through the forensic process of initial detection, indictment and finally to gaining a conviction from the accountants' standpoint. Students will study fraudulent financial reporting, misappropriation of assets, indirect methods of misappropriating income, money laundering and cash flows, evidence management, loss valuations, and providing litigation support and testimony. The course examines how prosecutors enable tax code violations, offshore banking violations, and the Rico statutes to gain conviction of fraudulent and illegal crimes. The forensic accountant is the chief tool used in this process from the standpoint of initial detection, information gathering, and supporting the case from an expert witness and subject matter expert.

ACC 520 Forensic Data Analysis - 3 credits

Prerequisites: MBE 503. This course covers the data collection and analysis aspect of forensic science applied to both the accounting and computer world. Most digital evidence is stored within the computer's file system but understanding how file systems work is one of the most technically challenging concepts for a digital investigator because little documentation exists. This course prepares you to understand and be able to testify about how file system analysis is performed. This course begins with an overview of investigation and computer foundations and then gives an authoritative, comprehensive, and illustrated overview of contemporary volume and file systems: crucial information for discovering hidden evidence, recovering deleted data, and validating your tools. Along the way, the course examines data structures, analyzes example disk images, provides advanced investigation scenarios, and uses today's most valuable open source file system analysis tools.

ACC 525 Asset Recovery and Loss Prevention - 3 credits

This course has been designed to introduce students to the basics of loss prevention and asset recovery principles employed within the business industry today. This course functions as a bridge between physical security and computer security as it requires that both be in sync with one another to fully prevent loss within the enterprise. Proven strategies for prevention of fire, crime, error, fraud, and mismanagement actions are presented. The focal point of this aspect of the forensic accounting process is to not only prevent the loss, but also put in place proper tools for recovering a loss if uncovered during an investigation. Strategies for doing this will be provided and discussed in detail during this course. Forensic accountants must be prepared for advances in technology, and the ever-evolving open door that these technologies present from a loss prevention and recovery process

ACC 530 The Forensic Audit - 3 credits

Prerequisites: MBE 503. This course provides an overview of forensic accounting fraud auditing and investigative accounting techniques and tools. Fraud is no simple vice for business. Recent years have seen it grow both in size and complexity, to the point where some estimates place losses due to fraud at well over \$100 billion a year. With the increasing complexity of financial structures and the intensity of business competition, fraud has become harder to detect and more enticing to commit.

Much of the responsibility for the detection of fraud has fallen to the accounting profession, forensic accountants must learn how to recognize its signs early on and how to best approach and investigate potential cases. This course focuses on the investigation, detection, documentation, and prevention of accounting frauds, stock frauds, and employee theft and embezzlement. It provides an in-depth analysis of how fraud occurs within an organization and explains the latest techniques for fighting it.

ACC 550 Federal Taxation for Partnerships & Corporations - 3 credits

The primary goal of this course is to provide students with basic instruction in tax laws as currently implemented by the Internal Revenue Service and to provide a working knowledge of preparing taxes for a partnerships, "C" Corporations, "Sub chapter S" Corporations, and limited liability companies (LLC). Tax related matters including gross income, deductions, losses, credits, tax computations, determination of basis, capital gains and losses, depreciation of business property and tax treatment of installment sales will be covered in this course.

ACC 555 Advanced Auditing Topics - 3 credits

This course focuses on the auditing practices performed by certified public accountants. Students learn the roles of the auditors and the process for how audits are performed. Topics include fraud risk and evaluation of internal controls, audit planning, audit sampling and information technology usage, audit procedures and analytical tests, audit reporting and required communications, non-assurance services, internal audit, and corporate governance's effects on auditing.

ACC 560 Advanced Financial Statement Analysis - 3 credits

The objective of this course is to sharpen the skills you will need to analyze and interpret financial statements effectively. Some of the topics we will cover in the course are earnings quality, off-balance sheet financing, inter-corporate investments and consolidations, equity carve-outs, employee stock options, derivatives, foreign currency translation, leases, pensions, and deferred taxes. We also will delve more deeply into the topics of earnings management and ratio analysis and discuss techniques commonly utilized in the valuation of common stock.

ACC 565 Not for Profit Accounting & Grant Writing - 3 credits

The objective of this course is to expose accounting students to Not for Profit Accounting and the financial reporting associated with the A-133 Audit, IRS 990, and Annual reports. Students will be exposed to grant writing and the accounting of such grants.

ACC 590 Accounting Capstone - 3 credits

Prerequisites: Completion of all other courses needed to meet degree requirements. This is the final course in the MACC program. Using a complex business problem, students explore "real world" accounting work.

HRM 501 Strategic Human Resources Management - 3 credits

Prerequisite: MBA 501: Strategic Leadership and Management. This course compares where human resource management (HRM) is now and where it needs to be in the future based upon needed strategic HR competencies, as outlined in the Ulrich (HRCS) model. The focus of the course is to identify the changes that HR needs within the HR field itself, to be perceived as a valued, strategic, business-savvy partner. From there, students identify ways they can partner with HR to meet business objectives. Students will complete a complex course-long project where they interview current HR practitioners and use the SHRM membership to gain insight into and create a dynamic presentation for a newly onboarded HR team. that serves as the cornerstone for a signature experience that communicates the HR competencies and how they are operationalized

HRM 510 Organizational Change and Stewardship - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. The purpose of this course is to enable students to develop skills needed to lead and/or facilitate complex organizational change. Students will explore the role that HRM can play as the organizational steward and change agent by evaluating the ethical and organizational culture implications of human resources management decisions. Areas of focus include stakeholder analysis, corporate social responsibility and sustainability, and ethical practices.

HRM 520 Recruitment & Selection for Organizational Excellence - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. This course focuses on the strategies and tools that human resources professionals use to create organizational excellence, by identifying high quality talent, creation of technological strategies to recruit high quality talent and employing valid selection measures for hiring and other staffing decisions. A large focus of the course is on creating an employment brand.

HRM 530 Total Rewards Approach to Compensation & Benefits - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. This course is an exploration of the process of creating a total rewards approach to compensation and benefits, from design, to communication, implementation, and operation of a total rewards program, including organizational compatibility, legal compliance and program efficacy. Topics also include compensation and benefit fundamentals, job analysis, linking pay to performance, employee motivation, and performance appraisal.

HRM 540 Talent Management & Development - 3 credits

Prerequisite: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. This course covers the theories and techniques to enable learning and development from strategic and operational perspectives, focusing on the development of systems that will provide the highest levels of employee development, growth within the organization. A significant emphasis is placed on the role of the L&D function in fostering employee engagement and supporting and enhancing the employment brand. Contemporary approaches to onboarding, learning, and development as part of a retention strategy, succession planning and utilization of technological systems to support these functions within human resources planning will also be examined.

HRM 550 Employee & Labor Relations - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. This course offers an introductory overview of employee-employer relations in unionized and non-unionized settings. The course is divided into three parts: labor relations laws and the processes of union organization and collective bargaining; employee rights in the workplace, including rights to employment-at-will, privacy, safety and security, and protection against defamation; and strategies used by non-union and union companies to improve employee engagement and commitment. Consideration will also be given to the role of human resources managers in these activities and the relevance of unions in the modern workplace.

HRM 560 Human Resource Metrics and Measurement - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. As organizations are continually faced with maintaining their competitive advantage amidst a variety of environmental and business challenges, it is imperative that HR practitioners have a comprehensive understanding of the ways in which the workforce influences the business. In order for HR to embrace the challenge of being a true business partner, it needs to not only be conversant in a full range of HR metrics but also able to use the vast amounts of data produced to analyze and report workforce and human capital trends and patterns. As the HR function becomes more strategic, it is critical for HR professionals to gain mastery over a wide range of measurements and metrics surrounding how workforce data can be used to better inform decision making, promote return on investment (ROI), improve performance, and impact business outcomes.

HRM 570 Global Human Resource Management - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; HRM 501: Strategic Human Resources Management. Global human resources deals with all aspects of human resource management in international contexts, including US-based companies doing business internationally or non-US-based companies doing business outside their home countries. Global human resource specialists are responsible for managing talent-related issues that impact global effectiveness, including global staffing, international compensation, global training and development, global mobility services, employee relations, and immigration and employment laws. Students will explore the challenges posed by rapid globalization of business, and their impact on creating and implementing strategic HRM decisions in a global business environment. Topics are framed within the context of global markets, global security, ethical practices, managing an international workforce and diversity.

HRM 600 HRM Capstone - 3 credits

Prerequisites: Completion of all MHRM courses or permission of college. This course is the culmination of the student's academic and professional experience, whereby students will integrate the course work they have completed in Global Human Resources Management, HRM Metrics, Total Rewards, Employee & Labor Relations, etc. Students will identify and analyze specific, real-world organizational challenges; ultimately developing a strategic HRM plan based focusing on strategic problem resolution and effective implementation.

PJM 505 Project Management I - 3 credits

This course explores both the theory and the practice necessary to successfully assess and manage projects. Students will learn the terminology, processes, and key concepts that are essential to effective and efficient project management based on industry standards set by the Project Management Institute (PMI). They will explore the project's life cycle and examine important project components—such as integration management, scheduling, costing, quality, control, risk management, procurement, and stakeholder engagement. The course offers interactive lectures, exercises and case studies, based on the “Guide to the Project Management Body of Knowledge” or the “PMBOK Guide 6th edition” therefore if students choose to pursue their PMI Project Manager Professional (PMP) or a Certified (CAPM) certification, this course is designed to be a pathway to pass the exam. This course is part one of a two-part sequence: PJM 510 Project Management II is the second course in the sequence.

PJM 510 Project Management II - 3 credits

This course explores both the theory and the practice necessary to successfully assess and manage projects. Students will learn the terminology, processes, and key concepts that are essential to effective and efficient project management based on industry standards set by the Project Management Institute (PMI). They will explore the project's life cycle and examine important project components—such as integration management, scheduling, costing, quality, control, risk management, procurement, and stakeholder engagement. The course offers interactive lectures, exercises and case studies, based on the “Guide to the Project Management Body of Knowledge” or the “PMBOK Guide 6th edition” therefore if students choose to pursue their PMI Project Manager Professional (PMP) or a Certified (CAPM) certification, this course is designed to be a pathway to pass the exam. This course is part two of a two-part sequence: PJM 505 Project Management I is the first course in the sequence.

MBA 501 Strategic Leadership and Management - 3 credits

Prerequisite: Acceptance into a graduate program or permission of the college. Drawing mainly from the fields of Psychology, Business, and Management, this course is designed to expose students to foundational theories, conceptual frameworks, methodologies, and business strategies they will use throughout their studies. Based on the premise that leadership and management skills can be learned, students will examine various theoretical constructs as a means of becoming more aware of their own leadership styles, and apply strategic business models to improve leadership and management skills in others. Students will identify and apply strategic models to analyze business problems, formulate strategic solutions, and make sound decisions.

MBA 502 Applied Quantitative Methods for Business - 3 credits

Prerequisite: Acceptance into the MBA or MSF program or permission of the college. This is an applied regression analysis course in the theory and application of regression analysis of economic and other social science data. It is designed to build on the basics of introductory statistics so that students can apply advanced regression analysis techniques and demonstrate the ability to do hypothesis testing. Students develop the necessary skills to build a parsimonious model that conforms to the assumptions of classical linear regression (CLR). The course is intended to provide more of a “hands on” than theoretical approach to quantitative analysis. Students transform data to test hypotheses using different forms of regression analysis. This analysis is evaluated for attributes of a good model (parsimony, identifiability, goodness of fit, theoretical consistency, and predictive power). During a students' evaluation of model specification, they learn how to identify and address violations of (CLR). At the completion of this course, students will have the ability to perform and evaluate quantitative analysis.

MBA 505 Managerial Accounting - 3 credits

The course covers concepts in managerial accounting ethics, cost-volume-profit analysis, cost behavior, methods of product costing and cost behavior, activity-based management, budget decision-making, reporting, and determining transfer prices between segments of a business organization. Traditional and modern cost analysis and management are examined through real world examples and decision cases. The new measures for relevant costs and performance reports are prepared with reporting alternatives by segment, activity-based and flexible budgeting and the balanced scorecard.

MBA 520 Strategic Marketing Management - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; MBA502: Applied Quantitative Methods for Business. This course explores the role that marketing management plays in the overall strategy of an organization. Students will learn to analyze market data to design effective, long-range marketing strategies, evaluate alternatives and create an implementation plan to guide a business through a dynamic, competitive business environment. Topics include segmentation, positioning, and marketing mix issues as a part of strategic marketing planning. The course also discusses analytics, agile marketing, and other contemporary trends in strategic marketing.

MBA 525 Managerial Economics - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; MBA502: Applied Quantitative Methods for Business. This course introduces the fundamental concepts of economic principles behind supply and demand, opportunity costs and market price and applies them to decisions made by businesses. The course focuses on three key topics. They include production and cost theory, market structure and pricing, and game theory and conducts microeconomic analysis, which deals with models of economic behavior of the consumer and the firm, and provides a basic understanding of firm and industry behavior that serves as a basis for business decision making.

MBA 530 Legal and Ethical Dimensions of Strategic Management - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; MBA502: Applied Quantitative Methods for Business. Business activities are governed by a dynamic landscape of rules derived from state and federal constitutions, statutes, administrative regulations, and decisional case law. The role of ethics in business decisions cannot be underestimated or undervalued. This course explores the how corporate citizenship, ethical business practices, and leadership form an integral part of corporate and individual decision-making. This course will explore these rules, how laws and regulations affect business, and the primary role of business ethics.

MBA 535 Operations Management and Supply Chain Management - 3 credits

Prerequisites: MBA 501: Strategic Leadership and Management; MBA502: Applied Quantitative Methods for Business. This course is a survey of the strategic concepts and quantitative tools used in operations and supply chain management. The objective of the course is to provide the student with insights into the issues, models, and methods used throughout operations management to improve the competitive advantage of the organization. Topics include total quality management, process improvement, project management, supply chain management and logistics, and specific quantitative tools including forecasting, critical path method, decision theory, queueing/waiting lines, and statistical process control.

MBA 541 International Business and Global Strategy - 3 Credits

Prerequisites: MBA 501: Strategic Leadership and Management; MBA502: Applied Quantitative Methods for Business. This course examines the inner workings of International Business from a strategic point of view. It includes the various challenges of operating in a global environment, including cultural, economic, operational, and legal aspects. It also reviews the concepts of global expansion, political complications, legal compliance, and ethical behavior. Students will explore the internal process of global business expansion and apply strategic paradigms to analyze, develop, and provide a comprehensive course of action.

MBA 545 Capstone: Strategic Planning & Decision Making - 3 Credits

Prerequisite: .Completion of all other courses needed to meet degree requirements. In this course MBA students demonstrate a broad mastery of the knowledge and skills gained throughout the program. This six-week class is a combination of a traditional class and a workshop. The workshop aspect includes participation in a simulation where teams of students craft an overall strategy and select tactics to build a successful, focused organization. Throughout the simulation, participants work in teams, competing against each other and/or the computer, as they guide their companies through six years of competition in an evolving market. Students analyze performance data from the year before and make strategic decisions designed to move their company towards success which requires them to look at an important issue through various lenses. The workshop closes with shareholder debrief presentation, peer review and comprehensive examination. The class closes with a reflection paper.

MBE 501 Regulations and Regulators - 3 credits

This course is designed to provide a broad understanding of the philosophy, history and context of regulations and regulatory agencies within various industries, including, but not limited to financial services, healthcare, and human resources. Students will evaluate and assess the external role of the compliance process, including federal, state, and local regulatory agencies. Students will study the complex regulatory environment that has recently grown in an effort to safeguard the public's personal information and prevent abuse within various industries.

MBE 503 Accounting & Ethics - 3 credits

This course's aims are two-fold: first, to provide students with a basic understanding of accounting methods as they are used for financial reporting and managerial control purposes; second, to provide students with a fundamental understanding of the role that our financial accounting system plays as a motivator and driver of managerial behavior. This course is suitable for both those experienced and unexperienced in accounting.

MBE 510 Governance, Ethics, and Compliance - 3 credits

This course aims are to provide students with a basic understanding of corporate governance as a term and as a practice involving relations between a firm's executive leadership, its governing board, and its stakeholders including shareholders and others who have an interest in the oversight of the entity. The course explores various governance models practiced in the US including both for-profit and non-profit and looks at the role and responsibilities of each of the parties in these relationships both as set down in the legal code and as suggested by current best practice. The role of various board committees will also be discussed along with their relationships with the regulatory agencies such as the SEC. A fundamental part of the course is a discussion of the 'purpose of a corporation' and of the various perspectives held by prominent thought leaders in the US on this subject. The course will also look at changes made in board practices following the Sarbanes Oxley legislation in 2002 and at recent trends in corporate governance.

MBE 515 Enterprise Risk Management - 3 credits

The purpose of this course is to understand the broad overview and perspective of risk management and both its theoretical and practical applications to corporate compliance issues, policies, and procedures. The course seeks to put Governance, Risk Management, and Compliance in context by providing an introduction and foundation to risk management.

MBE 525 Fraud Examination and Techniques - 3 credits

This course introduces the basic fundamentals behind fraud and its impact on the business world. It aids in gaining an understanding of the significance of fraud in the modern accounting world. This course prepares you to identify, detect, investigate, and prevent financial fraud. It outlines the nature of fraud and the different types of fraud, to include unique e-business fraud that is now possible in today's technological world. This course also touches on cutting edge elements of data analysis in fraud detection as well as the investigation and concealment of information. It will explore consumer fraud activities, as well as tax fraud strategies and methods. A specific focus will be on the financial statement fraud standards to include SAS 99 and Sarbanes Oxley impacts.

MBE 540 Corporations and Compliance: Case Studies - 3 credits

Prerequisites: MBE 501. The purpose of this course is to identify and assess both how corporations "went wrong" and what corporations consistently "do right" in business ethics and corporate compliance. Students will identify specific areas of regulatory and non-compliance based on actual case studies. They will also examine specific corporate policies and procedures which have been successful in creating a positive and productive corporate compliance culture.

Each week, two of the case studies or articles in the reading sections will be tied to a discussion board question. This gives students an opportunity to discuss each reading topic with the professor and classmates.

MBE 550 Conducting Internal Investigations- 3 credits

Most executives and HR professionals will have to conduct at least one formal investigation during their careers. Many will have to do so on numerous occasions for reasons such as theft, drug use or possession, discrimination, threats, assaults, or sexual harassment. This course is a guide to conducting thorough and lawful internal investigations. Investigative legal ramifications, principles, and techniques will be examined.

MBE 555 Legal Issues: Employee and Labor Relations - 3 credits

In this course, students consider the connections between employment issues and product markets, labor markets, and business strategies. The focus is on the effect of the constantly changing relationship between employers and their workers. Topics discussed include the complex structural, behavioral, and legal environment of management-employee relations with attention both to working with labor unions and to employee relations in settings in which workers are not collectively represented.

MBE 560 The Culture of Ethics - 3 credits

This course aims to provide student with a basic understanding of ethical theory and ethical decision-making. It begins with an introduction to several concepts in ethical philosophy. The psychological aspects of ethical decision-making are then introduced, along with ethical and social dilemmas. Concepts covered include ethical perspectives such as objectivism vs. realism and consequentialist theories such as utilitarianism. Students will look at how ethical reasoning can be impacted by individual psychologies such as unconscious bias, perceptions of fairness, future discounting, and in-group favoritism. The course will also allow students to explore ethical and social dilemmas such as 'tragedy of the commons' and the 'prisoner's dilemma'. Students will also be presented with practical examples of how these ethical principles and social dilemmas impact the business environment and business decision-making. The course ends with an exploration of the application of ethical principles to the business world and to the ethical cultures that prevail in many of our business institutions.

MBE 565 International Business Ethics and Compliance - 3 credits

Prerequisites: MBE 501- Regulations and Regulators & MBE 510- Governance, Ethics, and Compliance. Different legal, political, and business models have grown up in different parts of the world. Companies wishing to successfully operate outside of their own national boards and systems are finding themselves increasingly required to adapt to both international and foreign national standards of law, business practices, and ethics and conform their original business model to international and foreign national regulatory bodies. This course is designed to prepare students to understand practical ethical and compliance problems and phenomena which arise out of specific functional areas of companies or in relation to recognized business professions such as accounting, human resources, sales and marketing, production and intellectual property in a multinational corporation.

MBE 580 Strategy, Missions & Governance - 3 credits

This course explores the relationship between firm strategy and external environmental factors such as societal norms, governance frameworks, consumer expectations, and supra-national guidelines. Specifically, the course introduces students to the concept of 'corporate social responsibility' (hereafter CSR) along with firm strategies, governance mechanisms, and implementation approaches that explicitly integrate CSR concerns. Labeled as 'win-win' strategies, these approaches treat the externalities of economic activity, such as environmental damage or social displacement, not as costs to the firm, but as opportunities for cooperation and development. They also represent examples of how corporations can contribute to addressing some of the world's more pressing problems through partnership and innovation.

MBE 581 Corporate Stakeholder Relations & Communication - 3 credits

Prerequisites: MBE 510. Approached from a corporate communications perspective, students are provided with techniques for successfully managing and communicating with firms' stakeholders. The course looks at the range of communication outlets that require attention in various firm-stakeholder contexts, including negotiations, crisis management, stakeholder protest, etc. Students also explore potential areas of misunderstanding and conflicting priorities that underlie contentious firm-stakeholder relations and study examples of companies that have turned around situations that risked the reputation and legitimacy of the firm.

MBE 582 Measuring and Monitoring ESG Performance - 3 credits

Prerequisites: MBE 503. Increasingly firms are being asked to account and report on their performance in the social, environmental and governance realms. To be more than simply anecdotal accounts, firms are developing approaches to measure and monitor their performance. This course looks at the recent history of non-financial reporting, explains the nature of investor and stakeholder expectations for ESG reporting systems and at the various systems now in use including the GRI, the ISO standards, as well as voluntary agreements such as the UN Compact for corporations or the PRI for the investment community.

MBE 583 NGOs, Consumer Advocates & Issues Management - 3 credits

This is a hand-on course on how to manage partnerships with communities, charity organizations, and special interest groups. Students learn about ways to work with non-profit groups to improve relations and develop community-targeted projects. They are also exposed to the different forms of association or partnership that are appearing in order to provide structure and effectively manage the resources needed to achieve the goals set for collaborative ventures between business and the non-profit world.

MBE 600 Capstone: Ethics and Compliance - 3 credits

Prerequisites: Completion of all other courses needed to meet degree requirements. The purpose of this course is to allow students to cement their learning through the completion of a comprehensive project. Students will engage in individual or group projects as a means of learning how to implement the concepts covered in their degree work. Assignments are designed to turn theory into practical application and the final project will be tailored to the career area the student is pursuing.

The Capstone extends over two Sessions for a total of eleven weeks. An exception is made to NEIB's usual policy concerning simultaneous enrollments. During the first session of this two-session course; students may enroll in another course while simultaneously being enrolled in the Capstone course. During the second session of this two-session course, students must be enrolled only in the Capstone course.

MSF 500 Financial Markets - 3 Credits

Prerequisites: Acceptance into the MBA or MSF program or permission of the college. This course explores the features and functions of the key financial markets along with the institutions that serve the markets. Specifically, this overview compares and contrasts the equities, debt, money, and mutual fund markets. It analyzes the individual markets, as well as the interaction among them. The course also focuses on the Federal Reserve System: its integration with the investment market industry and how it affects economic conditions.

MBA 502 Applied Quantitative Methods for Business - 3 Credits

Prerequisite: Acceptance into the MBA or MSF program or permission of the college. This is the first or second course which MBA and MSF students take in the graduate program. It provides an applied approach to the use of quantitative models in managerial decision analysis. The course focuses on data collection, testing, analysis, and presentation of research findings. Upon completion of the course, students should be able to utilize statistical data in decision making, apply regression analysis techniques, demonstrate the ability to perform hypothesis testing, and build statistical models using Excel spreadsheets. Mid-Level working knowledge of Microsoft Excel is necessary to successfully complete the course.

MSF 505 Managerial Finance-3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This is the first or second course that MSF students take in the graduate program. This course deals with managing business funds and planning their use to accomplish organizational objectives. The primary objective of this course is to introduce the fundamental skills required to manage the financial aspects of a business as well as create and maintain organizational value. The main topics include: time value of money; financial statement analysis; valuation concepts; Weighted Average Cost of Capital (WACC); capital budgeting techniques; uncertainty & trade-off between risk and return; and the Security Market Line (SML). Basic working knowledge of a financial calculator and/or Microsoft Excel is necessary to successfully complete the course.

MSF 510 Investment Management - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This course provides in-depth analysis of the securities industry. It will describe and compare the different types and features of advanced securities such as mortgage backed, asset backed, and derivatives. The course introduces a securities market model describing the various participants such as banks, brokers, insurance companies, and investment advisors. Within this model, business and system requirements for investment management and trading, custody, and securities processing, and securities accounting are described in detail.

MSF 540 International Finance - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. International Finance will introduce students to global financial markets and operations of multinational firms. Topics to be discussed will include foreign exchange markets, international financial markets, international banking, international trade tariff and quotas, Euromarkets, and investment decisions in the global marketplace.

MSF 545 Financial Modeling - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. Purpose: In this course, students will develop and build comprehensive financial models relative to various corporate finance and investment scenarios. Through active learning, students will build models relative to amortization, the time value of money, financial derivatives, and option pricing. Students must have a mid-level working knowledge of Microsoft Excel prior to entering the course. Basic knowledge of Microsoft Visual Basic for Applications (VBA) is also helpful. This course serves as a compliment to Managerial Finance and Financial Derivatives.

MSF 547 Global Currency Management - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This course provides students with a comprehensive understanding of how foreign exchange (Forex) currencies are traded in both professional and retail markets and what causes currency values to rise and fall. The course examines the major players within the Forex market – banks, brokers, fund managers, hedge funds and retail traders – and explores the dynamics between these participants. It also investigates techniques to evaluate and trade FX for risk mitigation or speculation, exploring the use of futures, forwards, swaps and options to achieve these aims. Major macroeconomic data releases, political and central bank speeches are investigated, and their effects on Forex markets are analyzed, often in real-time. This course also introduces and examines fundamental and technical analysis techniques to forecast potential future exchange rate moves. As part of the course, students will be provided with a \$50,000 demo trading account to enable them to apply learned knowledge to real-time Forex markets.

MSF 550 Financial Derivatives - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. The course is designed to foster an understanding of derivatives, primarily forwards, futures options, swaps, collateralized debt obligations, and credit default swaps. This is achieved through an introduction to the basic techniques of pricing and trading. The course also focuses on the usage of these instruments for speculation and risk management.

MSF 557 Financial Trading and Management - 3 Credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This course is designed to develop and expand the techniques introduced in MSF547 to investigate additional asset classes and more advanced analysis techniques. Additional technical analysis indicators will be introduced, enabling students to evaluate price momentum and trend strength in more detail, as well as additional asset classes such as commodities and stock indices. Putting together this new-found knowledge, students will continue to trade their \$50,000 demo trading account as they develop their trading strategies. Additional options strategies will be introduced to identify more advanced methods of speculation and hedging of risk exposure. Students will be required to monitor and record their trading activity and use this information to critically evaluate their own trading performance.

MSF 560 Trading Psychology & Risk Management - 3 credits

Prerequisites: MSF 547: Global Currency Management; MSF 557: Financial Trading and Management. All human beings are hard-wired to behave in a certain way, given certain stimuli and situations. However, traders and investors need to adapt their behavior to become successful. This course studies a range of human emotions and the effect of crowd behavior on financial markets; what makes people think and behave as they do and how this (somewhat predictable) behavior can be used to forecast market movements and enhance trading profits. The course also examines individual psychological biases and explains how to recognize the reasons that cause traders to make predictable errors in their analysis & trading. The course examines how to identify these biases and how to avoid falling into emotional traps when trading. The course also explains how to recognize, assess and manage potential burn-out in traders, and how to help them return to profitability after a performance slump.

MSF 570 Financial Ethics and Compliance - 3 credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This course examines the state of ethics in the financial industry. Students will observe how the culture of the finance industry serves as an impediment to ethical behavior and compliance with current regulations and propose solutions to finance-related ethical dilemmas. These issues will be critically analyzed relative to agency relationships, market transactions, fiduciary responsibility as well as SEC and FINRA regulation of investment activity.

MSF 580 Insurance and Risk Management - 3 credits

Prerequisites: MSF500: Financial Markets; MBA502: Applied Quantitative Methods for Business. This course identifies and evaluates business and personal risk using insurance as a risk management tool. Students will study introductory and advanced topics in risk management as well as life, health, property, and liability insurance with their related legal and compliance issues.

MSF 600 Finance Capstone - 3 credits

Prerequisites: Completion of All Other Courses in Program. The Finance Capstone is the final course in the MSF Program. The purpose of the course is for the student to demonstrate a broad mastery of the knowledge and skills gained throughout the program. Through a combination of theoretical and applied financial concepts and techniques, the expected outcome of the course is the production of a high quality investment analyst report on par with those seen in the financial press. This final project should demonstrate the student's expertise in the field of finance.

MHM 501 Evolving Healthcare Systems - 3 credits

This course presents an overview of the organization and structure of the U.S. health care system. The core concepts of cost, access, and quality will be explored as well as introducing how healthcare is financed and delivered. The technical, economic, political and social forces responsible for changes in the health care system will be discussed in addition to addressing the management of organizations that deliver health care services such as independent practitioners, hospital facilities, nursing homes, and multi-specialty clinics. This introductory foundation will provide students the core knowledge needed to be successful in a diverse healthcare management environment.

MHM 502 Quantitative Methods and Metrics - 3 credits

Prerequisites: GMA305 or Statistics Course. This is an applied statistics course that builds on a foundational knowledge of basic statistics. Students will apply a sequentially developed group of statistical tests (z scores, t-tests, ANOVA, and regression) to healthcare scenarios. Students develop the necessary skills to identify the unique characteristics of each test and recognize which test to use based on the parameters of the data. At the completion of this course, students will have the ability to perform and evaluate quantitative analysis. Additionally, this course will discuss the quality metrics that are evaluated in contemporary healthcare settings.

MHM 505 Health Care Law and Policy - 3 credits

Health Care Law and Policy surveys the legal environment of the health services industry from a policy perspective. The course exams case law, statutory and regulatory analysis, and trends in health services delivery law to focus on the overall legal relationships among physicians, personnel, patients, and health care institutions. Topics include access to health care, antitrust law, personnel licensure, and institutional accreditation, malpractice, professional and institutional liability, cost containment regulation, and cost controls in government programs. This course discusses the philosophical and managerial implications of ethical issues including professional codes, resource allocation, and decisions concerning impaired professionals.

MHM 510 Healthcare Information Systems - 3 credits

This course provides a broad overview of the evolving role of information systems within a wide range of healthcare settings, taking into account both patient and practitioner perspectives. Students critique the impact that healthcare information systems have on decision-making, reporting, managing healthcare costs, and improving patient outcomes. Legislation and regulatory requirements that affect healthcare IT, such as HIPAA, electronic health records, and healthcare policy are evaluated. Finally, innovations in health informatics are explored and their impact on current practice.

MHM 515 Human Resources Management for Healthcare Professionals - 3 credits

This course addresses the key issues facing the Human Resources (HR) professional within today's multifaceted healthcare organization. Throughout the course, students will compare where human resource management (HRM) for healthcare is now and where it needs to be in the future based upon needed strategic competencies and address ways in which HRM can partner with the organization to meet business objectives.

MHM 520 Managerial Accounting for Healthcare Professionals - 3 credits

In this course, students learn how to use decision-making tools from managerial accounting that promote the strategic goals of various healthcare organizations including hospitals, outpatient services, and insurance providers. Students identify relevant costs and cost pools as they relate to performance measures. Topics are addressed within the context of their effect on patient outcomes, financial health of the organization, and ethical considerations. Traditional concepts such as cost behavior, cost-volume-profit (CVP) analysis, and activity-based costing (ABC) are applied to health care examples and cases. As part of this application, students develop a balanced scorecard that tracks key drivers of organizational performance.

MHM 525 Healthcare Finance and Reimbursement - 3 credits

An understanding of healthcare finance and reimbursement is a driving force behind the ability to survive in today's healthcare environment. This course addresses key areas for professionals who are working or desire to work in this industry. The course begins with a study of the revenue cycle management process, the lifeblood of a healthcare facility. Next, reimbursement models, to include study of emerging trends and processes, are analyzed in terms of maximizing payments to entities. Long-term care facilities, along with physician practices, provide an extension to the acute care model, so professionals are introduced to current financial issues, along with emerging trends, within these organizations. The course ends with an in-depth review of current trends and technologies that are affecting healthcare finance and reimbursement, to include electronic medical records (EMRs) and the increased focus related to the identification and elimination of fraudulent financial practices within the healthcare industry.

MHM 550 Healthcare Operations Management and Quality Assurance - 3 credits

This course focuses on achieving excellence in healthcare operations management and the strategic implementation of programs, techniques, and tools for reducing healthcare costs, improving quality and performance, and improving patient flow, safety and satisfaction. In this course the student reviews the role of operations management in the healthcare industry by understanding the factors that affect operations performance outcomes within healthcare organizations; methods to assess, monitor, adjust, and improve clinical and administrative performance; and management techniques and tools of quantitative analysis of operations and decision support. This course covers the basics of operations management and explains how operations and process improvement relate to contemporary healthcare trends such as evidence-based medicine, lean management, Six Sigma, capacity management, supply chain, project management, staffing, scheduling, and pay-for-performance.

MHM 565 Risk and Regulatory Compliance - 3 credits

As introduced in MHM501, regulatory oversight is significant for healthcare organizations and requires advanced compliance management. Students review current federal laws and regulations that affect healthcare organizations and focus on concepts for organizing and implementing compliance and risk management. Students will be able to analyze the wide range of regulations that affect the different areas of the healthcare industry and create guidelines for implementing effective programs to ensure compliance with them.

MHM 570 Long-Term Care in Organizations - 3 credits

This course examines the delivery of Long-Term Care (LTC) within various health care settings. It reviews the implications of longevity found within demographic data while analyzing the need for further governmental intervention and the allocation of funds required to effectively administer care to an aging society. This course provides an overview of long-term healthcare issues and the healthcare delivery programs designed for an aging population. Topics include the organizational arrangements for providing long-term care, the services provided in long-term care facilities, gerontology, and geriatric medicine, social and behavioral aspects of the aging, and the roles of healthcare providers working with the elderly. Upon successful completion of this course, students will be able to identify the different types of organizations, populations, and services that make up the long-term healthcare system; discuss the impact of the elderly on the healthcare system, and describe the complex needs and unique aspects of caring for elderly patients.

MHM 580 Leadership in Healthcare - 3 credits

This course examines the dynamic nature of leadership in the healthcare and public health contexts. This course uses foundational leadership concepts to develop leadership applications and processes, such as leadership assessment (individual and team), communication improvement, strategic planning, decision making alignment, employee enhancement, and knowledge management for use in creating and maintaining an organizational culture that can thrive within its external environment while improving organizational efficiency, effectiveness, and efficacy.

MHM 600 Capstone: Strategic Planning in Healthcare - 3 credits

Prerequisites: Completion of All Other Courses in Program. The goal of the course is to have students demonstrate a broad mastery of the knowledge and skills gained throughout the MHM program. This class is a combination of a traditional healthcare strategic management class and a final research project. The project requires students to examine an external healthcare organization and apply healthcare strategic management techniques to support a successful organization and the provision of increased quality of care. Students will identify and analyze specific real-world organizational challenges associated with managing an organization, in light of policy mandates; ultimately developing a research project focusing on strategic problem resolution and effective implementation.

QSM 535 Operations Management - 3 credits

Operations Management encompasses the methods and practices used to systematically plan, design, and execute the processes necessary to deliver services or produce tangible goods. Within the study of Operations Management there is a range of procedures and ancillary systems (i.e. purchasing, project management, training) necessary to manufacture materials or deliver services whether in the for profit or non-profit sectors. This course presents an overview of operations management from manufacturing and service delivery perspectives and looks back at the origins of the function as well as reviewing current best practices including operations and sustainability.

QSM 525 Quality Systems and Strategic Planning - 3 credits

QSM 525 introduces Six Sigma DMAIC (Define, Measure, Analyze, Improve, and Control) process and the associated quality tools that are used to assess and improve business processes. The course explores the role of quality in the strategic planning process. Strategic Planning is a process of articulating and envisioning a desired future and developing the procedures to mobilize the organization to achieve that future. This course introduces strategic planning methods and tools within the context of quality systems thinking and places emphasis on planning strategies that will help organizations shape their own future rather than passively wait for the future to shape them. This course will address basic definitions and methods, the typology of planning, the process of envisioning, how to overcome barriers to strategic planning and finally key implementation strategies and lessons learned from real-life public and private organizations.

QSM 543 Business Process Analysis - 3 credits

QSM 543 will explore Lean Thinking, Value Stream Mapping, and the best practices in Quality Production Systems. Students learn how to identify their organization's value stream and how it fits into their division's value stream. Current State and Future State maps are created. Opportunities for improvement are graphically displayed, waste is identified, and business process solutions are developed with a linkage to the data. Instruction is provided in throughput improvement methodologies, including throughout analysis, and Just-in-Time production, as applied to business and manufacturing processes.

QSM 545 Supply Chain Management - 3 credits

This course introduces supply chain management practices within the context of systems and process thinking and places emphasis on planning strategies that help organizations optimize material, information, and workflow. Topics include the Supply Chain Fundamentals, Supply Chain Operations Reference (SCOR) Model, Strategic SCM initiatives, Supply Chain Integration, Supply Chain Maturity and Networks, and best practices that characterize best in class companies. Class discussion and case studies are an important part of learning and students will be asked to relate supply chain management approaches to their own organization. Tools and techniques for understanding, analyzing and redesigning supply chain systems and processes and their networks will be discussed and practiced.

QSM 565 Performance Based Management and Benchmarking - 3 credits

Students learn the concepts of the Baldrige Criteria, Performance Excellence and benchmarking principles. Topics include an overview of quality-based systems management, process redesign, process mapping, performance benchmarking, process flow comparisons, and contemporary applications such as High Reliability Organizations (HRO) and performance outcomes. Teams of students complete an actual process improvement at a company or organization.

QSM 572 Financial Systems and Lean Accounting - 3 credits

Application of financial business theory and assessment of the cost elements of implementing systems and processes that promote the highest standards of quality are the core concepts of this course. The focus is on cost accounting and understanding the hidden cost of inefficiency and internal and external failure. It is also focused on the financial implications of Lean operations, as well as assessing and calculating the cost benefit analysis resulting from process improvements and reducing costs due to substandard service, failure of products or defects.

QSM 599 Business Project - 3 credits

The Master's Business Project (MBP) offers students a disciplined approach for pursuing quality improvement initiatives and programs of core organizational processes by helping them to identify root causes of process problems and applying evidence-based quantitative and qualitative methods and tools to measure, monitor, and improve performance. The MBP provides a real-life learning experience where the student applies the best business practices in an organizational setting to obtain desired process outputs and outcomes. Students work closely with faculty to identify a difficult, chronic, and important problem within an organization for which solutions have not been found. Faculty, student and sponsoring organization work closely together to research and analysis of key business processes and recommend process improvements.

RMI 530 Liability and Property Risk Management and Insurance - 3 Credits

This course provides students with an in-depth understanding and knowledge of Liability and Property Risk Management & Insurance. Students acquire an understanding of liability loss exposure and the law of negligence. The course provides a survey of auto and homeowners insurance products. Students study other property and, liability insurance coverages including inland marine floaters, ISO dwelling program, government property insurance programs, business income, personal liability policy, transportation insurance, commercial general liability policy, workers compensation insurance, aircraft insurance, professional liability insurance, crime insurance, and surety bonds, and commercial crime coverage. Students learn to utilize liability and property policies as important means for risk management.

RMI 540 Life & Health Insurance - 3 credits

This course provides students with an in-depth understanding and knowledge about the principles on which life and health insurance are based. Students develop an understanding of the role and importance of life and health insurance in our society, and to provide an introductory overview of life and health insurance products and pricing concepts.

RMI 550 Retirement Planning & Employee Benefit Plan Design - 3 credits

This course analyzes retirement planning and employee benefits. Students study the important steps and different aspects of designing, developing and planning an effective employee benefits program. The course covers a wide array of essential topics for developing and planning a cost-effective employee benefit plan including, health insurance, compensation, and benefits packages, self-funding vs. insurance, taxation, and forecasting. Moreover, it offers benchmarking costs and plan performance.

RMI 560 Insurance Company Operations, Qualification, and Underwriting - 3 credits

Students study the fundamentals of insurance companies' operations covering business development and customer acquisition, product development and distribution, underwriting, claim administration, solvency management, reinsurance, and information management. Students gain an in-depth understanding of the important strategic decisions made by executives and day to day management of the operations of an insurance company.

RMI 580 Insurance & Risk Management - 3 credits

This course identifies and evaluates business and personal risk using insurance as a risk management tool. Students will study introductory and advanced topics in risk management as well as life, health, property, and liability insurance with their related legal and compliance issues.

RMI 600 Risk Management & Insurance Capstone - 3 credits

Students are provided the opportunity to showcase their acquired knowledge through the RMI program to research and prepare a comprehensive Risk Analysis Report for an enterprise. They conduct a risk assessment to identify the company's risks and recognize the controls to mitigate and reduce risks. Students devise a risk management plan with a risk assessment matrix complemented by insurance policies.

Main Campus

New Location, New Facilities, New Opportunities

Cambridge College opened its new campus in Boston's historic Charlestown in Fall 2017. Located in the heart of this vibrant neighborhood, the new campus sits in the original home of the quintessential New England diary company H.P. Hood and Sons, and is part of a mixed-use master plan strategy for the several acre site. The modern and expansive campus offers a wide array of student amenities including, but not limited to:

- A one-stop location for all administrative and transactional services;
- multiple gathering spaces for students to lounge and study;
- flexible, state-of-the-art classrooms and science labs;
- ample free parking;
- the CC Store; and
- the CC Bistro.

The overall Hood Business Park site will eventually become home to over 1.2 million square feet of development featuring residential, retail, and open spaces, as well as improved pedestrian connections to the adjacent communities.

The Hood Park campus is easily accessible, via public transit or automobile, from communities throughout Greater Boston and the surrounding areas. Our Boston campus is conveniently located in close proximity to downtown Charlestown and landmark development projects such as Assembly Row and the Schrafft Center. Cambridge College is excited to have its central campus situated in this dynamic community that is fast becoming a mecca for some of Boston's leading companies in finance, education, health care, technology and more.

Housing — Cambridge College does not require or provide dormitories and/or student housing, nor does it have responsibility to find or assist enrolled students in finding housing.

Library Services

www.cambridgecollege.edu/resources/library-services

The **Cambridge College Online Library** provides an extensive collection, reference librarian support, and instruction and resources for doing research in all programs. Registered students log in to the MyCC portal and click on the Library tab. For recommended academic and other research libraries close to your campus and open for public use, click Traditional Libraries on the Cambridge College Online Library home page and select your campus from the drop-down menu.

Academic Support and Learning Assessment

Cambridge College offers assessment and tutoring opportunities to assist students to achieve their academic goals. Assessment activities are available primarily to undergraduate students. All students can readily find information about assessment and make appointments with writing and math tutors through the Center for Excellence in Learning and Teaching.

Computer Lab and IT Support

The College supports wireless technology at the Cambridge main campus. The Information Technology Department maintains staff and student computer labs and help desk support through phone and e-mail contact.

Disability Support

The College provides disability support and education accommodations for students through the Office of Student Affairs. The facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.

Directions and Parking

See also cambridge.cambridgecollege.edu/contact-us/ma/driving-directions.

Public Transportation. Cambridge College is convenient to the MBTA Orange Line. It is a short walk from either the Community College or Sullivan Square stop where many connecting MBTA buses are available. See www.mbta.com for Orange Line, connecting buses and other subway schedules.

From the north, follow I-93S to Exit 28 towards Sullivan Square. Take the ramp on the left to Sullivan Square. Keep going straight on Maffa Way until you hit the Sullivan Square traffic circle. Take the first exit onto Rutherford Ave. In approximately 500 feet, the entrance to the campus will be located on the right, with parking available in both the North and South Lot.

From the south, follow I-93N to Exit 28. At the bottom of the ramp, take a right onto Cambridge Street. At the traffic circle, take the first exit onto Rutherford Ave. In approximately 500 feet, the entrance to the campus will be located on the right, with parking available in both the North and South Lot.

From the Mass Pike (I-90) take exit 18 (Allston-Cambridge), follow ramp directions to Cambridge. At the traffic light, go straight across the intersection and across the bridge over the Charles River. At the end of the bridge, take a right at traffic lights onto Memorial Drive and follow directions from Memorial Drive, below.

From Route 2 and Memorial Drive. Take Route 2 to Memorial Drive. Continue along the Charles River past Harvard University and MIT. Bear right as road curves over water and then to the left onto Land Blvd. At the light after the Sonesta Hotel, go straight ahead through the intersection across the Gilmore Bridge. At the end of the bridge, turn left onto New Rutherford Avenue, staying in the left lane, and at fork stay right going toward Sullivan Square/Somerville/Medford. Keep left and in about 1/3 of a mile, take u-turn onto other side of Rutherford Avenue. Hood Park/500 Rutherford Avenue will be immediately on the right.

From the northeast via Tobin Bridge. Take exit right toward I-93 N/Somerville Charlestown on the right. At stop light, take a left. Then, keep left. Continue straight, then take exit on right toward Sullivan Square/Somerville/Medford. Keep left and in about 1/3 of a mile, take u-turn onto other side of Rutherford Avenue. Hood Park/500 Rutherford Avenue will be immediately on the right.

Free parking for staff, faculty and registered students is available at the Boston campus. Limited visitor parking is also available for the Boston site and ample public parking is located within a five-minute walk.

Emergency/Weather Closing

Information related to Cambridge College closings or delays is available on:

1. **Website** at cambridgecollege.edu: Choose your CC location, and an advisory banner will appear across the top of the web page, if applicable.
2. The **MyCC web portal** homepage; click on ANNOUNCEMENTS.
3. **Television**
 - a) Boston main campus: TV channels 4, 5, 7, 10, 25, 56 and NECN.
 - b) Regional centers provide closing/delay information to their local media outlets, which usually post school closings on their websites.
4. **Social media:** Check our Facebook and Twitter pages.
5. **Email:** Please check your Cambridge College email for periodic updates and notifications.
6. **Text:** RAVE emergency alert system sends text message notifications to members of the Cambridge College community who have registered for text messaging. Registered students should enroll or check your information at <https://www.cambridgecollege.edu/rave-emergency-alert-update-your-information-through-mycc>.
7. If you do not have internet access, please call the College at 1.800.877.4723.

Regional Locations of Cambridge College

Cambridge College maintains regional locations in Massachusetts and across the United States offering undergraduate, graduate and post-graduate degrees and certificate programs.

- Cambridge College Lawrence — Lawrence, MA
- Cambridge College Springfield — Springfield, MA
- Cambridge College Puerto Rico — Guaynabo, PR
- Cambridge College Southern California — Rancho Cucamonga, CA

Cambridge College is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc). Additionally, Cambridge College has sought and received state approval to operate in the states in which the regional locations are located.

All College programs are evaluated for consistency and quality control throughout the main campus and regional locations by the Office of Academic Affairs and Deans of the Schools. Massachusetts educator licensure degree programs are approved by the Department of Elementary and Secondary Education, Malden, Massachusetts.

Please note that not all programs listed in the academic catalog are available at all regional locations. Each location offers programs and courses based on local enrollment and interest. We will offer additional programs based on student demand through a cohort model or contract arrangements with local organizations.

Oversight and Communications

The Provost/Vice President of Academic Affairs Office maintains oversight of the Cambridge College regional locations (sites). Regional site directors represent the College policies and procedures to students and local agencies and act as the local authority in the chain of communications. Administrative, academic and operations offices at the main campus engage with the regional Cambridge College offices for purposes of strategic planning, information sharing, and problem solving. Regional site directors and faculty are the first choices when students have information needs or concerns. The main campus offices collaborate with the regional offices in supporting the needs of our students throughout the nation.

Cambridge College Lawrence

280 Merrimack Street, 5th Floor, Lawrence, MA 01843 • 617-873-0484 • lawrence.cambridgecollege.edu

Cambridge College is recognized in Lawrence as a member and supporter of the community, serving to secure the economic prosperity of tomorrow's workforce by expanding access to quality, flexible and affordable higher education to the Lawrence community. The College equips students with the tools and resources that are critical to their success inside and outside of the classroom.

The College has been a local leader in adult education and symbol of access to quality education since 2003, serving Lawrence and communities throughout the Merrimack Valley. With academic programs chosen to enhance the career advancement of community members, the College is a model for higher education services supporting diverse student needs.

Location and Facilities

In September 2016 the Lawrence location moved to a larger space at 280 Merrimack Street, on the fifth floor of this newly renovated building. Located in the heart of the Riverwalk, the new campus offers students large modern classrooms, improved technology, student-focused amenities such as a spacious computer lab and a One Stop Resource center, ample complimentary parking, and easy access from major highways.

Articulation Agreements

Articulation agreements are partnerships between Cambridge College and community colleges that facilitate the easy transfer of credits from other institutions to Cambridge College. When students complete an associate's degree at an articulated college, they can transfer in all eligible credits earned when they enroll in a related degree program at Cambridge College.

Massachusetts

- Bunker Hill Community College
- Greenfield Community College
- Holyoke Community College
- Jewish Vocational School
- Mount Wachusett Community College
- Northern Essex Community College
- Quincy College
- Roxbury Community College

Library Services

www.cambridgecollege.edu/resources/library-services

The **Cambridge College Online Library**, often referred to as CCOL, is accessible to all registered students from any internet accessible device, from both on or off campus. Registered students use their credentials to log in to the MyCC portal and on the Library tab open the link labeled: Cambridge College Online Library to access the CCOL site. The online Library provides an extensive database collection offering academic and peer-reviewed journals, newspapers, EBooks and video databases. All materials are fully indexed and can be searched easily via the Ebsco Discovery Service (EDS) search box. The system offers tools to print, email, cite, store and share research

or store research materials. Live 24/7 reference librarian support is available via instant messaging; There are tutorials for advanced searching methods and specialized online guides offering instruction and resources for doing research in all programs. For students wishing to visit a traditional physical library, the Traditional Libraries tab offers a drop down menu pertaining to each physical campus with information on recommended libraries close to each campus and open for public use.

Academic Support

Academic support is available by appointment and strongly encouraged. Specialists can assist with the reading and understanding of texts and assignments. They can also help with planning, organizing, with study skills and with writing. Seeking out support earlier rather than later helps ensure academic success.

Computer Lab and IT Support

The College supports wireless technology on school grounds. A computer lab is available during the day and during classroom hours, with a computer technician to assist students. The College also makes available to all enrolled students an online IT Help Desk which supports students through email and phone contact.

Disability Support

Disability support and education accommodations are provided for students through the Office of Student Affairs. The local facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.

Directions and Parking

From the South: 495 North toward Lawrence. Take exit 44-45 for Merrimack Street. Turn right at Merrimack Street. The Riverwalk will be about 0.2 miles on the right.

Cambridge College Springfield

Tower Square—1500 Main Street, PO Box 15229, Springfield, MA 01115 • 413.747.0204 • springfield.cambridgecollege.edu

Cambridge College Springfield is located in the heart of downtown Springfield, convenient for students in western Massachusetts and Connecticut. Cambridge College Springfield has a long history of supplying higher education degree and certificate programs to meet the needs of Connecticut students. Known for our diverse education environment, experienced faculty, affordable programs and flexible scheduling, Cambridge College Springfield focuses on adult learners, and helps them to advance in a changing world.

Location and Facilities

The classrooms and offices have state-of-the-art technology. There are study areas, a student lounge and vending machines for student convenience. Restaurants, public transportation and parking are available nearby.

Articulation Agreements

Articulation agreements and partnerships facilitate the easy transfer of credits from other institutions to Cambridge College. When students complete an associate's degree at an articulated college, they can transfer in all eligible credits earned when they enroll in a related degree program at Cambridge College.

Library Services

www.cambridgecollege.edu/resources/library-services

The **Cambridge College Online Library**, often referred to as CCOL, is accessible to all registered students from any internet accessible device, from both on or off campus. Registered students use their credentials to log in to the MyCC portal and on the Library tab open the link labeled: Cambridge College Online Library to access the CCOL site. The online Library provides an extensive database collection offering academic and peer-reviewed journals, newspapers, EBooks and video databases. All materials are fully indexed and can be searched easily via the Ebsco Discovery Service (EDS) search box. The system offers tools to print, email, cite, store and share research or store research materials. Live 24/7 reference librarian support is available via instant messaging. There are tutorials for advanced

searching methods and specialized online guides offering instruction and resources for doing research in all programs. For students wishing to visit a traditional physical library, the Traditional Libraries tab offers a drop down menu pertaining to each physical campus with information on recommended libraries close to each campus and open for public use.

Academic Support

Writing Center — Tutorial services are offered on Tuesdays, Thursdays and Saturdays. Our writing tutor provides assistance to undergraduate and graduate students, with all aspects of the writing and research process. Students can get help with everything from starting a paper, to library research using the Cambridge College Online Library, to the final editing. Call x6610 for an appointment.

Computer Lab and IT Support

The College supports wireless technology within the facility. A computer lab is available during the day and classroom hours with a computer technician to assist students. The College also makes available to all enrolled students an online IT Help Desk which supports students through email and phone contact.

Disability Support

Disability support and education accommodations are provided for students through the Office of Student Affairs. The local facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.

Directions and Parking

From Mass Pike I-90 (East or West): Take Mass Pike to Exit 4 (South Springfield/Hartford) onto Rte. 91 South and follow directions below.

From the North: Take Rte. 91 South to Exit 7 (Columbus Ave Downtown Springfield.) Take first left onto Boland Way. Continue under 91, turn onto East Columbus Avenue, and immediately bear to the right up ramp into Tower Square parking garage.

From the South: Take Rte. 91 North to Exit 6 (Springfield Center) to East Columbus Avenue and continue into center lane. At the intersection of East Columbus and Boland Way stay in middle lane, then immediately after crossing intersection bear to the right up ramp into Tower Square parking garage.

From Interstate 291: Take Exit 2-B (Dwight Street), take a left onto Dwight Street, drive 0.4 miles then turn right on Bridge Street. After crossing Main Street, turn left into Tower Square parking garage.

Tower Square Parking Garage: Take ticket and go up to level A. Park near north elevators "To the Shops". Take ticket with you for validation (visitors) and take elevator to street level. Cambridge College will be on your left.

For assistance please call Cambridge College at 413.747.0204 x 6610.

Public Transportation: Cambridge College Springfield, now located downtown at Tower Square, is conveniently on many city bus routes. Also, the Peter Pan Bus terminal and Amtrak station are just a few short blocks from Tower Square. Route information and assistance:

- Pioneer Valley Transportation Authority — www.pvta.com • 413.781.7882.
- Peter Pan Bus Lines — www.peterpanbus.com • 800.434.9999

Cambridge College Southern California

Offices: 9469 Haven Avenue, Suite 210, Rancho Cucamonga, CA 91730 • 909.635.0250 • california.cambridgecollege.edu
Classrooms: Chaffey College, 5885 Haven Avenue, Rancho Cucamonga, CA 91730

Cambridge College Southern California, in Rancho Cucamonga has been serving the diverse population of professional working adults in Southern California since 2005. The College collaborates and partners with local community colleges, organizations and agencies to offer academic programs that meet the educational and professional growth needs of students and employees. Students have chosen to come to Cambridge College from as far away as Northern California and Nevada for its flexible schedule, affordable tuition and its exceptional learning experience.

Location and Facilities

The Cambridge College location is the Chaffey College campus, which provides technology-supported classrooms and learning environments, study areas, and a café for student convenience. Public eating places, bookstores and parking are available nearby.

Housing — Cambridge College is a commuter college and therefore does not have dormitories or offer student housing. The College has no responsibility to find or assist students in finding housing. There are apartment complexes within a few miles of the campus. As of June 2018, one-bedroom apartments in the area served by Cambridge College rent for an average of \$1,766/month.

Accreditation and Authorization

Regional Accreditation — Cambridge College is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc).

California — Cambridge College is a private institution, approved to operate by the California Bureau for Private Post-Secondary Education • P.O. Box 980818, West Sacramento, CA 95798-0818 • www.bppe.ca.gov • 916-431-6959 • 1-888-370-7589 • fax 916-263-1897.

Student Tuition Recovery Fund

The Student Tuition Recovery Fund (STRF) was established by the legislature to protect any California resident who attends a private postsecondary institution from losing money, from having prepaid tuition and suffered a financial loss as a result of the school closing, failing to live up to its enrollment agreement, or refusing to pay a court judgement. See *Tuition and Fees Rates* on page 17.

Compliance and Community Policies

General Policy and Compliance

College policies are located on the College website at www.cambridgecollege.edu/college-policies. Additional policy statements and compliance related matters may be located throughout this catalog under section headings that are more specific to the policy statement or compliance related matter. This section broadly captures a wide variety of policy statements and compliance related issues that do not explicitly belong in other sections of this catalog. For general policy or compliance related inquiries, please contact the Office of the General Counsel.

Children at the College

In order to protect the safety and security of your children, as well as the educational environment, children under the age of 18 are not allowed to accompany parents or guardians to class. Children may accompany their parents or guardians when visiting the College for non-academic reasons, for example: registering for classes, paying bills, etc. Children must never be left unattended by the parent or guardian on the College's property.

Please arrange childcare off-site during class time, tutoring, etc. Parents/guardians are responsible for childcare and supervision at all times. Cambridge College is not responsible for children unattended by the parent or guardian.

College Name

Cambridge College's name and marks are copyrighted. Any use of the name or marks without the College's written consent is prohibited. All external marketing materials must have the name and marks attached unless otherwise noted.

Liability

Cambridge College cannot be responsible for personal property in its buildings and rented facilities. Participants in Cambridge College programs, courses and activities do so at their own risk, and agree to waive and release any and all claims of personal injury or property damage against Cambridge College, its agents, faculty, or employees, that may arise from their participation in the College.

Office Equipment

Office equipment such as copying machines and fax machines, computers, and telephones are not accessible to students.

Personal Services

Cambridge College students are not permitted to offer personal services at any Cambridge College location at any time. (Services such as manicures, pedicures, massage and haircuts require a state license for public health reasons).

Photos

Occasionally, photos and videos are taken at College classes and events for public relations, marketing, and other purposes. Students who do not want their images taken or used in College publications are provided with the opportunity to opt out.

Service Animals and Pets

No pets of any kind are allowed on Cambridge College property. Service animals are permitted.

Smoking Policy

Massachusetts locations—In compliance with Massachusetts and city ordinances, Cambridge College is a smoke-free institution. All indoor smoking on campus and at all other classroom locations is prohibited, including in bathrooms and stairwells. Outdoor smoking is not permitted on College property. Smokers should move to public sidewalks.

Locations in other states—Smoking is permitted only as allowed by the state and local laws governing smoking in public places and on College campuses, and, for the summer institutes, by the policies of our host site.

Student Housing

Cambridge College is a commuter college; it has no dormitory facilities under its control. The College does not provide information about the availability or cost of housing near its campuses, and Cambridge College takes no responsibility to find or assist a student in finding housing.

Summer Institutes—To assist students in attending the brief on-site residency, Cambridge College may make arrangements with a nearby hotel to provide housing that may be billed to a student's account. Charges for housing (and meals if offered/selected) must be paid prior to the start of the term or arrangements made for financial aid with the charges being paid prior to the distribution of student refunds. Students must make their own assessment of whether the accommodations meet their personal standards for quality, access and safety.

Only currently enrolled students taking classes are eligible to request and obtain housing when offered.

Specific procedures and housing request forms are distributed before the start of each term for locations/programs where housing is offered. See full policy at www.cambridgecollege.edu/college-policies.

Security

Annual Campus Safety & Security Report (Clery)

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act was signed into law in November 1990. At the time it was known as the "Student Right to Know and Campus Security Act." It requires institutions participating in student financial aid programs under Title IV of the Higher Education Act of 1965 to disclose information about campus safety policies and procedures and to provide statistics concerning certain crimes that occurred on or near campus. In compliance with the Act, Cambridge College publishes and distributes this information in October of each year in an Annual Security Report and Crime Statistics Brochure. It is made available to current students and prospective students and employees, electronically and in print, and to College employees through the Office of Human Resources.

See current Clery Report at www.cambridgecollege.edu/business-operations/public-safety

Security Statement

Cambridge College strives to protect the rights, safety, health and welfare of everyone in the Cambridge College community. Compliance with all city, state, and federal laws is expected of all members of this learning community. Anyone who is victimized by, observes, or has knowledge of a criminal action should report it immediately: the College will investigate and take prompt, appropriate action. If the complaint is of a criminal nature, the local police department will be notified right away. In a medical emergency, the College will call an ambulance to take the person(s) concerned to the nearest emergency room (at their own expense if not covered by health insurance).

Any act or threat of violence, indecent assault, or conduct that may endanger any person on College property is prohibited. Where there is reasonable cause to believe that a member of the College community has violated College regulations, the College will review the incident and take appropriate actions as necessary.

Crime Prevention

Cambridge College is concerned about the welfare, security and safety of every individual at the College. However, maintaining a secure and safe campus environment can only be achieved through a cooperative effort of the entire College community. Community members are encouraged to use caution on our urban campuses. It is rare that criminal activity occurs on College property, nevertheless, safety measures are essential in any urban setting. Keep your personal property safe. Lock your car. Do not leave your purse, keys, laptop, or other valuables unattended.

Please see also related safety and security policies in this catalog and on the Cambridge College website:

- Drugs & Alcohol
- Firearms/Weapons
- Hazing
- Sexual Harassment
- Domestic Violence
- Sexual Assault
- Non-Discrimination & Harassment

Cambridge College students are adult learners. The College serves the commuting students and does not maintain campus residence halls. The College takes the necessary steps to ensure the safety of our community through our published policies, reporting activities, relationships with local police, publications, and timely communications.

Threat Assessment & Prevention

Cambridge College is dedicated to providing a safe environment for work and study. The Threat Assessment and Prevention initiative is committed to improving community safety through a proactive, collaborative, coordinated, objective and thoughtful approach to prevention, identification, assessment, intervention, and management of situations that pose, or may reasonably pose, a threat to the safety and well-being of the campus community.

Timeliness in reporting potential threats is of utmost importance. DIAL 911 if there is an emergency. If a threat is observed or suspected, please contact the following parties **IMMEDIATELY** so that appropriate action may be taken:

1. Regina Robinson, Dean of Student Affairs,
regina.robinson@cambridgecollege.edu, 617.873.0470
2. Security in your Cambridge College building (see list below).

Questions about threat assessment and prevention? Contact:

Regina Robinson, Dean of Student Affairs,
regina.robinson@cambridgecollege.edu, 617.873.0470

How to Report a Crime

The College strongly urges every member of the community—faculty, staff, and students—to report any crime promptly to the College security authorities and/or your local police department (911). Criminal actions may also be reported to any professional staff member who will then contact appropriate campus officers or local authorities. Victims of crimes are encouraged to report these matters to local police; Cambridge College may assist any student in reporting crimes, if desired.

Campus Sex Crimes Prevention

The federal Campus Sex Crimes Prevention Act requires colleges and universities to issue a statement advising the campus community where state law enforcement agency information concerning registered sex offenders may be obtained. The Act also mandates that sex offenders who are already required to register in a state to provide notice of each institution of higher education in that state at which the offender is employed or is a student. To learn the identity of registered sex offenders on or near a Cambridge College location, or anywhere in the United States, visit the Sex Offender databases at www.sexoffender.com and <http://nsopr.gov>. You can search by city, county, or zip code. This information is collected by other agencies and Cambridge College cannot guarantee this information is correct or complete. The information provided here is intended to be in compliance with the Campus Security Act and for campus safety purposes only. It should not be used to intimidate, threaten or harass. Misuse of this information may result in prosecution.

Title IX Sexual Misconduct Policy

See *Title IX - Sexual Misconduct Policy* on page 54.

Violence Against Women Act

See *Violence Against Women Act* on page 55.

Department Personnel & Relationship with Local Authorities

Building security maintains security staff at all Cambridge College locations. Members of the College community should also check with onsite College administration. Security staff do not carry firearms nor do they have police powers of arrest. However, the security companies and staff have effective working relationships with local police agencies who can provide these services to the campus in timely fashion, as needed.

Timely Warning

In the event that a situation arises, either on or off campus that, in the judgment of the Vice President for Finance and Administration, constitutes an ongoing or continuing threat, a campus-wide “timely warning” will be issued. The warning will be issued through the College email systems and RAVE text message notifications to students, faculty, and staff. Additionally, notifications will be posted on the MyCC homepage (no log-in required) and at strategic public locations within each of the appropriate buildings, as well as to media outlets if appropriate. See full policy at www.cambridgecollege.edu/college-policies.

Emergency Response, Evacuation & Egress

The College has developed procedures for response and notification in the event of an ongoing or continuing threat to the college community that may or may not include evacuation or closing a facility. Egress information is posted in all classrooms and office suites with general emergency procedures to follow. For more information consult with campus security authorities listed below.

Disaster Recovery Plan: Safeguarding Student Records

The College follows the Department of Higher Education’s procedures for notification as it relates to the closing or discontinuation of programs, and the New England Commission of Higher Education procedures outlined in its Considerations When Closing an Institution of Higher Education.

Cambridge College is also committed to following the Notice of Closure Guidelines for Massachusetts Independent Institutions in regards to safeguarding student records as put forward by the Massachusetts Department of Higher Education (DHE). The College has transitioned to a paperless work environment and full backups are performed every 24 hours. Backup tapes are routinely rotated or stored offsite at Iron Mountain along with past academic records. The College’s data servers are located at a telecommunications and data center facility in downtown Boston outfitted with 24/7 security. In the event of Cambridge College’s closure, these off-campus sites would securely maintain student records, and the College will work with NECHE and the DHE to ensure compliance with all requirements pertaining to the safeguarding of student records.

Alumni Association

As a graduate of Cambridge College, you join a network of nearly 40,000 alumni worldwide. The Cambridge College Alumni Association, along with the Alumni Council, strives to create relationships and opportunities with alumni, members of the college community, and outside companies and organizations that will benefit our alumni and current students.

We hope that you will consider joining the Alumni Council. Partnering with the Alumni Association, the Alumni Council provides leadership and guidance for the promotion and execution of events sponsored by the Association. In addition, the Council partners with the administration of the College to provide feedback for and from alumni, and provides representative voices for the alumni around the globe. The Council meets quarterly during the year. These meetings, which can be attended remotely via phone conferencing, last approximately 60-90 minutes.

Additionally, we hope you will take advantage of all the resources available to you as an alumni. An extensive list of exclusive Cambridge College Alumni benefits can be found on our website at www.cambridgecollege.edu/welcome-alumni-friends.

To learn more about the Alumni Association, volunteer opportunities, professional development programs, and upcoming events, please visit our website www.cambridgecollege.edu/welcome-alumni-friends or send an email to Alumni@CambridgeCollege.edu and we would be happy to answer any questions.

In addition, please make sure you follow us on our social media platforms: Instagram, Twitter, Facebook and LinkedIn.
